If the special schedule were not established, the funding of benefits in the better funded plan would be diluted if a termination occurred after the merger. Thus, the priority category 4 benefits from the lower funded plan, not funded before the merger, would draw assets away from the priority category 4 and 5 benefits of the better funded plan that were funded before the merger. Moreover, priority category 5 benefits from the lower funded plan would share in the allocation of assets with the priority category 5 benefits from the better funded plan, further drawing assets away from those benefits in the better funded plan that would have been satisfied if the merger had not occurred.

Because section 4044 of the Act is contained in Title IV of the Act, an allocation of assets using the special schedule is not permissible until PBGC amends the allocation regulation (29 CFR Part 2608).

Accordingly, PBGC proposes to amend its Allocation of Assets regulation by adding a new § 2608.13 which would (1) allow plans to establish a special schedule in accordance with the requirements of the IRS proposal and (2) provide for allocation of assets upon termination using the special schedule.

Paragraph (a) of proposed § 2608.13 allows establishment of the special schedule for allocation purposes, if the merger is allowable under section 208 of the Act. Paragraph (b) provides for allocation using the special schedule. Under paragraph (b), assets are to be allocated as if there were no special schedule up to the point in the allocation procedure where the IRS proposal requires that the special schedule be inserted. Assets are then allocated to benefits in accordance with the IRS rule requiring the special schedule. If the assets remaining are not sufficient to satify all benefits in the special schedule, assets are allocated to benefits within the special schedule in the order of the priorities for allocation within the special schedule established in the IRS proposal.

Finally, paragraph (c) of proposed § 2608.13 makes it clear that the special schedule is only used for allocation if the plan terminates during the period the special schedule is required under the IRS proposal to be in effect to satisfy the requirements of 414(l) of the Code.

DATA MAINTENANCE ALTERNATIVE

Under the IRS proposal, the special schedule need not be created upon the merger, if the merged plan maintains the data necessary to create the special schedule in the event the merged plan terminates. The necessary data will differ from case to case depending on the relative levels of funding, the benefit structure and the participant census of the merging plans.

Each person submitting comments should include his or her name and address, identify this notice and give reasons for any recommendations. The proposal may be changed in light of the comments received.

In consideration of the foregoing, the Pension Benefit Guaranty Corporation prcposes to amend Part 2608 of Chapter XXVI, Title 29, of the Code of Federal Regulations to add a new § 2608.13 to read as follows:

§ 2608.13 Special categories for mergers or consolidations.

(a) *Authority to use special schedule.* A plan may establish a special schedule of benefits within any of the priority categories for use in allocating assets upon plan termination, if the special schedule is required as a condition of a merger or consolidation of plans under rules, regulations, interpretations or opinions implementing section 414(l) of the Internal Revenue Code of 1954, as amended, and the merger or consolidation is allowable under section 208 of the Act (and any rules, regulations, interpretations or opinions implementing that section). The special schedule may contain only those benefits required to be placed in the special schedule by the rules, regulations, interpretations or opinions implementing section 414(l) of the Internal Revenue Code of 1954, as amended.

(b) *Allocation upon termination.* Upon termination of a plan, assets are allocated to benefits in accordance with §§ 2608.1 through 2608.12 up to the point in the priority categories where the special schedule has been inserted. Assets are then allocated to remaining benefits in accordance with the rule, regulation, interpretation or opinion requiring establishment of the special schedule.

(c) *Expiration of authority.* The authority to use a special schedule for allocating assets expires at the end of the period that the special schedule is required to be in effect to satisfy the rule, regulation, interpretation, or opinion requiring its establishment.

(Secs. 4002(b)(3), 4044, Pub. L. 93–406, 88 Stat. 1004, 1025–27 (29 U.S.C. 1302(b)(3), 1344 (Supp. V, 1975)).)

Issued on this 27th day of July 1977.

RAY MARSHALL,
Chairman, Board of Directors, Pension Benefit Guaranty Corporation.

Issued on the date set forth above pursuant to a resolution of the Board of Directors authorizing its Chairman to issue this Notice of Proposed Rulemaking.

HENRY ROSE.
Secretary, Board of Directors, Pension Benefit Guaranty Corporation.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 17]

ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Review of the Status of 10 Species of Amphibians

AGENCY: U.S. Fish and Wildlife Service.

ACTION: Review of the status of 10 species of amphibians.

SUMMARY: Notice is hereby given that the Department of the Interior has evidence on hand to warrant a review of the species of amphibians listed below to determine whether they should be proposed for listing as endangered or threatened species.

DATES: Information regarding the status of these species should be submitted on or before November 1, 1977, to the Director, U.S. Fish and Wildlife Service.

ADDRESSES: Comments on this Notice of Review should be submitted to the Director (FWS/OES), U.S. Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director—Federal Assistance, Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240; Phone 202–343–4646.

SUPPLEMENTARY INFORMATION: The species of amphibians for which this notice of review is issued are as follows:

Scientific name	Common name	Where found
Bufo lemur	Puerto Rican toad	Puerto Rico.
Bufo nelsoni	Amargosa toad	Nevada.
Hyla andersonii	Pine Barrens treefrog	New Jersey, North Carolina, South Carolina.
Rana onca	Vegas Valley leopard frog	Arizona, Nevada, Utah.
Necturus lewisi	Neuse River waterdog	North Carolina.
Eurycea nana	San Marcos salamander	Texas.
Eurycea troglodytes	Valdina Farms salamander	Do.
Plethodon larselli	Larch Mountain salamander	Oregon, Washington.
Plethodon stormi	Siskiyou Mountain salamander	California, Oregon.
Typhlomolge tridentifera	Honey Creek Cave blind salamander.	Texas.

The Department is seeking the views of the Governors of Arizona, California, Nevada, New Jersey, North Carolina, Oregon, Puerto Rico, South Carolina, Texas, Utah, and Washington where the species of amphibians occur. Other interested parties are hereby invited to submit any factual information, including publications and written reports, which is germane to this status review.

This notice of review was prepared by Dr. C. Kenneth Dodd, Jr., Office of Endangered Species.

Dated: July 26, 1977.

LYNN A. GREENWALT,
Director,
Fish and Wildlife Service.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food Safety and Quality Service

EXPERT PANEL ON NITRITES AND NITROSAMINES

Meeting and Agenda

Notice is hereby given of a meeting of the Expert Panel on Nitrites and Nitrosamines to be held in Room 28A, Administration Building, Department of Agriculture, 12th and Independence Avenue SW., Washington, D.C., August 17, 1977, at 9:30 a.m.

The meeting will consist of a discussion of the issues pertinent to preparation of a final report.

The meeting will be open to the public and under the direction of the Panel Chairperson or her designee. Written statements may be filed with the Panel before or after the meeting. Any member of the public who has further questions should contact the Issuance Coordination Staff, Technical Services, Food Safety and Quality Service, U.S. Department of Agriculture, Room 4905, South Agriculture Building, Washington, D.C. 20250, Area Code 202–447–6189. Any person who wishes to file a statement may send such statement to the Issuance Coordination Staff at the above address.

Done at Washington, D.C., on August 1, 1977.

ROBERT ANGELOTTI,
Administrator, Food Safety and Quality Service.

CIVIL AERONAUTICS BOARD

[Docket 29123; Agreement C.A.B. 26761; Agreement C.A.B. 26763; Order 77-7-113]

INTERNATIONAL AIR TRANSPORT ASSOCIATION

Agreements Related to Passenger Fare and Cargo Rate Matters; Order

Issued under delegated authority July 25, 1977.

Agreements have been filed with the Board pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations between various air carriers, foreign air carriers, and other carriers embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA). The agreements were adopted by mail vote and have been assigned the above-designated C.A.B. agreement numbers.

Agreement C.A.B. 26761 would amend Resolution 084e governing group inclusive-tour (GIT) fares between the United States and South America, by permitting combinations with similar GIT fares between the United States and the Far East. Agreement C.A.B. 26763 would amend Resolution 084f governing Mid Atlantic 10/28 day GIT fares, by lowering the minimum stay to 7 days with respect to tours to San Juan organized in conjunction with sea cruises.[1] Both agreements would liberalize the conditions applicable to existing discount-fare resolutions, and will be approved.

Pursuant to authority duly delegated by the Board in the Board's Regulations, 14 CFR 385.14, it is not found that the following resolutions, incorporated in the agreements indicated, are adverse to the public interest or in violation of the Act:

Agreement C.A.B.:	*IATA resolution*
26781	100 (Mail 146) 084e.
26763	JT12 (Mail 148) 084f.

Accordingly, It Is Ordered That:

Agreements C.A.B. 26761 and 26763 are approved.

Persons entitled to petition the Board for review of this order, pursuant to the Board's Regulations, 14 CFR 385.50, may file such petitions within ten days after the date of service of this order.

This order shall be effective and become the action of the Civil Aeronautics Board upon expiration of the above period, unless within such period a petition for review is filed or the Board gives notice that it will review this order on its own motion.

This order will be published in the FEDERAL REGISTER.

By James L. Deegan, Chief, Passenger and Cargo Rates Division, Bureau of Economics.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.77-22192 Filed 8-1-77;8:45 am]

[1] The new provision would not apply, however, on tours originating in the United Kingdom or Ireland.

COLUMBIA UNIVERSITY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77–00104. Applicant: Columbia University, 119th and Broadway, New York, N.Y. 10027. Article: Picosecond Streak Camera, Model 675 II and Channel Plate Intensifier 50/40. Manufacturer: Hadland Photonics Ltd., United Kingdom. Intended use of article: The article is intended to be used in investigations of ultrafast relaxation processes in excited state molecules. The experiments to be conducted will include exciting molecules of interest with a pico-second laser pulse and monitoring the time dependent changes in the molecules, due to energy relaxtion processes and molecular motions, by measuring with the article the changes in molecular absorption and emission on the picosecond time scale. The objectives of this research are to gain an understanding of the various decay processes by which molecules dissipate their energy as a function of the molecules' structure and interactions with surrounding molecules and applied fields. The article will also be used for educational purposes in the course Chemistry G9307x—Research for the Doctorate in which students carrying out research for the Ph. D., and post-doctoral fellows carrying out research for advanced training will learn how to use the instrument in carrying out their research.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (April 29, 1976).

Reasons: The foreign article provides a time resolution of better than two picoseconds (2 picoseconds). The National Bureau of Standards (NBS) advises in its memorandum dated June 22, 1977 that: (1) the capability of the article described above is pertinent to the applicant's intended purposes, and (2) it knows of no domestic instrument or apparatus which provided the pertinent feature at the time the foreign article was ordered. The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the foreign article was ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-free Educational and Scientific Materials.)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

[FR Doc.77–22136 Filed 8–1–77;8:45 am]

METHODIST HOSPITAL OF INDIANA, INC., ET AL.

Consolidated Decision on Applications for Duty-Free Entry of Scientific Articles

The following is a consolidated decision on applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897), and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to each of the applications in this consolidated decision is available for public review during ordinary business hours of the Department of Commerce, at the Special Import Programs Division, Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Decision: Applications denied. Applicants have failed to establish that instruments or apparatus of equivalent scientific value to the foreign articles, for such purposes as the foreign articles are intended to be used, are not being manufactured in the United States.

Reasons: Subsection 301.8 of the Regulations provides in pertinent part:

> The applicant shall on or before the 20th day following the date of such notice, inform the Deputy Assistant Secretary whether it intends to resubmit another application for the same article for the same intended purposes to which the denied application relates. The applicant shall then resubmit the new application on or before the 90th day following the date of the notice of denial without prejudice to resubmission, unless an extension of time is granted by the Deputy Assistant Secretary in writing prior to the expiration of the 90 day period. * * * If the applicant fails, within the applicable time periods specified above, to either (a) inform the Deputy Assistant Secretary whether it intends to resubmit another application for the same article to which the denial without prejudice to resubmission relates, or (b) resubmit the new application, the prior denial without prejudice to resubmission shall have the effect of a final decision by the Deputy Assistant Secretary on the application within the context of Subsection 301.11

The meaning of the subsection is that should an applicant either fail to notify the Deputy Assistant Secretary of its intent to resubmit another application for the same article to which the denial without prejudice relates within the 20 day period, or fails to resubmit a new application within the 90 day period, the prior denial without prejudice to resubmission will have the effect of a final denial of the application.

None of the applicants to which this consolidated decision relates has satisfied the requirements set forth above, therefore, the prior denials without prejudice have the effect of a final decision denying their respective applications.

Subsection 301.8 further provides:

> * * * the Deputy Assistant Secretary shall transmit a summary of the prior denial without prejudice to resubmission, to the FEDERAL REGISTER for publication, to the Commissioner of Customs, and to the applicant.

Each of the prior denials without prejudice to resubmission to which this consolidated decision relates was based on the failure of the respective applicants to submit the required documentation, including a completely executed application form, in sufficient detail to allow the issue of "scientific equivalency" to be determined by the Deputy Assistant Secretary.

Docket Number: 76–00548. Applicant: Methodist Hospital of Indiana, Inc., 1604 North Capitol Avenue, Indianapolis, Ind. 46202. Article: Electron Microscope, Model EM 201C and attachments. Date of denial without prejudice to resubmission: March 8, 1977.

Docket Number: 77–00013. Applicant: Smithsonian Institution, Washington, D.C. 20560. Article: Scanning Electron Microscope, Novascan 30 and accessories. Date of denial without prejudice to resubmission: March 8, 1977.

Docket Number: 77–00016. Applicant: Yale University, Department of Chemistry, 225 Prospect Street, New Haven, Conn. 06520.

Article: Computer Controlled Kappa-Axis 4-circle Single Crystal Diffractometer, Model CAD–4 (less disc). Date of denial without prejudice to resubmission: February 1, 1977.

Docket Number: 77–00044. Applicant: UCLA/Geophysics & Space Physics, 405 Hilgard Avenue, Los Angeles, Calif. 90024. Article: Recording/Portable Proton Magnetometer, Model MP–2. Date of denial without prejudice to resubmission: February 25, 1977.

NATIONAL RADIO ASTRONOMY OBSERVATORY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77–00103. Applicant: National Radio Astronomy Observatory Associated Universities, Inc., Suite 100, 2010 N. Forbes Blvd., Tucson, Ariz. 85705. Article: Klystron, Model VRT–2124B and accessories. Manufacturer: Varian Associates of Canada Ltd., Canada. Intended use of article: The article is intended to be used as a phase-locked local oscillator in a millimeter wave radio astronomy receiver. This receiver is used in conjunction with a microwave antenna to measure the intensity, polarization, frequency, and direction of cosmic radiation.

Comments: No comments have been received with respect to this application.

Decision: Application approved. No instrument or aparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States.

Reasons: The foreign article provides a 160–168 gigahertz frequency range with 25 millivolts guaranteed minimum output power. The National Bureau of Standards (NBS) advises in its memorandum dated June 20, 1977, that: (1) the capability of the article described above is pertinent to the applicant's research purposes, and (2) it knows of no domestic instrument of equivalent scientific value to the foreign article for the applicant's intended use. The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

NORTHWESTERN UNIVERSITY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review or during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77–00125. Applicant: Northwestern University, 619 Clark Street, Evanston, Ill. 60201. Article: Interface Basic System, Model 502, PDP–11 UNIBUS Compatible, 60 Hz, 110V Power and accessories. Manufacturer: Cambridge Electronic Design Ltd., United Kingdom. Intended use of article: The article is intended to be used in conjunction with a PDP–11 computer and other laboratory equipment to investigate the response properties of single ganglion cells in the cat retina. In the experiments to be conducted, the electrical activity of a single ganglion cell is recorded with a microelectrode. This data is transmitted through the laboratory computer interface to the computer where it is analyzed. In addition, the important parameters of the visual stimulus

are determined by the computer and transmitted through the laboratory computer interface to a visual stimulus display. Most of the experimental work described above will be done by graduate students as part of their dissertation work and by post-doctoral fellows.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (April 16, 1976). Reasons: The foreign article provides the capability to use existing programs and to be optimized for specific programs. Domestic manufacturers stated that they were able to match the article at the time of order but, due to the paucity of customers performing the applicant's type of research, were unwilling to do so. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated May 24, 1977 that the capability described above is pertinent to the applicant's intended use. HEW also advises that it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended purposes.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time of order.

RUTGERS—THE STATE UNIVERSITY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00181. Applicant: Rutgers—The State University, Psychology Building, Busch Campus, Piscataway, New Jersey 08854. Article: Bat Detector (Ultrasonic Receiver). Manufacturer: Holgate's of Totten, United Kingdom. Intended use of article: The article will be used for studies of the role that various pup stimuli have in stimulating the onset and maintenance of maternal behavior in the rats. The changes in ultrasound production postpartum and the effects of various situations on it will be investigated. Some of the situations to be investigated include: maternal deprivation, temperature changes, nutritional deprivation, tactile stimulation, and odors from bedding or adult rats. Both the total number of ultrasonic detections and the frequencies at which the sounds are emitted will be studied.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides reception by converting ultrasonic vibrations into audible signals over a continuously variable range of 10 to 180 kilocycles per second and portability. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated June 24, 1977 that the features described above are pertinent to the applicant's intended use. HEW also advises that it knows of no domestic instrument of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

ST. FRANCIS HOSPITAL ET AL.

Consolidated Decision on Applications for Duty Free Entry of Electron Microscopes; Correction

The Notice of Consolidated Decision on Applications for Duty-Free Entry of Electron Microscopes appearing at page 35666 in the FEDERAL REGISTER of Monday, July 11, 1977 is hereby amended to include phrase inadvertently omitted in second sentence under Reasons:

Notice should read:

Docket Number: 77-00164. Applicant: St. Francis Hospital, 929 North St. Francis Avenue, Wichita, Kansas 67214. Article: Electron Microscope, Model EM 10A and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used in the areas of renal biopsies, liver biopsies and tumor pathology. A definitive diagnosis of kidney diseases based on the findings of electron microscopic studies will help determine the modality of treatment for the patients. The projected experiment to be conducted will be in the field of virology, particularly the clinical study of viral hepatitis. Application received by Commissioner of Customs: March 18, 1977. Advice submitted by the Department of Health, Education, and Welfare on: June 8, 1977. Article ordered: December 30, 1976.

Docket Number: 77-00171. Applicant: Robert B. Brigham Hospital, 125 Park Hill Avenue, Boston, Massachusetts 02120. Article: Electron Microscope, Model JEM-100C with side entry goniometer and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used in a wide variety of research projectors which will include the following: (1) High resolution transmission microscopy of plasma membranes of various cells to determine the relationships between a phagocytic cell and a target, e.g., macrophage attacking a tumor cell, and eosinophil attacking a schistosomula, (2) Studies of the fusion of liposomes with macrophages. (3) Examination of membranes of white blood cells by negative staining to discern any membrane order such as occurs in viral and some bacterial membranes. (4) Scanning microscopy of cell surfaces to determine whether peptides or proteins which alter the movement and behavior of cells act by entering the cell or on its surface. Application received by Commissioner of Customs: March 16, 1977. Advice submitted by the Department of Health, Education, and Welfare on: June 8, 1977. Article ordered: January 11, 1977.

Comments: No comments have been received in regard to any of the foregoing applications. Decision: Applications approved. No instrument or apparatus of equivalent scientific value to the foreign articles, for the purposes for which the articles are intended to be used, was being manufactured in the United States at the time the articles were ordered. Reasons: Each foreign article has a specified resolving capability equal to or better than 3.5 Angstroms. The Department of Health, Education, and Welfare advises in the respectively cited memoranda, that the additional resolving capability of the foreign articles is pertinent to the purposes for which each of the foreign articles to which the foregoing applications relate is intended to be used. HEW advises that it knows of no domestic instrument which could provide the pertinent feature at the time the articles were ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to any of the foreign articles to which the foregoing applications relate, for such purposes as these articles are intended to be used, which was being manufactured in the United States at the time the articles were ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials.)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

STATE UNIVERSITY OF NEW YORK AT SYRACUSE

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00169. Applicant: State University of New York—Upstate Medical Center, 155 Elizabeth Blackwell St., Syracuse, New York 13210. Article: Multiple Inoculator: Repliscan Processor and accessories. Manufacturer: KVL Laboratories, Canada. Intended use of article: The article is intended to be used for the study of gram negative bacilli, gram positive cocci, their identification and biochemical characteristics. Specifically, the system incorporates inoculation of pure test cultures on appropriate agar base media by means of a multiple inoculator thereby achieving simultaneous inoculation of a large number of test organisms on a wide range of agar base products.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides the capability for testing and identifying 36 organisms at a time on a wide range of agar base products using programmed information. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated June 8, 1977 that (1) the capability described above is pertinent to the applicant's intended use and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended purposes.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

TEXAS A&M UNIVERSITY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00139. Applicant: Texas A&M University, Oilseed Products, College Station, Texas 77843. Article: Automatic Nitrogen Analyzer. Manufacturer: Foss America, Inc., Denmark. Intended use of article: The article is intended to be used in research in which protein extracts from soybean, peanut and glandless cottonseed flours will be membrane processed using industrial semi-permeable membranes to fractionate the constituents of the liquid extracts into a high protein product and a secondary product composed of sugars and salts, and small molecular-sized compounds. The investigators will be conducted to explore and demonstrate the feasibility of recovering the solubilized protein by ultrafiltering it from the liquid extracts instead of separating it from non-protein constituents by conventional acid precipitation methods. Specifically, the article will be used to assay samples of liquid extract going into ultrafiltration membranes and samples of UF permeates coming from the UF membranes. It will likewise be used to monitor nitrogen contents of samples to and from the second stage of membrane processing where reverse osmosis (RO) membranes are employed. The article will also be used by graduate students, cooperative education students and project technicians for assaying samples pertaining to the research and other research projects when not in use for the purposes as stated.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (December 22, 1976). Reasons: The foreign article provides rapid and automatic analysis by the Kjehdahl nitrogen method (i.e., first run complete in 12 minutes and, in continuous use, results at 3 minute intervals). The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated May 24, 1977 that the features described above are pertinent to the applicant's intended use. HEW also advises it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended purposes.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

UNIVERSITY OF ALASKA

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00092. Applicant: University of Alaska, Institute of Arctic Biology, Fairbanks, Alaska 99701. Article: 2 Cassette temperature recorders and cassette playback units. Manufacturer: Grant Instruments Inc., United Kingdom. Intended use of article: The article is intended to be used for the study of the effect of disturbance upon soil temperature regime; comparison of soil temperature regime between temperature alpine and subalpine sites and between arctic alpine and subalpine sites, and documentation of soil temperature regime within a cottongrass tussock. The article will also be used in the course Physiological Ecology which involves the examination of physiological adaptations of plants and animals to their environment. The objective of the laboratory portion of the course is to teach students to document important aspects of the environment (Such as temperature) and to examine the responses of organisms to those factors.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (May 5, 1976). Reasons: The foreign article provides (1) a self-contained power supply with a battery life of at least 30 days, (2) multiple channel (10-20) simultaneous recording, (3) magnetic tape data acquisition, (4) play back-data transfer and (5) a weather proof case. The National Bureau of Standards (NBS) advises in its memorandum dated June 14, 1977 that the features of the article described above are pertinent to the applicant's intended uses. NBS also advises that it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article which was available at the time the foreign article was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

UNIVERSITY OF CALIFORNIA—LIVERMORE

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00079. Applicant: University of California—Lawrence Livermore Laboratory, 7000 East Avenue, Livermore, California 94550. Article: Faraday Rotators. Manufacturer: Hoya Corp., Japan. Intended use of article: The article is intended to be used to demonstrate the feasibility of the generation of usable power in a controlled thermonuclear fusion reaction. The phenomena to be investigated is the feasibility of producing a thermonuclear microexplosion using a uniquely high intensity laser pulse. Experiments will be conducted using the Shiva-20 arm laser system to obtain isentropic compression of deuterium-tritium targets to greater than 10,000 times liquid density, thereby producing for the first time thermonuclear reaction of as many as 10^{11} neutrons per microexplosion.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article is provided with a verdet constant of 0.070 which is required to insure minimal scattering of the laser beam. The National Bureau of Standards (NBS) advises in its memorandum dated June 6, 1977 that (1) the capability described above is pertinent to the applicant's intended use and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended purposes.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

UNIVERSITY OF CALIFORNIA—SANTA CRUZ

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00123. Applicant: University of California, Purchasing Department, 1156 High Street, Santa Cruz, CA 95064. Article: Two (2) Righthand and Two (2) Lefthand Micromanipulators, Model SM-20; and SM-19 Electrode Carriers. Manufacturer: Narishige Scientific Instrument Lab., Japan. Intended use of article: The articles are intended to be used for studies of the neural mechanisms of choice (and learning) in *Pleurobranchaea Californica*. Intracellular recordings will be made from cells in both the cerebral and buccal ganglia, with the aim of determining the mechanism of choice in *Pleurobranchaea*. This goal will be pursued utilizing the dominance of feeding over local withdrawal behavior; first, the point in the local withdrawal circuit upon which the feeding circuit responsible will be determined; lastly, the precise nature of the interaction will be studied.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides digital "Z" axis readout, 0.1 micron calibration, and an electrode carrier which permits repeated precise placing of very small electrodes. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated May 23, 1977 that the capabilities of the article described above are pertinent to the applicant's intended uses. HEW also advises that it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for such purposes as the article is intended to be used.

The Department of Commerce knows of no other instrument or appartuus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

Application for Duty-Free Entry of Scientific Articles; Correction

In the Notice of Application for Duty-Free Entry of Scientific Articles appearing at page 12539 in the FEDERAL REGISTER of Wednesday, March 19, 1975, the following amendment is hereby made to reflect more fully the intended use of the article:

Docket Number: 75-00392-00-66700. Applicant: Jacksonville Children's Museum, 1025 Gulf Life Drive, Jacksonville, Fla. 32207. Article: Planetarium Projector, MS-10. Manufacturer: Minolta Camera Co. Ltd., Japan. Intended use of article: The article is intended to be used to demonstrate astronomical phenomena and to allow student participation and involvement in the following courses:

Celestial Navigation.
Principles of Stellar Photography.
General Astronomy.
Concepts in Contemporary Astronomy.
General and Practical Astronomy.
Concepts in Science, Grades 3 through 12.
Our Galaxy and the Universe.
Astronomy Workshops for Teachers.

Application received by Commissioner of Customs: February 25, 1975.

UNIVERSITY OF OREGON

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00107. Applicant: University of Oregon, Department of Biology, Eugene, Oregon 97403. Article: Computer Compatible Multi-Purpose Event Recorder. Manufacturer: Ursula Heinecke, West Germany. Intended use of article: The article is intended to be used in research related to the detailed interaction between an animal and its environment, particularly the aspects of such interaction which are important for survival of the animal species. The article allows the observer to observe an animal and at the same time unobtrusively records exactly what the animal is doing, and the time spent doing it. In addition, the article is intended to be used for educational purposes in the courses Animal Behavior, and the Animal Behavior Laboratory which are classes for juniors, seniors and graduate students.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides operation in one of four modes and permits 256 different events to be recorded. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated June 8, 1977 that (1) the features described above are pertinent to the applicant's intended uses and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended purposes.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

WASHINGTON UNIVERSITY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00124. Applicant: Washington University, Biochemistry Dept., 660 South Euclid Ave., St. Louis, Missouri 63110. Article: Bacterial Cell Homogenizer. Manufacturer: Edmund Buhler, West Germany. Intended use of article: The article will be used to break bacteria for studies involving the mechanism of action of antibiotics in cell wall synthesis.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. Reasons: The foreign article provides the capability for processing large quantities of bacteria by using the vibration of steel or glass balls in the cell suspension at about 70 Hertz. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated May 24, 1977 that the capability described above is pertinent to the purposes for which the article is to be used. HEW also advises that it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for such purposes as this article is intended to be used.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article for such purposes as this article is intended to be used, which is being manufactured in the United States.

YALE UNIVERSITY

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 77-00128. Applicant: Yale University, Dept. of Internal Medicine, 333 Cedar Street, New Haven, CT 06510. Article: Reichert type Univar Microscope, Manual analyzer and Grand microtome. Manufacturer: Les Instruments Scientifiques & Industriels, France. Intended use of article: The article is intended to be used for preparation and morphometric analysis of sections of undecalcified bone. Experiments will be conducted to determine the effects of parathyroid hormone and calcitonin on the migration of cells into bone and the changes in the structure of these bone cells. The article will be used by faculty and students working on this research problem.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (January 3, 1977). Reasons: The foreign article incorporates a massive and rigid microtome capable of cutting undecalcified bone with a microscope and analytical system for quantitative morphometric analysis. The Department of Health, Education, and Welfare advises in its memorandum dated May 24, 1977 that the capabilities of the article described above are pertinent to the applicant's intended use. HEW also advises that it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended purposes.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

National Oceanic and Atmospheric Administration

SQUID FISHERIES OF THE NORTHWESTERN ATLANTIC

Revision to Preliminary Fishery Management Plan

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Revision to Preliminary Fishery Management Plan.

SUMMARY: This document revises "Squid Fisheries of the Northwestern Atlantic", a preliminary fishery management plan, published on February 16, 1977. The plan proposed conservation and management measures for squid pursuant to the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265). The action revises the amount of squid allocated to foreign squid fisheries in the northwestern Atlantic.

DATE: Effective date: August 1, 1977.

ADDRESS: Comments should be addressed to: Director, National Marine Fisheries Service, Washington, D.C. 20235.

FOR FURTHER INFORMATION CONTACT:

William G. Gordon, Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Gloucester, Massachusetts 01930, 617-281-3600.

SUPPLEMENTARY INFORMATION:

BACKGROUND

On February 16, 1977, a preliminary fishery management plan entitled "Squid Fisheries of the Northwestern Atlantic" (42 FR 9596) was issued by the Secretary of Commerce to provide proposed conservation and management measures for foreign squid fisheries in the Northwest Atlantic pursuant to sec. 201(g) of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) (hereinafter the "Act"). The plan provided, among other things, for a preliminary determination of optimum yield as follows:

Short-finned squid (*Illex*)—35,000 tons.[1]
Long-finned squid (*Loligo*)—44,000 tons.

Based upon the stimated domestic production potential, an allocation of 23,500 tons (*Illex*) and 19,000 tons (*Loligo*) was made available to the foreign fishery during 1977. Since the domestic squid fishery and squid markets were small, it was stated in the plan that the U.S. capacity would be reconsidered in June, 1977, based upon the actual catches of squid by U.S. fishermen up to that date.

PURPOSE

An evaluation of U.S. catches of squid from the northwest Atlantic during the period March-June, 1977, indicates that that domestic harvest has been about 400 tons of *Illex* and *Loligo*.

Based on U.S. catches to date and consultations with the concerned domestic industry, it is believed that the estimated 1977 domestic production level of 36,500 tons will not be fully utilized during 1977. Therefore, the foreign surplus is revised and increased by the following amounts: *Illex*—1,500 tons, and *Loligo*—11,000 tons. The domestic production level is decreased by equivalent amounts.

IMPACT

The Final Environmental Impact Statement/Preliminary Fishery Management Plan (January, 1977) indicated the implementation of the plan, i.e., harvest of the optimum yield, should induce no significant adverse impact upon the environment. It has been determined by NOAA that this action will have no significant adverse impact because the increased foreign allocation of 12,500 tons of squid is within the optimum yield of 79,000 tons. The increase could, however, discourage growth of U.S. squid processing capacity. Our analysis indicates that the harvesting sector of the industry has not yet developed the capacity to catch the initial domestic allocation during the remainder of 1977. This action could delay development of foreign markets since an increased harvest by foreign countries could decrease their level of imports of squid from the United States. However, the demand by foreign markets for squid is well beyond the amounts available to their fisheries. It is anticipated that this increase will not discourage foreign market development by U.S. interests. The additional amount of squid to be made available for foreign fishing is a result of U.S. industry choice to pursue alternative fisheries. Therefore, no adverse impact is anticipated upon employment within the domestic industry.

NEED FOR EFFECTIVE DATE

The Secretary believes that formal notice of proposed rulemaking is impracticable, unnecessary, and contrary to the public interest because the proposed revision to the preliminary management plan must be effected before the termination of this year's squid fisheries season and will have negligible effect upon U.S. fishing interests. The proposed revision becomes effective on August 1, 1977.

TABLE 26.—*Squid optimum yield and allocations*

Species	Maximum sustainable yield (tons)	Optimum yield (tons)	U.S. capacity (tons)	Foreign surplus (tons)
Illex	40,000	35,000	10,000	25,000
Loligo	44,000	44,000	14,000	30,000
Total	84,000	79,000	24,000	55,000

As was stated previously, the squid fishery and squid markets in the USA are extremely small. On the other hand, foreign fisheries and markets have been quite significant, and this fishery could be quite promising in terms of the European export potential. Before these potential markets can be exploited to any signficant extent, however, major obstacles will have to be resolved by the U.S. fishing industry in terms of harvesting, storage, processing, and marketing. Some industry spokesmen felt these problems could be addressed this year and requested the level of 36,500 tons as determined in the Preliminary Fishery Management Plan published February 16, 1977, to assist development efforts. However, current production projections are far short of this level. The revised 1977 U.S. capacity figure of 24,000 tons provides opportunities for the orderly development of the U.S. industry while providing for increased utilization of available squid within a conservation framework designed to prevent overfishing.

[FR Doc.77-22086 Filed 8-1-77;8:45 am]

[1] Tons refers to metric tons (2205 pounds).

MARINE MAMMAL SCIENTIFIC RESEARCH PERMIT

Receipt of Amended Application

On June 21, 1977, notice was published in the FEDERAL REGISTER (42 FR 31480) that the Ocean Research and Education Society Inc., 51 Commercial Wharf 6, Boston, Mass. 02110, had applied for a scientific research permit under the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407); and the Endangered Species Act of 1973 (16 U.S.C. 1531-1543).

Notice is hereby given that the Applicant has amended the original application in the following manner: Phase One of the study will commence in October 1977 and continue through 1978, and will include the radio tracking of 25 humpback whales along their migratory path; Phase Two of the study will commence in the fall of 1978 and include radio tag tracking studies of the other species listed in the original application.

The amended application for the Marine Mammal Protection Act Permits will be considered under the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216). The amended application for the Endangered Species Act Permit will be considered under the regulations governing endangered fish and wildlife permits (50 CFR Parts 217-222).

Documents submitted in connection with the applications are available in the following offices:

Director, National Marine Fisheries Service, Department of Commerce, 3300 Whitehaven Street, NW., Washington, D.C.;
Regional Director, National Marine Fisheries Service, Northeast Region, 14 Elm Street, Gloucester, Mass. 01930;
Regional Director, National Marine Fisheries Service, Southeast Region, Duval Building, 9450 Gandy Boulevard, St., Petersburg, Fla. 33702;
Regional Director, National Marine Fisheries Service, Northwest Region, 1700 Westlake Avenue, North, Seattle, Wash. 98109; and
Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, Calif. 90731.

Concurrent with the publication of this notice in the FEDERAL REGISTER, the Secretary of Commerce is sending copies of the amended application for the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or request for a public hearing on this application should be submitted to the Director, National Marine Fisheries Service, Washington, D.C. 20235, on or before September 1, 1977. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Director.

All statements and opinions contained in this notice in support of this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Dated: July 25, 1977.

ROBERT J. AYERS,
Acting Assistant Director for Fisheries Management, National Marine Fisheries Service.

PRELIMINARY FISHERY MANAGEMENT PLANS

Amending and Supplementing Environmental Impact Statements

In accordance with the provisions of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), amendments to Preliminary Fishery Management Plans will be forthcoming shortly (on/or about August 5, 1977). Supplemental Environmental Impact Statements or negative declarations will be prepared as necessary for each plan amended. It is anticipated the following Preliminary Fishery Management Plans, approved by the Secretary of Commerce, will be amended:

Plan title	*Date of issue*
Trawl Fishery Gulf of Alaska	Feb. 11, 1977.
Atlantic Herring Fishery of the Northwestern Atlantic.	Feb. 22, 1977.
Hake Fisheries of the Northwestern Atlantic.	Feb. 18, 1977.
Foreign Trawl Fisheries of Northwestern Atlantic.	Feb. 17, 1977.
Sablefish Fishery of the Eastern Bering Sea and Northeastern Pacific.	Feb. 10, 1977.
Seamount Groundfish Fishery of the Pacific.	do.
Trawl Fisheries of Washington, Oregon, and California.	do.
Trawl Fisheries and Herring Gillnet Fishery of Eastern Bering Sea and Northeastern Pacific.	Feb. 15, 1977.
Snail Fishery of the Eastern Bearing Sea.	Feb. 15, 1977.
Eastern Bering Sea (King and Tanner Crab).	Feb. 16, 1977.
Mackerel Fishery of Northwestern Atlantic.	Do.
Squid Fisheries of the Northwestern Atlantic.	Do.

Copies of this notice will be mailed to persons who have commented on the Final Environmental Impact Statements/Preliminary Fishery Management Plans and other interested parties that are potentially affected by the proposed changes to the plans.

Individuals or organizations wishing to obtain additional information on the intent to amend the preliminary plans may do so by writing the Director, National Marine Fisheries Service, Washington, D.C. 20235.

Signed this 28th of July, 1977, at Washington, D.C.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

PRE-ACT ENDANGERED SPECIES PRODUCTS

Issuance of Certificates of Exemption

On June 2, 1977, notice was published in the FEDERAL REGISTER (42 FR 28182) that applications had been filed with the National Marine Fisheries Service by Phillip's Gift Center, Inc., of Provincetown, Mass., and Jerry Howard Williamson of Pensacola, Fla., for Certificates of Exemption to engage in certain commercial activities with respect to their declared inventories of pre-Act endangered species products. Notices that H. Krupp, d.b.a. Oceanic Trading Company of Seattle, Wash., and Irving F. Briggs, d.b.a. Cape Cod Labidary of Hyannis, Mass., had also filed applications for such Certificates of Exemption, were published in the FEDERAL REGISTER on June 7, 1977 (42 FR 29034) and June 14, 1977 (42 FR 30422) respectively.

Notice is hereby given that on July 25, 1977, as authorized by the provisions of the Endangered Species Act of 1973, as amended (Pub. L. 94-359), and the regulations issued thereunder (50 CFR Part 222, Subpart B), the National Marine Fisheries Service issued Certificates of Exemption to Phillip's Gift Center, Inc., a/k/a Scrimshaw Handcrafts, 230 Commercial Street, Provincetown, Mass. 02657; Jerry Howard Williamson, 112 Southern Street, Pensacola, Fla. 32503; H. Krupp, d.b.a. Oceanic Trading Co., 84 University Street, Seattle, Wash. 98101 and Irving F. Briggs, d.b.a. Cape Cod Labidary, 4 Circle Drive, Hyannis, Mass. 02601.

The Certificates of Exemption are available for review during normal business hours in the Office of the Enforcement Division, National Marine Fisheries Service, 3300 Whitehaven Street NW., Washington, D.C. 20007.

Dated: July 27, 1977.

WINFRED H. MEIBOHM,
Associate Director, National Marine Fisheries Service.

[FR Doc.77-22189 Filed 8-1-77;8:45 am]

PRE-ACT ENDANGERED SPECIES PRODUCTS

Notice of Receipt of Application for Certificate of Exemption

Notice is hereby given that the following applicant has applied in due form for a Certificate of Exemption under Pub. L. 94-359, and the regulations issued thereunder (50 CFR Part 222, Subpart B), to engage in certain commercial activities with respect to pre-Act endangered species parts or products.

APPLICANT

R. Robert Rayno, 735 Main Road, Westport, Mass. 02790.

PERIOD OF EXEMPTION

The applicant requests that the period of time to be covered by the Certificate of Exemption begin on the date of the original issuance of the Certificate of Exemption and be effective for a 3-year period.

COMMERCIAL ACTIVITIES EXEMPTED

(i) The prohibitions, as set forth in section 9(a)(1)(E) of the Act, to deliver, receive, carry, transport, or ship in interstate or foreign commerce, by any means whatsoever and in the course of commercial activity any such species part;

(ii) The prohibitions, as set forth in section 9(a)(1)(F) of the Act, to sell or offer for sale in interstate or foreign commerce any such species part.

PARTS OR PRODUCTS EXEMPTED

Approximately 170 finished scrimshaw jewelry items and finished scrimshaw products to be made from approximately 218 pounds of whole sperm whale teeth, 97 pounds of scraps of sperm whale teeth and 33 pounds of cross-cuts from sperm whale teeth.

Written comments on this application may be submitted to the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235 on or before September 1, 1977.

Dated: July 24, 1977.

ROBERT J. AYERS,
Acting Assistant Director for Fisheries Management.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

AMENDING U.S./POLAND COTTON TEXTILE AGREEMENT

JULY 29, 1977.

AGENCY: Committee for the Implementation of Textile Agreements.

ACTION: (1) Combining the levels of restraint for certain T-shirts, sweatshirts and knit tops in Categories 42, 43, and part of 62 for the year which began on January 1, 1977.

(2) Adjusting the designated annual consultation levels for Categories 36 (bedspreads and quilts), 41 (men's and boys' white T-shirts), 42/43 and part of

62 (certain T-shirts, sweatshirts, and knit tops), 48 (raincoats), and 49 (other coats), for the year which began on January 1, 1977.

(A detailed description of the categories in terms of T.S.U.S.A. numbers was published in the FEDERAL REGISTER on February 3, 1975 (40 FR 5010), as amended on December 31, 1975 (40 FR 60220), December 30, 1976 (41 FR 56881), January 21, 1977 (42 FR 3888), and March 7, 1977 (42 FR 12898).)

SUMMARY: On July 21, 1977, the Governments of the United States and the Polish People's Republic exchanged notes amending the Bilateral Cotton Textile Agreement of November 6, 1975 for the third agreement year which began on January 1, 1977. According to the terms of the amendment, the designated annual consultation levels for Categories 36 and 41 have been reduced and those for Categories 48 and 49 have been increased. Categories 42/43/62 (pt.) have been merged at a new level of restraint. The level for Category 63 (other clothing, not knit or crocheted) has also been increased to 1,000,000 square yards equivalent.

EFFECTIVE DATE: August 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Edmond C. Callahan, International Trade Specialist, Office of Textiles, U.S. Department of Commerce, Washington, D.C. 20230, 202–377–5423.

SUPPLEMENTARY INFORMATION: On January 3, 1977, there was published in the FEDERAL REGISTER (42 FR 64), a letter dated December 29, 1976, from the Chairman of the Committee for the Implementation of Textile Agreements, which established the levels of restraint applicable to certain specified categories of cotton textile products, produced or manufactured in Poland and exported to the United States during the twelve-month period which began on January 1, 1977. In the letter of July 29, 1977, published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to amend the levels of restraint applicable to cotton textile products in Categories 36, 41, 42/43/62 (pt.), 48 and 49 to the designated amounts.

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

U.S. DEPARTMENT OF COMMERCE, THE ASSISTANT SECRETARY FOR DOMESTIC AND INTERNATIONAL BUSINESS

Washington, D.C., July 29, 1977.

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

COMMISSIONER OF CUSTOMS,
Department of the Treasury,
Washington, D.C.

DEAR MR. COMMISSIONER: This directive amends, but does not cancel, the directive issued to you on December 29, 1976 by the Chairman of the Committee for the Implementation of Textile Agreements concerning imports into the United States of certain specified categories of cotton textile products, produced or manufactured in Poland.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, pursuant to the Bilateral Cotton Textile Agreement of November 6, 1975, as amended, between the Governments of the United States and the Polish People's Republic, and in accordance with the provisions of Executive Order 11651 of March 3, 1972, you are directed to amend, effective on August 3, 1977 and for the twelve-month period beginning on January 1, 1977 and extending through December 31, 1977, the levels of restraint established in the directive of December 29, 1977 for Categories 36, 41, 42/43/62 (part), 48, 49, and 62 (part), produced or manufactured in Poland, to the following amounts:

Category:		*Amended 12-mo level of restraint* [1]
36	numbers	43,478
41	dozen	49,765
42/43/62 (part)[2]	do	439,119
48	do	28,000
49	do	60,385
62 (part)[3]	pounds	476,087

[1] The levels of restraint have not been adjusted to reflect any imports after Dec. 31, 1976.

[2] In category 62, only T.S.U.S.A. Nos. 380.-0024, 380.0027, 380.0624, 382.0002, 382.0024, 382.0026, 382.0605, 382.0610, 382.0665, 382.-3904, and 382.6904.

[3] All T.S.U.S.A. numbers in category 62 except those listed in footnote 2.

The actions taken with respect to the Government of the Polish People's Republic and with respect to imports of cotton textile products from Poland have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, the directions to the Commissioner of Customs, being necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the FEDERAL REGISTER.

Sincerely,

ROBERT E. SHEPHERD,
Chairman, Committee for the Implementation of Textile Agreements, and Deputy Assistant Secretary for Resources and Trade Assistance.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 770-8; PF76]

PESTICIDE PROGRAMS

Filing of Pesticide Petition

E. I. Du Pont De Nemours & Co., Wilmington, Del. 19898, has submitted a petition (PP 7F1948) to the Environmental Protectoin Agency which proposes that 40 CFR 180.253 be amended by establishing a tolerance for residues of the insecticide methomyl (S-methyl N-[(methylcarbomoyl)oxy] thioacetimidate) in or on the raw agricultural commodity strawberries at 2 parts per million (ppm). The proposed analytical method for determining residues is by using .nicroculometric gas chromatography.

Interested persons are invited to submit written comments on this petition to the Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, Environmental Protection Agency, Rm. 401, East Tower, 401 M St. SW., Washington, D.C. 20460. Three copies of the comments should be submitted to facilitate the work of the Agency and of others interested in inspecting them. Inquiries concerning this petition may be directed to Product Manager (PM) 12, Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone at 202-426-9425. Written comments should bear a notation indicating the petition number. Comments may be made at any time while a petition is pending before the Agency. All written comments will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m., Monday through Friday.

Dated: July 25, 1977.

MARTIN H. ROGOFF, Ph. D.
Acting Director,
Registration Division.

[FR-771-1; OPP-33000/512]

RECEIPT OF APPLICATION PESTICIDE REGISTRATION DATA TO BE CONSIDERED IN SUPPORT OF APPLICATIONS

On November 19, 1973, the Environmental Protection Agency (EPA) published in the FEDERAL REGISTER (39 FR 31862) its iterim policy with respect to the administration of Section 3(c)(1)(D) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended ("Interim Policy Statement"). On January 22, 1976, EPA published in the FEDERAL REGISTER a document entitled "Registration of a Pesticide Product —Consideration of Data by the Administrator in Support of an Application" (41 FR 3339). This document described the changes in the Agency's procedures for implementing Section 3(c)(1)(D) of FIFRA, as set out in the Interim Policy Statement which were effected by the enactment of the recent amendments to FIFRA on November 28, 1975 (Pub. L. 94-140), and the new regulations governing the registration and re-registration of pesticides which became effective on August 4, 1975 (40 CFR Part 162).

Pursuant to the procedures set forth in these FEDERAL REGISTER documents, EPA hereby gives notice of the applications for pesticide registration listed below. In some cases these applications have recently been received; in other cases, applications have been amended by the submission of additional supporting data, the election of a new method of support, or the submission of new "offer to pay" statements.

In the case of all applications, the labeling furnished by the applicant for the product will be available for inspection at the Environmental Protection Agency, Room 209, East Tower, 401 M Street, SW., Washington, D.C. 20460. In the case of applications subject to the new Section 3 regulations, and applications not subject to the new Section 3 regulations which utilize either the 2(a) or 2(b) method of support specified in the Interim Policy Statement, all data citations submitted or referenced by the applicant in support of the application will be made available for inspection at the above address. This information (proposed labeling and, where applicable, data citations) will also be supplied by mail, upon request. However, such a request should be made only when circumstances make it inconvenient for the inspection to be made at the Agency offices.

Any person who: (a) is or has been an applicant, (b) believes that data he developed and submitted to EPA on or after January 1, 1970, is being used to support an application described in this notice, (c) desires to assert a claim under Section 3(c)(1)(D) for such use of his data, and (d) wishes to preserve his right to have the Administrator determine the amount of reasonable compensation to which he is entitled for such use of the data or the status of such data under Section 10 must notify the Administrator and the applicant named in the notice in the FEDERAL REGISTER of his claim by certified mail. Notification to the Administrator should be addressed to the Product Control Branch, Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460. Every such claimant must include, at a minimum, the information listed in the Interim Policy Statement of November 19, 1973.

Specific questions concerning applications made to the Agency should be addressed to the designated Product Manager (PM), Registration Division (WH-567), Office of Pesticide Programs, at the above address, or by telephone as follows:

PM 11, 12, and 13—202/755-9315
PM 21 and 22—202/426-2454
PM 24—202/755-2196
PM 31—202 426-2635
PM 33—202/755-9041
PM 15, 16, and 17—202/426-9425
PM 23—202/755-1397
PM 25—202/755-2632
PM 32—202/426-9486
PM 34—202/426-9490

The Interim Policy Statement requires that claims for compensation be filed on or before October 3, 1977. With the exception of 2(c) applications not subject to the new Section 3 regulations, and for which a sixty-day hold period for claims is provided, EPA will not delay any registration pending the assertion of claims for compensation or the determination of reasonable compensation. Inquires and assertions that data relied upon are subject to protection under Section 10 of FIFRA, as amended, should be made within 30 days subsequent to publication of this notice.

Dated: July 25, 1977.

MARTIN H. ROGOFF, Ph. D.,
Acting Director,
Registration Division.

FEDERAL ENERGY ADMINISTRATION

APPLICATIONS FOR EXCEPTION FROM REFINERS PRICE RULES GOVERNING ORDER OF RECOVERY OF INCREASED NON-PRODUCT COSTS

January 1, 1975 Through January 31, 1976 Period; Deadline for Filing

AGENCY: Federal Energy Administration.

ACTION: Filing Deadline for Certain Exception Applications.

SUMMARY: Pursuant to the lifting of a judicial stay, the FEA has determined to reimpose the 60-day deadline for filing Applications for Exceptions from the regulations governing the sequence for recovering increased non-product costs during the period January 1, 1975 through January 31, 1976. Notice is hereby provided that FEA will not consider any Application for Exception from such regulations to be timely filed if such submission is filed more than 60 days after the date on which this notice appears in the FEDERAL REGISTER. The FEA is also requiring each firm to submit within 60 days a detailed specification of the facts it intends to establish in support of its Application for Exception and the manner of proving such facts.

DATE: All Applications for Exception to be filed with the Office of Exceptions and Appeals on or before October 3, 1977.

ADDRESSES: All comments should be directed to Thomas L. Weiker, Assistant Director of the Office of Exceptions and Appeals, Federal Energy Administration, Washington, D.C. 20461.

SUPPLEMENTARY INFORMATION: On April 21, 1977, the Federal Energy Administration issued a notice for publication in the FEDERAL REGISTER providing that Applications for Exception from the provisions of the FEA Mandatory Petroleum Price Regulations which governed the order of recovery of increased non-product costs by refiners during the period January 1, 1975 through January 31, 1976 must be filed with the FEA Office of Exceptions and Appeals no later than June 27, 1977. The FEA has interpreted those regulatory provisions as requiring that increased non-product costs could not be recovered by refiners until all available increased product costs had been passed through to their customers. See, e.g., 41 FR 5111, 5113 (February 4, 1976); 41 FR 33282 (August 9, 1976).

Subsequent to the issuance of the April 21 notice and during the course of certain litigation involving these regulatory provisions, the FEA agreed to a temporary stay of the June 27 filing requirement with respect to all refiners. On June 28, 1977 the FEA therefore published in the FEDERAL REGISTER a notice indicating that the June 27 deadline was vacated until further notice. 42 F.R. 32831 (June 28, 1977). On July 21, 1977, the U.S. District Court for the Northern District of Ohio dissolved the stay of the filing requirements. *Standard Oil Co. et al. v. O'Leary et al.*, ---- F. Supp. (N.D. Ohio, July 21, 1977).

Accordingly, FEA is now free to reimpose a filing deadline and has determined that a new filing deadline should be established for the reasons that were set forth in detail in the April 21 notice. Consequently, notice is hereby provided that the FEA will not consider any Application for Exception from the provisions of the FEA Regulations which governed the order of recovery of increased nonproduct costs during 1975 and January 1976, as those provisions have been interpreted by the FEA in the notices cited above, as being filed in a timely manner if the submission is filed with the FEA Office of Exceptions and Appeals later than October 3, 1977. This filing deadline will not apply, however, to Applications for Exception submitted by firms which complied with applicable FEA regulatory requirements during the period in question and whose submissions consist solely of a request that they receive equitable treatment in the light of any action which the FEA might take in exception proceedings initiated by other firms which failed to comply with the FEA Regulations as interpreted by the FEA in the manner described above.

In order to expedite its consideration of any exception applications which may be filed and to establish a reliable basis for conducting proceedings in this matter, the FEA has further determined that any firm which files an Application for Exception within the period prescribed above must also submit to the Office of Exceptions and Appeals at the same time it files its Application an itemization of:

(a) The particular factual representations whose validity the firm intends to establish and which it contends would lead ultimately to the conclusion that its Application for Exception should be granted; and

(b) The particular manner in which the firm intends to establish the validity of each of the representations set forth in response to Subparagraph (a) above.

The itemization referred to in Subparagraph (a) above should describe the facts alleged by the firm with a high degree of specificity. For example, with respect to a certain event that is alleged to have occurred, the itemization should at least include the names and titles of the persons involved, the date and place of the event, and the specific statements made or actions taken at that time.

Any questions regarding this notice should be directed to Thomas L. Wieker, Assistant Director of the Office of Exceptions and Appeals, Federal Energy Administration, Washington, D.C. 20461.

Issued in Washington, D.C., July 27, 1977.

ERIC J. FYGI,
Acting General Counsel.

FUEL OIL MARKETING ADVISORY COMMITTEE

Meeting

Pursuant to the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770), notice is hereby given that the Fuel Oil Marketing Advisory Committee will meet Monday, August 15, 1977, at 9 a.m., room 2003A, JFK Federal Bldg., Government Center, Boston, Mass.

The Committee was established to provide the Administrator, FEA, with expert and technical advice concerning the trade of selling fuel oil.

The agenda for the meeting is as follows:

1. Old Business—Discussion of Requests and Commitments from the Prior Committee Meeting.
2. Summer Fill.
3. Resid Containment Problems (East Coast).
4. Nationwide Distillate Trigger.
5. Administration's Energy Plan.
6. FEA Compliance (Auditing Procedures)
7. New Business—Items for Discussion at the Next Meeting.
8. Remarks from the Floor (10 Minute Rule).

The meeting is open to the public. The Chairman of the Committee is empowered to conduct the meeting in a fashion that will in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Committee will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Lois Weeks, Director, Advisory Committee Management, 202-566-9996, at least 5 days prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Further information concerning this meeting may be obtained from the Advisory Committee Management Office.

The transcript of the meeting will be available for public review at the Freedom of Information Public Reading Room, room 2107, FEA, Federal Building, 12th and Pennsylvania Ave. NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays. Any person may purchase a copy of the transcript from the reporter.

Issued at Washington, D.C., on July 28, 1977.

ERIC J. FYGI,
Acting General Counsel.

FEDERAL POWER COMMISSION

[Docket No. CI74-566]

AMOCO PRODUCTION CO.

Extension of Time

JULY 25, 1977.

On June 20, 1977, Amoco Production Company (Amoco) filed a motion to extend the time within which to comply with Ordering Paragraph (K) of the June 3, 1977, Order issuing a certificate of public convenience and necessity in the above designated docket.

Upon consideration, notice is hereby given that an extension of time is granted to and including December 1, 1977, within which Amoco shall commence deliveries of gas as required by Ordering Paragraph (K).

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22101 Filed 8-1-77;8:45]

[Docket No. CI64-26]

GULF OIL CORP.

Request for Inquiry

JULY 25, 1977.

Take notice that on June 13, 1977, the Assembly, State of New York, through its Sub-committee on Economic Development Task Force on Natural Gas (Assembly) requested the Commission to inquire into the legality of certain actions taken by Gulf Oil Corporation (Gulf) with respect to its deliveries to other pipelines in Southern Louisiana during the period when Gulf's sales under its warranty contract were significantly below the amounts requested by Texas Eastern Transmission Company (TETCO).

Specifically, Assembly wants to know whether Gulf violated its TETCO warranty contract and coincident FPC certificate by entering into a new warranty obligation in 1972 to Southern Natural Gas Company (Southern) and/or by failing to prorate deliveries to both warranty customers when Gulf's deliverability was insufficient to meet both contractual commitments.

By a letter agreement dated January 14, 1972, Gulf and Southern agreed to a contract amendment covering sales of gas to Southern from Gulf's interest in the West Delta Block 27 Field (Block 27), in lieu of Gulf making another reserve redetermination for that Field pursuant to Southern's September 23, 1971 request. This letter agreement committed Gulf to deliver specified quantities of gas to Southern from Block 27 "or any other field or fields in which may now or hereafter have an interest," equivalent in total amount to Gulf's share of 1.25 Tcf of Block 27 reserves, minus all volumes already delivered under the contract.

Assembly notes that during the years 1972-75 Gulf's deliveries to Southern pursuant to the 1972 letter agreement were in sum 1,351,040 Mcf greater than the total Southern had requested over that period. At the same time, Gulf's sales to TETCO fell well below the 625,000 Mcf/D requested by TETCO.

Assembly essentially asks four questions:

(a) In what manner, if any, was Gulf's reluctance to make a reserve redetermination for the Block 27 Field pursuant to Southern's request, related to Gulf's warranty obligation to TETCO certificated in Docket No. CI64-26;

(b) Did Gulf, by signing the January 14, 1972 letter agreement with Southern, incur a corporate warranty obligation to supply Southern with specified volumes of gas from unspecified fields. And if so, why instead of prorating the available supply between Southern and TETCO on the basis of their respective daily contract entitlements, did Gulf nearly satisfy its entire obligation to Southern during the years 1972-75, while at the same time fall far short of supplying TETCO with the quantities of gas it requested;

(c) Was it inappropriate on Gulf's part to have added at least 5 fields since 1972 for the satisfaction of the Southern contract, while simultaneously steeply curtailing its deliveries to TETCO;

(d) Has Gulf made any sales of new reserves it has found in the offshore Louisiana area to any purchaser other than TETCO during the time it has been underdelivering to TETCO?

Any person desiring to be heard or to make any protest with reference to said request should on or before August 12, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). Any party wishing to become a party to a proceeding, or to participate as a party in any hearing therein, must file a petition to intervene in accordance with the Commission's Rules.

Comments with respect to Assembly's request may be filed with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before August 12, 1977. Such comments will be considered in determining appropriate action, but those filing comments will not as a result of such action become parties to this proceeding.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22099 Filed 8-1-77;8:45 am]

[Docket No. ER77-507]

NIAGARA MOHAWK POWER CORP.

Tariff Filing

JULY 25, 1977.

Take notice that Niagara Mohawk Power Corporation (Niagara), on July 11, tendered for filing, as a rate schedule, a Service Classification to be used to supply power and energy to the St. Lawrence Power Company.

Niagara states that the rates contained in this Service Classification are comparable to Niagara's other rates charged to customers who have requirements of a magnitude similar to those served by this tariff.

Niagara proposes an effective date of June 1, 1977, and therefore requests waiver of the Commission's notice requirements.

Niagara indicates that copies of the filing have been served on St. Lawrence Power Company, the only customer presently proposed to be served under this tariff, and upon the Public Service Commission of the State of New York.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with paragraphs 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions should be filed on or before August 3, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-435]

NIAGARA MOHAWK POWER CORP.

Proposed Tariff Change

JULY 25, 1977.

Take notice that Niagara Power Corporation (Niagara), on July 7, 1977, tendered for filing as a rate schedule, an agreement between Niagara and Orange and Rockland Utilities, Inc. (Rockland), dated April 12, 1977.

Niagara states that there is presently on file an agreement with Rockland dated February 14, 1976, and that this agreement is designated as Niagara Mohawk Power Corporation Rate Schedule FPC No. 89. Niagara further states that the new agreement is being submitted as a supplement to the existing agreement.

Niagara indicates that this supplement revises the wheeling rate as provided for in the terms of the original agreement.

Niagara proposes an effective date of April 1, 1977, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with paragraphs 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the processing. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-434]

NIAGARA MOHAWK POWER CORP.

Proposed Tariff Change

JULY 25, 1977.

Take notice that Niagara Mohawk Power Corp. (Niagara) on July 7, 1977, tendered for filing a rate schedule, an agreement between Niagara and Rochester Gas and Electric Corp. (Rochester), dated April 12, 1977.

Niagara states that there is presently on file an agreement with Rochester dated February 14, 1975, and that this agreement is designated as Niagara Mohawk Power Corp. Rate Schedule FPC No. 92. Niagara further states that the new agreement is being submitted as a supplement to the existing agreement.

Niagara indicates that this supplement revises the wheeling rate as provided for in the terms of the original agreement.

Niagara proposes an effective date of April 1, 1977, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with paragraphs 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22098 Filed 8-1-77;8:45 am]

[Docket No. ER77-433]

NIAGARA MOHAWK POWER CORP.

Proposed Tariff Change

JULY 25, 1977.

Take notice that Niagara Mohawk Power Corp. (Niagara), on July 7, 1977, tendered for filing as a rate schedule, an agreement between Niagara and the Power Authority of the State of New York (PASNY), dated April 12, 1977.

Niagara indicates that there is presently on file an agreement with PASNY dated April 21, 1976, and that this agreement is designated as Niagara Mohawk Power Corp. Rate Schedule FPC No. 96. Niagara further indicates that the new agreement is being submitted as a supplement to the existing agreement.

According to Niagara this supplement revises the wheeling rate as provided for in the terms of the original agreement.

Niagara proposes an effective date of April 1, 1977, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with paragraphs 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 12, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22102 Filed 8-1-77;8:45 am]

[Docket No. CP77-510]

NORTHERN NATURAL GAS CO.

Application

JULY 25, 1977.

Take notice that on July 15, 1977, Northern Natural Gas Co. (Applicant), 2223 Dodge Street, Omaha, Nebr. 68102, filed in Docket No. CP77-510 an application pursuant to Section 7 of the Natural Gas Act for permission and approval to abandon and remove certain small volume sales measuring stations and for a certificate of public convenience and necessity authorizing the construction and operation of three sales measuring stations in Carson and Gray Counties, Tex., all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant indicates that pursuant to the authority granted by the Commission in Docket Nos. CP74-205, CP75-333, and CP77-130, it operates certain small volume rural sales measuring stations and delivers and sells natural gas through such sales measuring stations to West Texas Gas, Inc. (West Texas) for resale in the state of Texas. The sale of gas to West Texas by Applicant is made pursuant ot the terms of a sales agreement dated August 27, 1974, as amended, between Applicant and West Texas, it is said. Applicant states that such agreement is on file with the Commission as Applicant's Rate Schedule X-40 of its FPC Gas Tariff, Original Volume No. 2. Applicant states further that the gas delivered and sold to West Texas by Applicant pursuant to its Rate Schedule X-40 is resold by West Texas to Applicant's pipeline right-of-way grantors for high priority use in rural areas of West Texas. It is stated that Applicants' Rate Schedule X-40 provides for the sale and delivery of up to 350,000 Mcf per month and 2,291,111 Mcf annually

Applicant indicates that it is experiencing declining wellhead pressures in its supply area which necessitates a reduction in gathering line pressure, and that by lowering the pressure to 15 psia in the gathering systems supplying the McConnell, Haiduk and Bobbitt field compressor stations, Applicant has determined that the deliverability from the wells attached to these gathering systems can be increased by 4,700 Mcf per day during the first year of such operations. Applicant indicates that lowering of the gathering system pressure to 15 psia would result in it no longer being feasible to provide service to West Texas through 22 existing delivery stations for rural service to certain of Applicant's right-of-way grantors in Carson and Gray Counties, Tex., and that to lower the pressure in such gathering systems would result in the premature abandonment of wells attached thereto, and therefore, the loss of gas reserves attributable to such wells.

Applicant requests approval to abandon 22 delivery stations through which gas is presently delivered and sold to West Texas for resale to Applicant's pipeline right-of-way grantors and proposes to install and operate 2 new delivery stations through which the delivery and sale of gas would be made to West Texas for such customers in order to increase the deliverability from the wells attached to the McConnell, Haiduk, and Bobbitt gathering systems and to assure continuity of gas service by Applicant to West Texas under the agreement. It is stated that the three delivery stations that Applicant proposes to construct and operate would be located on Applicant's Kermit to Beaver high pressure line in Carson County, Tex., and Gray County, Tex.

Applicant indicates that it and West Texas have entered into a letter agreement dated June 22, 1977, which provides for the termination of gas deliveries by Applicant to West Texas through the 22 delivery points and for the initiation of service through the 3 delivery stations herein proposed to be installed by Applicant. Applicant further indicates that pursuant to the subject agreement West Texas would install and operate distribution facilities that may be required downstream of the proposed delivery stations to enable each of the customers to receive the same volumes of gas to which they are presently entitled.

The estimated cost of the facilities proposed to be constructed by Northern is $13,500, and the estimated cost of the proposed abandonment and removal of facilities is $1,100, it is said. Applicant indicates that it would finance the proposed facilities from cash on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 15, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Section 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22095 Filed 8-1-77;8:45 am]

[Docket No. ER77-43]

PACIFIC POWER & LIGHT CO.

Electric Rates; Order Approving Settlement

JULY 25, 1977.

On May 17, 1977, the Presiding Administrative Law Judge in this proceeding certified to the Commission a proposed Settlement Agreement in the form of an Executed Contract, dated May 1, 1977, between Pacific Power & Light Co. (PP&L), Applicant, and Montana Light & Power Co. (ML&P), sole Intervenor in the proceeding. The Commission finds that the Settlement Agreement is in the public interest and accepts and approves it as hereinafter ordered and conditioned.

Proceedings were initiated in this docket on November 5, 1976, when PP&L filed a proposed rate schedule change[1] for sales of electricity to ML&P. Prior to that date, service to ML&P had been governed by Letter Agreement, dated February 3, 1973,[2] whereby PP&L served ML&P on a month-to-month basis. By order issued February 4, 1977, the Commission accepted the aforementioned Letter Agreement for filing, effective as of December 6, 1976, suspended the tendered rate schedule until July 7, 1977, subject to refund, and ordered a hearing to investigate the lawfulness of the filed rates.

A formal prehearing conference was held on March 15, 1977, after which the parties, including Staff, met to discuss the issues in dispute. By Motion dated April 26, 1977, PP&L requested that the Presiding Judge certify to the Commission for approval the subject proposed settlement. Therein, PP&L requested that the settlement rates be given an effective date of May 1, 1977.

In response to PP&L's April 26 Motion, Staff did not object to certification of the proposed Settlement Agreement, but reserved comment on the merits of the Agreement pending a review of supporting data submitted by PP&L.

Public notice of the Presiding Judge's May 17 certification of the proposed Agreement to the Commission was issued on June 3, 1977, with comments due on or before June 20, 1977. On June 20, 1977, Staff submitted comments in support of the Settlement Agreement requesting that the tendered contract be allowed to go into effect as a revised rate schedule on or before July 7, 1977, the date the original filing would have gone into effect subject to refund.

The proposed Settlement Agreement would, inter alia, (1) reduce the requested amount of increase in charges for power and energy sold to ML&P, from $41.865 to $31,114 based on 1976 transactions; (2) revise the billing demand ratchet to an average of the three highest demands in the eleven months prior to the billing month;[3] (3) establish an excess demand charge of $6 per kilowatt for actual demands that are, in any month, in excess of the established billing demand; (4) provide for six months notice by ML&P of requested scheduled maintenance service; (5) provide a basis for pricing of energy sold by ML&P to PP&L;[4] and (6) permit ML&P to purchase non-firm thermal energy under PP&L's Schedule RR2.

Based on our review of the Settlement Agreement record in this docket, we find that the tendered, Executed Contract represents a reasonable resolution of the issues in the proceeding and is in the public interest.[5] Accordingly, we shall allow the tendered contract to go into effect as a revised rate schedule[6] on July 7, 1977.

The Commission finds: The Settlement Agreement in the form of an Executed Contract filed in this docket on April 26, 1977, should be approved and made effective, as hereinafter ordered.

The Commission orders: (A) The Settlement Agreement in the form of an Executed Contract filed with the Commission in this docket on April 26, 1977, is incorporated herein by reference, accepted and approved as revised rate schedule PP&L FPC No. 131, the rates therein effective as of July 7, 1977. Within 30 days from the date of issuance of this order, ML&P shall file its rate schedule or concurrence with the Commission pursuant to the requirements of Section 35.1(a) of the Regulations under the Federal Power Act.

(B) This order is without prejudice to any findings or orders which have been made or which may hereinafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its Staff, or any party or person affected by this order in any proceeding now pending or hereafter instituted by or against PP&L, any other person or party.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22104 Filed 8-1-77;8:45 am]

[Docket No. ER76-543]

SOUTHWESTERN PUBLIC SERVICE CO.

Interconnection Agreement; Application for Approval; Order Accepting for Filing and Suspending Proposed Rate Schedules, Establishing Procedures and Granting Requests for Waiver

JULY 25, 1977.

On March 3, 1976, Southwestern Public Service Company (SWPS) tendered for filing proposed rate schedules[1] canceling and superseding its FPC Rate Schedule No. 54 and New Mexico Electric Service Company's (NMES) FPC Rate Schedule No. 1.[2] The proposed filing pertains to firm capacity sales made by SWPS to NMES and unit capacity sales from NMES to SWPS. The parties request waiver of the notice provisions to permit the filing to be effective June 1, 1976, the date NME's Maddox Station Unit No. 2 (66 MW gas turbine) was placed in commercial operation.

Firm capacity sales are made to NMES on the basis of loss of the largest generating unit. NMES presently has a 118 MW generating unit and a 66 MW gas turbine

[1] Designated as: PP&L Rate Schedule No. 130 to Supersede PP&L Rate Schedule FPC No. 100.

[2] Designated as: Supplement No. 1 to PP&L Rate Schedule FPC No. 100.

[3] Originally PP&L had requested a 100% ratchet for the prior eleven months.

[4] Designated as: Montana Light & Power Co. Rate Schedule FPC No. 2 (Supersedes ML&P Rate Schedule FPC No. 1).

[5] The earned rate of return under the proposed settlement rates will not exceed Staff's recommendation of 8.94%, including 12.50% on common equity.

[6] Designated as: PP&L Rate Schedule FPC No. 131 (Supersedes PP&L Rate Schedule FPC No. 130).

[1] The filing is designated in the attachment to this order. Presently, SWPS and New Mexico Electric Service are interconected and exchange various service under an agreement dated January 14, 1967.

[2] By letter dated March 18, 1976, SWPS was notified that its filing was deficient. On March 1, 1977, SWPS submitted for filing an amendment to its Interconnection Agreement dated December 24, 1976. That amendment did not cure the previous deficiency and a 2nd deficiency letter (dated March 31, 1977) was forwarded to SWPS. On April 25, 1977, SWPS submitted additional data. By letter dated May 25, 1977, the Commission notified SWPS that its filing was still deficient. On June 13, 1977, SWPS submitted additional information which completed the filing.

Its peak load, prior to June 6, 1976, was approximately 95 MW. Southwestern will sell firm capacity energy to New Mexico equal to the difference between New Mexicos' peak load and the 66 MW gas turbine. A letter agreement will be initiated after each peak season load signifying the amount of firm capacity sales for the next 12 months. Pricing for the firm capacity sales is based on the generation plants, the 230 KV "backbone" transmission system and the 115 KV "backbone" transmission system of Southwestern. No subtransmission is included in the pricing. Demand related costs are fully covered in the price per KW. Pricing per KWH is Southwestern's incremental cost of production per KWH, which includes fuel and water, plus one mill. KWH sales are anticipated only in emergency situations and at such times as the 118 MW unit is out of service for maintenance.

Unit capacity sales are made to Southwestern by New Mexico on the basis of the full capacity, 66 MW, of the gas turbine that has been in commercial operation since June 1, 1976. Pricing for the unit capacity sales is made on the basis of the incremental financing charges. Pricing per KWH is based on NMES's incremental cost of production per KWH, including fuel, maintenance and water, plus one mill. KWH sales from this unit are anticipated at times when Southwestern is burning fuel oil due to natural gas curtailments and during peak load periods.

Public notice of the filing of March 8, 1976, and public notice of the amendment were issued on March 8, 1976, and March 23, 1977, respectively. No protests or petitions to intervene have been received.

Our review indicates that among other things, the rate for the sale of NMES gas turbine capacity and the methods of reserve capacity determination have not been shown to be just and reasonable and, therefore, may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, the filing will be suspended for one day to become effective June 2, 1976, subject to refund. In addition, we shall grant the request of waiver of the notice period.

The Commission finds: (1) Good cause exists to accept for filing the rate schedules tendered by SWPS as designated in the attachment hereto.

(2) Good cause exists to grant waiver of the notice provisions as requested and to suspend the filing as hereinafter ordered.

(3) It is necessary and proper in the public interest and in the enforcement of the provisions of the Federal Power Act, that the Commission enter upon a hearing to determine the justness and reasonableness of the proposed rate schedules tendered in this proceeding as hereinafter ordeed.

The Commission orders: (A) Pending a hearing and decision thereon, SWPS's filing as designated in the attachment is hereby accepted for filing and suspended for one day to become effective on June 2, 1976, subject to refund.

(B) The request for a waiver of the notice requirements is hereby granted.

(C) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5(d)), shall preside at an initial conference in this proceeding to be held on September 13, 1977, at 10 a.m., in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426. Said Law Judge is authorized to establish all procedural dates and to rule upon all motions, (except petitions to intervene, motions to consolidate and sever and motions to dismiss), as provided for in the Rules of Practice and Procedure.

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER77-483]

VIRGINIA ELECTRIC & POWER CO.

Electric Rates; Order Accepting for Filing Granting Intervention, Suspending Proposed Rate Increase, and Establishing Procedures

JULY 25, 1977.

On June 28, 1977, Virginia Electric and Power Company (VEPCO) tendered for filing proposed increased rates and charges for jurisdictional sales to 50 rural electric cooperatives and 9 municipal systems.[1] The filing would increase Vepco's revenues by $21,038,000 or 20.8 percent, based on the 12 month period ending December 31, 1977.

On July 13, 1977, the ElectriCities of North Carolina (petitioners) filed a document entitled "Preliminary Protest, Petition to Intervene and Request For Hearing and Maximum Suspension Period of ElectriCities of North Carolina".

In support of their petition to intervene, the petitioners state that they are an unincorporated association whose members are representatives of all municipalities in North Carolina and certain municipalities in Virginia which own and operate their own electric systems serving their citizens and customers. The petitioners also aver that many of the North Carolina municipalities and all of the Virginia municipalities purchase electric and energy at wholesale from Vepco and resell such power and energy at retail to their own citizens and other municipalities. Our review indicates that the petitioners have shown sufficient justification for permitting them to participate as intervenors in this proceeding.

Review of the request for increased rates and charges indicates that the proposed rates have not been shown to be justified and may be unjust, unreasonable, unduly discriminatory or preferential, or otherwise unlawful. Accordingly, we will suspend the effectiveness of the proposed rates and charges. Based on a review of all the pleadings, including petitioners' request for maximum suspension period, we will accept for filing the proposed increased rates and will suspend their effectiveness for four months. Moreover, certain procedures[2] must be established with regard to the petitioners' allegation of "price squeeze" violations. We will direct the Administrative Law Judge to convene a prehearing conference within 15 days from the date of this order for the purpose of hearing petitioners' request for data necessary to present their *prima facie* showing on the "price squeeze" issue.

The Commission finds. (1) Good cause exists to accept for filing and suspend the proposed increased rates and charges as hereinafter ordered.

(2) The participation in this proceeding of the Electricities of North Carolina may be in the public interest.

(3) It is necessary, proper, and in the public interest to aid in the enforcement of the provisions of the Federal Power Act, that the Commission enter upon a hearing to determine the justness and reasonableness of the proposed increased rates ad charges, filed by Vepco in this proceeding.

(4) Good cause exists to establish "price squeeze" procedures to effectuate

[1] Rate schedule designations will be forwarded separately to Vepco following the issuance of this order.

[2] See, Order Prescribing A New Section 2.16 of the Commission's General Policy and Interpretations and Terminating Rulemaking, Order No. 563, Docket No. RM76-29, issued March 21, 1977.

the Commission's policy announced in Order No. 563.

The Commission orders: (A) Pursuant to the authority contained under the Federal Power Act, particularly Sections 205 and 206 thereof, the Commission's Rules of Practice and Procedure and the Regulations under the Federal Power Act, a public hearing shall be held concerning the justness and reasonableness of the rates proposed by Vepco.

(B) Pending hearing and final decision thereon, Vepco's filing for increased rates and charges in Docket No. ER77-483 is hereby accepted for filing and suspended for four months, to become effective November 28, 1977, subject to refund.

(C) The Staff shall prepare and serve top sheets on all parties for settlement purposes on or before October 12, 1977 (See Administrative Order No. 157).

(D) A Presiding Administrative Law Judge to be designated by the Chief Administrative Law Judge for that purpose (See Delegation of Authority, 18 CFR 3.5(d)), shall preside at an initial conference in this proceeding to be held on October 20, 1977, at 10 a.m., in a hearing room of the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426. Said Law Judge is authorized to establish all procedural dates and to rule upon all motions (except petitions to intervene, motions to consolidate and sever and motions to dismiss), as provided for in the Rules of Practice and Procedure.

(E) The Administrative Law Judge shall convene a prehearing conference within 15 days from the date of this order for the purpose of hearing the petitioners' request for data required to present their case, including a prima facie showing, on the price squeeze issue. Also, Vepco shall be required to respond to the discovery requests authorized by the Administrative Law Judge within 30 days, and the petitioners shall file their case-in-chief on the price squeeze issue within 30 days after Vepco's response.

(F) Nothing contained herein shall be construed as limiting the rights of parties to this proceeding regarding the convening of conferences or offers of settlement pursuant to Section 1.18 of the Commission's Rules of Practice and Procedure.

(G) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

FEDERAL RESERVE SYSTEM

BARNETT BANKS OF FLORIDA, INC.

Acquisition of Bank

Barnett Banks of Florida, Inc., Jacksonville, Fla., has applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842 (a)(3)) to acquire 100 percent of the voting shares of Amelia Island Bank, Fernandina Beach, Fla. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than August 22, 1977.

Board of Governors of the Federal Reserve System, July 25, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposals

The following requests for clearance of reports intended for use in collecting information from the public were received by the Regulatory Reports Review Staff, GAO, on July 27, 1977. See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice in the FEDERAL REGISTER is to inform the public of such receipts.

The notice includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed NRC and FTC requests are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed requests, comments (in triplicate) must be received on or before August 22, 1977, and should be addressed to Mr. John M. Lovelady, Acting Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5033, 441 G Street NW., Washington, D.C. 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

FEDERAL TRADE COMMISSION

The FTC requests clearance of a new voluntary single time "Drug Substitution Letter Questionnaire" which FTC's Bureau of Consumer Protection will use in conducting an investigation into the laws and practices which prohibit drug product selection by pharmacists. The letter questionnaire will be sent to the deans of pharmacy schools seeking information on the role of pharmacists in drug product selection. Potential respondents are estimated by FTC to be approximately 73 and reporting burden to average one hour per response.

NUCLEAR REGULATORY COMMISSION

The NRC requests clearance of reporting and recordkeeping requirements contained in new sections 71.51, 71.62(c) and 71.63(c) of 10 CFR Part 71, Packaging of Radioactive Material for Transport and Transportation of Radioactive Material Under Certain Conditions. These sections pertain to Quality Assurance Requirements for Transport Packages. Section 71.51 requires a licensee to file a description of the general quality assurance programs which he applies to packages for the shipment of radioactive materials. Section 71.62(c) requires the licensee to maintain for the life of the packaging to which they pertain, quality assurance records which furnish documentary evidence of the quality of the packaging. Section 71.63 (c) requires that the licensee notify the NRC Director of Inspection and Enforcement before fabrication of a package to be used for the shipment of radioactive material which has decay loads or operating pressures in excess of specific values. NRC estimates potential respondents to be 2,020 NRC licensees and that the total annual reporting and recordkeeping burden under sections 71.51, 71.62(c) and 71.63(c) is approximately 93,003 hours.

NORMAN F. HEYL,
Regulatory Reports, Review Officer.

GENERAL SERVICES ADMINISTRATION

PRIVACY ACT OF 1974

Changes to a System of Records

On June 21, 1977, there was published in the FEDERAL REGISTER (42 FR 31494 and 31495) a notice proposing changes to the system of records identified as "Employee related files GSA/NARS-10," system identification number 23-00-0055. The public was given the opportunity to submit, not later than July 21, 1977, written comments concerning the revised routine use. No comments were received, and the revised routine use is hereby adopted.

Dated at Washington, D.C., on July 25 1977

PAUL S. CARTER,
Acting Director of Administration.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration

[Docket No. 77N-0148]

METABOLIC, INC.

Revocation of U.S. License 415

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Commissioner of Food and Drugs revokes the establishment and

product licenses of Metabolic, Inc., U.S. License No. 415, to manufacture four biological products at six locations.

DATE: Effective upon date of signature by the Commissioner.

FOR FURTHER INFORMATION CONTACT:

John F. Harty, Jr., Compliance Regulations Policy Staff (HFC–10), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3480.

SUPPLEMENTARY INFORMATION: A notice of opportunity for hearing was published in the FEDERAL REGISTER of May 13, 1977 (42 FR 24328) on a proposal by the Bureau of Biologics to revoke U.S. License 415 issued to Metabolic, Inc., with locations at 417 La Branch St., Houston, TX; 4520 Yoakum Blvd., Houston; 2429 Jensen St., Houston; 47–49 W. Ashley St., Jacksonville, FL; 822 Howard Ave., New Orleans, LA; and 300 Luckie St., Atlanta, GA; and the product licenses for the manufacture and preparation of Source Plasma (Human), Normal Serum Albumin (Human), Immune Serum Globulin (Human) and Tetanus Immune Globulin (Human). Significant deviations from standards for biological products and the failure to submit products for lot release and/or licensure were cited as grounds for the proposed revocation. The notice was preceded by a suspension, pursuant to § 601.6 (21 CFR 601.6), of U.S. License 415 to manufacture at four locations. The remaining locations were suspended on April 26, 1977. A notice of revocation was published in the FEDERAL REGISTER of May 13, 1977 (42 FR 24329) for the establishment and product licenses to manufacture Source Plasma (Human) at 1907 S. Staples St., Corpus Christi, TX, and 5104 Almeda St., Houston, TX. On July 6, 1977, the location at 300 Luckie St., Atlanta, GA was revoked by the Bureau after being notified by the licensee that he had sold the establishment and no longer had any interest in it. This notice fulfills the requirements of § 601.8 (21 CFR 601.8) to publish notice of revocation as to this particular establishment.

Pursuant to the notice of opportunity for hearing to revoke U.S. License 415 as to the remaining establishments and products, the licensee requested a hearing. A hearing was granted by the Commissioner in a notice published in the FEDERAL REGISTER of July 8, 1977 (42 FR 35221). On July 21, the licensee notified the Bureau of Biologics and the Hearing Clerk that he had withdrawn his request for a hearing. Additionally, the licensee requested revocation of his license, U.S. License 415, as to the remaining establishments and products.

The Commissioner is granting the licensee's request. Accordingly, under § 12.38 (21 CFR 12.38), section 351 of the Public Health Service Act (42 U.S.C. 262), and the authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1), U.S. License No. 415, including all establishments and products not previously revoked, is hereby revoked as of the date of signature. This notice of revocation is published pursuant to § 601.8 (21 CFR 601.8).

Dated: July 28, 1977.

WILLIAM F. RANDOLPH,
Acting Associate Commissioner for Compliance.

[Docket No. 76N–0068; DESI 12542]

PHENYLBUTAZONE TABLETS AND OXYPHENBUTAZONE TABLETS

Drugs for Human Use; Drug Efficacy Study Implementation; Announcement and Notice of Opportunity for Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: This notice announces that phenylbutazone and oxyphenbutazone are regarded as effective for treatment of certain inflammatory diseases and lacking substantial evidence of effectiveness or not shown to be safe for other uses, and sets forth the conditions for their marketing.

DATES: Hearing requests due on or before September 1, 1977.

Bioavailability supplements to approved new drug applications due on or before January 30, 1978; other supplements due on or before October 3, 1977.

ADDRESSES: Communications forwarded in response to this notice should be identified with the reference number DESI 12542, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

Supplements (identify with NDA number): Division of Oncology & Radiopharmaceutical Drug Products (HFD–150), Bureau of Drugs, Rm. 17B–45.

Original abbreviated new drug applications and supplements thereto and notice of claimed investigational exemption for a new drug (identify as such): Division of Generic Drug Monographs (HFD–530), Bureau of Drugs.

Requests for opinion regarding the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFD–310), Bureau of Drugs.

Requests for Hearing (identify with Docket number appearing in the heading of this notice): Hearing Clerk, Food and Drug Administration (HFC–20), Rm. 4–65.

Requests for the report of the National Academy of Sciences-National Research Council: Public Records and Document Center (HFC–18), Rm. 4–62.

Other communications regarding this notice: Drug Efficacy Study Implementation Project Manager (HFD–501), Bureau of Drugs.

FOR FURTHER INFORMATION CONTACT:

Robert H. Hahn, Bureau of Drugs (HFD–32), Food and Drug Administration, Department of Health, Education, and Welfare, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3650.

SUPPLEMENTARY INFORMATION: In a notice published in the FEDERAL REGISTER of July 9, 1966 (31 FR 9426) each holder of a new drug application which became effective prior to October 10, 1962, was requested to submit to the Food and Drug Administration reports containing the best data available in support of the effectiveness of each such product for its claimed indications. That information was needed to facilitate a determination by the Food and Drug Administration, with the assistance of the National Academy of Sciences-National Research Council, whether each claim in the labeling is supported by substantial evidence of effectiveness, as required by the Drug Amendments of 1962. The holder of the new drug applications described below, both of which became effective prior to October 10, 1962, did not submit the requested information concerning the products:

NDA 8–319; Butazolidin Tablets, containing phenylbutazone, and

NDA 12–542; Tandearil Tablets, containing oxyphenbutazone; Geigy Pharmaceuticals, Division of Ciba Geigy Corp., Ardsley, NY 10502.

These products are used in the treatment of some of the symptoms in certain inflammatory diseases. The Food and Drug Administration has reviewed these drugs, and this notice announces its conclusions and the conditions under which the products may be marketed.

Such drugs are regarded as new drugs (21 U.S.C. 321(p)). Supplemental new drug applications are required to revise the labeling in and to update previously approved applications providing for such drugs. An approved new drug application is a requirement for marketing such drug products.

In addition to the holder of the new drug applications specifically named above, this notice applies to all persons who manufacture or distribute a drug product, not the subject of an approved new drug application, which is identical, related, or similar to a drug product named above, as defined in 21 CFR 310.6. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product he manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product he manufactures or distributes that may be identical, related, or similar to a drug product named in this notice by writing to the Division of Drug Labeling Compliance (HFD–310), Bureau of Drugs.

Geigy Pharmaceuticals had taken the position that, because certain supplements to the applications were approved subsequent to October 9, 1962, the issue of effectiveness was resolved by those approvals. Those approvals of supplements, however, were not based upon complete reviews of the applications and therefore did not constitute a determination that all claimed indications are supported by substantial evidence of effectiveness.

The Food and Drug Administration, on its own initiative, sought and obtained the views of the National Academy of Sciences-National Research Council, Drug Efficacy Study Group concerning these two products. Geigy Pharmaceuticals was provided copies of the Academy's reviews. To further assist the Food and Drug Administration in reaching a determination, the Bureau of Drugs asked the Food and Drug Administration's Arthritis Advisory Committee to assess the role of the two drug products in medical practice today. The Committee was specifically asked to determine which indications for use of phenylbutazone and oxyphenbutazone are supported by appropriate evidence of both safety and effectiveness and what, if any, labeling revisions are indicated. Geigy Pharmaceuticals prepared a document summarizing its own scientific data, data from other studies, and an intensive review of the world literature on the two drugs. In advance of the Committee meeting on February 27–28, 1975, a copy of that document had been provided each member of the Committee, with copies for use by the Food and Drug Administration. Representatives of Ciba-Geigy Corporation and the Food and Drug Administration were present at the meeting, and discussed the drugs with the Committee.

A. *Safety and effectiveness classification.* The Food and Drug Administration has considered the Academy's reports, the recommendations of the Food and Drug Administration's Arthritis Advisory Committee, and all available evidence and concludes that:

1. Phenylbutazone and oxyphenbutazone are effective for treatment of active rheumatoid arthritis, active ankylosing spondylitis, and acute gouty arthritis.

2. Both drugs lack substantial evidence of effectiveness in painful shoulder syndrome, acute thrombophlebitis, and psoriatic arthritis, and for oxyphenbutazone alone, for "severe forms of a variety of local inflammatory conditions". In addition, because of potential hazards associated with their use, both drugs have not been shown to be safe for use in painful shoulder syndrome and acute thrombophlebitis; and, for oxyphenbutazone alone, for "severe forms of a variety of local inflammatory conditions."

3. Although effective in osteoarthritis, both drugs have not been shown to be safe for use for that indication, because of the availability of safer compounds which are also effective in osteoarthritis.

B. *Conditions for approval and marketing.* The Food and Drug Administration is prepared to approve abbreviated new drug applications and abbreviated supplements to previously approved new drug applications under the conditions described herein.

1. *Form of drug.* Such preparations are in conventional tablet form suitable for oral administration.

2. *Labeling conditions.* a. The label bears the statement:

Caution: Federal law prohibits dispensing without prescription.

b. The drugs are labeled to comply with all requirements of the act and regulations and the labeling bears adequate information for safe and effective use of the drugs. (Full labeling guidelines are available from the Division of Oncology and Radiopharmaceutical Drug Products (HFD–150), Bureau of Drugs). The indications for both phenylbutazone tablets and oxyphenbutazone tablets are as follows:

Active rheumatoid arthritis.
Active ankylosing spondylitis.
Acute gouty arthritis.

3. *Marketing status. a.* Marketing of such drug product which is now the subject of an approved or effective new drug application may be continued provided that, on or before October 3, 1977 the holder of the application submits (i) a supplement for revised labeling as needed to be in accord with the labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, and (ii) a supplement to provide updating information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD–356H (21 CFR 314.1(c)) to the extent required in abbreviated applications (21 CFR 314.1 (f)). In addition, on or before January 30, 1978, the holders of such applications are required to supplement their applications to provide (1) evidence demonstrating the in vivo bioavailability of the drug product that is the subject of the application in accordance with 21 CFR 320.-24 and 320.25; or (2) information to permit the Food and Drug Administration to waive demonstration of in vivo bioavailability in accordance with 21 CFR 320.22.

b. Approval of an abbreviated new drug application (21 CFR 314.1 (f)) must must be obtained prior to marketing such products. Such abbreviated new drug applications are required to contain evidence from in vivo studies demonstrating bioequivalency to the reference standard. Such bioavailability studies shall consist of single or multiple dose blood level comparisons to an appropriate reference material. Multiple dose studies will require prior submission of a Notice of Claimed Investigational Exemption for a New Drug (IND) including a protocol for such studies. Because of inherent toxicological side effects associated with these drugs, it is advisable that firms submit a protocol with the ANDA prior to undertaking a single dose study in human subjects. Dissolution rate data are required of solid oral dosage forms. Marketing prior to approval of a new drug application will subject such products, and those persons who caused the products to be marketed, to regulatory action.

C. *Notice of opportunity for hearing.* On the basis of all the data and information available to him, the Director of the Bureau of Drugs is unaware of any adequate and well-controlled clinical investigation, conducted by experts qualified by scientific training and experience, meeting the requirements of section 505 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 335) and 21 CFR 314.111 (a)(5), demonstrating the effectivness of the drugs for the indications for which the drugs lack substantial evidence of effectiveness referred to in paragraph A. 2. of this notice. The Director further concludes that because of the potential hazards associated with the use of the drugs or the availability of safer compounds, the drugs have not been shown to be safe for certain indications referred to in paragraphs A.2. and A.3. of this notice.

Notice is given to the holder of the new drug applications, and to all other interested persons, that the Director of the Bureau of Drugs proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 335(e)), withdrawing approval of the new drug application(s) and all amendments and supplements thereto providing for the indications referred to in paragraphs A.2. and A.3. of this notice on the grounds that (1) new information before him with respect to the drug products, evaluated together with the evidence available to him at the time of approval of the applications, shows there is a lack of substantial evidence that the drug products will have all the effects they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in the labeling; and (2) new evidence of clinical experience, not contained in the applications or not available to the Food and Drug Administration until after the applications were approved, evaluated together with the evidence available when the applications were approved, shows that the drugs are not shown to be safe for use under the conditions of use upon the basis of which the applications were approved. An order withdrawing approval will not issue with respect to any applications supplemented, in accord with this notice, to delete the claims referred to in paragraphs A.2. and A.3. of this notice.

In addition to the grounds for the proposed withdrawal of approval stated above, this notice of opportunity for hearing encompasses all issues relating to the legal status of the drug products subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6), e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act pursuant to the exemption for products marketed prior to June 25, 1938, contained in section 201 (p) of the act, or pursuant to section 107(c) of the Drug Amendments of 1962; or for any other reason.

In accordance with the provisions of section 505 of the act (21 U.S.C. 355) and the regulations promulgated thereunder (21 CFR 310, 314), the applicant and all other persons who manufacture or distribute a drug product which is identical, related, or similar to a drug product named above (21 CFR 310.6), are hereby

given an opportunity for a hearing to show why approval of the new drug applications providing for the claims involved should not be withdrawn and an opportunity to raise, for administrative determination, all issues relating to the legal status of a drug product named above and all identical, related, or similar drug products.

If the applicant or any person subject to this notice pursuant to 21 CFR 310.6 elects to avail himself of the opportunity for a hearing, he shall file (1) on or before September 1, 1977, a written notice of appearance and request for hearing, and (2) on or before October 3, 1977, the data, information, and analyses on which he relies to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this proposal to withdraw approval. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a grant or denial of hearing, are contained in 21 CFR 314.200.

The failure of the applicant or any other person subject to this notice pursuant to 21 CFR 310.6 to file timely written appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by such person not to avail himself of the opportunity for a hearing concerning the action proposed with respect to such drug product and a waiver of any contentions concerning the legal status of such drug product. Any such drug product labeled for the indications referred to in paragraph A.2. and A.3. of this notice may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such drug products from the market. Any new drug product marketed without an approved NDA is subject to regulatory action any time.

A request for a hearing may not rest upon mere allegations or denials, but must set forth specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for the hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner will enter summary judgment against the person(s) who requests the hearing, making findings and conclusion, denying a hearing.

All submissions pursuant to this notice of opportunity for hearing shall be filed in quintuplicate. Such submissions, except for data and information prohibited from public disclosure pursuant to 21 U.S.C. 331(j) or 18 U.S.C. 1905, may be seen in the office of the Hearing Clerk between the hours of 9 am. and 4 p.m. Monday through Friday.

(Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat. 1050–1053, as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the Bureau of Drugs (21 CFR 5.82).)

Dated: July 20, 1977.

J. RICHARD CROUT,
Director Bureau of Drugs.

National Institutes of Health

ARTERIOSCLEROSIS AND HYPERTENSION ADVISORY COMMITTEE

Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Arteriosclerosis and Hypertension Advisory Committee, National Heart, Lung, and Blood Institute, September 23–24, 1977, Conference Room 7, Building 31, National Institutes of Health, Bethesda, Maryland.

The entire meeting will be open to the public from 9:00 a.m. to 6:00 p.m. on Friday, September 23 and from 8:30 a.m. to 3:00 p.m. on Saturday, September 24, to evaluate program support in Arteriosclerosis and Hypertension. Attendance by the public will be limited on a space available basis.

Mr. York Onnen, Chief, Public Inquiries and Reports Branch, NHLBI, Room 5A–03, Building 31, National Institutes of Health, Bethesda, Maryland 20014, Phone (301) 496–4236, will provide summaries of the meeting and rosters of committee members.

Dr. Gardner C. McMillan, Associate Director for Etiology of Arteriosclerosis and Hypertension Program, NHLBI, Room 516, Federal Building, National Institutes of Health, Bethesda, Maryland 20014, Phone (301) 496–1613, will furnish substantive program information.

Dated: July 19, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

BOARD OF REGENTS OF THE NATIONAL LIBRARY OF MEDICINE

Renewal

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92–463, 86 Stat. 770–776), the National Institutes of Health announces the renewal by the Secretary, HEW, with the concurrence of the Office of Management and Budget Committee Management Secretariat, of the Board of Regents of the National Library of Medicine.

This committee, established by an Act of Congress, shall file a charter upon the expiration of each successive two-year period in accordance with Pub. L. 92–463. That rechartering date is May 31, 1979.

Dated: July 14, 1977.

DONALD S. FREDRICKSON,
Director,
National Institutes of Health.

NATIONAL CANCER INSTITUTE

Meetings for the Review of Contract Proposals

Pursuant to Pub. L. 92–463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

These meetings will be open to the public to discuss administrative details or other issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available.

These meetings will be closed to the public as indicated below in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92–463, for the review, discussion and evaluation of individual contract proposals, as indicated. These proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the proposals.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 4B43, National Institutes of Health, Bethesda, Md. 20014 (301–496–5708) will furnish summaries of the meetings and rosters of committee members, upon request. Other information pertaining to the meeting can be obtained from the Executive Secretary indicated. Meetings will be held at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Md. 20014, unless otherwise stated.

Name of committee: Committee on Cancer Immunodiagnosis.
Dates: September 2, 1977, 1 p.m.
Place: Building 10, Room 4B14, National Institutes of Health.
Times: Open—September 2, 1 p.m.–1:30 p.m. Closed—September 2, 1:30 p.m.–adjournment.
Closure reason: To review research contract proposals.
Executive Secretary: Mrs. Judith M. Whalen, Building 10, Room 4B17, National Institutes of Health; phone 301–496–1791.

(Catalog of Federal Domestic Assistance Number 13.394, National Institutes of Health.)

Name of committee: Virus Cancer Program Scientific Review Committee B.
Dates: September 15–16, 1977, 9 a.m.
Place: Landow Building, Room C418, 7910 Woodmont Avenue, Bethesda, Md. 20014.
Times: Open—September 15, 9 a.m.–9:30 a.m. Closed—September 15, 9:30 a.m.–5 p.m.; September 16, 9 a.m.–adjournment.
Closure reason: To review research contract proposals.
Executive Secretary: Dr. Wilna A. Woods, Landow Building, Room C306, National Institutes of Health; phone 301–496–4533.

(Catalog of Federal Domestic Assistance Number 13.393, National Institutes of Health.)

Name of committee: Committee on Cancer Immunodiagnosis.
Dates: September 25–26, 1977, 7 p.m.
Place: Landow Building, Room C418, 7910 Woodmont Avenue, Bethesda, Md. 20014.
Times: Open—September 25, 1977; 7 p.m.–7:30 p.m.; September 26, 1977; 8:30 a.m.–11:30 p.m.
Agenda: Open portion—Immunodiagnosis Program Review and Planning. Closed—September 25, 1977; 7:30 p.m.–11:30 p.m.
Closure reason: To review research contract proposals.
Executive Secretary: Mrs. Judith M. Whalen, Building 10, Room 4B17, National Institutes of Health; phone 301–496–1791.

(Catalog of Federal Domestic Assistance Number 13.394, National Institutes of Health.)

Name of committee: Biometry and Epidemiology Contract Review Committee.
Dates: September 27–28, 1977, 1 p.m.
Place: Landow Building, Room C418, 7910 Woodmont Avenue, Bethesda, Md. 20014.
Times: Open—September 27, 1 p.m.–3 p.m.; Closed—September 27, 3 p.m.–10 p.m.; September 28, 8:30 a.m.–adjournment.
Closure reason: To review research contract proposals.
Executive Secretary: Mr. Harvey Geller, Landow Building, Room C519, National Institutes of Health; phone 301–496–6014.

(Catalog of Federal Domestic Assistance Number 13.393, National Institutes of Health.)

Name of Committee: Committee on Cytology Automation.
Dates: September 28, 1977, 1 p.m.
Place: Building 10, Room 1A21, National Institutes of Health.
Times: Open—September 28, 1 p.m.–1:30 p.m. Closed—September 28, 1:30 p.m.–adjournment.
Closure reason: To review research contract proposals.
Executive Secretary: Dr. Bill Bunnag, Building 10, Room 1A21, National Institutes of Health; phone 301–496–5282.

NATIONAL CANCER INSTITUTE

Open Meetings

Pursuant to Pub. L. 92–463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

Thees meetings will be entirely open to the public to discuss issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available. Meetings will be held at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Md. 20014, unless otherwise stated.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 4B43, National Institutes of Health, Bethesda, Md. 20014 (301–496–5708) will furnish summaries of the meetings and rosters of committee members upon request.

Other information pertaining to the meeting can be obtained from the Executive Secretary indicated.

Name of committee: Subcommittee on Manpower Needs of the Cancer Research Manpower Review Committee
Dates: September 12, 1977; 9 a.m.–3 p.m.
Place: Building 31C, Conference Room 7, National Institutes of Health.
Times: Open for the entire meeting.
Agenda: Discuss future projected needs for M.D.'s, Ph. D.'s, and D.V.M.'s as well as predoctorals in the areas of cancer etiology and prevention, detection, diagnosis treatment and restorative care.
Executive Secretary: Dr. Leon J. Niemiec, Westwood Building, Room 10A15, National Institutes of Health; phone 301–496–7803.

Name of committee: Executive Subgroup of the Clearinghouse on Environmental Carcinogens.
Dates: Septembed 12, 1977; 8:30 a.m.–5 p.m.
Place: Building 31C, Conference Room 10, National Institutes of Health.
Times: Open for the entire meeting.
Agenda: To review the activities of the Clearinghouse bioassay program and other relevant matters.
Executive Secretary: Dr. James M. Sontag, Building 31, Room 3A16, National Institutes of Health; phone 301–496–5108.

Name of committee: Data Evaluation and Risk Assessment Subgroup of the Clearinghouse on Environmental Carcinogens.
Dates: September 26, 1977; 8:30 a.m.–5 p.m.
Place: Building 31C, Conference Room 10, National Institutes of Health.
Times: Open for the entire meeting.
Agenda: To review available bioassay reports and other matters relevant to data evaluation and risk assessment.
Executive Secretary: Dr. James M. Sontag, Building 31, Room 3A16 National Institutes of Health; phone 301–496–5108.

Dated: July 15, 1977.

NATIONAL DIABETES ADVISORY BOARD

Meeting

Pursuant to Pub. L. 92–463, notice is hereby given of a meeting of the National Diabetes Advisory Board on September 21, 1977, 8:30 a.m. to 5 p.m., in Conference Room 723A, South Portal Building of Health, Education, and Welfare, at 330 Independence Avenue SW., Washington, D.C.

In addition, the Executive Committee of the Board will have a meeting on September 20, 1977, 8:30 a.m. to 5 p.m. at the same location. The meetings, which will be open to the public both days from 8:30 a.m. to 5 p.m., are being held to continue review of the status and implementation of the long-range

plan to combat diabetes formulated by the National Commission on Diabetes. Attendance by the public will be limited to space available.

Messrs. James N. Fordham or Leo E. Treacy, Office of Scientific and Technical Reports, NIAMDD, National Institutes of Health, Building 31, Room 9A04, Bethesda, Md. 20014 (301–496–3583), will provide summaries of the meeting.

(Catalog of Federal Domestic Assistance Program No. 13.847, National Institutes of Health)

Dated: July 15, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

WORKSHOP ON CANCER RESEARCH SAFETY

Meeting

Notice is hereby given of the Workshop on Cancer Research Safety sponsored by the National Cancer Institute, September 27–29, 1977, at the Dulles Marriott Hotel, Washington, D.C.

This meeting will be open to the public on September 27, 1977, 8:30 a.m. to 4:30 p.m., September 28, 1977, 8:30 a.m. to 10 p.m., and September 29, 1977, 8:30 a.m. to 1:30 p.m., to discuss Cancer Research Safety for Institutional Environmental Health and Safety Director. Attendance by the public will be limited to space available.

Dr. W. Emmett Barkley, Ph. D., Director, Office of Research Safety, National Cancer Institute, National Institutes of Health, Bethesda, Md. 20014 (301–496–1862), will provide additional information.

Dated: July 25, 1977.

SUZANNE L. FREMEAU,
Committee Management Officer,
National Institutes of Health.

[FR Doc.77-21988 Filed 8-1-77;8:45 am]

Office of Education

FINANCIAL ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES TO MEET THE SPECIAL EDUCATIONAL NEEDS OF EDUCATIONALLY DEPRIVED AND NEGLECTED AND DELINQUENT CHILDREN

Public Meeting

Section 151 (20 U.S.C. 241o) of Title I of the Elementary and Secondary Education Act of 1965 requires the Commissioner of Education to develop and provide to State educational agencies models for the evaluation of all programs conducted under Title I, expressed in regulatory form. A Notice of Intent to issue regulations, which will invite public comment upon a number of issues related to the development of the evaluation models, is planned for publication in the FEDERAL REGISTER soon.

In the meantime, the Office of Education, in consultation with a large number of interested persons and groups, both public and private, has contructed three tentative evaluation models applicable to Title I projects in reading, mathematics, and language arts for grades 2 through 12. The Office of Education has also sponsored a nationwide series of workshops at which these tentative models were presented, and is funding a number of Technical Assistance Centers which currently are instructing personnel from many State and some local educational agencies in the use of these tentative models. Therefore, while the models that have been developed are strictly tentative, and their use is not now required, personnel from many State and local educational agencies are already using them in their evaluation efforts.

The Office of Education will sponsor a meeting, to which the public is invited, to explain the steps it has taken to implement Section 151 and to explain its current thinking with regard to the three tentative models. The meeting will be held on September 14, 1977, at 400 Maryland Ave. SW., Washington, D.C., Room 6004, between the hours of 9 a.m. and 4 p.m. This meeting is not intended to be a hearing on the merits of the tentative models, as hearings for this purpose will be scheduled once evaluation models are published as a notice of proposed rulemaking. Rather, the intent of this meeting is solely to update those interested in the steps the Office of Education has taken to implement Section 151.

Among others, this meeting should be of interest to companies marketing elementary and secondary school educational achievement tests and companies that provide scoring, reporting, and evaluation services. The Office of Education intends to discuss the following topics: (1) the background of the Office of Education's efforts to fulfill the requirements of Section 151; (2) suggested procedures for implementing the tentative models; (3) current misperceptions of the tentative models and of the Office of Education's policies regarding evaluation of Title I programs; and (4) the capabilities of the current version of a computer program which processes evaluation data generated through use of the tentative models.

Dated: July 27, 1977.

ERNEST L. BOYER,
Commissioner of Education.

[FR Doc.77-22201 Filed 8-1-77;8:45 am]

Office of the Secretary

COMMENTS ON COLLECTION ON INFORMATION AND DATA ACQUISITION ACTIVITY

Pursuant to Section 406(g)(2)(B), General Education Provisions Act, notice is hereby given as follows:

The U.S. Office of Education has proposed collections of information and data acquisition activities which will request information from educational agencies or institutions.

The purpose of publishing this notice in the FEDERAL REGISTER is to comply with paragraph (g)(2)(B) of the "Control of Paperwork" amendment which provides that each educational agency or institution subject to a request under the collection of information and data acquisition activity and their representative organizations shall have an opportunity, during a 30-day period before the transmittal of the request to the Director of the Office of Management and Budget, to comment to the Administrator of the National Center for Education Statistics on the collection of information and data acquisition activity.

These data acquisition activities are subject to review by the HEW Education Data Acquisition Council and the Office of Management and Budget.

Descriptions of the proposed collections of information and data acquisition activities follow below.

Written comments on the proposed activities are invited. Comments should refer to the specific sponsoring agency and form number and must be received on or before September 1, 1977 and should be addressed to Administrator, National Center for Education Statistics, Attn: Manager, Information Acquisition, Planning, and Utilization, Room 3001, 400 Maryland Avenue SW., Washington, D.C. 20202.

Further information may be obtained from Elizabeth M. Proctor of the National Center for Education Statistics, 202–245–1022.

Dated: July 25, 1977.

MARIE D. ELDRIDGE,
Administrator, National Center
for Education Statistics.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. TITLE OF PROPOSED ACTIVITY

Study to Determine the Projected Area of Vocational Education Teacher Shortage.

2. AGENCY/BUREAU/OFFICE

U.S. Office of Education, Bureau of Occupational and Adult Education.

3. AGENCY FORM NUMBER

OE Form 581.

4. LEGISLATIVE AUTHORITY FOR THIS ACTIVITY

"Section 172(c)(7) * * * the Commissioner shall, before the beginning of each fiscal year, publish a listing of the areas of teaching in vocational education which are presently in need of additional personnel and of the areas which will have need of additional personnel in the future * * *" (Pub. L. 94–482, Title II, Section 202; 20 U.S.C. 2402).

5. VOLUNTARY OBLIGATORY NATURE OF RESPONSE

Voluntary.

6. HOW INFORMATION TO BE COLLECTED WILL BE USED

The information is to be used to meet the legislative requirements of Section 172(c)(7) cited above in item number 4. The information will also be used in the awarding of vocational education teacher certification fellowships in vocational skill areas of shortage.

7. DATA ACQUISITION PLAN

a. Method of Collection: Mail and/or telephone.
b. Time of Collection: Summer and Fall.
c. Frequency: Annually.

8. RESPONDENTS

a. Type: State Education Agencies.
b. Number: 57.
c. Estimated Average Man-Hours per Respondent: 16.

9. INFORMATION TO BE COLLECTED

The respondents will be requiredto provide data on the present and anticipated shortages of teachers within vocational skill areas for their States. A listing (a taxonomy) of the "specialties" (skill areas) in vocational education will be forwarded to the States; and, for each specialty, in accordance with the taxonomy, the State will provide the number of teachers required to meet present shortages and the number anticipated to meet future shortages.

DESCRIPTION OF A PROPOSED COLLECTION OF INFORMATION AND DATA ACQUISITION ACTIVITY

1. TITLE OF PROPOSED ACTIVITY

The Status and Impact of Bilingual Vocational Training: Bilingual Vocational Training Inventory.

2. AGENCY/BUREAU/OFFICE

U.S. Office of Education—Office of Planning, Budgeting and Evaluation.

3. AGENCY FORM NUMBER

OE-586.

4. LEGISLATIVE AUTHORITY FOR THIS ACTIVITY

"The Commissioner and the Secretary of Labor together shall—

"(1) develop and disseminate accurate information on the status of bilingual vocational training in all parts of the United States;

"(2) evaluate the impact of such bilingual vocational training on the shortages of well-trained personnel, the unemployment or underemployment of persons with limited English-speaking ability, and the ability of such persons to acquire sufficient job skills and English language skills to contribute fully to the economy of the United States; and

"(3) report their findings annually to the President and the Congress." (Pub. L. 94–482, Sec. 182(a); 20 U.S.C. 2412).

5. VOLUNTARY/OBLIGATORY NATURE OF RESPONSE

Voluntary.

6. HOW INFORMATION COLLECTED WILL BE USED

The Status and Impact of Bilingual Vocational Training requires an inventory of existing publicly funded adult bilingual vocational training programs for persons of limited English-speaking ability. This inventory will identify types of bilingual vocational training programs, their locations, and their sponsors in order to inform the President and the Congress of the availability during fiscal year 1977 of such training for unemployed and underemployed persons of limited English-speaking ability. The inventory will also be used to identify the sampling universe for the mandated evaluation.

7. DATA ACQUISITION PLAN

a. Method of Collection: Telephone interviews and personal interviews.
b. Time of Collection: Fall, 1977.
c. Frequency: Single Time Only.

8. RESPONDENTS

a. Type: State Education Agencies.
b. Number: Universe—200 screening interviews.
c. Estimated Average Man-Hours per Respondent: .33.
a. Type: Other—Directors of Bilingual Vocational Training programs.
b. Number: Universe—50.
c. Estimated Average Man-Hours per Respondent: .33.

9. INFORMATION TO BE COLLECTED

The respondents will be asked to provide information on the characteristics of bilingual vocational training programs, the sponsor and conducting organization, the language target group(s) for which training is provided, English language proficiency of trainees, and English language training provided. For programs with training which does not qualify as Bilingual Vocational Training, the interview will be terminated after one of six screening questions has received a negative response.

DEPARTMENT OF THE INTERIOR

Bureau of Indian Affairs

LOWER CARSON-LOWER TRUCKEE RIVER BASINS, PROPOSED OPERATING CRITERIA

Supplemental Public Hearing and Extension of Time for Written Comments—Draft Environmental Statement

JULY 21, 1977.

This notice is published in exercise of authority delegated by the Secretary of the Interior to the Commissioner of Indian Affairs by 230 DM 2.

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 the Department of the Interior prepared, published, and held hearings on a draft environmental impact statement for the proposed operating criteria for the Lower Carson-Lower Truckee River Basins located principally in Churchill and Washoe Counties of Nevada. The notice of hearings on this statement (INT–DES–77–18) was published in the FEDERAL REGISTER on May 27, 1977 (42 FR 27311). Those hearings were completed June 28, 29, and 30, 1977, and the deadline for submission of written comments had been set for July 9, 1977.

Due to the complexity of the statement and the widespread interest in the subject of the statement, a supplemental hearing will be held on September 22, 1977, at 2 p.m., at the Jot Travis Auditorium, University of Nevada, Reno, Nev. The deadline for written comments on this statement and written comments to be made a part of the record of the public hearing, is also extended from July 9, 1977, to September 30, 1977.

The proposed action is to mitigate or offset the effects of implementing the operating criteria for the Newlands Reclamation Project. That operating criteria has been changed by a court order in a way that restricts the diversion of water out of the Truckee River watershed, for use in the Newlands Reclamation Project, to that amount of water needed for beneficial use as required by the decreed rights of lands having approved water rights within that project. The mitigation includes certain improvements, in the operation and management of the project and in connection with losses in various wildlife areas. Further, the proposed action will result in increased flows in the Lower Truckee River and into Pyramid Lake.

The hearing will continue until all persons desiring to comment have been heard.

Individuals and representatives of organizations desiring to present their views at the hearing should contact Mr. Harold Ranquist, Senior Attorney, Department of the Interior, Special Projects Office, 900 West First Street, Reno, Nev. 89503; Telephone 702–322–4042. Requests for scheduling of oral presentation will be accepted until September 21, 1977, at 5 p.m. Insofar as practicable, speakers will be scheduled according to time preferences in their letter or telephone requests. Speakers being scheduled at the time of the hearing will be scheduled according to the time of their arrival on a first-come, first-served basis.

The time permitted for oral presentation at the hearing may be limited to 10 minutes per speaker, depending upon the number of presentations scheduled. Speakers will not be permitted to trade or consolidate their scheduled times to make longer individual presentations. However, the person presiding at the hearing may allow additional oral comment by anyone after all speakers have been heard. Written statements by persons who desire to supplement their oral presentations and by those unable to attend the public hearing may be submitted to Mr. Harold Ranquist, Senior Attorney, Department of the Interior, Special Projects Office, 900 West First Street, Reno, Nev. 89503, address given above, through September 30, 1977, for inclusion in the hearing record.

Copies of the Draft Environmental Impact Statement are available pursuant to the notice published in the FEDERAL REGISTER on May 23, 1977 (42 FR 26254), at the places therein designated and further may be obtained for public examination at the Department of the Interior, Special Projects Office, 900 West First Street, Reno, Nev. 89503. Single copies of the statement may be obtained without charge by writing to that same office.

RAYMOND V. BUTLER,
Acting Deputy Commissioner
of Indian Affairs.

Bureau of Land Management

[M18434]

MONTANA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 26, 1977.

The Department of Agriculture filed application, Serial No. M18434, on May 5,

1971, for a withdrawal in relation to the following described lands:

PRINCIPAL MERIDIAN, MONTANA
KOOTENAI NATIONAL FOREST
Roberts Lookout Site

T. 34 N., R. 26 W.,
Sec. 3, E½NW¼SE¼NE¼ and W½NE¼SE¼NE¼.
The area described contains 10 acres in Lincoln County, Montana.
The applicant desires that the land be reserved for a fire lookout point.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on June 10, 1971, Volume No. 36, Page 11226, Document No. 71-8061.

Pursuant to section 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing with the State Director, Bureau of Land Management, P.O. Box 30157, Billings, Montana 59107, on or before September 6, 1977. Notice of the public hearing will be published in the FEDERAL REGISTER, giving the time and place of such hearing. The hearing will be scheduled and conducted in accordance with BLM Manual Sec. 2351.16 B. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 6, 1977.

The above-described lands are temporarily segregated from the operation of the public land laws, including the mining laws, to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Department of the Interior, P.O. Box 30157, Billings, Montana 59107.

EDGAR D. STARK,
Acting Chief, Branch of Lands and Minerals Operations.

National Park Service

NATIONAL REGISTER OF HISTORIC PLACES

Additions, Deletions, and Corrections

By notice in the FEDERAL REGISTER of February 1, 1977, Part IX, there was published a list of the properties included in the National Register of Historic Places. Further notice is hereby given that certain amendments or revisions in the nature of additions, deletions, or corrections to the previously published list are adopted as set out below.

It is the responsibility of all Federal agencies to take cognizance of the properties included in the National Register as herein amended and revised in accordance with section 106 of the National Historic Preservation Act of 1966, 80 Stat. 16 U.S.C. 470 et seq. (1970 ed.), and the procedures of the Advisory Council on Historic Preservation 36 CFR Part 800.

WILLIAM J. MURTAGH,
Keeper of the National Register.

The following properties have been added to the National Register of Historic Places since July 5, 1977. National Historic Landmarks are designated by NHL; properties recorded by the Historic American Buildings Survey are designated by HABS; and properties recorded by the Historic American Engineering Record are designated by HAER:

Portland, *Grand Central Station*, NW 6th Ave. (8-6-75.)

• • • • •

The following properties have been determined to be eligible for inclusion in the National Register. All determinations of eligibility are made at the request of the concerned Federal Agency under the authorities in section 2(b) and 1(3) of Executive Order 11593 as implemented by the Advisory Council on Historic Preservation, 36 CFR Part 800. This listing is not complete. Pursuant to the authorities discussed herein, an Agency Official shall refer any questionable actions to the Director, Office of Archeology and Historic Preservation, National Park Service, Department of the Interior, for an opinion respecting a property's eligibility for inclusion in the National Register.

Historical properties which are determined to be eligible for inclusion in the National Register of Historic Places are entitled to protection pursuant to section 106 of the National Historic Preservation Act of 1966, as amended, and the procedures of the Advisory Council on Historic Preservation, 36 CFR Part 800. Agencies are advised that in accord with the procedures of the Advisory Council on Historic Preservation, before an agency of the Federal Government may undertake any project which may have an effect on such a property, the Advisory Council on Historic Preservation shall be given an opportunity to comment on the proposal.

ALABAMA

Green County

Gainesville vicinity, *Archeological Sites in Gainesville Project*, Tombigbee Waterway (also in Pickens and Sumter counties).

Phoenix, *Ivy House*, 111 W. Monroe St.
Phoenix, *Kenilworth Elementary School*, 1210 N. 5th Ave.
Phoenix, *La Ciudad Archeological Site*.
Phoenix, *Las Colinas (Arizona T:12810)*, 1200 block of N. 27th Ave.
Phoenix, *Stewart House*, 1115 N. Central.
Site T:4:6.
Site U:1:30 (A.S.U.).
Site U:1:31 (A.S.U.).
Skunk Creek Archeological District.

Mohave County

Colorado City vicinity, *Short Creek Reservoir States NA 13,257 and NA 13,258*.

Navajo County

Polacca vicinity, *Walpi Hopi Village*, adjacent to Polacca

Pima County

Tucson, *Convento Site*.

Yavapai County

Copper Basin Archeological District, Prescott National Forest.

Yuma County

Eagle Tail Mountains Archeological Site.

ARKANSAS

Archeological Sites, Black River Watershed.

Clay County

Site 3CY34, Little Black River Watershed.

Craighead County

Mangrum Site (State Site Number 3CG636).

Faulkner County

Site 3WH145, E fork of Cadron Creek Watershed (also in White county).
Sites 3VB49-3VB51, N fork Cadron Creek Watershed.

Hempstead County

Archeological Sites in Ozan Creeks Watershed.

Lonoke County

Scott vicinity, *William S Pemberton House*.

Ouachita County

Camden, Old Post Office, Washington St.

Poinsett County

Riverside Site (State Site Number 3P0395).

CALIFORNIA

Archeological Sites, Buchanan Dam at Chowchilla River.

Alpine County

Woodsford vicinity, *Archeological Site 4-Alp-105*.

Amador County

Amador City, 35 mi. SE of Sacramento.

Benito County

Chalone Creek Archeological Sites, Pinnacles National Monument

Calavras County

New Melones Historical District, New Melones Lake Project area, Stanislaus River (also in Tuolumne County).

Colusa County

Stoneyford vicinity, *Upper and Lower Letts Valley Historical District*, 12 mi. SW of Stoneyford.

Del Norte County

Chimney Rock, Six Rivers National Forest.
Doctor Rock, Six Rivers National Forest.
Peak No. 8, Six Rivers National Forest.

DEPARTMENT OF LABOR

Employment and Training Administration

[Field Memorandum 323-77]

PUBLIC SERVICE EMPLOYMENT PROGRAMS BUILDUP

Assessment

In order to ensure an effective implementation and buildup of public service jobs under the Comprehensive Employment and Training Act (CETA) of 1973, as amended, the Department of Labor has developed procedures to be followed in assessing prime sponsor title II and title VI performance and reallocating funds within and between prime sponsor jurisdictions should that prove necessary.

The entire text of Field Memorandum No. 323-77 is published here to inform all interested parties of the Department's implementation procedures.

Signed at Washington, D.C., this 13th day of July 1977.

ROBERT J. MCCONNON,
Deputy Assistant Secretary for Employment and Training Administration.

Directive: Field Memorandum No. 323-77.
To: All regional administrators.
From: Floyd E. Edwards, Administrator, Field Operations.
Subject: Assessment of public service employment programs buildup.

JUNE 23, 1977.

1. *Purpose.* To outline procedures to be followed in the review of implementation plans for the title II and title VI buildup, including procedures for assessing performance and reallocating funds within and among prime sponsor jurisdictions should that prove necessary.

2. *References.* CETA section 606 and CETA regulations section 99.73; Field Memorandum Nos. 124-77 and 231-77.

3. *Background.* The creation of an additional 415,000 public service jobs under titles II and VI is one of the major components of President Carter's Economic Stimulus Package. The success of this effort depends on the speed at which these additional jobs are created. The maximum impact of this program can therefore only be realized if all prime sponsors fully implement their programs according to the schedules approved by regional offices.

Rescissions: TWX No. TD 7-191, dated May 23, 1977, FM No. 256-77.

Expiration date: September 30, 1978.

The Department of Labor not only has the responsibility to assess prime sponsor performance under both these titles, but also is provided the authority to reallocate funds.

The authority for title VI allocations is contained in section 606 of the Act. This section provides that:

"The Secretary is authorized to make such allocations as he deems appropriate of any amount of any allocation under this title to the extent that the Secretary determines that an eligible applicant will not be able to use such amount within a reasonable period of time. Any such amount may be reallocated only if the Secretary has provided thirty days' advance notice to the prime sponsor for such area and to the Governor of the State of the proposed reallocation, during which period of time the prime sponsor and the Governor may submit comments to the Secretary. After considering any comments submitted during such period of time, the Secretary shall notify the Governer and affected prime sponsors of any decisions to reallocate funds, and shall publish any such decision in the FEDERAL REGISTER. In reallocating any such funds, the Secretary shall give priority first to other areas within the same State and then to areas within other States, taking into account the number of eligible unemployed individuals (as described in section 608) in such area."

4. *Assessment procedures.* It is necessary to implement extensive assessment procedures in order to assure that prime sponsors achieve a 100 percent implementation of the expanded public service employment program. Therefore, the following procedures shall be initiated and maintained until further notice.

(a) Regional office staff shall review prime sponsor implementation plans for both titles II and VI.

(b) Regional office staff are to review the weekly PSE Expansion Report submitted by prime sponsors in order to assess the status of program enrollment in titles II and VI during the implementation period of the program.

(c) Where a prime sponsor's actual title II or VI increase in total enrollment between May 12, 1977, and the end of month being reviewed is not at least 70 percent of its respective planned increase in enrollment between May 12, 1977, and the end of month being reviewed, a determination shall be made that the prime sponsor is not operating in accordance with its approved plan. In these cases, the regional office shall make a further determination as to what corrective actions, if any, shall be made, and what technical assistance, if necessary should be provided. In addition, the regional office will orally and in writing notify the prime sponsor of any corrective actions and/or technical assistance which will be necessary to raise the level of prime sponsor performance, and that continued substandard performance could result in a reallocation of funds. To ensure that corrective action is being implemented, it is recommended that regional office staff visit not less than once every two weeks those prime sponsors whose actual title II or title VI performance is under 70 percent of the plan or whose weekly reports indicate that it is unlikely that they will be able to achieve 70 percent of its planned enrollment level.

5. *Title VI reallocation procedures.* (a) At the end of July 1977, the second full calendar month of implementation, the regional office shall notify in writing all prime sponsors, (as well as appropriate chief elected officials) who are not at least achieving 70 percent of their approved title VI hiring goal that funds shall be reallocated in 30 days if performance is not brought up to at least 70 percent of the planned enrollment level. This communication shall state explicitly what the prime sponsor must do to avoid reallocation of funds. At the same time the regional office shall notify in writing the respective Governor of the intent to reallocate funds unless the prime sponsor's performance improves.

Regional office staff shall also identify, during the end of the second month reviews, those prime sponsors who are over 70 percent of the plan but who have not shown any significant increased effort to come closer to meeting its approved hiring goals during the past month. If necessary, consideration should also be given to sending reallocation notification letters for underperformance in title VI to these prime sponsors and appropriate chief elected officials (and to the appropriate Governors). At the very least, such prime sponsors should be advised that if performance does not substantially improve (by at least 10 percent) during the third month of operation, it may become necessary to issue the 30-day reallocation notice.

Whenever a reallocation notice is sent we are also recommending that the Regional Administrator personally call appropriate chief elected officials to make them aware of impending actions. Where it has further been determined that a prime sponsor may not be able to make the necessary corrective actions required by the regional office, a technical assistance team, including a senior regional office staff member, UI, ES representatives etc., should make an on-site visit to provide any assistance possible.

(b) At the end of August 1977, the third month, the regional office shall review the third month's performance of those prime sponsors who have received title VI reallocation notices, their efforts to bring their performance up to the minimally required level, as well as any comments received from prime sponsors and the Governor on the proposed reallocation of funds. If a prime sponsor has neither achieved the minimally required hiring level nor has a likelihood of substantially improving performance, the regional office shall immediately deobligate those funds which they have determined the prime sponsor will not effectively use during the remaining period of the grant, and reallocate those funds to other appropriate prime sponsors.

(c) Regional offices shall not proceed with the 18-month modification for any prime sponsor which has been given a 30-day reallocation notice until the reallocation issue has been resolved. The bilateral modification should be revised as necessary to accommodate any changes in the procedures for timing necessitated by the possibility of reallocation. Further, regional offices should consider withholding approval of the 18-month modification for those prime sponsors who have been advised that a reallocation of funds is possible if there was not a substantial increase in performance (at least 10 percent) during the third month of operation. Such an action would negate the need for a formal deobligation of funds if a reallocation proves necessary. A revision of the bilateral modification may be necessary in these cases also.

(d) The assessment and reallocation procedures shall be followed at a minimum at the end of the third, sixth and ninth month of implementation, with prime sponsors notified of the intent to reallocate title VI funds at the end of the following month of operation if there is no significant improvement in performance.

(e) Reallocation of Funds to an Alternative Prime Sponsor. Where a determination has been made to reallocate title VI funds from a prime sponsor, the Regional Administrator (RA) should first give consideration to having the Governor or another appropriate grantee operate the program in the same area served by the prime sponsor from which the funds are being reallocated.

(f) Reallocation of Funds Among Prime Sponsors. Where a reallocation is desired and it is determined by the RA that an alternative prime sponsor or the Governor would also be unable to use the funds in the same area, the RA should give first consideration to reallocating funds to prime sponsors to serve other areas located within the same State and then to prime sponsors within other States. Distribution should be made taking into account the number of unemployed persons in those prime sponsor jurisdictions considered for additional funding. Only those prime sponsors which have proven ability to effectively utilize title II and title VI funds within their locale and which are at least equal to or near the monthly enrollment levels included in their plans should be considered by the RA for such additional allocations.

(g) Reallocation Within a Prime Sponsor's Jurisdiction. When it is determined that poor performance is due to the performance of a program agent or a program agent has indicated that there are not sufficiently eligible persons to fill available jobs, and other areas within the same prime sponsor jurisdiction both will be able to effectively utilize additional funds and have a need for additional funds, the regional office may authorize the prime sponsor to make appropriate adjustments to program agent suballocations. The amount of any adjustment to a program agent's allocation should be determined in conjunction with the prime sponsor and the effected program agent.

(h) Immediate Reallocation of Funds to an Alternative Prime Sponsor. If at any time prior to the completion of the first two full months of implementation the prime sponsor agrees to a reallocation because of an inability to use available funds, the procedures outlined above can be begun immediately. However, the prime sponsors and the Governor must be provided a 30-day period in which to submit comments. After considering comments submitted, the RA shall notify the Governor and affected prime sponsors of any decision to reallocate funds.

6. *Title II allocation procedures.* The procedures for assessing title VI grants described in 5 above should be carried out also for title II grants with the exception that should reallocation of title II funds become necessary, the procedures set forth in section 98.11 of CETA regulations will apply.

7. *Reporting of intent to reallocate.* Regional officers should include as part of the "Expanded Public Service Employment Item" in the Significant Activities Report any actions taken with regard to reallocations. Specifically, the national office should be alerted whenever a prime sponsor has been notified in writing of a proposed reallocation of funds. In subsequent weekly reports, the status of each of these prime sponsors receiving letters should be provided, including any decision to reallocate funds. The national office will make appropriate arrangements to publish decisions to reallocate funds in the FEDERAL REGISTER.

8. *Action required.* (a) Regional Administrators should immediately implement these procedures.

(b) Prime sponsors should be informed of these procedures and of the intent to reallocate funds should that prove necessary.

9. *Inquiries.* Questions may be directed to either Hugh Davies or Jack Rapport on 8-376-7006.

FARMWORKER ECONOMIC STIMULUS PROGRAMS

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice announces the plans of the Employment and Training Administration for allocating funds for the Farmworker Economic Stimulus Porgram and the availability of "Solicitation for Grant Applications."

FOR FURTHER INFORMATION CONTACT:

Mr. Paul A. Mayrand, Chief, Division of Farmworker Programs, Room 7122, 601 D Street NW., Washington, D.C. 20213.

SUPPLEMENTARY INFORMATION: Pursuant to the Economic Stimulus Appropriation Act of 1977, the Division of Farmworker Programs of the Department of Labor announces two initiatives under the Farmworker Economic Stimulus Program (ESP) to support efforts to improve the unemployment and underemployment problems facing seasonal farmworkers. The two categories of activity to be funded at this time are: (1) Residential Skill Training and (2) Employment and Training Coordinated with Rural Economic Development Activities.

The ESP initiatives may be operated by private nonprofit organizations, prime sponsors under title I of CETA, and other public agencies. Technical and vocational institutes, and other training centers, including Job Corps may operate residential skill training.

The above eligible applicants are herein invited to submit innovative proposals in response to a competitive

Solicitation for Grant Award (SGA) announcement made by the Division of Farmworker Programs (DFP). The SGA will contain detailed information and materials necessary for submission of proposals.

SGAs will be available on or about August 8, 1977, for the two program categories. The SGA guidelines will be sent to eligible applicants on request. Requests must indicate which of the two SGA initiatives the applicant desires. SGAs will be available only on written request submitted to the above address. Telephone requests will not be honored. Requestors should furnish two self-addressed gummed labels with the written request for SGA.

Proposals in response to the SGA must be received by the Department at the above address by September 8, 1977, or within 30 days of the date SGAs become available, whichever is sooner. Review panels will be convened in September with grant contract signing beginning November 1, 1977.

Proposals will be evaluated on the basis of objective criteria by a panel composed of employment and training specialists from the Department of Labor and representatives of other appropriate Federal agencies.

Signed in Washington, D.C., this 20th day of July, 1977.

LAMOND GODWIN,
Administrator, Office of National Programs.

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of Labor under section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, has instituted investigations pursuant to section 221(a) of the Act and 29 CFR 90.12.

The purpose of each of the investigations is to determine whether absolute or relative increases of imports of articles like or directly competitive with articles produced by the workers' firm or an appropriate subdivision thereof have contributed importantly to an absolute decline in sales or production, or both, of such firm or subdivision and to the actual or threatened total or partial separation of a significant number or proportion of the workers of such firm or subdivision.

Petitioners meeting these eligibility requirements will be certified as eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act in accordance with the provisions of Subpart B of 29 CFR Part 90. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

Pursuant to 29 CFR 90.13, the petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 12, 1977.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than August 12, 1977.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Bureau of International Labor Affairs, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, D.C. 20210.

Signed at Washington, D.C., this 18th day of July 1977.

MARVIN M. FOOKS,
Director, Office of Trade Adjustment Assistance.

CHRISTY FASHIONS

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1895: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 24, 1977 in response to a worker petition received on March 24, 1977 which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing women's blouses at Christy Fashions, Glen Lyon, Pennsylvania.

The notice of investigation was published in the FEDERAL REGISTER on April 12, 1977 (42 FR 19175). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Christy Fashions, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, the investigation revealed that the first and second criteria have not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Christy Fashions, a contractor located in Glen Lyon, Pennsylvania, began to produce women's blouses in May 1975. The average number of production workers employed at Christy Fashions increased 15.9 percent in the last eight months of 1976 compared to the same period of 1975, and further increased 11.1 percent in the first four months of 1977 compared to the same period of 1976. There is no indication that current workers are threatened with any involuntary separations.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED

Production at Christy Fashions has continually increased since May 1975. In the last eight months of 1976, production increased 24.7 percent compared to the same period of 1975. Production further increased 38.0 percent in the first four months of 1977 compared to the same period of 1976.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers at Christy Fashions, Glen Lyon, Pennsylvania, have not become totally or partially separated and

that sales or production of women's blouses at Christy Fashions have not decreased as required in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 15th day of July 1977.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[TA-W-1988]

A. E. NETTLETON CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1988: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 18, 1977, in response to a worker petition received on April 18, 1977, which was filed by Local 63 of the United Shoe Workers of America on behalf on behalf of workers and former workers producing men's dress and casual footwear at the A. E. Nettleton Co., Syracuse, N.Y.

The notice of investigation was published in the FEDERAL REGISTER on April 29, 1977 (42 FR 21872). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the A. E. Nettleton Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of the Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the criteria have been met.

SIGNIFICANT TOTAL AND PARTIAL SEPARATIONS

Employment of production workers at the A. E. Nettleton Co. declined by 13.6 percent in 1975 compared to 1974. Employment increased by 12.7 percent in 1976 compared to 1975 but declined by 12.3 percent in the period July–December 1976 compared to the same period in 1975. Employment declined by 13.6 percent in the period January–April 1977 compared to the same period in 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of men's dress and casual footwear with leather uppers, in terms of quantity at the A. E. Nettleton Co. declined by 15.5 percent in 1976 compared to 1975. Sales declined in the period July-December 1976 by 19.2 percent compared to the same period in 1975. Sales declined by 6.9 percent in the first quarter of 1977 compared to the first quarter of 1976.

INCREASED IMPORTS

Imports of men's dress and casual footwear with leather uppers were recorded at 30.3 million pair in 1972. Imports increased to 31.3 million pair in 1973 and then declined to 29.7 million pair in 1974. Imports increased to 33.2 million pair in 1975 and increased by 22.9 percent in 1976 to 40.8 million pair.

The ratio of imports to domestic production of men's dress and casual footwear with leather uppers was recorded at 44.3 percent in 1972. The ratio was recorded at 46.7 percent in 1973, 47.8 percent in 1974, 54.7 percent in 1975 and 63.5 percent in 1976.

CONTRIBUTED IMPORTANTLY

Customers of A. E. Nettleton Co. indicated that they had increased purchases of imported men's dress and casual footwear with leather uppers while reducing purchases from A. E. Nettleton Co.

A. E. Nettleton Co. began importing men's dress and casual footwear with leather uppers in 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with men's dress and casual footwear with leather uppers produced at the A. E. Nettleton Co., Syracuse, N.Y., contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Syracuse, N.Y. plant of A. E. Nettleton Co. who became totally or partially separated from employment on or after June 26, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C., this 25th day of July 1977.

GLORIA S. PRATT,
Director, Office of Foreign Economic Policy.

AEGIS PRINT WORKS, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1698: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 2, 1977, in response to a worker petition received on February 22, 1977, which was filed by the Machine Printers and Engravers Association on behalf of workers and former workers printing and finishing fabric at Aegis Print Works, Inc., Woodridge, N.J.

The notice of investigation was published in the FEDERAL REGISTER on March 11, 1977 (42 FR 13627). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Aegis Print Works, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated.

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely.

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (2) has not been met.

Aegis Print Works was incorporated in August 1975 as a commission printer. Aegis occupies 100,000 square feet in a one story plant in Woodridge, N.J. Both the administrative offices and production facilities of Aegis are located at the Woodridge plant. Aegis receives greige goods (unfinished fabric) from converters, prints and finishes the fabric, and returns it to the converters, who in turn sell the fabric to apparel manufacturers. Aegis prints and finishes all types of fabric.

Production at the Woodridge plant began in December 1975. All production is to order and production therefore equals sales. Production at the plant increased by 12 percent, 59 percent, and 54 percent in the second, third, and fourth quarters of 1976 compared to the previous quarters. Production increased 160.7 percent in the first quarter of 1977 compared to the first quarter of 1976.

The petition alleges that increased imports of apparel adversely affected production and employment at Aegis Print Works, Inc. Imported wearing apparel cannot be considered to be like or directly competitive with printed fabric. Imports of fabric must be considered in determining import injury to workers producing printed fabric.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that sales and production have not decreased as required in Section 222 of the Trade Act of 1974. The petition is, therefore denied.

Signed at Washington, D.C., this 27th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1700]

AIRCO SPEER ELECTRONICS

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1700; Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 3, 1977, in response to a worker petition received on March 1, 1977, which was filed on behalf of divisional office personnel at the St. Marys, Pa. plant of Airco Speer Electronics.

The notice of investigation was published in the FEDERAL REGISTER on March 11, 1977 (42 FR 13628). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Airco Speer Electronics, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The Department's investigation revealed that all four criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of Airco Speer's divisional office personnel in St. Marys, Pa., decreased 10.0 percent in the first quarter of 1977 compared to the first quarter of 1976, after remaining at a constant level during 1974-1976. The decline in employment occurred when the divisional offices were transferred from the St. Marys location to the firm's Bradford, Pa. plant.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Company sales of carbon composition resistors decreased 33.2 percent in 1975 compared to 1974, before increasing 1.2 percent in 1976 compared to 1975. In the first quarter of 1977, sales declined 15.9 percent compared to the first quarter of 1976.

Production of carbon composition resistors at the Bradford plant declined 63.5 percent in 1975 compared to 1974. Production ceased in February 1976.

INCREASED IMPORTS

U.S. imports of fixed resistors increased from 2118.0 million units in 1972 to 4175.6 million units in 1974, before decreasing to 2287.9 million units in 1975. Imports of these articles then increased 87.9 percent in 1976 compared to 1975, to 4299.9 million units.

Company imports of carbon composition resistors decreased in 1975 compared to 1974, before increasing 59.0 percent in 1976 compared to 1975. Imports further increased 15.8 percent in the first quarter of 1977 compared to the first quarter of 1976.

CONTRIBUTED IMPORTANTLY

The production of carbon composition resistors was shifted from the Bradford, Pa. plant of Airco Speer Electronics to its plant in Singapore. The transfer was completed in February 1976, resulting in the separation of most production workers at the Bradford plant. Workers at the Bradford plant have been certified as eligible (TA-W-64). The transfer of production overseas necessitated a reduction in divisional office personnel at St. Marys, which occurred during February-June 1977 when the divisional offices were transferred from St. Marys to Bradford.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports like or directly competitive with carbon composition resistors formerly produced at the Bradford, Pa. plant of Airco Speer Electronics contributed importantly to the total or partial separation of divisional office personnel at the St. Marys, Pa. plant of the firm. In accordance with the provisions of the Act, I make the following certification:

All divisional office personnel of the St Marys, Pa. plant of Airco Speer Electronics who became totally or partially separated from employment on or after February 25, 1977, and before June 5, 1977, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 27th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-22168 Filed 8-1-77;8:45 am]

[TA-W-1500]

BETHLEHEM STEEL CORP.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1500: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 15, 1976, in response to a worker petition received on December 15, 1976, which was filed by the United Steelworkers of America on behalf of workers and former workers producing reinforcing bars at the Seattle, Wash., plant of Bethlehem Steel Corp.

The notice of investigation was published in the FEDERAL REGISTER on January 18, 1977 (42 FR 3367). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Bethlehem Steel Corp., its customers, the U.S. International Trade Commission, the U.S. Department of Commerce, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average annual employment of production workers engaged in the production of reinforcing bars at the Seattle, Wash., plant declined 10 percent in 1976 compared to 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Sales of reinforcing bars decreased in quantity 25 percent in 1976 compared to 1975,

Production decreased 19 percent in quantity in 1976 compared to 1975.

INCREASED IMPORTS

U.S. imports of reinforcing bars decreased in 1973 to 286.4 thousand net tons from 358.2 thousand net tons in 1972. In 1974 imports increased to 477.5 thousand net tons, decreased in 1975 to 141.9 thousand net tons, then increased in 1976 to 192.2 thousand net tons.

The ratio of imports to U.S. shipments of reinforcing bars decreased to 5.6 percent in 1973 from 8.0 percent in 1972. In 1974 this ratio increased to 9.5 percent, decreased to 3.9 percent in 1975, then increased to 5.0 percent in 1976.

In the seven western states steel market principally served by the Seattle plant of Bethlehem Steel, the ratio of imports of concrete reinforcing bars to domestic shipments increased from 8.4 percent in 1975 to an estimated 14.3 percent in 1976.

CONTRIBUTED IMPORTANTLY

The Department conducted a survey of reinforcing bar customers of the Seattle plant. One sizeable customer sharply decreased purchases of reinforcing bars from Bethlehem and began to buy imports for the first time in 1976. Other customers that purchase imported reinforcing bars decreased purchases from Bethlehem relative to the decline in imported purchases. Customers indicated an overall impact by imports affecting sales and prices of domestic reinforcing bars in the market served by the Bethlehem plant.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with reinforcing bars produced at the Seattle, Wash., plant of Bethlehem Steel Corp. contributed importantly to the total or partial separation of workers at that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Seattle, Wash., plant of the Bethlehem Steel Corp. engaged in employment related to the production of concrete reinforcing bars, including yard and transportation workers, who became totally or partially separated from employment on or after November 15, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C., this 27th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-22169 Filed 8-1-77;8:45 am]

[TA-W-1838]

"BRONCO BILL II"

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1838: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 17, 1977, in response to a worker petition received on March 17, 1977, which was filed on behalf of workers and former workers engaged in shrimp catching on the trawler *Bronco Bill II*, Port Isabel, Texas.

The notice of investigation was published in the FEDERAL REGISTER on April 5, 1977 (42 FR 18158). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the trawler *Bronco Bill II* and its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, criterion (4) has not been met.

Bronco Bill II's only customer purchases all the shrimp that Bronco Bill II is able to supply at the highest bid offered for each day's landings. This price bid and paid for shrimp has increased each year since 1974. The boat's customer only purchases imported shrimp when Bronco Bill II and other domestic suppliers are unable to meet the customer's requirements.

The Department's investigation has revealed that three major factors have affected the shrimp catch in 1976 and the first quarter of 1977: (1) the shortage of shrimp available in U.S. coastal waters of the Gulf of Mexico; (2) the restrictions imposed by the Mexican government with respect to fishing within the 200 mile offshore limits established in Mexico in 1976; and (3) unusually adverse weather conditions in the Gulf of Mexico during the winter months of November 1976 to March 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that imports of articles like or directly competitive with shrimp caught and landed by the trawler *Bronco Bill II*, Port Isabel, Tex., have not contributed importantly to the total or partial separations of workers of that trawler as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 27th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-22170 Filed 8-1-77;8:45 am]

[TA-W-1689]

BROWN SHOE CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1689: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 1, 1977 in response to a worker petition received on February 14, 1977 which was filed by three workers on behalf of workers and former workers producing women's shoes at the Potosi, Mo. plant of the Brown Shoe Company.

The notice of investigation was published in the FEDERAL REGISTER on March 11, 1977 (42 FR 13628). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Brown Shoe Company, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (2) has not been met.

Sales of women's shoes, representing the wholesale value of production and adjusted for price increases, increased 55.8 percent from 1975 to 1976. Production of women's shoes at the Potosi plant increased 77.5 percent in quantity from 1975 to 1976. Production quantities increased in each quarter of 1976 com-

pared to the same quarter of the previous year.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that sales and production have not declined at the Potosi, Missouri plant of the Brown Shoe Company as required for certification under Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 22nd day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-22171 Filed 8-1-77;8:45 am]

[TA-W-1714]

CRESTLANE CLOTHES, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1714: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 3, 1977, in response to a worker petition received on February 23, 1977, which was filed by workers and former workers producing men's suits and sportcoats at Crestlane Clothes, Inc., New York, N.Y.

The notice of investigation was published in the FEDERAL REGISTER on March 15, 1977 (42 FR 14185). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Crestlane Clothes, Inc., the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, criterion (1) and criterion (4) have not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment increased in 1976 compared to 1975 and remained constant in the first quarter of 1977 compared to the first quarter of 1976.

CONTRIBUTED IMPORTANTLY

Customers of Crestlane Clothes, Inc., surveyed, did not purchase imports of men's suits and sportcoats. Customers decreased purchases from Crestlane while increasing purchases from other domestic sources.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with men's suits and sportcoats produced at Crestlane Clothes, Inc., New York, N.Y., did not contribute importantly to the total or partial separations of the workers of that firm.

Signed at Washington, D.C., this 27th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-22172 Filed 8-1-77;8:45 am]

[TA-W-2072]

EMHART INDUSTRIES, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-2072: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 16, 1977, in response to a worker petition received on May 16, 1976, which was filed by the United Automobile Workers on behalf of workers and former workers producing glass making machinery at the Windsor, Conn., plant of the Hartford Division of Emhart Industries, Inc.

The notice of investigation was published in the FEDERAL REGISTER on May 24, 1977 (42 FR 26481). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Hartford Division of Emhart Industries, Inc., and the United Automobile Workers.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely, and

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separation, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (1) has not been met.

The Windsor, Conn., plant of the Hartford Division of Emhart Industries, Inc., produces glass making machinery.

Pursuant to the requirements of 29 CFR 90.2 total separations must be equivalent to a total unemployment of five percent or 50 workers, whichever is less. Evidence developed in the Department's investigation revealed that total separations which occurred during the period of possible coverage amounted to less than 5 percent of the workforce employed at the Windsor, Conn., plant. The total number of workers experiencing separations during the period May 6, 1976, one year prior to the signature date of the petition, to the present was less than 50 workers.

Pursuant to the requirements of 29 CFR 90.2, "partial separations" means that the workers' hours of work have been reduced to 80 percent or less of the workers' average weekly hours at the firm or appropriate subdivision thereof. Evidence developed in the Department's investigation revealed that the workers' average weekly hours of work have not been reduced to less than 80 percent of their average weekly hours from May 6, 1976, one year prior to the signature date of the petition, to the present.

The Hartford Division of Emhart Industries, Inc., indicated they had no plans to lay off additional workers at the Windsor, Conn., plant. Therefore, no threat of total or partial separation is evident.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers at the Windsor, Conn. plant of the Hartford Division of Emhart Industries, Inc., have not become totally or partially separated, nor threatened to become separated, as required for certification in Section 222 of the Trade Act of 1974.

Signed at Washington D.C., this 25th day of July 1977.

GLORIA S. PRATT,
Director, Office of Foreign Economic Policy.

[FR Doc.77-22173 Filed 8-1-77;8:45 am]

[TA-W-1905]

EMPIRE DRESS CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1905: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 24, 1977, in response to a worker petition received on March 24, 1977, which was filed by the International Ladies' Garment Workers' Union on behalf of workers and former workers producing women's dresses at Empire Dress Co., Wilkes-Barre, Pa.

The notice of investigation was published in the FEDERAL REGISTER on April 12, 1977 (42 FR 19175). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Empire Dress Co., the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether the other criteria have been met, the investigation revealed that the first criterion has not been met.

The Department's investigation revealed that the average number of production workers employed at Empire Dress increased 2.1 percent in 1976 compared to 1975, and further increased 2.6 percent in the first four months of 1977 compared to the same period of 1976. The average weekly hours worked by those production workers increased 1.2 percent in 1976 compared to 1975, and further increased 3.1 percent in the first four months of 1977 compared to the same period of 1976.

There is no indication that current workers are threatened with any involuntary separations.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers at Empire Dress Co., Wilkes-Barre, Pa., have not become or threatened to become totally or partially separated at Empire Dress as required for certification in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 22d day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-22174 Filed 8-1-77;8:45 am]

[TA-W-1880]

FLORY FASHIONS, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1880: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 23, 1977, in response to a worker petition received on March 23, 1977, which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing women's dresses at the Swoyerville, Pa., plant of Flory Fashions, Inc.

The notice of investigation was published in the FEDERAL REGISTER on April 12, 1977 (42 FR 19176). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Flory Fashions, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause

Regardless of whether any other criteria have been met, the investigation has revealed that criteria (1) and (2) have not been met.

SIGNIFICANT TOTAL OF PARTIAL SEPARATIONS

Employment of production workers decreased 18.2 percent in 1975 compared with 1974 and increased 52.8 percent in 1976 compared with 1975. Employment increased each quarter of 1976 compared with the respective quarters of 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Flory is a contractor that produces on order. Therefore sales equals production. Sales of women's dresses by Flory Fashions in terms of value decreased 8.1 percent in 1976 compared with 1974 and increased 96.3 percent in 1976 compared with 1975. Sales increased each quarter of 1976 compared with the respective quarters of 1975.

CONCLUSION

After careful review of the facts obtained in the investigation, it is concluded that sales of women's dresses have not declined and that separations of workers have not occurred at Flory Fashions, Inc., Swoyerville, Pa., as required for a certification under Section 222 of the Trade Act of 1974.

Signed at Washington D.C., this 27th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1328]

GLAUBER VALVE CO., INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1328: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on November 30, 1976 in response to a worker petition received on November 30, 1976 which was filed by the United Steelworkers of America on behalf of workers and former workers producing valves and fittings at the Omaha, Nebraska plant of Glauber Valve Co., Inc.

The Notice of Investigation was published in the FEDERAL REGISTER on December 14, 1976 (41 FR 54557). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Glauber Valve Co., Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or porportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat, thereof, and to decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, the investigation has revealed that criterion (4) has not been met.

The Department conducted a survey of customers of Glauber Valve Co. Only one of the customers contacted reported any purchases of imported valves or fittings and this customer did not switch from Glauber's product to competitive imports. All of the other customers contacted reported that they did not buy valves or fittings from imported sources.

A management decision by Glauber resulted in the transfer of production from the company's Omaha plant to a new plant in Piggot, Ark. Total company production from both plants increased 70 percent in the first nine months of 1976 compared to the first nine months of 1975. Production in the first nine months of 1976 exceeded full year 1975 production.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with valves and fittings produced at the Omaha, Nebr. plant of Glauber Valve Co., Inc., have not contributed importantly to the total or partial separation of the workers at that plant as required for certification under the Trade Act of 1974.

Signed at Washington, D.C., this 27th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1949]

H. W. GOSSARD CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the result of TA-W-1949: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on April 4, 1977, in response to a worker petition received on April 4, 1977, which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing ladies' brassieres, girdles, and corsets at the Ishpeming, Mich. plant of H. W. Gossard Co., Chicago, Ill. The petition was expanded to cover all workers producing ladies' brassieres, girdles, and corsets in the Body Foundation Division of H. W. Gossard Co. This includes plants located in Logansport, Ind.; Sullivan, Ind.; Piggott, Ark.; and a warehouse located in Batavia, Ill.

The Notice of Investigation was published in the FEDERAL REGISTER on April 15, 1977 (42 FR 19938). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of H. W. Gossard Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

SIGNIFICANT PARTIAL OR TOTAL SEPARATIONS

The average number of production workers at the Ishpeming plant declined 1 percent from 1974 to 1975 and declined 10 percent from 1975 to 1976. All employment was terminated when the plant closed in December 1976.

The average number of production workers at the Logansport plant declined 13 percent from 1974 to 1975, declined 7 percent from 1975 to 1976, and declined 39 percent in the first quarter of 1977 compared to the first quarter of 1976.

The average number of production workers at the Sullivan plant declined 27 percent from 1974 to 1975, declined 27 percent from 1975 to 1976, and remained stable in the first quarter of 1977 compared to the first quarter of 1976. All employment was terminated when the plant closed in June 1977.

The average number of production workers at the Piggott plant declined 12 percent from 1974 to 1975 and increased 14 percent from 1975 to 1976. Employment declined 2 percent in the last half of 1976 compared to the last half of 1975, and declined 19 percent in the first quarter of 1977 compared to the first quarter of 1976.

The average number of workers at the Batavia warehouse declined 15 percent from 1974 to 1975 and declined 2 percent from 1975 to 1976.

Workers in the Body Foundation Division are not identifiable by product line.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Total production of brassieres in the Body Foundation Division increased 36 percent from 1975 to 1976. Production declined 0.3 percent in the last three quarters of 1976 compared to the like period of 1975. Production declined 77 percent in the first quarter of 1977 compared to the first quarter of 1976.

Total production of corsets and girdles in the Body Foundation Division declined 23 percent from 1975 to 1976 and declined 53 percent in the first quarter of 1977 compared to the first quarter of 1976.

Production at the Ishpeming plant declined 2 percent from 1975 to 1976. Production ceased in December 1976. In 1976, unit production consisted of 97 percent brassieres and 3 percent girdles and corsets.

Production at the Logansport plant declined 4 percent from 1975 to 1976 and declined 52 percent in the first quarter of 1977 compared to the first quarter of 1976. In 1976, unit production consisted of 72 percent girdles and corsets and 28 percent brassieres.

Ladies' sleepwear was produced at Sullivan until December 1976.[1] During 1976 production of sleepwear was phased out at Sullivan and replaced with production of brassieres.

Total unit production at Sullivan increased 17 percent from 1975 to 1976. Production of brassieres declined 3 percent in the first quarter of 1977 compared to the first quarter of 1976. Production ceased in June 1977.

The cutting plant at Piggott is an integrated part of production in the Body Foundation Division. Cuttings made at Piggot are shipped to sewing plants for assembly into finished garments.

All garments produced by Gossard are inventoried at the Batavia warehouse.

INCREASED IMPORTS

Imports of ladies' brassieres, bra-lettes and bandeaux increased absolutely and relative to domestic production in each year from 1972 through 1976. Imports increased 26 percent from 1975 to 1976 and increased 22 percent in the first quarter of 1977 compared to the first quarter of 1976. The ratios of imports to domestic production and consumption increased from 42.3 percent and 42.3 percent, respectively in 1975 to 50.3 percent and 52.2 percent, respectively in 1976.

Imports of ladies's corsets and girdles declined absolutely and relative to domestic production from 1972 to 1973, and then increased absolutely and relatively in each year from 1974 through 1976. Imports increased 69 percent from 1975 to 1976 and increased 13 percent in the first quarter of 1977 compared to the first quarter of 1976. The ratios of imports to domestic production and consumption increased from 3.1 percent and 3.1 percent, respectively in 1975 to 5.3 percent and 5.2 percent, respectively in 1976.

CONTRIBUTED IMPORTANTLY

Company imports of ladies' brassieres increased 155 percent from 1975 to 1976. The proportion of Gossard's brassiere sales represented by imported brassieres increased from 1975 to 1976. Simultaneously, production of brassieres at Gossard's domestic plants declined.

Customers of Gossard were surveyed regarding their purchases of ladies girdles and corsets. Over 50 percent of the customers contacted purchase imported girdles and corsets and reduced purchases from Gossard in 1976 compared to 1975.

Total Body Foundation Division production of brassieres and of girdles and corsets declined in 1976. Production of body foundations at both the Ishpeming and Logansport plants declined from 1975 to 1976, however production of body foundations at the Sullivan plant did not begin until 1976. Production at Sullivan increased from 1975 to 1976, but began declining in 1977 and finally ceased in June 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with ladies' brassieres, girdles, and corsets produced at the Ishpeming, Mich.; Logansport, Ind.; Sullivan, Ind.; and Piggott, Ark. plants and the Batavia, Ill., warehouse of H. W. Gossard contributed importantly to the total or partial separations of the workers of these plants. In accordance with the provisions of the Act, I make the following certification:

All workers engaged in employment related to the production of ladies' brassieres, girdles, and corsets at the Ishpeming, Mich.; Logansport, Ind.; and Piggott, Ark. plants and the Batavia, Ill. warehouse of H. W. Gossard Co., Chicago, Ill., who became totally or partially separated from employment on or after March 12, 1976, and at the Sullivan, Ind. plant of H. W. Gossard Co., who became totally or partially separated from employment on or after January 1, 1977 are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Without regard to whether any of the other criteria have been met, the investigation has revealed that criterion (4) has not been met.

The Hyde Park Foundry & Machine Co. produces two products: iron rolls used as replacement parts for rolling mill equipment at steel plants are the principal product, and automobile body die holders (molds) used in the production of castings for automobile bodies.

The Department conducted a survey of customers of the Hyde Park plant and foundry accounting for 61.2 percent of sales in 1976. The survey revealed that customers who reduced purchases from Hyde Park Foundry & Machine Co. in 1976 had not switched to imports of competitive articles.

Some customers attributed the decrease in purchase of iron rolls to the level of demand for their own products.

The automobile body die holders were sold to only one customer and that contract was terminated. The company switched to another domestic producer.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of articles like or directly competitive with iron rolls and auto body die holders produced at the Hyde Park, Pa., plant and foundry of Hyde Park Foundry & Machine Co. have not contributed importantly to the total or partial separation of workers at the Hyde Park plant as required for certification under the Trade Act of 1974.

Signed at Washington, D.C., this 27th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

JONES AND LAUGHLIN STEEL CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1480: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 20, 1976, in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing hot and cold rolled carbon steel sheet and galvanized sheet at the Hennepin, Illinois plant of Jones and Laughlin Steel Corporation.

The Notice of Investigation was published in the FEDERAL REGISTER on January 7, 1977 (42 FR 1535). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Jones and Laughlin Steel Corp., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility

[TA-W-1816]

HYDE PARK FOUNDRY & MACHINE CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1816: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 21, 1977, in response to a worker petition received on March 17, 1977, which was filed by the United Steelworkers of America on behalf of workers and former workers producing iron rolls and automobile body die holders at the Hyde Park, Pa., plant of the Hyde Park Foundry & Machine Co.

The notice of investigation was published in the FEDERAL REGISTER on April 5, 1977 (42 FR 18158). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Hyde Park Foundry & Machine Co., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations or threat thereof; and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that although the third criterion has been met, the first, second, and fourth criteria have not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

The average number of production workers at the Hennepin Works increased 16.2 percent in the period January–November 1976, compared to the same period in 1975. Employment increased in each quarter of 1976 compared to the corresponding quarters in 1975.

The average number of hours worked by production employees increased 17.7 percent in the period January–November 1976, compared to the same period in 1975.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Total shipments at the Hennepin Works increased 51.3 percent in the period January through November 1976 compared to the same period in 1975. Shipments increased in each quarter of 1976 compared to the corresponding quarters in 1975.

Hot and cold rolled carbon steel sheet and galvanized sheet represented over 95 percent of total shipments by the Hennepin Works in 1976.

Total shipments of cold rolled sheet increased 55.8 percent in the period January through November 1976, compared to the same period in 1975.

Total shipments of hot rolled sheet increased 192.4 percent in the period January through November 1976, compared to the same period in 1975.

Total shipments of galvanized sheets increased 48.0 percent in the period January through November 1976, compared to the same period in 1975.

INCREASED IMPORTS

Imports of hot rolled carbon steel sheet decreased steadily from 1972 to 1975. Imports increased from 1,509.2 thousand short tons in 1975 to 1,635.9 thousand short tons in 1976. The import/shipment and import/consumption ratios decreased from 1972 to 1973 and then increased in 1974 and 1975 compared to the immediately preceding years. The import/shipment and import/consumption ratios decreased from 14.0 percent and 12.4 percent, respectively, in 1975 to 11.3 percent and 10.2 percent, respectively, in 1976.

Imports of carbon steel cold rolled sheets decreased from 1973 through 1975 and increased from 2,067.1 thousand short tons in 1975 to 2,350.7 thousand short tons in 1976. The import/shipment and import/consumption ratios decreased from 1972 to 1973 and increased in 1974 and 1975 compared to the immediately preceding years. The import/shipment and import/consumption ratios decreased from 16.5 percent and 14.2 percent, respectively, in 1975 to 13.2 percent and 11.7 percent, respectively, in 1976.

Imports of galvanized steel sheet and strip decreased both absolutely and relative to domestic shipments and consumption in 1973 compared to 1972 and then increased both absolutely and relatively in 1974 from 1973. Imports decreased 42.5 percent in 1975 from 1974 and then increased 98.6 percent from 739.0 thousand short tons in 1975 to 1,467.7 thousand short tons in 1976. The import/shipment and import/consumption ratios decreased from 21.0 percent and 17.6 percent, respectively, in 1974 to 19.9 percent and 16.7 percent, respectively, in 1975 and then increased to 28.3 percent and 22.2 percent, respectively, in 1976.

CONTRIBUTED IMPORTANTLY

Total shipments and employment at the Hennepin Works increased in 1976 from 1975. Hot and cold rolled carbon steel sheet and galvanized sheet represented over 95 percent of total shipments. Increased shipments of these products in 1976 were due primarily to increased demand for durable consumer products (automotive and household appliance markets).

Customers of the Hennepin plant who purchase imported galvanized and nongalvanized sheets indicated that imported sheets have not caused them to reduce purchases of these products from the Hennepin plant.

CONCLUSION

After careful review of the facts obtained in the investigation, it is concluded that increases of imports of articles like or directly competitive with hot and cold rolled carbon steel sheet and galvanized sheet produced at the Hennepin, Illinois plant of Jones and Laughlin Steel Corporation did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C., this 25th day of July 1977.

GLORIA S. PRATT,
Director, Office of Foreign Economic Policy.

[FR Doc.77-22179 Filed 8-1-77;8:45 am]

[TA-W-1559]

LEEMAR KNITTING MILLS, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-1559: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on January 10, 1977 in response to a worker petition received on that date which was filed on behalf of workers and former workers producing ladies' knit suits at Leemar Knitting Mills, Inc., Long Island City, New York. The petition was expanded to include workers at its affiliate, Marlee Trim, Inc., and its subsidiary, Winmore Knitting Mills, Ltd., both of Long Island City, New York.

The Notice of Investigation was published in the FEDERAL REGISTER on January 28, 1977 (42 FR 5452). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Leemar Knitting Mills, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974.

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or sudivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average total employment of Leemar declined 29 percent from 1974 to 1975 and declined 18 percent from 1975 to 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Leemar's production declined 12 percent from 1974 to 1975 and 16 percent from 1975 to 1976. Total sales declined 22 percent from 1974 to 1975 and 18 percent from 1975 to 1976.

INCREASED IMPORTS

Imports of women's misses' and children's suits, which includes ladies' suits such as those produced at Leemar, increased abolutely in each year from 1972 through 1975. Imports increased 6 percent from 1974 to 1975, and declined less than one percent from 1975 to 1976. The ratios of imports to domestic production and consumption declined from 12.2 percent and 10.9 percent, respectively, in 1975 to 11.6 percent and 10.4 percent, respectively, in 1976. Imports increased 35 percent in the first quarter of 1977 compared to the first quarter of 1976.

CONTRIBUTED IMPORTANTLY

In recent years in the women's apparel industry there has been a style trend away from suits toward the purchase of the individual "mix or match" articles which make up the suit. Consistent with this is that imports of ladies' blouses, skirts, vests, slacks, and clothes all increased in 1976.

Leemar produced ladies' suits exclusively for one customer. That customer was contacted by the Department of Commerce during their investigation regarding adjustment assistance. The customer indicated that a significant decline in sales in 1976 was in large part a result of the adverse impact of imports. This forced the customer to reduce purchases from Leemar.

Leemar produced ladies suits for distribution through retail stores. The Department of Commerce's contact with Leemar's sole customer revealed that these retail stores do purchase imports of the "like or directly competitive" items. Such imports did contribute to the decline in purchases by Leemar's customer and to the decline in sales at Leemar.

Since aggregate imports of like or directly competitive items are being imported into the United States in increased quantities, and on the basis of the finding made by the Department of Commerce, it is reasonable to conclude that imports adversely affected employment and sales at Leemar Knitting Mills, Inc.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports of articles like or directly competitive with ladies' knit suits produced at the Leemar Knitting Mills, Inc., contributed importantly to the total or partial separation of workers at Leemar and its affiliate and subsidiary. In accordance with the provisions of the Act, I make the following certification:

All workers at Leemar Knitting Mills, Inc., Marlee Trim Inc., and Winmore Knitting Mills, Ltd., Long Island City, New York who became totally or partially separated from employment on or after December 19, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 26th day of July 1977.

GLORIA G. PRATT,
Director, Office of Foreign Economic Policy.

[FR Doc.77-22180 Filed 8-1-77;8:45 am]

[TA-W-1739]

M & G SPORTSWEAR COMPANY, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1739: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 3, 1977 in response to a worker petition received on March 3, 1977 which was filed on behalf of workers and former workers producing boy's sportswear and outerwear at the Fall River, Massachusetts plant of M & G Sportswear Company, Inc.

The notice of investigation was published in the FEDERAL REGISTER on March 22, 1977 (42 FR 15477). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of M & G Sportswear Co., Inc., its customers, the Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales, production, or both, of the firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Average employment of production workers increased 23 percent from 1974 to 1975 and increased 19 percent from 1975 to 1976. Employment declined in the fourth quarter of 1976 compared to the same quarter of 1975. Employment declined 21 percent in the first quarter of 1977 compared to the first quarter of 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

All sales data was adjusted for price increases. Throughout the time period, boy's sportswear was produced and sold in the first and fourth quarters of the year, and outerwear was produced and sold in the second and third quarters. Sales of sportswear and outerwear increased 14.2 percent in value from 1974 to 1975, and increased 15.1 percent from 1975 to 1976. The value of sales increased 0.5 percent in the first quarter of 1977 compared to the first quarter of 1976. Sales declined 15.0 percent in value in the last six months of 1976 compared to the same period of the prior year.

Production data was not available.

INCREASED IMPORTS

Imports of men's and boy's tailored suits increased absolutely and relative to domestic production each year from 1972 to 1976. Imports increased 15 percent in quantity from 1975 to 1976. The ratio of imports to domestic production increased from 18.3 percent in 1975 to 20.0 percent in 1976.

Imports of men's and boy's outer coats and jackets increased absolutely from 1972 to 1973, and declined each year from 1973 to 1975. The quantity of imports increased 10 percent from 1975 to 1976. The ratio of imports to domestic production increased from 28.1 percent in 1975 to 31.3 percent in 1976.

CONTRIBUTED IMPORTANTLY

Sixty percent of the retail customers surveyed during the investigation decreased their purchases of outerwear from M & G and increased their import purchases from 1975 to 1976. Forty percent of the customers surveyed shifted their purchases of sportswear from M & G to imports from 1975 to 1976. M & G began purchasing imported sportswear on a contract basis in 1976. The value of imported sportswear in 1976 was equal to 17 percent of the value of the company's domestically-produced sales. In the first quarter of 1977, the value of imports equalled 15 percent of the company's domestically produced sales.

The company's loss in sales, to which imports were linked, occurred in the third and fourth quarters of 1976. The negative effect of sales on employment was felt in the succeeding quarters, so that employment declines occurred in the fourth quarter of 1976 and in the first quarter of 1977.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with boy's sportwear and outerwear produced at the Fall River, Massachusetts plant of M & G Sportwears Co., Inc. contributed importantly to the total or partial separation of the

workers of the plant. In accordance with the provisions of the Act I make the following certification:

All workers engaged in employment related to the production of boy's sportswear and outerwear at the Fall River, Massachusetts plant of M & G Sportswear Co., Inc. who became totally or partially separated from employment on or after July 1, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C., this 27th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[FR Doc.77-22181 Filed 8-1-77;8:45 am]

[TA-W-1697]

PARRA PRINT, INC.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1697: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on February 22, 1977 in response to a worker petition received on that date which was filed by the Machine Printers and Engravers Association on behalf of former workers printing and finishing fabric at Parra Print, Inc., Passaic, New Jersey.

The notice of investigation was published in the Federal Register on March 11, 1977 (42 FR 13627). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Parra Print, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all of the criteria have been met for Parra Print, Incorporated.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment of production workers at Parra Print, Inc. increased 24 percent from 1974 to 1975. Employment increased 10 percent in the first three quarters of 1976 compared to the like period in 1975, however after peak employment in February 1976 employment decreased steadily until all employees were terminated when the plant closed in August 1976.

SALES, PRODUCTION, OR BOTH, DECREASED ABSOLUTELY

Sales in value of the printing and finishing performed on greige goods by Parra Print, Inc. increased 84 percent from 1974 to 1975, then declined 30 percent in the first three quarters of 1976 compared to the same period in 1975.

Production in quantity (in yards) of the printing and finishing performed on greige goods by Parra Print, Inc. increased 123 percent from 1974 to 1975, then declined 49 percent in the first three quarters of 1976 compared to the same period in 1975. All production ceased in August 1976.

INCREASED IMPORTS

Imports of cotton broadwoven printcloth declined absolutely from 1972 to 1973, increased from 1973 to 1974, declined 10.5 percent from 1974 to 1975 and then increased 55.6 percent from 1975 to 1976. The ratios of imports to domestic production and consumption increased from 13.5 percent and 12.9 percent, respectively, in 1975 to 20.6 percent and 19.8 percent, respectively, in 1976.

Imports of man-made woven printed fabric declined absolutely from 1972 to 1973, increased from 1973 to 1974, declined .8 percent from 1974 to 1975 and then increased 23.5 percent from 1975 to 1976. The ratios of imports to domestic production and consumption remained less than one percent from 1972 through 1976.

CONTRIBUTED IMPORTANTLY

The petition alleges that increased imports of apparel adversely affected production and employment of Parra Print, Incorporated. Converters, who are customers of Parra Print stated that imports of apparel have been a factor in reduced business with Parra Print. Imported wearing apparel cannot be considered to be like or directly competitive with printed fabric. Imports of fabric must be considered in determining import injury to workers producing printed fabric.

Customers of Parra Print, Inc. are converters who buy greige goods and commission Parra Print to finish and print the fabric in accordance with apparel manufacturers' specifications. During the course of the investigation it was established that converters, in general, do not import printed or finished fabric. The Department's survey of apparel manufacturers, who are customers of the converters, revealed that manufacturers are importing printed or finished fabric for use in the production of men's and women's wearing apparel. The converters reported a growing trend towards manufacturers bypassing converters and purchasing finished fabric offshore or purchasing the imported finished fabric domestically, through foreign trading companies.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with fabric printed and finished at Parra Print, Incorporated, Passaic, New Jersey contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at Parra Print, Incorporated, Passaic, New Jersey who became totally or partially separated from employment on or after February 17, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Trade Act of 1974.

Signed at Washington, D.C., this 27th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1916]

SWEPCO TUBE CORP.

Certification Regarding Eligibilty To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1916: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 28, 1977, in response to a worker petition received on March 24, 1977, which was filed by the International Union of Electrical, Radio, and Machine Workers on behalf of workers and former workers producing stainless steel pipe at the Swepco Tube Corp. Clifton, N.J.

The notice of investigation was published in the FEDERAL REGISTER on April 12, 1977 (42 FR 19178). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Swepco Tube Corp., it customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Employment at the Swepco Tube Corp. declined 22 percent in 1976 compared to 1975 and declined 8 percent in the first quarter of 1977 compared to the first quarter of 1976.

SALES OR PRODUCTION, OR BOTH, HAVE DECREASED ABSOLUTELY

Production at the Swepco Tube Corp. declined 48 percent in 1976 compared to 1975 and declined 11 percent in the first quarter of 1977 compared to the first quarter of 1976.

INCREASED IMPORTS

Imports of stainless steel pipe and tubing increased relative to domestic shipments from 56.1 percent in 1975 to 92.2 percent in 1976. In the first quarter of 1977, imports as a percentage of shipments declined to 85.3 percent from 96.2 percent in the first quarter of 1976.

Imports of stainless steel pipe and tubing increased from 23.8 thousand tons in 1975 to 28.3 thousand tons in 1976. Imports declined from 7.5 thousand tons in the first quarter of 1976 to 6.4 thousand tons in the first quarter of 1977.

CONTRIBUTED IMPORTANTLY

Customers of the Swepco Tube Corp. indicated that they reduced purchases from Swepco because their own customers began purchasing stainless steel pipe directly from foreign sources.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with stainless steel pipe produced by the Swepco Tube Corp., Clifton, N.J., contributed importantly to the total or partial separation of the workers of that firm. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers of the Swepco Tube Corp., Clifton, N.J., who became or become totally or partially separated from employment on or after March 23, 1976, are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 22d day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

[TA-W-1768]

UNITED TECHNOLOGIES CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1768: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 7, 1977, in response to a worker petition received on March 3, 1977, which was filed by the International Association of Machinists and Aerospace Workers on behalf of workers and former workers producing aircraft engine parts at the Southington, Conn. plant of the Pratt & Whitney Aircraft Division of United Technologies Corp.

The notice of investigation was published in the FEDERAL REGISTER on March 25, 1977 (42 FR 16200). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of United Technologies Corp. and the International Association of Machinists and Aerospace Workers.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any other criteria have been met, criterion (1) has not been met.

The Southington, Conn. plant of Pratt & Whitney Aircraft produces aircraft engine parts.

Evidence developed in the Department's investigation revealed that no involuntary separations of production workers occurred from February 28, 1976, one year prior to the signature date of the petition, to the present.

Company officials do not anticipate any layoffs at the plant.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers at the Southington, Conn. plant of the Pratt & Whitney Aircraft Division of United Technologies Corp. have not become totally or partially separated as required in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of July 1977.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

UNITED TECHNOLOGIES CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1769: Investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 7, 1977, in response to a worker petition received on March 3, 1977, which was filed by the International Association of Machinists and Aerospace Workers on behalf of workers and former workers producing aircraft engine parts at the North Haven, Conn. plant of the Pratt & Whitney Aircraft Division of United Technologies Corp.

The notice of investigation was published in the FEDERAL REGISTER on March 25, 1977 (42 FR 16200). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of United Technologies Corp. and the International Association of Machinists and Aerospace Workers.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the worker's firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term 'contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any other criteria have been met, criterion (1) has not been met.

The North Haven, Conn. plant of Pratt & Whitney Aircraft produces aircraft engine parts.

Evidence developed in the Department's investigation revealed that no involuntary separations of production workers occurred from February 28, 1976, one year prior to the signature date of the petition, to the present.

Company officials do not anticipate any layoffs at the plant.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers at the North Haven, Conn. plant of the Pratt & Whitney Aircraft Division of United Technologies Corp. have not become totally or partially separated as required in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 15th day of July 1977.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[TA-W-1770]

UNITED TECHNOLOGIES CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1770: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on March 7, 1977 in response to a worker petition received on March 3, 1977 which was filed by the International Association of Machinists and Aerospace Workers on behalf of workers and former workers producing aircraft engines at the East Hartford, Connecticut plant of the Pratt & Whitney Aircraft Division of United Technologies Corporation.

The Notice of Investigation was published in the FEDERAL REGISTER on March 25, 1977 (42 FR 16200). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Untied Technologies Corporation and the International Association of Machinists and Aerospace Workers.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The Department's investigation revealed that criterion four (4) has not been met.

The East Hartford, Connecticut plant of Pratt & Whitney Aircraft produces aircraft engine parts.

All layoffs that occurred during 1976 involved workers in the experimental division. The experimental division performs research and development activities and as such produces no specific product. All layoffs in the experimental division resulted from a shift in certain research activities from the East Hartford plant to another company facility in East Palm Beach, Florida.

Company officials do not anticipate any other layoffs at the plant.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that increased imports of aircraft engines did not contribute importantly to the separations or threat thereof, or to a decrease in sales or production at the East Hartford, Connecticut plant of the Pratt & Whitney Aircraft Division of United Technologies Corporation as required in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 15th day of July 1977.

BRIAN TURNER,
Executive Assistant to the Deputy Under Secretary for International Affairs.

[FR Doc.77-22186 Filed 8-1-77;8:45 am]

[TA-W-1362]

VOGT MACHINE CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA-W-1362: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on December 1, 1976 in response to a worker petition received on December 1, 1976, which was filed by the United Steelworkers of America on behalf of workers and former workers producing valves and fittings at the Louisville, Kentucky plant of Vogt Machine Company.

The Notice of Investigation was published in the FEDERAL REGISTER on January 4, 1977 (42 FR 904). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Vogt Machine Company and the United Steelworkers of America.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (1) has not been met.

Vogt Machine Company produces steel valves and fittings, steam boilers, heat exchangers and ice making machines. The Company has one plant located in Louisville, Kentucky.

Pursuant to the requirements of 29 CFR 90.2 total separations must be the equivalent to a total unemployment of five percent or 50 workers, whichever is less. Evidence developed in the Department's investigation revealed that the total separations which occurred during the period of possible coverage amounted to less than five percent of the workforce employed at the Vogt Machine Company. The total number of workers experiencing separations during the period November 1, 1975, one year prior to the signature date of the petition, to the present was less than 50 workers. There is no indication that current workers are threatened with any involuntary separations.

Pursuant to the requirements of 29 CFR 90.2, "partial separation" means, that the worker's hours of work have been reduced to 80 percent or less of the worker's average weekly hours at the firm or appropriate subdivision thereof. Evidence developed in the Department's investigation revealed that the worker's average weekly hours of work increased 1 percent in 1975 compared to 1974. The average weekly hours of work declined 3 percent in 1976 compared to 1975.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers at the Louisville, Kentucky plant of the Vogt Machine Company have not become or threatened to become totally or partially separated as required for certification in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 25th day of July 1977.

GLORIA S. PRATT,
Director, Office of Foreign Economic Policy.

[FR Doc.77-22187 Filed 8-1-77;8:45 am]

[TA-W-1557]

WILLOFORM MANUFACTURING COMPANY, INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-1557: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on January 1, 1977 in response to a worker petition received on that date which was filed by the International Ladies' Garment Workers Union on behalf of workers and former workers producing brassieres and girdles at Willoform Manufacturing Company, Inc., New York.

The notice of investigation was published in the FEDERAL REGISTER on January 25, 1977 (42 FR 4563). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Willoform Manufacturing Company, Inc., its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department Files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production. The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (1) has not been met.

SIGNIFICANT TOTAL OR PARTIAL SEPARATIONS

Annual average employment of production workers declined 2.2 percent in 1975 compared to 1974 but increased 3.7 percent in 1976 compared to 1975. There is no indication that current workers are threatened with any involuntary separations.

CONCLUSION

After careful review of the facts obtained in the investigation, I conclude that a significant number or proportion of the workers at the Willoform Manufacturing Company, Inc., New York, New York have not become totally or partially separated as required in Section 222 of the Trade Act of 1974.

Signed at Washington, D.C. this 27th day of July 1977.

JAMES F. TAYLOR,
Director, Office of Management, Administration, and Planning.

SECURITIES AND EXCHANGE COMMISSION

[File No. 18-3; Release No 5846]

ARTHUR ANDERSEN & CO. PARTNERS' PROFIT SHARING PLAN AND ARTHUR ANDERSEN & CO. PARTNERS' PROFIT SHARING TRUST

Filing of Application

JULY 27, 1977.

Notice is hereby given that Arthur Andersen & Co., 69 West Washington Street, Chicago, Ill. 60602, a public accounting firm organized as a partnership under the laws of Illinois, ("Applicant") has, by letters dated April 4 and April 29, 1977, applied for an exemption from the registration requirements of the Securities Act of 1933 (the "Act") for participations or interests issued in connection with the Arthur Andersen Profit Sharing Plan and Arthur Andersen Profit Sharing Trust (the "Plan"). All interested persons are referred to those documents, which are on file with the Commission, for the facts and representations contained therein, which are summarized below.

I. *Introduction.*—Applicant's Plan is for the exclusive benefit of its 728 partners and 76 participating principals. A partner or participating principal is a self-employed member of the firm who has generally been associated with the firm for at least ten years. The Plan provides for Applicant to make both discretionary and non-discretionary firm contributions on behalf of participants. Par-

ticipants may also make voluntary personal contributions to the Plan. The Plan is of the type commonly referred to as a "Keogh" plan, which covers persons (in this case Applicant's partners and participating principals) who are employees within the meaning of section 401(c)(1) of the Internal Revenue Code of 1954 (the "Code"), and, therefore, is excepted from the exemption provided by Section 3(a)(2) of the Act for interests or participations in certain employee benefit plans of corporate employers. Section 3(a)(2) of the Act provides, however, "the Commission, by rules and regulations or order, shall exempt from the provisions of section 5 of the Act any interest or participation issued in connection with a stock bonus, pension, profit-sharing or annuity plan which covers employees some or all of whom are employees within the meaning of section 401(c)(1) of the Code, if and to the extent that the Commission determines this to be necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act."

II. *Description and Administration of the Plan.*—The Plan has been maintained since 1969 as a profit-sharing plan qualified under section 401 of the Code. In connection with certain changes which recently have been incorporated in the Plan, Applicant has applied to the Internal Revenue Service (the "IRS") for a determination that the Plan as modified will continue to be qualified under section 401. Applicant requests that the Commission assume that the IRS will rule favorably as to the Plan.

Applicant contributes to the Plan on behalf of the covered employees based on a percentage of their compensation. In addition, an active participant may contribute up to 10% of the participant's compensation (limited to $100,000) received while a participant, subject to certain limitations under section 415 of the Code.

Funds held by the Plan are allocated between three investment funds, as determined by Applicant. Although a participant has an undivided interest in the three investment funds, a participant has no discretion as to the proportion of his assets to be invested in each of such funds. A fourth investment fund, a fixed income fund, became available on July 1, 1977, for participants who are 55 years of age or over. At age 55 a participant will be able to elect to have all or a portion of the account allocated to the fixed income fund.

The trustees have the power to appoint and to remove investment managers with respect to Plan assets.

Applicant exercises substantial administrative responsibilities in connection with the Plan. Applicant has employed independent experts to provide investment advisory and other services to the Plan. In addition, Applicant has retained full power to amend the Plan, subject to restraints imposed by the Code and ERISA and to the condition that no amendment enlarge the trustees' liabilities without the trustees' consent.

Although the Plan is subject to portions of ERISA which establish fiduciary responsibilities, it is not subject to ERISA's reporting and disclosure provisions. Applicant has undertaken to furnish participants with various information about the Plan and its investments including copies of the Plan and any amendments thereto, as well as other descriptive materials relating to various features of the Plan. Other basic documents under which the Plan is operated, and amendments thereto, will be made available for review by any participant of the Plan upon request. Applicant will furnish participants with annual statements reflecting the benefits accrued for each participant and annual financial statements of the Trust. Applicant will also furnish participants with summaries of interim reports which it receives concerning the Plan's investments and, upon request, with copies of the interim reports themselves. In addition, the Plan will be audited annually by an independent auditor.

III. *Applicant's Arguments.*—Applicant contends that if Applicant was a corporation, rather than a partnership, interests or participations issued in connection with the Plan would be exempt from registration under section 3(a)(2) of the Act. Applicant further contends that the Plan is not a master or prototype plan marketed to the public by a sponsoring financial institution and that Plan assets are not commingled in collective investment media with the assets of the plans of other employers. Applicant argues, therefore, that the unincorporated status of Applicant does not provide sufficient justification, under all the circumstances, for subjecting such interests and participations to the registration requirements of the Act.

Applicant concludes that under the circumstances granting the requested exemptive order would be appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Notice is further given that any interested person may, not later than August 22, 1977, at 5:30 p.m. submit to the Commission in writing a request for a hearing on the application, accompanied by a statement of the nature of his interest, the reasons for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed to: George A. Fitzsimmons, Secretary, Securities & Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon McDermott, Will & Emery, 111 West Monroe Street, Chicago, Ill. 60631, Attn: William J. Quinlan, Jr., Esq. Proof of such service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request.

An order disposing of the matter will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive notice of further developments in this matter, including the date of the hearing (if ordered) and any postponements thereof.

By the Commission.

Dated: July 27, 1977.

GEORGE A. FITZSIMMONS,
Secretary.

SMALL BUSINESS ADMINISTRATION

[Proposed License No. 02/02-0333]

BBS EQUITIES LTD.

Application for a License To Operate as a Small Business Investment Company

Notice is hereby given that an application has been filed with the Small Business Administration (SBA) pursuant to Section 107.102 of the Regulations governing small business investment companies (13 C.F.R. 107.102 (1977)) under the name of BBS Equities Ltd., Gateway One, Suite 2400, Newark, New Jersey 07102, for a license to operate as a small business investment company under the provisions of the Small Business Investment Act of 1958, as amended (the Act), and the Rules and Regulations promulgated thereunder.

The proposed officers, directors and shareholders are as follows:

Robert L. Bevill, President, Director, 22 Kings Hill Court, Summit, New Jersey 07901.
Gilbert C. Schulman, Executive Vice President, Director, R.D. No. 1, Box 524, Montague, New Jersey 12771.
William F. Greenley, Jr., Vice President, Secretary-Treasurer, Director, 1 Scenic Drive, Highlands, New Jersey 07732.
E. M. Charlet, Manager/Director, 76 New England Avenue, Apartment 23, Summit, New Jersey 07901.
W. A. Bruce, Manager/Director, 6615 Goodwood Avenue, Baton Rouge, Louisiana 70806.
Bobbie R. Bankston, Assistant Secretary-Treasurer, 2355 Woodland Ridge Boulevard, Baton Rouge, Louisiana 70816.

There is one class of stock, common stock, authorized in the amount of 2,500 shares having no par value. The initial 526 shares to be issued will be held by:

Bevill, Bresler & Schulman Investment Company—95.06%.
Venturtech, Inc.—4.94%.

Bevill, Bresler & Schulman Investment Company, Gateway One, Suite 2400, Newark, New Jersey 07102, was incorporated in July 1977, as a holding company for the proposed Applicant Licensee. This holding company is owned by the following individuals:

Robert L. Bevill—30%.
Gilbert C. Schulman—25%.
William F. Greenley, Jr.—3.5%.
Alan L. Bresler, 549 Lynn Street, Ridgewood, New Jersey 07450—26%.
Andrew D. Ledbetter, 201 Vanderpool, Houston, Texas 77063—15%.
John D. Rooney, 1688 East Drive, Point Pleasant, New Jersey 08742—1.5%.

Venturtech, Inc., was incorporated in February of 1973, as a holding company for Venturtech Capital, Inc., a Federally licensed small business investment company (SBIC) located at Suite 706, Republic Tower, 5700 Florida Boulevard, Baton Rouge, Louisiana 70806. SBA issued license certificate No. 06/06–0163 to this company on May 31, 1973. There are approximately 20 shareholders of Venturtech, Inc., including Mr. E. M. Charlet and Dr. W. A. Bruce. Messrs. Charlet and Bruce are also the principal officers of Venturtech Capital, Inc.

The Applicant proposes to commence operations with a capitalization of $500,-200. Applicant proposes to conduct its operations in the State of New Jersey and in other areas within the United States of America and its territories and possessions as may from time to time be approved by SBA as its operating territory. A branch office will be located in Baton Rouge, Louisiana, within the offices of Venturtech Capital, Inc. The Applicant will engage primarily, but not exclusively, in equity investments in companies operating in the high technology field.

Venturtech Capital, Inc., will manage the day to day operations of the Applicant under a written contract pursuant to the provisions of section 107.809 of the SBA rules and regulations. Therefore, in accordance with the provisions of section 107.101(a) of the regulations, Venturtech Capital, Inc., is deemed to be an officer of the Applicant. Also, Venturtech Capital, Inc., would be an associate of the Applicant as defined by section 107.3(a) of the regulations.

It is also proposed that the Applicant will provide management services to small business concerns upon the request of such concerns. These services will be provided through its manager/advisor, Venturtech Capital, Inc. In some instances, a fee will be charged to the small concern for these services. This proposed activity is subject to the provisions of section 107.601 of the regulations. Where an Associate of an SBIC provides management services, advisory only or technical in nature, to a small concern being financed by the SBIC, such services shall be performed pursuant to a written contract, and the contract shall be approved annually in advance by the board of directors or the principals of the small concern and by SBA.

Matters involved in SBA's consideration of the application include the general business reputation and character of the management, and the probability of successful operations of the new company in accordance with the Act and Regulations.

Notice is further given that any interested person may, not later than (fifteen days from the date of publication of this notice), submit to SBA, in writing, relevant comments on the proposed licensing of this company. Any such communications should be addressed to: Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street NW., Washington, D.C. 20416.

A copy of this notice shall be published by the proposed Licensee in a newspaper of general circulation in Newark, New Jersey, and Baton Rouge, Louisiana.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: July 25, 1977.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

[Declaration of Disaster Loan Area No. 1349]

PENNSYLVANIA

Declaration of Disaster Loan Area

As a result of the President's declaration of July 21, 1977, and Federal Disaster Assistance Administration's designation of Bedford, Cambria, Clearfield, Indiana, Jefferson, Somerset and Westmoreland Counties within the State of Pennsylvania, I find that these counties constitute a disaster area because of damage resulting from severe storms and flooding beginning about July 19, 1977. The Small Business Administration will accept applications for disaster relief loans from disaster victims within the above-named counties, and adjacent counties within the State of Pennsylvania.

Eligible persons, firms, and organizations may file applications for loans for physical damage until the close of business on September 19, 1977, and for economic injury until the close of business on April 21, 1978, at:

Small Business Administration, Disaster Office, East Lobby—Suite 400, One Bala Cynwyd Plaza, 231 St. Asaphs Road, Bala Cynwyd, Pennsylvania 19004.
Small Business Administration, Disaster Office, 1000 Liberty Avenue, Pittsburgh, Pennsylvania 15222.

or other locally announced locations.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Dated: July 22, 1977.

RICHARD HERNANDEZ,
Acting Administrator.

[FR Doc.77-22112 Filed 8-1-77;8:45 am]

[Amdt. 1]

MICHIGAN

Declaration of Disaster Loan Area

The incidence date for physical damage to wells from drought is extended to cover the period from March 14, 1977 to July 11, 1977. Therefore, the above numbered Declaration (see 42 FR 17930) is amended to extend the filing date for physical damage from May 26, 1977, until the close of business October 14, 1977, and for economic injury from December 27, 1977, until the close of business on April 14, 1978.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008.)

Dated: July 22, 1977.

RICHARD HERNANDEZ,
Acting Administrator.

[Proposed License No. 09/09-0195]

SAN JOSE CAPITAL CORP.

Application for a License to Operate as a Small Business Investment Company

Notice is hereby given of the filing of an application with the Small Business Administration (SBA) pursuant to Section 107.102 of the SBA Regulations (13 CFR 107.102 (1977)) by San Jose Capital Company, 100 Park Center Plaza, San Jose, California 95113, for a license to operate as a small business investment company (SBIC) under the provisions of the Small Business Investment Act of 1958 (Act), as amended (15 U.S.C. 661 et seq.).

The proposed officers, directors and principal stockholders are:

H. Bruce Furchtenicht, President, Director, 18510 Decatur Rd., Monte Sereno, Ca. 95030—12.4%.
Sydney Resnick, Vice President, Secretary and Director, 1690 Cabana Drive, San Jose, Ca. 95125—3%.
John Arrol, Chairman, Director, 2326 Royal Oaks Drive, Alamo, Ca. 94507—15.4%.
Sydney Burk Hardts, Director, 19020 Raleigh Place, Saratoga, Ca. 95070—15.4%.
Daniel Hochman, Director, 14157 Squirrel Hollow Lane, Saratoga, Ca. 95070—15.4%.

Resnick and Furchtenicht, Inc., 100 Park Center Plaza, San Jose, California 95113, a licensed Investment Advisor, will act as general manager of the SBIC. Messrs. Furchtenicht and Resnick are officers, directors and controlling shareholders of the proposed manager.

The SBIC will begin operations with an initial capitalization of $325,000. No concentration in any particular Industry is planned. The applicant intends to make invetments in small business concerns, with growth potential, located primarily within the State of California.

Matters involved in SBA's consideration of the application, in view of the particular circumstances involved, include (1) the general business reputation and character of the proposed owners and management, (2) the reasonable prospects for successful operation of the new SBIC under such management (including adequate profitability and financial soundness, in accordance with the Act and Regulations), and (3) whether the proposed licensing action would be in furtherance of the purposes of the Act.

Notice is hereby given that any person may not later than August 17, 1977, submit to SBA in writing comments on the proposed SBIC to: Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice will be published in a newspaper of general circulation in San Jose, California.

[Notice No. 94]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

JULY 28, 1977.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 3252 (Sub-No. 96 TA), filed July 12, 1977. Applicant: MERRILL TRANSPORT CO., 1037 Forest Avenue, Portland, Maine 04103. Applicant's representative: Francis E. Barrett, Jr., 10 Industrial Park Road, Hingham, Mass. 02043. Strotheid District Supervisor, Interstate Commerce Commission, Room 302, 1400 Building, 1400 Pickens St., Columbia, S.C. 29201.

No. MC 100666 (Sub-No. 356TA), filed July 11, 1977. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, 1129 Grimmett Drive, Shreveport, La. 71107. Applicant's representative: Wilburn L. Williamson, Telephone No. 405-946-1418, 280 National Foundation Life Bldg., 3535 N.W. 58th Street, Oklahoma City, Okla. 73112. Authority sought to operate as a *common carrier* by motor vehicle, over irregular routes, transporting: *Plastic pipe*, from the facilities utilized by Robintech Incorporated at or Sylvania, Ohio, to points in Kentucky and Tennessee, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): Robintech Incorporated, P.O. Box 2342, Fort Worth, Tex. 76101. Send protests to: District Supervisor Ray C. Armstrong, Jr., 701 Loyola Avenue, 9038 Federal Bldg., New Orleans, La. 70113.

No. MC 105607 (Sub-No. 10TA), filed July 13, 1977. Applicant: TWIN HAULAGE CO., A Corporation, 401 Commerce Road, Linden, N.J. 07036. Applicant's representative: George A. Olsen, 69 Tonnele Avenue, Jersey City, N.J. 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Corn products and blends thereof, fish oil and vegetable oil*, in bulk, in tank vehicles, from the facilities of Archer Daniels Midland Company, N.J., to points in Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, Delaware, Maryland, Virginia and Washington, D.C., for 180 days. Supporting shipper(s): Archer Daniels Midland, P.O. Box 1470, 4666 Faries Parkway, Decatur, Ill. 62525. Send protests to: Robert E. Johnson, District Supervisor, Interstate Commerce Commission, 9 Clinton Street, Newark, N.J. 07102.

No. MC 105733 (Sub-No. 60 TA), filed July 8, 1977. Applicant: H. R. RITTER TRUCKING CO., INC., 928 East Hazelwood Avenue, Rahway, N.J. 07065. Applicant's representative: Andrew R. Jeltes, P.O. Box 1064-A, Rahway, N.J. 07065. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Corn products and blends thereof, fish oil, vegetable oil*, in bulk, in tank vehicles, from the facilities of Archer Daniels Midland Co. at Bayway, N.J., to points in Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, Delaware, Maryland, Virginia and Washington, D.C., for 180 days. Supporting shipper(s): Archer Daniel Midland Co., 4666 Faries Parkway, Decatur, Ill. 62525. Send protests to: Robert E. Johnston, District Supervisor, Interstate Commerce Commission, 9 Clinton Street, Newark, N.J. 07102.

No. MC 107002 (Sub-No. 510TA), filed July 13, 1977. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123 (U.S. Highway 80 West), Jackson, Miss. 39205. Applicant's representative: Edward M. Regan, P.O. Box 1123, Jackson, Miss. 39205. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum and petroleum products*, in bulk, in tank vehicles, from Memphis, Tenn., to points in Illinois, Indiana, Ohio and Virginia, for 180 days. Supporting shipper(s): Sun Oil Co. of Pennsylvania, P.O. Box 2039, Tulsa, Okla. 74102. Send protests to: Alan C. Tarrant, District Supervisor, Interstate Commerce Commission, Room 212, 145 East Amite Building, Jackson, Miss. 39201.

No. MC 107002 (Sub-No. 511TA), filed July 15, 1977. Applicant: MILLER TRANSPORTERS, INC., P.O. Box 1123, U.S. Highway 80 West, Jackson, Miss. 39205. Applicant's representative: John J. Borth, P.O. Box 1123, Jackson, Miss. 39205. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Insecticides*, liquid, in bulk, in tank vehicles, from Becker, Miss., to points in South Carolina for 180 days. Supporting shipper(s): United States Steel Corporation, USS Agri-Chemicals Division, 233 Peachtree Street, Atlanta, Ga. 30303. Send protests to: Alan C. Tarrant, District Supervisor, Interstate Commerce Commission, Room 212, 145 East Amite Building, Jackson, Miss. 39201.

No. MC 107295 (Sub-No. 857TA), filed July 11, 1977. Applicant: PRE-FAB TRANSIT CO., 100 South Main St., Farmer City, Ill. 61842. Applicant's representative: Duane Zehr (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Gypsum, gypsum products, and building materials*, from the plant site of the United States Gypsum Co., Southard, Okla., to points in Illinois, Indiana, Kentucky, Michigan, Missouri, Ohio, Tennessee, and Wisconsin, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper(s): R. A. Stoneham, Traffic Manager, U.S. Gypsum Co., 101 S. Wacker Drive, Chicago, Ill. 60606. Send protests to: Harold C. Jolliff, District Supervisor, Interstate Commerce Commission, P.O. Box 2418, Springfield, Ill. 67205.

No. MC 113388 (Sub-No. 118TA) (Amendment), filed June 21, 1977, published in the FEDERAL REGISTER issue of July 8, 1977, and republished as amended this issue. Applicant: LESTER C. NEWTON TRUCKING CO., P.O. Box 618, Seaford, Del. 19973. Applicant's representative: Sol H. Proctor, 1101 Blackstone Bldg., Jacksonville, Fla. 32202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen concentrate foods*, from points in Florida to points in Virginia, Delaware, District of Columbia, Maryland, Pennsylvania, New York, New Jersey, Connecticut, Rhode Island, Maine, New Hampshire, Vermont, and Massachusetts, for 180 days. Supporting shippers: There are approximately 5 statements of support attached to the application which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: William L. Hughes, District Supervisor, Interstate Commerce Commission, 814-B Federal Building, Baltimore, Md. 21201. The purpoe of this republication is to amend carrier's commodity description, and there are approximately 5 supporting shippers instead of 4, as was previously published in error.

H. G. HOMME, JR.,
Acting Secretary.

[FR Doc 77-22199 Filed 8-1-77;8:45 am]

FOURTH SECTION APPLICATIONS FOR RELIEF

JULY 28, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed on or before August 17, 1977.

FSA No. 43404—*Beet or Can Sugar from Points in Montana, Trans-Continental and WTL Territories.* Filed by Western Trunk Line Committee, Agent, (No. A-2739), for interested rail carriers. Rates on sugar, beet or cane, dry, in bulk, in carloads, as described in the application, from specified points in Montana, trans-continental, and western trunk-line territories, to Kansas City, Mo.-Kans., Skokie, Ill., and Coldspur, Kans.

Grounds for relief—Rate relationship and returned shipments.

Tariffs—Supplements 190 and 192 to Western Trunk Line Committee, Agent, tariff 159-0, I.C.C. No. A-4481, and 4 other schedules named in the application. Rates are published to become effective on August 15, 1977.

FSA No. 43405—*Alcohol from Talla Bena, Louisiana.* Filed by Southwestern Freight Bureau, Agent (No. B-695), for interested rail carriers. Rates on alcohol and related articles, in tank-car loads, as described in the application, from Talla Bena, Louisiana, to points in Illinois, Indiana, Kentucky, Minnesota, North Dakota, and Ohio.

Grounds for relief—Market competition.

Tariff—Supplement 53 to Southwestern Freight Bureau, Agent, tariff 210-M, I.C.C. No. 5245. Rates are published to become effective on August 28, 1977.

AGGREGATE-OF-INTERMEDIATES

FSA No. 43406—*Methanol (Methyl Alcohol) from Talla Bena, Louisiana.* Filed by Southwestern Freight Bureau, Agent (No. B-696), for interested rail carriers. Rates on methanol (methyl alcohol), in tank-car loads, as described in the application, from Talla Bena, Louisiana, to Chicago, Illinois, and points taking same rates.

Grounds for relief—Maintenance of depressed rates published to meet market competition without use of such rates as factors in constructing combination rates.

Tariff—Supplement 53 to Southwestern Freight Bureau, Agent, tariff 210-M, ICC No. 5245. Rates are published to become effective on August 28, 1977.

By the Commission.

H. G. HOMME, JR.,
Acting Secretary.

1

CIVIL AERONAUTICS BOARD.

ADDITION OF ITEM TO JULY 28, 1977, MEETING AGENDA

TIME AND DATH: 10 a.m., July 28, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 5. Docket 30277 et al. Chicago-Midway Low-Fare Route Proceeding (Memo No. 6653-D, BOR, BE, BLJ, OGC).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary, 202-673-5068.

SUPPLEMENTARY INFORMATION: The Board will make a presentation at the House Aviation Subcommittee hearings to be held in Chicago on July 30, 1977. Since the Board's discussion of this item in the Chicago-Midway Low-Fare Route Proceeding might affect the Board's testimony, the following Members have voted that agency business requires the addition of this item to the agenda of the July 28, 1977 Board meeting and that no earlier announcement of the change was possible:

Chairman Alfred E. Kahn
Vice Chairman Richard J. O'Melia
Member G. Joseph Minetti
Member Lee R. West

Dated: July 27, 1977.

[S-1018-77 Filed 7-28-77;3:50 pm]

2

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10 a.m., August 4, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: Oral Argument, Docket 29898, Part 207, Charter Trips and Special Services Off-Route Charter Limitations.

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, The Secretary, 202-673-5068.

Dated: July 27, 1977.

[S-1019-77 Filed 7-28-77;3:50 pm]

3

COMMODITY FUTURES TRADING COMMISSION.

TIME AND DATE: 10 a.m., August 4, 1977.

PLACE: 2033 K Street NW., Washington, D.C., 5th Floor Hearing Room.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public:

Chicago Board of Trade Application for Designation as a Contract Market in Long Term U.S. Treasury Bonds.

Processing of Section 5a(12) Submissions.

New Orleans Cotton and Commodity Exchange—Informational Discussion.

Portions closed to the public:

Enforcement Matters.
POIA Appeal.

CONTACT PERSON FOR MORE INFORMATION:

Jane Stuckey, 254-6314.

[S-1020-77 Filed 7-28-77;4:02 pm]

4

COMMODITY FUTURES TRADING COMMISSION.

TIME AND DATE: 11 a.m., August 5, 1977.

PLACE: 2033 K Street NW., Washington, D.C., 8th Floor, Conference Room.

STATUS: Closed.

MATTERS TO BE CONSIDERED: Market Surveillance Meeting.

CONTACT PERSON FOR MORE INFORMATION:

Jane Stuckey, 254-6314.

[S-1021-77 Filed 7-28-77;4:02 pm]

5

FEDERAL DEPOSIT INSURANCE CORPORATION.

CHANGE IN SUBJECT MATTER OF AGENCY MEETING

At its meeting held at 10:30 a.m. on Thursday, July 28, 1977, the Board of Directors of the Federal Deposit Insurance Corporation determined, on motion of Chairman George A. LeMaistre, seconded by Director John G. Heimann (Comptroller of the Currency), that Corporation business required its addition of a recommendation regarding the liquidation of assets acquired by the Corporation in its capacity as liquidating agent of The New Boston Bank and Trust Company, Boston, Massachusetts (Case No. 43,143-L), to the agenda for consideration at that meeting and that no earlier notice of a change in the subject matter of the meeting was possible.

The Board's deliberations with respect to the matter were closed pursuant to the provisions of subsections (c)(6) and (d)(1) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(6) and (d)(1)) on the basis of the Board's determination that the public interest did not require consideration of the matter in a meeting open to public observation.

Dated: July 28, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

[S-1016-77 Filed 7-28-77; 3:32 pm]

6

FEDERAL DEPOSIT INSURANCE CORPORATION.

CHANGE IN SUBJECT MATTER OF AGENCY MEETING

At its meeting held at 11 a.m. on Thursday, July 28, 1977, the Board of Directors of the Federal Deposit Insurance Corporation determined, on motion of Chairman George A. LeMaistre, seconded by Director John G. Heimann (Comptroller of the Currency), that Corporation business required its addition of a recommendation regarding the restructuring of a loan from the Corporation to European-American Bank & Trust Company, New York, New York, in connection with the bank's purchase of assets and assumption of liabilities of Franklin National Bank, New York, New York (in liquidation), to the agenda for consideration at that meeting and that no earlier notice of a change in the subject matter of the meeting was possible.

The Board's deliberations with respect to the matter were open to public observation.

Dated: July 28, 1977.

FEDERAL DEPOSIT INSURANCE CORPORATION,
ALAN R. MILLER,
Executive Secretary.

[S-1017-77 Filed 7-28-77;3:32 pm]

7

INTERSTATE COMMERCE COMMISSION.

TIME AND DATE: 10 a.m., Thursday, August 4, 1977.

PLACE: Room 4225, Interstate Commerce Commission Building, 12th and Constitution Avenue NW., Washington, D.C.

STATUS: Special Open Conference.

MATTER TO BE CONSIDERED: 1. Ex Parte No. MC 103, Procedures in Motor Carrier Application Proceedings Where For-Hire Carriage is Substituted for Proprietary Operations.

CONTACT PERSON FOR MORE INFORMATION:

Office of Information and Consumer Affairs, Douglas Baldwin, Director, telephone 202-275-7252.

The Commission's profesional staff will be available to brief news media representatives on conference issues at the conclusion of the meeting.

[S-1022-77 Filed 7-29-77;8:45 am]

8

RENEGOTIATION BOARD.

DATE AND TIME: Wednesday, August 3, 1977, 9:30 a.m.

PLACE: Conference Room, 4th Floor, 2000 M St. NW., Washington, D.C. 20446.

STATUS: Closed to public observation.

MATTER TO BE CONSIDERED: Division Meeting concerning: A. J. Industries, Inc., fiscal year ended March 31, 1972.

CONTACT PERSON FOR MORE INFORMATION:

Kelvin H. Dickinson, Assistant General Counsel-Secretary, 2000 M Street NW., Washington, D.C. 20446, 202-254-8277.

Dated: July 28, 1977.

GOODWIN CHASE,
Chairman.

[S-1014-77 Filed 7-28-77; 2:37 pm]

9

RENEGOTIATION BOARD.

DATE AND TIME: Tuesday, August 9, 1977, 10 a.m.

PLACE: Conference Room, 4th Floor, 2000 M St. NW., Washington, D.C. 20446.

STATUS: Matters 1 through 3 are open to the public. Matters 4 and 5 are closed to public. Status is not applicable to matters 6 and 7.

MATTERS TO BE CONSIDERED:

1. Approval of Minutes of meeting held August 2, 1977, and other Board meetings, if any.
2. Partial Mandatory New Durable Productive Equipment Exemption: The G. A. Gray Company, LPI No. 95659, fiscal year ended December 31, 1972.
3. Summary of Meeting of Staffs of Regional and Statutory Boards.
4. Republic Corporation, fiscal year ended October 31, 1969.
5. Court of Claims Case: Bennett Box & Pallet Co., Inc., fiscal years ended December 31, 1967, 1968, and 1969.
6. Approval of Agenda for meeting to be held August 23, 1977.
7. Approval of Agenda for other meetings, if any.

CONTACT PERSON FOR MORE INFORMATION:

Kelvin H. Dickinson, Assistant General Counsel-Secretary, 2000 M Street NW., Washington, D.C. 20046, 202-254-8277.

Dated: July 29, 1977.

GOODWIN CHASE,
Chairman.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Parts 700 and 710]

[OTS-081002; FRL 764-1]

TOXIC SUBSTANCES CONTROL

General Provisions and Inventory Reporting Requirements; Supplemental Notice; Public Meeting

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rules; Notice of Public Meeting.

SUMMARY: This notice reproposes the inventory reporting regulations first proposed on March 9, 1977 in the FEDERAL REGISTER and supplemented thereafter. Specifically, these reproposed regulations would require some manufacturers:

(1) To report the identity of each chemical substance manufactured (or imported) for a commercial purpose and the site of such manufacture;

(2) To estimate the amount of each such chemical substance manufactured or imported at each site;

(3) To indicate whether each such chemical substance is manufactured and used only within one site; and

(4) To indicate whether the respondent is a manufacturer, processor, and/or importer of each such chemical substance.

In addition, these reproposed regulations would authorize certain other persons to report such information at their discretion.

DATES: Written comments must be received on or before September 16, 1977. EPA will hold a public meeting in Washington, D.C. on August 24, 1977 to provide an opportunity for oral comments. Details are provided below.

ADDRESS: Comments should be addressed to the Federal Register Section (WH-557), Office of Toxic Substances, Attention: Vicki Briggs, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. Comments should be filed in triplicate and bear the identifying notation OTS-081002. All written comments filed pursuant to this notice will be available for public inspection at that office from 8:30 a.m. to 4:00 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT:

Mr. John Ritch, Office of Industry Assistance, Office of Toxic Substances (TS-788), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, 202-755-0535.

SUPPLEMENTARY INFORMATION: These regulations are proposed under the authority of subsection 8(a) of the Toxic Substances Control Act (90 Stat. 2003; 15 U.S.C. 2601 et seq.; hereinafter referred to as TSCA).

On March 9, 1977, EPA first published in the FEDERAL REGISTER (42 FR 13130) proposed inventory reporting regulations to govern reporting of chemical substances for inclusion on an inventory of chemical substances required by subsection 8(b) of TSCA. On April 12, 1977, EPA published a supplemental notice of proposed rulemaking in the FEDERAL REGISTER (42 FR 19298) providing additional information pertaining to the proposed inventory regulations. This notice set forth instructions for use of a Candidate List of Chemical Substances and specified minerals which EPA proposed to include in the inventory of chemical substances. On April 28, 1977, EPA published a notice of availability of the Candidate List of Chemical Substances for use in reporting chemicals for inclusion on the inventory (42 FR 21639). In addition, on July 8, 1977, the Agency published a notice to amend the procedures for securing a copy of the Candidate List on computer-readable tape (42 FR 35183).

On April 18, 1977, EPA held a public meeting in Washington, D.C. to provide interested persons an opportunity to comment publicly on the proposed regulations. In addition, approximately 200 persons have submitted written comments on the proposed regulations. Both the transcript of the public meeting and the written comments are available for inspection by the public in the Federal Register Office of the Office of Toxic Substances.

As a result of these comments, EPA has decided to repropose the inventory reporting regulations to require additional reporting by some persons and less reporting by others.

PARTICIPATION IN THE PUBLIC MEETING

The public meeting on these proposed regulations will be on Wednesday, August 24, 1977 from 9:00 a.m. to 4:30 p.m. in the Thomas Jefferson Auditorium of the Department of Agriculture, 14th and Independence Avenue, SW., Washington, D.C. Persons who want to reserve time to present their comments at that meeting should contact Vicki Briggs at the address provided above or telephone 202-426-9819. Each person may request up to 15 minutes although less time may be allotted depending upon the number of participants. EPA will make a transcript of the proceedings for public inspection.

STATUS OF REPROPOSAL

The record of this rulemaking will include all comments received in response to the earlier notices of proposed rulemaking as well as the comments received in response to this notice. The public is encouraged to review the earlier notices of proposed rulemaking if any questions arise concerning the context of these reproposed regulations. While EPA would welcome comments on any aspect of these proposed regulations, persons are encouraged to direct their comments to the new provisions proposed here and not duplicate comments submitted earlier on other aspects of the proposed regulations. EPA will respond to all the comments submitted in response to the proposed rulemaking notices in the final inventory reporting regulations.

MODIFICATIONS OF INITIAL REPORTING REQUIREMENTS

The main purpose in revising the proposed approach is to use these initial reporting requirements not only to compile the inventory required by section 8(b) but also to fulfill the Congressional intent, as stated in section 2 of TSCA, that adequate data be developed for implementation of TSCA and other authorities directed to regulating risks associated with chemical substances. Although the regulations proposed on March 9, 1977 would have required manufacturers to report chemical substances manufactured for commercial purposes, the proposed approach would not have required reporting concerning production sites or the quantities produced.

In contrast to EPA's original proposal, the revised version published here would require certain manufacturers not only to identify the chemical substances in commerce but also to report where the chemical substances are manufactured and in what quantities. This information will be valuable for estimating the potential exposure to chemical substances for monitoring, control, and preventive actions. For example, plant site information would be useful in identifying possible sources of hazardous chemicals, especially in an emergency. Data on the quantities of chemical substances in commerce would enable EPA and other agencies to select substances for priority attention among the tens of thousands in commerce.

These amendments would expand the scope of the initial reporting requirements, but would limit the applicability of the requirements to those persons with establishments that are primarily engaged in the manufacture of chemical substances. Accordingly, only the approximately 20,000 establishments in the Standard Industrial Classification Major Group 28 (Basic Chemicals and Allied Products) and Group 2911 (Petroleum Refining) would be required to report each chemical substance manufactured at the production site and the volume of production. Manufacturers outside these groups would not be required to report. These latter persons could choose to report or could authorize a trade association to report to ensure chemical substances which they manufacture are included on the inventory. The hundreds of thousands of chemical processors may report during a limited period following publication of the initial inventory. EPA may require reporting by any of these manufacturers or processors as part of its phased reporting strategy under section 8(a), discussed in the following section.

Other amendments to the March 9, 1977 proposal include a requirement that manufacturers indicate whether a chemical substance is manufactured and processed solely within one site and not distributed for a commercial purpose outside that site. EPA is considering specially designating these chemical substances on the inventory and providing under section 5(a)(2) that any use of those substances for commercial purposes outside the manufacturing site would be considered a "significant new use." In addition, respondents would be required to indicate whether they manufacture, process, and/or import a chemical substance. Knowing which persons manufacture, import, or process a reported chemical substance would enable EPA to direct any future notice or requirement to appropriate persons and permit the Agency to estimate how much of a substance is manufactured domestically and how much is imported.

Various representatives of the Federal government and environmental groups have urged EPA to amend the initial reporting requirements to include reporting on uses of chemical substances. EPA recognizes the importance of obtaining use information in order to estimate exposure to a chemical substance. However, incorporating use reporting into the initial requirements would substantially delay the publication of the inventory, perhaps for more than a year after the statutory date. Premanufacture notification of new chemicals would be delayed accordingly.

For this and other reasons, EPA decided to postpone use reporting to the second phase of its reporting strategy, as described below.

OVERALL STRATEGY

By reproposing the inventory regulations, EPA recognizes that it will be unable to meet the statutory deadline for publication of the inventory in November 1977. Nonetheless, EPA believes that the proposed delay is warranted by the importance of the data base that would be generated as a foundation for implementation of TSCA. At the same time, EPA will not attempt to develop a comprehensive data base on all chemical substances through the initial reporting requirements. EPA has developed an overall strategy for data development under section 8(a) of TSCA. These initial reporting requirements are the first of three phases.

The second phase of EPA's proposed strategy will be initiated after these regulations are final this fall. In this phase, EPA will address chemical substances selected because of their concern to EPA, the Occupational Safety and Health Administration (OSHA), the Consumer Product Safety Commission (CPSC), as well as to other agencies and interested parties. Manufacturers and processors of those chemical substances may be required to submit use information, including the estimated amounts of a chemical substance manufactured or processed for each use. In addition, EPA would consider asking for information on impurities, byproducts, worker exposure, and other factors as needed for specific chemical substances or categories of chemical substances.

The third phase of EPA's reporting strategy would begin after the inventory is published in 1978. EPA would by regulation require reporting under section 8(a) for additional chemical substances selected in part on the basis of their relative production volumes as reported under the initial reporting requirements. During this phase, EPA intends to develop the data base for a larger portion of chemical substances in commerce with respect to their use, exposure and other factors. Finally, in addition to such systematic reporting, EPA anticipates that it may ask for information on certain chemical substances as needed by the Department of Labor and others in emergency situations.

In determining what information to require in each of these phases, EPA will of course review alternative sources of data such as information available under Section 308 of the Federal Water Pollution Control Act Amendments of 1972 and other authorities, and will minimize duplicative reporting requirements.

DEFINITIONS OF SMALL MANUFACTURERS FOR THESE REGULATIONS ONLY

In proposing an expanded approach to the inventory reporting requirements, EPA would require certain manufacturers and importers to report information in addition to the identities of chemical substances in commerce. Paragraph 710.5(d) of these proposed regulations outlines this information. Although TSCA section 8(a) provides broad authority to EPA to require information necessary for the administration of the Act, EPA may require "small manufacturers and processors" to submit only information required for compilation of the initial inventory or concerning a chemical substance which is subject to a proposed rule or order under TSCA section 4, 5, or 6, or court action under section 5 or 7.

Some of the additional information outlined in paragraph 710.5(d), such as production volume and the manufacturing sites of a chemical substance, may not be considered necessary for compilation of the initial inventory. Therefore, EPA may not be authorized to require submission of that information from "small manufacturers" under these regulations. Accordingly, EPA is proposing to define which persons qualify as "small manufacturers" for the purpose of these regulations and to exempt small manufacturers from certain of these reporting requirements.

The definition of "small manufacturer" proposed here is a one-time definition intended to apply solely to these regulations. Accordingly, it would only apply to manufacturers in SIC groups 28 and 2911 and to importers of chemical substances. Persons should not interpret this definition as indicative of future definitions which will be proposed for the purpose of subsequent regulations under section 8(a) of TSCA. Those definitions for "small manufacturers" will take into account the burdens of complying with the future reporting and/or record-keeping requirements.

Section 8(a)(3)(B) of TSCA provides that, after consulting with the Small Business Administration, the Administrator shall by rule prescribe standards for determining the manufacturers and processors which qualify as "small manufacturers and processors." The legislative history of TSCA shows that the Senate bill contained no exemption from the reporting requirements for small manufacturers and processors. The House bill first introduced this provision because reporting and record-keeping requirements "may impose a particularly heavy burden on small manufacturers and processors" (H.R. Rep. No. 94-1341, 94th Cong., 2d Sess. 42 (1976)). The Conference substitute retained the exemption of the House amendment in order to "protect small manufacturers and processors from *unreasonably* burdensome requirements" (italics added) (H.R. Rep. No. 94-1679, 94th Cong., 2d Sess. 80 (1976)).

In exempting "small manufacturers and processors" from certain reporting requirements, Congress intended that EPA balance its need for certain information with the burden imposed upon small manufacturers and processors in submitting that information. As discussed above, EPA believes that the information which would be required by these regulations is necessary to establish a data base for implementation of TSCA and other authorities directed to regulating risks associated with chemical substances. In developing the proposed exemption from these reporting requirements, EPA has consulted with the Small Business Administration (SBA) and others in order to assess the administrative and economic burdens for small manufacturers of complying with these reporting regulations.

As proposed in § 710.2 of these regulations, the term "small manufacturer or importer" means "a manufacturer who (a) has only a single manufacturing site, and either (b) has total sales of less than $100,000, based on the manufacturer's latest complete fiscal year, or (c) has no more than 2,000 pounds annual production (i.e., amount manufactured and imported) of each manufactured chemical substance. In the case of a company which is owned or controlled by another company, such factors would apply to the parent company and all companies owned or controlled by it taken together."

Manufacturers and importers which fall within this definition would be exempt from reporting production volume. They would not be exempt from reporting the following information, which is necessary for compilation of the inventory: The identities of the chemical substances they manufacture or import; the business address; whether a chemical substance is used solely within the manufacturing site; or whether they manufacture, process, and/or import the chemical substance. Any small manufacturer whose chemical substance is not included on the initial inventory would be subject to the premanufacture notification requirements of TSCA section 5.

In considering alternative definitions, EPA is evaluating the burden of complying with the expanded reporting requirements in light of the fact that manufacturers and importers would already be reporting the identities of chemical sub-

stances for the inventory. In promulgating these regulations, EPA will probably define "small" in terms of (a) plant site, and either (b) sales or (c) production levels, incorporating only two parameters in the final definition.

With respect to the alternative of defining the term "small manufacturer" in terms of clauses (a) and (b) above, the number of plant sites is indicative of the management structure of a company and the likelihood that the information required would already exist in a centralized form. Information on the total annual sales of all products is generally available to all manufacturers. It also is a measure of size in terms of dollars and therefore is relevant to the burden imposed by these reporting requirements. EPA considers $100,000 an appropriate level above which all manufacturers should be able to comply with the additional requirements of this regulation without undue economic burden. If the manufacturer is owned or controlled by another company, the manufacturer should compute both the total annual sales and the number of plant sites on the basis of the sales and number of plants in the United States for that company as a whole.

If "small" is defined in terms of (a) and (b), potentially as many as 20 percent of the firms in Standard Industrial Classification Major Group 28 (SIC 28), Chemicals and Allied Products, would be considered "small manufacturers." However, the exempted manufacturers contribute a very small fraction, less than one percent, of the total sales within SIC 28.

Alternatively, if EPA chose to define "small manufacturer" in terms of clauses (a) and (c) above, one plant site and no more than 2,000 pounds annual production of any chemical substance, the number of establishments which would be exempted from reporting production would probably be far fewer. In fact, the effect of using the criteria in clauses (a) and (c) would be to exempt those persons who only manufacture chemical substances in less than 2,000 pounds from reporting the estimated production levels of those substances. EPA solicits comments on this alternative, especially with respect to the number of pounds selected for setting the exemption.

EPA also solicits comments on this proposed definition of "small manufacturer," including any quantitative data on the estimated costs of compliance, the number, sizes, and types of firms for which it may be a significant additional burden, or other information which describes the impact of these reporting requirements on small manufacturers. For example, EPA anticipates that reporting production may be burdensome for some manufacturers, particularly those who use batch processing to produce a variety of chemicals and keep records of production only on the basis of shipments or customer invoices. EPA would also appreciate any comments on other possible parameters for defining "small manufacturer," such as profits, market share, financial assets, or the number of employees.

Other Definitions

As indicated in § 710.2, EPA proposes to revise many of the definitions published in the March 9, 1977 proposed regulations. The definitions are included in § 710.2 rather than § 700.2 so that their applicability will be limited to these regulations and not automatically extend to subsequent regulations under TSCA. While minor proposed changes to the originally proposed terms are included in the new § 710.2, these changes are not discussed here as they will be addressed in the final regulations.

Several definitions included in the March 9, 1977 regulations were taken from other authorities. Specifically, the definitions of "food additive," "drug," "cosmetic," "device," "special nuclear material," "nuclear byproduct material," "nuclear source material," and "pesticide" were incorporated without modification from other regulations. Instead of including these definitions in their entirety in these regulations, EPA would include them by reference. Thus any changes in the other statutes will automatically be reflected in these regulations.

Included in these proposed regulations are three additional terms. EPA is proposing to define "article" as a "manufactured item (a) which is formed to a specific shape or design during manufacture, (b) which has end use function(s) dependent in whole or in part upon its shape or design during end use, and (c) which is functional in its end use(s) without change of chemical composition during its end use; except that (d) fluids and particles are not considered articles regardless of shape or design." This definition is added to clarify proposed § 710.4(d)(6) which would exclude from the inventory, and from these reporting requirements, a chemical substance which is the result of a chemical reaction that occurs upon use of curable plastic molding compounds and other chemical substances to manufacture an article destined for the marketplace without further chemical change. Examples of this are chemical substances that form during the thermosetting process in forming plastic articles, firing pottery or enamel products, setting concrete sidewalks, or molding rubber products. This exclusion is discussed further below under the section "Chemical Substances Excluded From the Inventory."

Related to this is the proposed definition of "manufacture, process, or import 'for commercial purposes'" which means to manufacture, process, or import for use by the manfacturer, as well as for distribution in commerce, for use as a catalyst or an intermediate, and for test marketing purposes. This definition is intended to clarify that chemical substances that are used by the manufacturer, not only as an intermediate or catalyst in the manufacture of another chemical substance, but also in the manufacture of a mixture or an article or in any other way, would be subject to these regulations. Accordingly, chemical substances which are manufactured and then converted by the manufacturer into an article should be reported by that manufacturer and would not be excluded from reporting for the inventory under § 710.4(d)(6). For example, a person who manufactures a polymer and then converts the polymer into a synthetic fiber should report the polymer.

The term "establishment" is defined as "an economic unit, generally at a single site, as defined for purposes of the Standard Industrial Classification of Establishments. There may be more than one establishment at a single site." This term is necessary to clarify proposed § 710.3(a) which would provide that only manufacturers with establishments in certain Standard Industrial Classification (SIC) groups would be required to report.

EPA is proposing to define the term "site" as "each contiguous property unit where a chemical substance is manufactured or processed whether or not such site is independently owned or operated. Property divided only by a public right of way shall be considered one site. For the purposes of imported chemical substances, the site shall be the business address of the importer." While all persons are encouraged to report by site, § 710.5(a)(1) would require only those persons required to report under § 710.3(a) to report by site. EPA solicits comment on these definitions and the clarity of the reporting requirements with respect to articles, establishments, and sites.

Applicability: Who Must Report; Who May Report, Who May Not Report

Section 710.3 is intended to clarify who must report for the inventory under these regulations and for whom reporting is optional. In addition, the section states who may not report. Although these regulations expand the information obtained, EPA is proposing to limit the expanded reporting requirements primarily to those establishments which are the basic manufacturers of chemical substances.

Under the March 9, 1977 proposal, every person who currently manufactures a chemical substance for commercial purposes would have had to report that substance for the inventory. Many comments emphasized that this approach would require duplicative reporting by persons who are not generally recognized as part of the chemicals industry but who, for economic reasons or special purposes, manufacture a limited number of chemical substances essential to their processes. For example, in the pulp and paper industry, pulp mills manufacture sodium hydroxide and other chemical substances as part of their recovery processes. If EPA adopted the approach of the March 9, 1977 proposal, there may be more than 400 such establishments reporting that they manufacture sodium hydroxide or other chemical substances common to pulp manufacture.

As an alternative, these initial reporting requirements would focus on the chemical and allied products sector of the manufacturing industry and the petroleum refining sector, as defined by SIC Major Group 28 and Group 2911, respectively. Major Group 28 includes the manufacturers of chemicals such as acids, alkalies, and organics; synthetic fibers and plastics; dry colors and pigments; soaps and detergents; and paints and fertilizers. Group 2911, petroleum refining, is the basis of the organic chemicals industry.

Establishments subject to TSCA which fall outside these SIC groups are primarily involved in processing chemical substances, such as fabricating plastic and rubber products or treating articles such as textiles and metals, and would not be required to report. In most cases the chemical substances they manufacture would be reported by establishments in SIC Group 28. To the extent that they manufacture chemical substances for special purposes that may not otherwise be reported for the inventory, they would be responsibile for ensuring, either through trade associations or individually, that those substances were included in the inventory. Otherwise, if these substances are not included in the inventory, any person who manufactured or imported the substances would be subject to premanufacture notification requirements under section 5(a)(1)(A) of TSCA.

One advantage of limiting required reporting primarily to manufacturing establishments in the chemical and allied products sectors of industry would be that EPA would be able to direct the reporting requirements to 20,000 establishments rather than to 225,000 or more establishments, most of which primarily process chemical substances, as explained above. Those establishments in SIC group 28 represent approximately 95 percent of chemical production.

Further, if someone identified a hazard associated with the processing of a chemical substance or wanted to know exactly what chemical substances may be manufactured or processed by establishments outside SIC groups 28 and 2911, EPA has authority under section 8(a) to require such detailed reporting. As mentioned in the discussion of EPA's overall strategy, EPA intends to implement this general reporting authority to develop a data base on those substances for which there is significant human or environmental exposure or some other reason for concern.

EPA solicits comments on this proposal to limit required reporting to establishments in SIC groups 28 and 2911. Specifically, EPA assumes that there may be manufacturers who do not know in which SIC group their establishment appropriately belongs. Others may have been categorized in one group five years ago and have since changed their primary economic activity and belong in a different SIC group. EPA intends to notify each establishment which, to the best of EPA's knowledge, should be included in the SIC groups 28 or 2911. If for some reason a person has not been directly notified and would belong in SIC groups 28 or 2911, that person would still be required to report to EPA. Accordingly, it would be useful to EPA to know to what extent manufacturers are familiar with SIC groupings and whether the descriptions provided in the Standard Industrial Classification Manual published by the U.S. Government Printing Office would be adequate for manufacturers to determine in which group they belong.

Section 710.3(a)(2) would modify the original proposal and would only require importers to report those chemical substances imported into the United States for a commercial purpose since January 1, 1977. The March 9, 1977 proposed regulations would have required importers to report not only those chemical substances imported in bulk into the United States but also those chemical substances contained in the articles they import. Comments from industry and trade associations argued that it would be extremely burdensome for importers to identify the chemical substances contained in the articles they import. Moreover, they argued that the proposed regulations would have imposed a burden on importers of articles which was not imposed on domestic manufacturers of articles. The Administrator has decided to revise the original proposal to limit the reporting requirement to imported chemical substances. This includes all chemical substances which are imported in cans, bottles, drums, barrels, packages, tanks, bags, and other devices which are used to contain the substances during importation. EPA solicits comments on this reproposal.

Aside from importers, under this proposal only establishments in SIC groups 28 and 2911 would be required to report the chemical substances they have manufactured since January 1, 1977. Section 710.3(b) provides that in addition to those required to report, any person who has manufactured, imported, or processed a chemical substance for a commercial purpose since January 1, 1975, may report that substance or authorize a trade association or other representative to report on his behalf.

As proposed in § 710.3(c), during a special reporting period, 120 days after the first publication of the inventory, any person who has processed or used a chemical substance (including the manufacture of a mixture or article containing that chemical substance) for a commercial purpose since January 1, 1975 may report that chemical substance if it was not included in the inventory. EPA would like to minimize duplicative reporting of chemical substances by processors during the initial reporting period to facilitate compilation of the initial inventory in a timely way. Many processors and users have expressed concern that the manufacturers of the chemical substances they process may fail to report. EPA hopes that this proposed provision would reduce the amount of duplicative reporting by processors seeking to ensure that chemical substances are included in the inventory.

As provided by section 5(a)(1)(A) of TSCA, 30 days after publication of the initial inventory any person who manufactures or imports a "new chemical substance must submit premanufacture notification prior to manufacture or importation of the chemical substance. Processors are not subject to the provisions of section 5(a)(1)(A). However, it is a prohibited act under section 15(2) of TSCA for a person to use for commercial purposes a chemical substance which he had reason to know was manufactured in violation of section 5. As a matter of Agency policy, the Agency will not enforce section 15(2) with respect to processors and users of chemical substances (including manufacturers of a mixture or article containing that substance) during the 120-day period proposed in § 710.3(c). The Agency will, however, enforce section 15(2) with respect to all manufacturers and importers of chemical substances during that period, and will enforce sections 15(2) and (3) with respect to all persons after the period expires.

Section 710.3(d) would clarify who may not report chemical substances for the inventory, either because the chemical substances are automatically included in the inventory as provided in § 710.4(b), or because they are excluded from the inventory as provided in paragraphs (c) and (d) of § 710.4. A person should only report those substances which he knows and could verify are chemical substances as defined in the Act. In particular, chemical substances used exclusively as pesticides and drugs may not be reported. In addition, chemical substances manufactured solely in small quantities for research and development may not be reported. If a person does not know whether his customers may use the substance for a TSCA use and does not report, but discovers later that they do, he may add it to the inventory at that time. Any customer who uses the substance could add it to the inventory during the 120-day period provided in § 710.3(c).

Scope of the Inventory

In the March 9, 1977 proposal EPA relied upon certain definitions of terms such as "mixture," "manufacture or process for 'commercial purposes'," and "by-product" to clarify what chemical substances should be reported for the inventory. Because this approach was confusing to many, EPA has redrafted section 710.4 to clarify what substances are eligible for inclusion on the inventory.

Basically, the Act provides in sections 8(b) and (f) that any chemical substance may be included on the inventory if it has been manufactured or processed for a commercial purpose in the United States within three years of the effective date of these regulations. In the regulations proposed on March 9, 1977, EPA anticipated that the regulations would

become effective by July 1, 1977, and that the three-year period would date from July 1, 1974. The decision to repropose means that the final regulations will not be published until sometime in October. In order to define a reporting period that industry can rely upon, regardless of the actual date the final regulations are published, EPA is proposing that the three-year period begin on January 1, 1975. This proposal would satisfy those who have urged that EPA define the period in terms of calendar years. EPA recognizes that some may still prefer to have the period include the full three years from whatever date the regulations are final. EPA specifically solicits comment on this matter.

Section 710.4(a) generally defines which chemical substances are manufactured, imported, or processed "for a commercial purpose." Because the term "manufacture" is defined to include "to import into the customs territory of the United States," chemical substances which are imported into the United States are subject to the same provisions as those which are manufactured in the United States. The provisions in § 710.4 (a) are consistent with the definition of the term "manufacture, process, or import 'for commercial purposes'" in § 710.2. Accordingly, any chemical substance manufactured, processed, or imported (1) for distribution in commerce, (2) for use as a catalyst or an intermediate, (3) for use by the manufacturer, or (4) for test market purposes, would be eligible for inclusion on the inventory.

Chemical Substances Automatically Included

Section 710.4(b) specifies that chemical substances which are naturally occurring and are unprocessed or processed only by manual, mechanical, or gravitational means; by dissolution in water; or by heating solely to remove water shall be automatically included on the inventory under the category "Naturally Occurring Chemical Substances." Examples of naturally occurring substances that would be included on the inventory are raw agricultural commodities, water, air, natural gas, crude oil, rocks, ores, and minerals.

In the March 9, 1977 regulations, EPA proposed to automatically include on the inventory the general category "raw agricultural commodities." The revised proposal would incorporate this category. Accordingly, as under the original proposal, manufacturers, importers, and processors of raw agricultural, horticultural, and silvicultural products, such as unprocessed cotton, wood, wool, straw, oat hulls, and raw hides, for example, would not report. For clarity, this proposal also cites water, air, and natural gas, and crude oil as examples of "naturally occurring chemical substances" that need not be reported. With respect to rocks, ores, and minerals, this revised approach would not attempt to list each automatically included mineral separately, but would include all rocks, ores, and minerals under the category "naturally occurring chemical substances."

In the supplement to the March 9, 1977 regulations published on April 12, 1977 (42 FR 19308), EPA proposed a list of minerals under consideration for inclusion on the inventory without reporting. Persons commenting on that proposal have emphasized the difficulty of knowing precisely all the minerals a company may be extracting from the earth and, accordingly, whether the minerals being mined were included on the inventory or not. Most rocks and ores contain many different substances of varying composition depending upon the geological formation of the mined area. With respect to creating an inventory of where each major mineral is mined, the U.S. Bureau of Mines already has such an inventory. For those minerals, such as asbestos, which may present a risk to human health or the environment, EPA will require information on uses, exposure, and other factors necessary in assessing that risk under section 8(a) of the Act.

EPA solicits comments on the proposed approach to "naturally occurring chemical substances" and any suggestions for clarifying this category.

Chemical Substances Excluded by Definition or by TSCA Section 8(b)

Section 710.4(c) clarifies those substances which may not be reported for the inventory either because of the definition of "chemical substance" in section 3(2) of the Act or the specific exemption for chemical substances manufactured, imported, or processed solely in small quantities for research in section 8(b) of TSCA. In response to the March 9, 1977, proposal, EPA received extensive comments on the exclusion of chemical substances used in the manufacture of pesticides and drugs and will respond to the comments in the final regulations. Likewise, the final regulations will explain the exemptions for alloys, inorganic glasses, ceramics, frits and cements, including Portland cement.

A chemical substance used as a reagent in quality control testing, where the material tested is distributed in commerce, is itself considered to be distributed in commerce and should be reported to EPA for inclusion on the inventory unless it is known that the "small quantities for research and development" exemption applies. As mentioned above, section 8(b) explicitly exempts from the inventory any chemical substance which is manufactured or processed only in small quantities solely for purposes of research, including analysis of another chemical substance. EPA would define "small quantities for research and development" as quantities that are not greater than reasonably necessary for such purposes and which, after the effective date of premanufacture notification requirements, are used for "research and development that is conducted by, or directly supervised by, a technically qualified individual(s)." Accordingly, unless the persons performing the quality control testing are themselves technically qualified persons, as defined in § 710.2, or are directly supervised by technically qualified individuals, the chemical substance would not be considered to be manufactured in a "small quantity for research and development" and would be subject to these reporting requirements or the premanufacture notification requirements.

Chemical Substances Excluded From the Inventory

Section 710.4(d) clarifies that certain chemical substances which are not manufactured for distribution in commerce as chemical substances per se and have no commercial purpose separate from the mixture or article of which they may be a part are excluded from these reporting requirements. Specifically, impurities or chemical substances which are unintentionally present with another chemical substance are excluded. With respect to byproducts, the proposed regulations of March 9, 1977, would have excluded byproducts which have no commercial purpose. However, the proposal left unclear whether manufacturers should report byproducts which are not manufactured for a commercial purpose but are used as a fuel or reprocessed. These regulations would provide that those byproducts whose sole commercial value is to municipal or private organizations who (1) burn it as a fuel, (2) dispose of it as a waste, including as a landfill or for enriching soil or (3) extract component chemical substances which may have some commercial value, may be included on the inventory but that the reporting of such substances, insofar as they are byproducts as defined in § 710.2, is optional.

In proposing to exempt from the reporting requirements such byproducts which have some commercial purpose, EPA intends to encourage conservation and recycling of the energy and resources contained in the waste material that might otherwise be discarded because of reporting burdens under TSCA. Further, insofar as these wastes are hazardous, EPA intends to require reporting of them under the Resource Conservation and Recovery Act (RCRA) next spring or under TSCA section 8(a)(2) during the second or subsequent phases of reporting. EPA explicitly solicits comments on this approach, particularly with respect to the proposed exemptions.

The exclusions in § 710.4(d) (3), (4), and (5) are for chemical substances which result from chemical reactions that occur incidental to exposure to environmental factors, or during storage or end use of a chemical substance or mixture. These exemptions clarify those provided in the March 9, 1977, proposed regulations and are consistent with the legislative history of the Act (H.R. Rep. 94–1341, 94th Cong., 2d Sess. 13 (1976)).

In § 710.4(6), EPA would exclude "any chemical substance which is the result of a chemical reaction that occurs upon use of curable plastic or rubber molding compounds, inks, drying oils, metal finishing compounds, adhesives, paints, or other chemical substances used to manufacture an article destined for the marketplace without further chemical change of the chemical substance except for those chemical changes that may occur as described elsewhere in this § 710.4(d). This provision expands upon the earlier proposal to exempt chemical substances formed upon use of curable plastic molding compounds. By providing a general exclusion for chemical substances manufactured as articles or parts of articles destined for the marketplace without further chemical change of the chemical substance, EPA intends to exclude from reporting persons who are primarily manufacturers of articles.

Section 710.2 proposes to define "article" as "a manufactured item (a) which is formed to a specific shape or design during manufacture, (b) which has end use function(s) dependent in whole or in part upon its shape or design during end use, and (c) which is functional in its end use(s) without change of chemical composition during its end use; except that (d) fluids and particles are not considered articles regardless of shape or design." Under this definition, fluids and particles such as dust, powders, dispersions, granules, lumps, and flakes would not be considered articles.

To illustrate, sodium hypochlorite and particles of titanium dioxide would not be considered "articles" in themselves. The function of sodium hypochlorite as a bleach, for example, depends upon a change of chemical composition during its end use. Similarly, although the distinctive shape of titanium dioxide particles may contribute to their ultimate usefulness, they are particles and would not be considered articles in themselves. Paints containing titanium dioxide particles would not be articles because they are liquids and do not have "shape or design" when manufactured. But automobiles coated with titanium dioxide containing paints are articles under this definition. Other examples of articles which need not be reported for the inventory include plastic films, synthetic fibers, leather goods, nails, iron bars, chrome plated bumpers, jewelry, paper, particle board, furniture, refrigerators, cloth, and clothing. EPA solicits comments on this provision and the clarity of the distinction between articles and chemical substances.

Further, precursors of the compositions covered by the exclusions in § 710.4(d) (5) and (6) may be supplied to users as two or more different products which need to be mixed as a first step in their use because of limited stability of the mixture. Chemical substances formed during such mixing would be excluded.

Finally, § 710.4(d)(7) provides an exemption for chemical substances that may occur as the result of a chemical reaction when a stabilizer, colorant, odorant, antioxidant, filler, solvent, carrier, surfactant, plasticizer, corrosion inhibitor, antifoamer or de-foamer, dispersant, precipitation inhibitor, binder, emulsifier, de-emulsifier, dewatering agent, agglomerating agent, adhesion promoter, flow modifier, pH neutralizer, sequestrant, coagulant, flocculant, fire retardant, lubricant, chelating agent, quality control reagent, or a chemical substance which is solely intended to impart a specific physico-chemical characteristic functions as intended. This provision expands upon the approach in the March 9, 1977, proposal which would have exempted as "mixtures" the result of chemical reactions that occur when certain chemical substances function as intended.

How to Report

Section 710.5(a) would provide general instructions for reporting chemical substances. As discussed in the earlier sections, only importers and manufacturers with establishments in SIC groups 28 and 2911 would be required to report, and "small manufacturers" in these SIC groups would not have to report certain information. The Agency would encourage any person not required to report all the information, to do so anyway because the information will establish the data base for future actions under TSCA.

Section 710.5(b) outlines how to report the name or specific identity of a chemical substance. In April 1977, EPA published and made available the TSCA Candidate List of Chemical Substances, and on April 12, 1977, published in the Federal Register a guide for using this list. EPA realizes that the Candidate List is not a complete list of chemical substances in commerce and does include some substances which would be excluded from the inventory. In addition, there are some minor errors. On or before the date these reporting requirements are published in their final form in October 1977, EPA intends to revise the guide to the Candidate List and make necessary corrections and certain additions to the List itself.

Section 710.5(c) proposes that any person reporting a polymer for inclusion in the inventory must list in the description of the polymer composition at least those constituent monomers used at greater than two weight percent in the manufacture of the polymer. A person may include as part of the description of the polymer composition those monomers used at two weight percent or less in the manufacture of the polymer. Of course, all monomers themselves must be separate entries on the inventory. EPA received extensive comment on the issue of polymer reporting in response to the March 9, 1977, proposal and will respond to all the comments in the final regulations.

Additional information, which would be required according to the general instructions in § 710.5(a), is outlined in § 710.5(d). As mentioned earlier in this preamble, knowing who is manufacturing, importing, or processing a chemical substance would enable EPA to direct any future notice or requirement to the appropriate person. The reporting forms will provide three check boxes for persons to check any or all of them, as appropriate.

Manufacturers must report according to the site at which the chemical substance is manufactured. As explained earlier, the definition of "site" includes each contiguous property unit where a chemical substance is manufactured or processed whether or not such site is independently owned or operated. There may be more than one establishment, including subsidiaries or branches of a given company, at one site. The chemical substances manufactured at that site may all be reported on one form with the site address provided.

Paragraph (d)(3) of § 710.5 would require manufacturers to designate whether they manufacture and process a chemical substance only within a site and do not distribute the chemical substance, or any mixture or article containing that substance, for commercial purposes outside that site. In most cases these chemical substances would be consumed by chemical reaction in the manufacture of another chemical substance. The exposure to such chemicals would be limited to persons involved in the manufacture, processing, and use at that site and immediate environs. Intermediates and catalysts would most likely form the greatest percentage of these chemical substances. However, this provision would also apply to any other chemical substances which are not distributed in commerce outside that site.

Section 710.5(d)(4) would require that manufacturers and importers report the amount of each chemical substance manufactured or imported in calendar year 1976. Alternatively, if the chemical substance was not manufactured or imported during 1976, a manufacturer or importer would either report the amount manufactured or imported during 1975 or the projected amount during 1977. If there has been no manufacture or importation since January 1, 1975, a manufacturer or importer should report the amount distributed to others for any purpose since that date. Processors would not be permitted to report amounts processed in order to avoid double-counting.

EPA is considering requiring that all production amounts be expressed in pounds. EPA would appreciate alternative suggestions for cases where conversion to pounds appears unreasonable.

As one alternative, persons would report amounts above five thousand pounds to only two significant figures. That is, only the first two figures of a six-figure number would be reported, such as 590,000 instead of 586,272. Instead, EPA could use a one-digit code to require reporting of the range of production volume. For example, production levels of 1,000 to 10,000 pounds would be reported by "1"; 10,000 to 50,000 reported by "2"; and so forth. While this approach may be easy to use, the results may not be as valuable since the imprecision of the ranges would be compounded when the production amounts are aggregated. As a third alternative, EPA could require reporting production accurate to within ten

percent of the production. EPA would appreciate comments on these or other possible alternative ways of reporting production.

In addition, the reproposal at § 710.4 (e) would permit an importer to authorize his foreign supplier(s) to report on his behalf. For several reasons, including issues of confidentiality, importers often do not know exactly what they are importing. Because EPA's jurisdiction under TSCA extends only to importers, and not to their foreign suppliers, EPA will hold the importers liable for compliance with these reporting rules. However, the foreign suppliers will be permitted to act as agents for the importers with the latter remaining legally liable for their reports. To do so, the foreign suppliers must sign declarations on the reporting forms, and the importers must endorse these declarations. This approach is similar to that already followed by the U.S. Bureau of Customs in some of its 40 CFR Part 19 regulations.

CONFIDENTIALITY

The expanded scope of these regulations would significantly increase the number of possible claims of confidentiality that persons reporting may make. Section 14 of TSCA provides that EPA must not disclose information which is exempt from mandatory disclosure under the Freedom of Information Act (5 U.S.C. 552(b)(4)). EPA has regulations dealing with the confidentiality of business information in Part 2, Subpart B of Title 40 of the Code of Federal Regulations (40 CFR Part 2; 41 FR 36906, September 1, 1976), which outline the general approach taken by EPA in dealing with confidentiality claims. EPA intends to add a new section to those regulations which will govern how the Agency will deal with claims of confidentiality with respect to information obtained under TSCA. A proposed version of this new section should be published in the FEDERAL REGISTER for public comment within the next several months.

With respect to these reporting regulations, § 710.7(a) lists the items of information that may be claimed as confidential. EPA will design its reporting forms to allow all potential confidentiality claims to be asserted on the forms. EPA solicits comments on the various kinds of claims that might be asserted so that EPA can design its reporting forms accordingly.

Paragraphs 710.7 (b), (c), and (d) would provide that any claim of confidentiality must accompany the information at the time it is submitted to the Agency and that failure to make a claim on the reporting form could result in disclosure by EPA. EPA will consider only those claims that are asserted. Moreover, each company should take into account the possibility that EPA (or a court) might determine that some of the information should be released. Thus, if more than one claim applies concerning a particular chemical substance, the company should assert all those claims. For example, if a company believes that both the production volume of a chemical substance at a particular site or sites and the company-wide production of that substance are confidential, the company should specifically claim both of these items as confidential.

If a company makes a claim in the manner prescribed on the form, the information claimed to be confidential will be treated in accordance with EPA's confidentiality regulations and TSCA section 14, including the 30-day notice prior to release. EPA is considering amending the proposed reporting forms to include statements which a company asserting a confidentiality claim could check to substantiate its claims. This would expedite the process of making final determinations by eliminating the need for obtaining that information at a later date. The success of this approach, however, is dependent upon businesses asserting only justifiable claims. If EPA determines that a particular claim or substantiation from a company is frivolous, EPA will take this into account in making other determinations concerning that company's other claims of confidentiality.

Section 710.7(e) of these proposed regulations modifies the March 9, 1977, proposal which would have required the submission of the following information from a person submitting a claim as to the specific name or identity of a chemical substance: (1) The confidential identity; (2) a proposed name which is only as generic as necessary to protect the substance's confidential identity; (3) a list of the elements of the chemical substance and its molecular weight; and (4) a bibliography identifying any published literature and summaries of any unpublished information concerning the health and ecological effects and environmental behavior of the chemical substance. These proposed regulations would require submission of only items (1) and (2) above at the time the person submits the claim of confidentiality.

Some comments suggested that EPA publish on the inventory only a noninformative code designation instead of a generic name and list of elements of the chemical substance and its molecular weight. As explained in the preamble to the March 9, 1977, proposed regulations, EPA originally proposed that the inventory include these items so that the public would have some indication of the undisclosed substance. Because of the likelihood that someone may be able to discern the identity of a confidential chemical substance from these data, EPA is proposing to publish only a generic name. EPA would either publish the generic name as proposed or, if EPA disagreed with the proposed generic name, consult with the person submitting it before publishing a revised generic name on the inventory.

Many comments recommended that EPA not require submission of a bibliography identifying any published literature because in many cases competitors could learn the identity of a chemical substance by reading the referenced literature. Others argued that without the specific identity of the chemical substance, the health and safety data would not be particularly useful to the public. Finally, some asserted that development of such a bibliography could be costly to prepare. Many suggested that EPA simply require a brief summary of known data on the health and environmental effects of the chemical substance. Others contended that a summary would not meaningfully contribute to the public understanding of the potential risks presented by the substance. Without the specific identity of the chemical substance, the public could not verify the information and, according to some, there would be a considerable possibility that the summaries would be misleading.

For these and other reasons, EPA is proposing to drop the requirement that persons submit a bibliography or summary of the health and safety studies pertaining to the confidential chemical substance at the time the claim is made. Under section 8, EPA has authority to require submission of such information for any chemical substances in commerce and could request such information after the publication of the inventory. Moreover, TSCA section 8(e) requires submission of information which supports the conclusion that a chemical substance presents a substantial risk of injury to health or the environment. EPA would appreciate comments on this proposal.

ALTERNATIVES FOR HANDLING CONFIDENTIAL INFORMATION

Of the information reported to EPA, only the identity of the chemical substances and perhaps designation of those chemical substances manufactured and used within a single site will be published. The remainder of the information will be used by EPA for various purposes under TSCA. EPA does not anticipate that this remaining information will be routinely released to the public. If EPA proposes to release confidential information, it will do so in accordance with EPA's confidentiality regulations.

EPA will be subject to disclosure requests under the Freedom of Information Act (FOIA, 5 U.S.C. 552). Under the Act, EPA must respond to any request for records by either releasing the records or denying the request because the information is exempted from disclosure. Records may be exempt from disclosure if they are "trade secrets and commercial or financial information obtained from a person and privileged or confidential." Section 14 of TSCA makes it clear that if EPA determines that information is exempt under 5 U.S.C. 552(b)(4), it must be kept confidential by EPA.

If a manufacturer claimed that the chemical name of a particular chemical substance is a trade secret, EPA would be confronted with conflicting statutory provisions. Section 8(b) apparently requires EPA to place the chemical name in the inventory. Section 14 appears to require EPA to keep the name confidential (at least temporarily, until a final determination is made by EPA or the courts.) In addition, the Freedom of Information Act requires that EPA either release information in response to a request or provide reasons for any denial. EPA cannot refuse to answer the request. Normally, in responding to Freedom of Information requests, EPA would reply either: (1) "We have no records;" (2) "We have such records and are releasing them;" or (3) "We have such records but are denying them because they constitute a confidential trade secret and are exempt from disclosure." However, if the request concerned disclosure of the identity of a chemical substance which was allegedly a trade secret, to reply that EPA had a record but was refusing to release it would inform the requester that such a substance was being manufactured, imported, or processed for commercial purposes. The result would be to reveal the trade secret by denying the request.

Confidentiality assertions also pose a problem under section 5 of TSCA. Section 5 requires anyone who proposes to manufacture a new chemical substance to furnish EPA with a 90-day premanufacture notice, during which time the person may not manufacture the new chemical substance. This delay may be even longer if a testing rule under section 4 requires the manufaoturer to develop and submit certain test data. However, if the chemical substance is on the section 8(b) inventory, it is not a "new substance", and the section 5 notice need not be given. If a company asserts that the name or specific identity of a chemical substance is confidential, EPA may not be able to list that substance on the inventory, and all other manufacturers would have to give premanufacture notification.

EPA has not decided how it will deal with these contradictory statutory requirements in the face of a claim that the identity of a chemical substance is confidential. Four issues arise that EPA must consider before deciding which approach to take. The issues are set forth below with a discussion of the options available under each:

1. What chemical substances' identities should be determined by EPA to be entitled to confidential treatment? EPA perceives three positions it could take:

A. No chemical identity is entitled to confidential treatment.

B. Only chemical identities of those chemical substances that are manufactured and used within one site and not distributed for a commercial purpose outside that site may be entitled to confidential treatment.

C. Any chemical identity may be entitled to confidential treatment.

If EPA decided that some or all of the chemical identities claimed as confidential were not entitled to confidential treatment, companies would be given the 30-day notice required in section 14 of the Act. Before determining that a particular chemical identity was entitled to confidential treatment, EPA would have to make a specific determination, in accordance with 40 CFR Part 2, Subpart B, and the criteria in 40 CFR 2.208, that the particular chemical identity is entitled to confidential treatment.

2. Assuming that some chemical identities are temporarily (because no final determination has been made or because a court has enjoined EPA from disclosing the identity) or permanently (as a result of a final confidentiality determination by EPA or a court order) entitled to confidential treatment, how should EPA treat confidential chemical identities for purposes of the published inventory? EPA perceives four positions it could take:

A. The inventory could be published with only non-confidential chemical substances in it. There would be no mention of confidential chemical identities. This approach would give the public no information concerning confidential chemicals.

B. The inventory could be published with non-confidential chemical identities and generic names for those chemical substances that are entitled to confidential treatment. The use of generic names would inform the public in general terms about what types of confidential chemical substances had been reported.

C. The inventory could be published with non-confidential chemical identities and random code numbers for those chemical substances that are entitled to confidential treatment. The use of a random code number would not give the public any information beyond that which would be available under A, except to acknowledge the existence of confidential chemical substances.

D. The inventory could be published with only non-confidential chemical identities appearing on it and a notice that some chemical substances were reported that are confidential. This approach would give the public no more information than A or C.

3. Assuming that some chemical names are temporarily or permanently entitled to confidential treatment and that EPA is, therefore unable to publish the chemical identities on the section 8 inventory list, how are present and future manufacturers to be treated under section 5 of TSCA? EPA perceives four positions it could take:

A. If a manufacturer proposed to manufacture a chemical substance that did not appear on the inventory and asked EPA whether it was one of the reported confidential chemical substances, EPA could tell the manufacturer whether the chemical substance had been reported. If it had been reported, the manufacturer would be exempt from requirements of section 5(a), as would the manufacturer that originally reported the chemical substance.

B. If a manufacturer proposed to manufacture a chemical susbtance that did not appear on the inventory and asked EPA whether it was one of the reported confidential chemical substances, EPA could refuse to answer the question. EPA would require the manufacturer to give premanufacture notification under section 5(a), and the manufacturer would not be able to begin manufacturing for at least 90 days. The manufacturer that originally reported the chemical substance would be exempt from section 5(a). This approach would treat the two manufacturers unequally allowing one to manufacture its chemical substance without delay or interruption while requiring the other to undergo premanufacture notification and a 90-day delay. Section 5 speaks in terms of "new chemical substances." This substance would not be "new" since it was already reported for the inventory.

C. If a manufacturer reported a confidential chemical substance for the inventory, EPA could require the manufacturer to give premanufacture notification under section 5(a) and to cease manufacture for at least 90 days. If another manufacturer later proposed to manufacture the same chemical substance, EPA would require that the manufacturer give premanufacture notification and wait at least 90 days before starting manufacture. This approach would treat the two manufacturers equally. However, it would impose a burden on the first manufacturer reporting the chemical substance for the inventory in that it would have to stop manufacturing even though it may have been manufacturing the substance for some time before the inventory.

D. If a manufacturer reported a confidential chemical substance for the inventory, EPA could require the manufacturer to give premanufacture notification. However, EPA would not require the manufacturer to cease manufacture for 90 days. If another manufacturer later proposed to manufacture the same chemical substance, EPA would require that manufacturer to give premanufacture notification and wait at least 90 days before starting manufacture. This approach would give the first manufacturer reporting the chemical substance an advantage by allowing him to continue manufacture. Section 5(a) states that no person may manufacture a new chemical substance without giving notice at least 90 days before beginning manufacture. This approach would violate section 5.

4. Assuming that some chemical identities are temporarily or permanently entitled to confidential treatment, how is EPA to answer Freedom of Information requests for disclosure of records concerning confidential substances? EPA perceives two positions it could take:

A. If a request were made for disclosure of records concerning a reported chemical substance, the chemical identify of which was entitled to confidential treatment, EPA could reply: "EPA has such a record, but the request is denied because the record contains trade secrets that are exempt from disclosure by virtue of 5 U.S.C. 552(b)(4)." If a request were made for disclosure of records concerning a chemical substance that had not been reported, EPA would reply: "EPA has no such record." The result of this type of answer would be to confirm whether a particular chemical sub-

stance had been reported for the inventory and, therefore, was being manufactured, imported, or processed for commercial purposes.

B. If a request were made for disclosure of records concerning a particular chemical substance that did not appear on the inventory by chemical identity, EPA could reply: "The request is denied either because the record in question is exempt from mandatory disclosure by virtue of 5 U.S.C. 552 (b)(4) or because EPA has no such record." This same answer would be given whether or not the chemical substance in question had been reported to EPA. In this way EPA would be able to give an answer that would allow the requester to pursue any judicial remedies under the Freedom of Information Act. At the same time, EPA would not have disclosed whether the particular chemical substance was being manufactured, imported, or processed for commercial purposes.

Any combination of the options under the four issues set forth above might be selected in the final approach taken by EPA. EPA intends to evaluate the advantages and disadvantages of these options before determining how to handle claims of confidentiality under the inventory reporting. EPA would appreciate comments concerning the various alternatives mentioned here and any other possible approaches.

ENFORCEMENT LIABILITY

Because of the great importance of compiling a sound data base on the chemical substances in commerce, the Agency considers violation of these reporting requirements to be a serious violation of TSCA. Section 15(3)(B) of TSCA makes it "unlawful for any person to fail or refuse to submit reports, notices, or other information, as required by this Act or a rule thereunder." Section 16(a) provides for civil penalties of up to $25,000 for each violation of section 15. Section 16(b) provides that criminal penalties of not more than $25,000 for each day of violation, or imprisonment for not more than one year, may be imposed on "any person who knowingly or willfully violates any provision of section 15." Section 17(a) authorizes specific enforcement to restrain any violation of section 15 and to compel the taking of any action required by or under this Act.

The Agency considers the most serious violations of these reporting requirements to include the following: (1) Failure to report information required under the regulation; (2) falsification of information reported under the regulation; and (3) reporting of chemical substances which are specifically excluded from the inventory, such as chemical substances manufactured solely in small quantities for research and development.

Enforcement liability attaches to any person submitting a report for the inventory, including (1) those required to report, (2) manufacturers, importers, or processors who are not required to report, but voluntarily do so, (3) trade associations acting as agents for manufacturers, processors, or importers, and (4) those manufacturers, processors, or importers certifying to trade associations that a given chemical substance was manufactured, imported, or processed for a commercial purpose since January 1, 1975.

ECONOMIC IMPACT ANALYSIS STATEMENT

EPA has determined that the regulation does not require the compilation of an Economic Impact Analysis Statement as required by Executive Order 11821. This determination is based on the cost estimate for compilation of the inventory as originally proposed and an estimate of the additional burden created by the added reporting requirements. EPA has not completed an adequate analysis of the cost of complying with the requirements of this regulation because of the lack of time between the decision to repropose these regulations and the actual date for reproposal of the regulations. EPA is obtaining a better cost estimate at this time and will perform an Economic Impact Analysis if the cost exceeds the criteria for a major action, in general, $100 million annual cost. A discussion of the cost will accompany the final regulation.

The Environmental Protection Agency has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Analysis Statement under Executive Order 11821 and OMB Circular A-107.

Dated: July 27, 1977.

DOUGLAS M. COSTLE,
Administrator.

Parts 700 and 710 as previously proposed are withdrawn, and it is proposed to establish a new Part 710 to read as follows:

PART 710—INVENTORY REPORTING

Sec.
710.1 Scope and compliance.
710.2 Definitions.
710.3 Applicability: Who must report; who may report; who may not report.
710.4 Scope of the inventory.
710.5 How to report for the inventory.
710.6 When to report.
710.7 Confidentiality.

AUTHORITY: Subsection 8(a), Toxic Substances Control Act (90 Stat. 2003) (15 U.S.C. 2601 et seq.).

§ 710.1 Scope and compliance.

(a) This part establishes regulations governing reporting by certain manufacturers, processors, and importers of chemical substances under section 8(a) of the Toxic Substances Control Act (15 U.S.C. 2607). That subsection requires EPA to issue regulations for the purpose of compiling the inventory of chemical substances manufactured or processed for a commercial purpose, as required by section 8(b) of the Act. In accordance with section 8(b), EPA periodically will amend the inventory to include chemical substances which are manufactured, processed, or imported for commercial purposes; will revise the categories of chemical substances; and will make other amendments as appropriate.

(b) Section 15(3) of TSCA makes it unlawful for any person to fail or refuse to submit information required under these reporting regulations. In addition, section 15(3) makes it unlawful for any person to fail to keep, and permit access to, records required by these regulations. Section 16 provides that a violation of section 15 renders a person liable to the United States for a civil penalty and possible criminal prosecution. Pursuant to section 17, the Government may seek judicial relief to compel submittal of section 8(a) information and to otherwise restrain any violation of section 8(a).

(c) Each person who reports under these regulations shall permit access to, and the copying of, records that document information reported under these regulations.

§ 710.2 Definitions.

For the purposes of this part, the following terms shall have the meaning contained in the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. 321, and the regulations issued under such Act: "cosmetic," "device," "drug," "food," and "food additive." In addition, the term "food" includes poultry and poultry products, as defined in the Poultry Products Inspection Act, 21 U.S.C. 453; meats and meat food products, as defined in the Federal Meat Inspection Act, 21 U.S.C. 60; and eggs and egg products, as defined in the Egg Products Inspection Act, 21 U.S.C. 1033. The term "pesticide" shall have the meaning contained in the Federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. 136, and the regulations issued thereunder. The following terms shall have the meaning contained in the Atomic Energy Act of 1954, 42 U.S.C. 2014, and the regulations issued thereunder: "nuclear byproduct material," "nuclear source material," and "special nuclear material." In addition, "Act" means the Toxic Substances Control Act, 15 U.S.C. 2061, et seq.

"Administrator" means the Administrator of the U.S. Environmental Protection Agency or any employee of the Agency to whom the Administrator may either herein or by order delegate his authority to carry out his functions, or any person who shall by operation of law be authorized to carry out such functions.

An "article" is a manufactured item (a) which is formed to a specific shape or design during manufacture, (b) which has end use function(s) dependent in whole or in part upon its shape or design during end use, and (c) which is functional in its end use(s) without change of chemical composition during its end use; except that (d) fluids and particles are not considered articles regardless of shape or design.

"Byproduct" means a chemical substance produced without separate commercial intent during the manufacture or processing of other chemical substance(s) or mixture(s).

"Chemical substance" means any organic or inorganic substance of a particular molecular identity including (a) any combination of such substances occurring in whole or in part as a result of a chemical reaction or occurring in nature and (b) any chemical element or uncombined radical, and (c) except that "chemical substance" does not include:

(1) Any mixture,

(2) Any pesticide when manufactured, processed, or distributed in commerce for use as a pesticide,

(3) Tobacco or any tobacco product, but not including any derivative products,

(4) Any nuclear source material, special nuclear material, or nuclear byproduct material,

(5) Any pistol, firearm, revolver, shells, and cartridges, and

(6) Any food, food additive, drug, cosmetic, or device, when manufactured, processed, or distributed in commerce for use as a food, food additive, drug, cosmetic, or device.

"Commerce" means trade, traffic, transportation, or other commerce (a) between a place in a State and any place outside of such State, or (b) which affects trade, traffic, transportation, or commerce described in clause (a).

"Distribute in commerce" and "distribution in commerce" when used to describe an action taken with respect to a chemical substance or mixture or article containing a substance or mixture mean to sell or to transfer the ownership of the substance, mixture, or article in commerce, to introduce or deliver for introduction into commerce, or the introduction or delivery for introduction into commerce of the substance, mixture, or article; or to hold, or the holding of, the substance, mixture, or article after its introduction into commerce.

"EPA" means the U.S. Environmental Protection Agency.

"Establishment" means an economic unit, generally at a single site, as defined for purposes of the Standard Industrial Classification of Establishments. There may be more than one establishment at a single site.

"Importer" means any person who imports any chemical substance into the customs territory of the U.S. and includes: (a) The person primarily liable for the payment of any duties on the merchandise, or (b) an authorized agent acting on his behalf (as defined in 19 CFR 1.11).

"Impurity" means a chemical substance which is unintentionally present with another chemical substance.

"Intermediate" means any chemical substance (a) which is deliberately present in a chemical reaction sequence used to manufacture or process another chemical substance, (b) whose presence is known or reasonably ascertainable, and (c) which could be isolated and identified under conditions which are practically encountered in the environment.

"Manufacture" means to produce or manufacture in the United States or import into the customs territory of the United States.

"Manufacture, process, or import 'for commercial purposes'" means to manufacture, process, or import

(a) For distribution in commerce,

(b) For use as a catalyst or an intermediate,

(c) For use by the manufacturer, or

(d) For test marketing purposes.

"Mixture" means any combination of two or more chemical substances if the combination does not occur in nature and is not, in whole or in part, the result of a chemical reaction; except that "mixture" does include (a) any combination which occurs, in whole or in part, as a result of a chemical reaction if none of the chemical substances comprising the combination is a new chemical substance and if the combination could have been manufactured for commercial purposes without a chemical reaction at the time the chemical substances comprising the combination were combined, (b) hydrates of a chemical substance or hydrated ions formed by association of a chemical substance with water.

"New chemical substance" means any chemical substance which is not included in the inventory compiled and published under subsection 8(b) of the Act.

"Person" means any natural or juridical person including any individual, corporation, partnership, or association, any State or political subdivision thereof, or any municipality, any interstate body and any department, agency, or instrumentality of the Federal Government.

"Process" means the preparation of a chemical substance or mixture, after its manufacture, for distribution in commerce (a) in the same form or physical state as, or in a different form or physical state from, that in which it was received by the person so preparing such substance or mixture, or (b) as part of an article containing the chemical substance or mixture.

"Processor" means any person who processes a chemical substance or mixture.

"Site" means each contiguous property unit where a chemical substance is manufactured or processed whether or not such site is independently owned or operated. Property divided only by a public right-of-way shall be considered one site. For the purposes of imported chemical substances, the site shall be the business address of the importer.

"Small manufacturer or importer" means a manufacturer who (a) has only a single manufacturing site, and either (b) has total annual sales of less than $100,000, based on the manufacturer's latest complete fiscal year or (c) has no more than 2,000 pounds annual production (i.e., amount manufactured and imported) of each manufactured chemical substance. In the case of a company, which is owned or controlled by another company, such factors would apply to the parent company and all companies owned or controlled by it taken together.

"Small quantities for purposes of scientific experimentation or analysis or chemical research on, or analysis of, such substance or another substance, including any such research or analysis for the development of a product" (hereinafter sometimes shortened to "small quantities for research and development") means quantities of a chemical substance manufactured or processed or proposed to be manufactured or processed that (a) are no greater than reasonably necessary for such purposes and (b) after (the effective date of premanufacture notification requirements), are used by, or directly under the supervision of, a technically qualified individual(s).

"State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Canal Zone, American Samoa, the Northern Mariana Islands, or any other territory or possession of the United States.

"Technically qualified individual" means a person who, because of his education, training, or experience, or a combination of these factors, is capable of appreciating the health and environmental risks associated with exposure to the chemical substance which is used under his supervision, and who (a) is responsible for enforcing appropriate methods of conducting scientific experimentation, analysis, or chemical research in order to minimize such risks and (b) is responsible for the safety assessments and clearances related to the procurement, storage, use, and disposal of the chemical substance as may be appropriate or required within the scope of conducting the research and development activity.

"Test marketing" means the distribution of no more than a predetermined amount of a chemical substance, or mixture or article containing that chemical substance, by a manufacturer or processor to no more than a defined number of potential customers to explore market capability in a competitive situation during a predetermined testing period prior to the broader distribution in commerce.

"United States," when used in the geographic sense, means all of the States, territories, and possessions of the United States.

§ 710.3 Applicability: Who must report; who may report; who may not report.

Paragraphs (a), (b), and (c) of this section identify the persons subject to these requirements with respect to reporting chemical substances in accordance with § 710.4. Paragraph (d) of this section identifies the persons who may not report chemical substances for the inventory.

(a) *Who Is Required to Report*—(1) *Manufacturers.* Any person who manufactures, or has manufactured since January 1, 1977, a chemical substance(s) for a commercial purpose in an establishment included in the Chemical and Allied Products sector (as defined by Standard Industrial Classification (SIC) Major Group 28) or Petroleum Refining sector (as defined by SIC Group 2911) must report concerning the chemical substance(s) manufactured in that establishment.

(2) *Importers.* Any person who imports, or has imported since January 1,

1977, a chemical substance(s) into the United States for a commercial purpose must report concerning that chemical substance(s).

(b) *Who may report.* (1) In addition to those persons required to report by paragraph (a) of this section, any person who has manufactured, imported, or processed a chemical substance for a commercial purpose since January 1, 1975 may report concerning that chemical substance.

(2) If a person manufactured or imported a chemical substance prior to January 1, 1975 but the substance was processed after that date, he may report that substance for the inventory if he certifies that the substance was processed after January 1, 1975.

(3) A trade association may report on behalf of any person who would be permitted to report under paragraphs (b) (1) and (2) of this section. For every chemical substance reported by a trade association, at least one manufacturer, processor, or importer must have certified to that trade association, and be able to document to EPA in accordance with § 710.1(c), that the chemical substance was manufactured, imported, or processed for commercial purposes since January 1, 1975.

(c) *Who may report after publication of the inventory.* During the 120-day period after the first publication of the inventory, any person who has processed or used a chemical substance (including the manufacture of a mixture or article containing that chemical substance) for a commercial purpose since January 1, 1975 may report that chemical substance if it was not included in the inventory.

NOTE.—Premanufacture notification requirements under section 5 for manufacturers and importers of new chemical substances will begin thirty (30) days after the first publication of the inventory and will apply to all chemical substances not included on the first inventory.

(d) *Who may not report.* (1) No person may report any chemical substance which is automatically included in the inventory under § 710.4(b).

(2) No person may report any chemical substance which is excluded from the inventory under paragraphs (c) or (d) of § 710.4.

(3) No person may report any chemical substance which has not been manufactured, processed, or imported for a commercial purpose since January 1, 1975.

§ 710.4 Scope of the Inventory.

(a) *Chemical substances subject to these regulations.* The following chemical substances are manufactured, imported, or processed "for a commercial purpose";

Chemical substances which are manufactured, imported, or processed

(1) For distribution in commerce,

(2) For use as a catalyst or as an intermediate,

(3) For use by the manufacturer, or

(4) For test marketing purposes.

(b) *Naturally occurring chemical substances automatically included.* Any chemical substance which is naturally occurring and which is either unprocessed or processed only by manual, mechanical, or gravitational means; by dissolution in water; or by heating solely to remove water, shall be automatically included in the inventory under the category "Naturally Occurring Chemical Substances." Examples of such substances are: (1) Raw agricultural commodities; (2) water, air, natural gas, and crude oil; and (3) rocks, ores, and minerals.

(c) *Substances excluded by definition or Section 8(b) of TSCA.* The following substances are excluded from the inventory:

(1) Any substance which is not considered a "chemical substance" as provided in subsection 3(2)(B) of the Act and in the definition of "chemical substance" in § 710.2.

(2) Any mixture as defined in § 710.2. This term will include alloys, inorganic glasses, ceramics, frits, and cements, including Portland cement.

(3) Any chemical substance manufactured, imported, or processed solely in small quantities for research and development, as defined in § 710.2.

(d) *Chemical substances excluded from the inventory.* The following chemical substances are excluded from the inventory insofar as they are not manufactured for distribution in commerce as chemical substances per se and have no commercial purpose separate from the mixture or article of which they may be a part.

NOTE.—In addition, chemical substances excluded here would not be subject to premanufacture notification under section 5 of the Act.

(1) Any impurity.

(2) Any byproduct which has no commercial purpose.

NOTE.—A byproduct which has commercial value to municipal or private organizations who (i) burn it as a fuel, (ii) dispose of it as a waste, including in a landfill or for enriching soil, or (iii) extract component chemical substances which may have some commercial value, may be included on the inventory.

(3) Any chemical substance which is the result of a chemical reaction that may occur incidental to exposure of another chemical substance, mixture, or article to environmental factors such as air, moisture, microbial organisms, or sunlight.

(4) Any chemical substance which is the result of a chemical reaction incidental to storage of a chemical substance or mixture.

(5) Any chemical substance which is the result of a chemical reaction that may occur upon end use of other chemical substances or mixtures such as adhesives, paints, miscellaneous cleansers or other housekeeping products, fuels and fuel additives, water softening and treatment agents, and which is not itself manufactured for distribution in commerce.

(6) Any chemical substance which is the result of a chemical reaction that occurs upon use of curable plastic or rubber molding compounds, inks, drying oils, metal finishing compounds, adhesives, paints, or other chemical substances used to manufacture an article destined for the marketplace without further chemical change of the chemical substance except for those chemical changes that may occur as described elsewhere in this paragraph.

(7) Any chemical substance which occurs as the result of a chemical reaction when a stabilizer, colorant, odorant, antioxidant, filler, solvent, carrier, surfactant plasticizer corrosion inhibitor, antifoamer or de-foamer, dispersant, precipitation inhibitor, binder, emulsifier, de-emulsifier, dewatering agent, agglomerating agent, adhesion promoter, flow modifier, pH neutralizer, sequestrant, coagulant, flocculant, fire retardant, lubricant, chelating agent, quality control reagent, or a chemical substance which is solely intended to impart a specific physico-chemical characteristic functions as intended.

§ 710.5 How to report.

(a) *General instructions.* (1) Except for small manufacturers or importers, any person who is required to report under section 710.3(a) shall follow the reporting procedures of paragraphs (b), (c), and (d) of this section.

(2) Any person who chooses to report under § 710.3(b) shall follow the reporting procedures of paragraphs (b), (c), and (d) (3) of this section. In addition, the Agency encourages those persons to report in accordance with paragraphs (d)(1), (d)(2), and (d)(4 of this section. A trade association may report aggregated production data under paragraph (d)(4) of this section.

(3) Any person who is required to report under § 710.3(a) and who is a small manufacturer or importer as defined in § 710.2 shall follow the reporting procedures of paragraphs (b), (c), and (d)(1) and (d)(3) of this section. In addition, the Agency encourages small manufacturers to report in accordance with paragraphs (d)(2) and (d)(4) of this section.

(b) *Reporting the identity of a chemical substance.* (1) To report a chemical substance, a person shall first consult the TSCA Candidate List of Chemical Substances and any amendment to the Candidate List.

(2) To report a chemical substance found in the Candidate List, or in an amendment to the List, a person must complete, sign, and submit EPA inventory reporting Form A (EPA Form No. —).

(3) To report a chemical substance not found in the Candidate List, or in an amendment to the list, a person must complete, sign and submit EPA inventory reporting Form B (EPA Form No. —).

(4) For assistance in using the Candidate List or the reporting forms, consult "Guide to the Use of the TSCA Candidate List of Chemical Substances and

Instructions for Reporting" published in Appendix A of these regulations.

(c) *Reporting polymers.* (1) To report a polymer a person must list in the description of the polymer composition at least those monomers used at greater than two weight percent in the manufacture of the polymer.

(2) Those monomers used at two weight percent or less in the manufacture of the polymer may be included as part of the description of the polymer composition.

(3) For purposes of this paragraph, the "weight percent" of a monomer is the weight of the monomer expressed as a percentage of the weight of the polymeric chemical substance manufactured.

(d) *Reporting other information concerning a chemical substance.* (1) Designate whether the person manufactures, processes and or imports the chemical substance.

(2) Report the site(s) at which the person manufactures, processes, and or imports the chemical substance.

(3) Designate whether the person manufactures and processes the chemical substances only within a site and does not distribute the chemical substance, or any mixture or article containing that substance, for commercial purposes outside that site.

(4) Report the amount of the chemical substance which the person manufactured at each site and/or imported during calendar year 1976. If the person did not manufacture or import the chemical substance during 1976, report the amount manufactured and/or imported during 1975 or projected for 1977. If there has been no manufacture or importation since January 1, 1975, report the amount distributed to others for any purpose since that date.

(e) *Importers.* (1) Any importer who is required to report or who chooses to report a chemical substance for the inventory may authorize the foreign supplier of an imported chemical substance(s) to report to EPA on behalf of the importer if both the foreign supplier and the importer sign the declarations provided on the reporting form.

(2) The importer has the ultimate responsibility for reporting all information required by this part and for the completeness and truthfulness of such information. If certain information is not or cannot be provided by the foreign supplier, it must be provided by the importer.

§ 710.6 When to report.

(a) All reports concerning chemical substances manufactured, processed, or imported for a commercial purpose during the period January 1, 1975 to (the effective date of these regulations) shall be submitted by (90 days after the effective date of these regulations).

(b) All reports concerning chemical substances which are manufactured, processed, or imported for a commercial purpose for the first time during the period (the effective date of these regulations) to (the effective date of premanufacture notification regulations) shall be submitted when such manufacturing, processing, or importation begins.

§ 710.7 Confidentiality.

(a) A manufacturer, importer, or processor may claim that for a particular chemical substance any or all of the following items of information submitted under this part are entitled to confidential treatment:

(1) Company name

(2) Site.

(3) The specific chemical name or identity.

(4) Whether the chemical substance is manufactured, imported, or processed.

(5) Whether the chemical substance is manufactured and processed only within one site and not distributed for commerical purposes outside that site.

(6) The quantity manufactured, imported, or processed.

(b) Any claims of confidentiality must accompany the information at the time it is submitted to EPA. The claims must appear on the form on which the information is submitted to EPA and in the manner prescribed on the form.

(c) Any information that is covered by a claim made as specified will be disclosed by EPA only to the extent permitted by, and by means of, the procedures set forth in Part 2 of this title (41 FR 36902).

(d) If no claim accompanies the information at the time it is submitted to EPA, the information may be made public by EPA without further notice to the submitter.

(e) If a claim of confidentiality is asserted concerning the specific chemical name or identity of a particular chemical substance, the person making the claim shall furnish EPA with (1) the specific chemical name and identity and (2) a proposed generic name which is only as generic as necessary to protect the confidential identity of the particular chemical substance.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

List of Public Laws

This is a continuing listing of public bills that have become law, the text of which is not published in the FEDERAL REGISTER. Copies of the laws in individual pamphlet form (referred to as "slip laws") may be obtained from the U.S. Government Printing Office.

H.R. 4088..... Pub. L. 95–76
National Aeronautics and Space Administration Authorization Act, 1978. (July 30, 1977; 91 Stat. 312). Price: $.35.

H.R. 2502..... Pub. L. 95–77
To extend certain oil and gas leases by a period sufficient to allow the drilling of an ultradeep well. (July 30, 1977; 91 Stat. 317). Price: $.35.

H.R. 5864..... Pub. L. 95–78
To approve with modifications certain proposed amendments to the Federal Rules of Criminal Procedure, to disapprove other such proposed amendments, and for other related purposes. (July 30, 1977; 91 Stat. 319). Price: $.35.

H.R. 5970..... Pub. L. 95–79
Department of Defense Appropriation Authorization Act, 1978. (July 30, 1977; 91 Stat. 323). Price: $.35.

S.J. Res. 77..... Pub. L. 95–80
To provide for a temporary extension of certain Federal Housing Administration mortgage insurance and related authorities and of the national flood insurance program, and for other purposes. (July 31, 1977; 91 Stat. 339). Price: $.35.

H.R. 7552..... Pub. L. 95–81
Treasury, Postal Service, and General Government Appropriation Act. (July 31, 1977; 91 Stat. 341). Price: $.35.

S. 1474..... Pub. L. 95–82
Military Construction Authorization Act, 1978. (Aug. 1, 1977; 91 Stat. 358.) Price $.40.

H.R. 4975..... Pub. L. 95–83
To amend the Public Health Service Act to extend through the fiscal year ending September 30, 1978, the assistance programs for health services research; health statistics; comprehensive public health services; hypertension programs; migrant health; community health centers; medical libraries; cancer control programs; the National Cancer Institute; heart, blood vessel, lung, and blood disease prevention and control programs; the National Heart, Lung, and Blood Institute; National Research Service Awards; population research and voluntary family planning programs; sudden infant death syndrome; hemophilia; national health planning and development; and health resources development; to amend the Community Mental Health Centers Act to extend it through the fiscal year ending September 30, 1978; to extend the assistance programs for home health services; and for other purposes. (Aug. 1977; 91 Stat. 383.) Price $.35.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 10—Energy
CHAPTER II—FEDERAL ENERGY ADMINISTRATION
PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Corrective Amendments

AGENCY: Federal Energy Administration.

ACTION: Corrective amendments.

SUMMARY: The Federal Energy Administration (FEA) hereby amends its refiner and reseller/retailer pricing regulations to correct inadvertent errors and omissions in those portions of its regulations. These amendments do not in any manner change or alter the substantive provisions of the Mandatory Petroleum Price Regulations.

EFFECTIVE DATE: See discussion of specific regulatory amendments in the supplementary information.

FOR FURTHER INFORMATION CONTACT:

Deanna Williams (FEA Reading Room), 12th and Pennsylvania Avenue NW., Room 2107, Washington, D.C. 20461 (202–566–9161).

William M. Lee (Office of General Counsel), 12th and Pennsylvania Avenue NW., Room 5138, Washington, D.C. 20461 (202–566–9567).

SUPPLEMENTARY INFORMATION:

I. Definitions of "cost of crude oil," "quantity or volume of crude oil," and "throughput."
II. Benzene and toluene adjustment.
III. Increased costs allocator, the "R" factor.
IV. Definition of "product in inventory."
V. Passthrough of actual non-product cost increases by certain sellers of propane, butane, and natural gasoline.
VI. Typographical and publication errors and use of parallel terms.

The following amendments to the Mandatory Petroleum Price Regulations are to correct inadvertent errors and omissions in the present regulations. The sole purpose of these amendments is to correct and clarify the regulations and not to change the substantive provisions of the regulations in any manner.

I. Definitions of "Cost of Crude Oil," "Quantity or Volume of Crude Oil," and "Throughout"

First, on July 20, 1976, FEA amended the price regulations to exempt naphthas, gas oils, and certain "other products" including "unfinished oils," effective September 1, 1976 (41 FR 30096, July 22, 1976). FEA failed at that time, however, to make a corresponding revision in the definition of the "cost of crude oil in § 212.82, which included "the cost of [certain] unfinished oils * * * *which are covered products*." (Emphasis added.) The cost of unfinished oils which are further refined (the cost of which was includable before any deregulation actions were taken) continues to be properly includable as a "cost of crude oil," even though unfinished oils are no longer a covered product. Accordingly, the definition of "cost of crude oil" is revised effective September 1, 1976, to clarify that it continues to include the cost of certain unfinished oils which were covered products before their September 1, 1976, exemption.

Second, corrective changes in the definitions of "cost of crude oil," "quantity or volume of crude oil," and "throughput" are necessary, to conform the language of the price regulations to Ruling 1976–4 (41 FR 25886, June 23, 1976). Ruling 1976–4 holds that synthetic fuels (crude oil substitutes) processed from oil shale, tar sands, coal, and other natural deposits that must be mined before the crude oil substitute can be extracted are not within the purview of the FEA price and allocation regulations. However, FEA's current regulations regarding the computation of a refiner's "increased product costs," which refer to the "cost of crude oil" as defined in § 212.82 and the "quantity or volume of crude oil" as defined in § 212.83(c)(2)(iii)(C)(II) do not expressly include substitutes for crude oil and unfinished oils. Nor does the definition of "throughput" in § 212.83(c)(2)(iii)(E)* include such synthetic fuels. Thus these sections are amended to clarify that the cost of such synthetic fuels, although not subject to FEA price or allocation regulations (Ruling 1976–4) when acquired for use as crude oil substitutes, is properly includable within a refiner's "cost of crude oil" and the volume of such synthetic fuels when used as crude oil substitutes is properly includable within a refiner's "quantity or volume of crude oil" and "throughput."

II. Benzene and Toluene Ajustment

FEA exempted benzene and toluene from the price and allocation regulations effective September 1, 1976 (41 FR 30096, July 22, 1976). However, FEA did not delete the regulatory provisions that formerly provided an incentive for increased production of benzene and toluene, contained in § 212.83(a)(4) and in the adjustment in the "D_i" factor of the refiners' price formulae in § 212.83(c)(2)(iii)(B). An adjustment to the amount computed under "D_i" for general refinery products because of benzene and toluene production is not appropriate after the exemption of benzene and toluene, as those products are no longer subject to price regulations. Accordingly, the incentives are eliminated, effective as of the September 1, 1976, exemption of benzene and toluene.

III. Increased Costs Allocator, the "R" Factor

Beginning in February 1976, FEA gave refiners the option of allocating increased crude oil costs to product prices on the basis of the relative volumes of certain products or product categories refined by the refiner from crude oil, pursuant to a formula commonly known as the "R" factor ("R/R_i") (41 FR 5111, February 4, 1976). On January 19, 1977, FEA amended its regulations, effective January 1, 1977, to require refiners not later than March 1, 1977 to allocate both increased crude oil and non-product costs on the basis of products refined by the refiner from crude oil, or the "R" factor. ("R/R_i") (42 FR 5030, January 27, 1977) The purpose of the amendments first permitting and later requiring that cost increases be allocated on the basis of product refined by the refiner from crude oil was to exclude product sales volumes attributable to purchased product and blending agents from the cost allocator. FEA did not intend, however, when adopting the "R" factor to exclude volumes of product attributable to refinding of unfinished oils and addition of additives from the cost allocator computation. Therefore, effective February 1, 1976, with respect to crude oil cost increases (§ 212.83(c)(2)(iii)(C)) and to January 1, 1977, with respect to non-product cost increases (§ 212.83(c)(2)(iii)(E)) the definitions of "R" and "R_i" are amended to clarify that product volume attributable to the refining of unfinished oils and the addition of additives is included in the computation of the "R" factor cost allocator.

IV. Definition of "Product in Inventory"

Section 212.92 was amended on May 5, 1976 (41 FR 19110, May 10, 1976) to allow resellers and retailers increased pricing flexibility by permitting them to calculate cost of product in inventory based on separate inventories to the extent such inventories were maintained pursuant to generally accepted accounting principles historically and consist-

ently applied by the seller concerned. In the preamble to the amendment FEA stated:

• • • First, "product in inventory" is defined as either (1) the entire undivided stock of the seller's product, no matter where located, or (2) that portion of the seller's total stock of the product concerned which constitutes a separate inventory under generally accepted accounting principles historically and consistently applied by the seller concerned. Sellers may elect to use the second definition if they qualify under the terms of that definition but they must have consistently utilized separate inventory accounting methods for cost management or other normal business purposes since May 15, 1973 • • •.

However, in the actual amendment to the regulation in two instances the word "covered" was inserted before the word "product."

"Product in inventory" means, at the option of the seller concerned, either: (1) the entire, undivided stock of a *covered* product, no matter where located, purchased and held for resale by the seller concerned; or (2) that portion of the total stock of a *covered* product purchased and held for resale by the seller concerned which constitutes a separate inventory under generally accepted accounting principles consistently and historically applied by the seller concerned • • •. (§ 212.92, emphasis added.)

The addition of the word "covered" before the word "product" in the definition of "product in inventory" was inadvertent. The amendment as issued could arguably be construed to require resellers and retailers to compute cost of "product in inventory" on the basis of the "covered products" categories as defined in § 212.31 even if the seller had historically and consistently maintained inventories of specific covered products or product groups that were less comprehensive than the defined categories of "covered products."

It is FEA's intention that sellers may calculate "increased product costs" and prices pursuant to § 212.92 and 212.93 on the basis of products or product categories that are less comprehensive than the defined terms set forth in Subpart B of the price regulations. The refiner price rules include an express provision in § 212.83(c)(1)(ii)(c), which permits refiners (subject to disapproval by FEA) to treat as "a particular general refinery product", separate products or product categories if they represent discrete, technical product differences that have been consistently and historically applied by that refiner. By implication, a comparable measure of flexibility must be read into the reseller and retailer price rules in order to avoid anomalous results.

For example, although the term "gasoline" is defined in § 212.31 to include "all of the various grades", it would clearly be inappropriate for a reseller or retailer of "regular" and "premium" grades of "gasoline" to make a single increased product cost calculation attributable to prices for both grades. This is because the calculation of "increased product costs pursuant to § 212.92 on the basis of a single weighted average cost of "gasoline" in inventory would not yield a meaningful measure of increased costs if the relative volumes of "regular" and "premium" gasoline in inventory were different than on May 15, 1973. An increased percentage of "premium" gasoline in inventory would, in itself, yield an amount of calculated "increased product costs," although no increase would, in fact, have taken place. Moreover, the weight-averaging of costs for "products" that have historically been separately priced would tend to distort the prices allowed to be charged for "products" by resellers and retailers, so that such prices would not be representative of the costs to the seller of those "products." For example, refiners are permitted to price gasoline separately by type and grade, and many refiners have increased prices for unleaded gasoline more than for leaded types. A requirement that resellers and retailers make a single calculation of "increased produce costs" for all types and grades of gasoline could result in a maximum allowable price for unleaded gasoline that would be less than the seller's cost for such gasoline, if unleaded gasoline were only a small portion of the seller's gasoline inventory.

Therefore, FEA is deleting the word "covered" from § 212.92 to eliminate any confusion as to what products or product groups may be used for purposes of determining cost of "product in inventory" and to clarify that the regulation change was not intended to require resellers and retailers to alter their historical method of designating the particular products to be used for the purpose of determining cost of "product in inventory." This amendment is effective May 1, 1976, the effective date of the amendment containing the error.

V. PASS THROUGH OF ACTUAL NON-PRODUCT COST INCREASES BY CERTAIN SELLERS OF PROPANE, BUTANE, AND NATURAL GASOLINE

Section 212.93 was recently amended in paragraphs (b)(4) and (e)(2) to require or permit resellers and retailers of propane, butane, and natural gasoline which elect to pass through increased non-product costs in price increases to compute such price increases using actual increased non-product costs as defined by FEA rather than using a standardized cents-per-gallon mark up previously allowed to reflect increased non-product costs. Also, all sellers may carry forward for recovery at a later date ("bank") unrecouped increased non-product costs. The effective date of the amendment is May 1, 1977. However, § 212.93 (b)(4) and (e)(2) incorrectly refer to the month of March as being the first month the amendments were in effect. Accordingly, the word "March" is deleted from, and the word "May" is added to, § 212.93 (b)(4) and (e)(2), to clarify the effective date of the amendments. Also, § 212.93(b)(4)(IV) mistakenly refers to "refiners" instead of "resellers and retailers." These corrected amendments are effective May 1, 1977, the effective date of the amendments containing the errors.

VI. TYPOGRAPHICAL AND PUBLICATION ERRORS AND USE OF PARALLEL TERMS

First, several lines in § 212.93(i)(2)(iv) were transposed and phrases were added when the section was published in the FEDERAL REGISTER (41 FR 18304, May 3, 1976). These errors are corrected effective April 28, 1976, the effective date of the amendment containing the errors.

Second, § 212.93(i)(2)(ii)(A) and (B), "General refinery products" is a duplication of § 212.93(i)(2)(i)(A) and (B), "General refinery products." The correct paragraph (i)(2)(ii)(A) and (B), "No. 2 oils", was inadvertently deleted from the section in connection with the September 1, 1976 exemption of naphthas, gas oils, and "other products" (41 FR 30096, July 22, 1976). Accordingly, § 212.93(i)(2)(ii)(A) and (B), "No. 2 oils", is reinserted in the regulations and the current § 212.93(i)(2)(ii)(A) and (B), "General refinery products", is deleted. This amendment is effective retroactive to September 1, 1976, the effective date of the inadvertent deletion of § 212.93(i)(2)(ii), "No. 2 oils", and of the duplication of § 212.93(i)(2)(i), "General refinery products".

Third, the term "maximum allowable prices" is defined in and applicable only to Subpart E, Refiners, and does not apply to Subpart F, Resellers and Retailers. The term in Subpart F corresponding to "maximum allowable prices" is simply "prices." Accordingly, the words "maximum allowable" are deleted from the following sections of Subpart F, effective as of the dates the regulations that first contained those words became effective.

1. Section 212.93(i)(2)(i)(C), effective October 1, 1976 (41 FR 44151, October 7, 1976).

2. Section 212.93(i)(2)(ii)(B) effective July 1, 1976 (41 FR 24518, June 16, 1976).

3. Section 212.93(i)(3)(i) and (ii) effective April 28, 1976 (41 FR 18304, May 3, 1976).

Fourth, § 212.93(i) deals with the reallocation of only increased product costs. Accordingly, to make this obvious and to use parallel sentence construction throughout the section, § 212.93(i)(2)(i)(C), (ii)(B), and (iii)(B) are amended to insert the word "product" between the words "increased" and "costs." These additions are made to the following sections as of the date they became effective.

1. Section 212.93(i)(2)(i)(C) effective September 1, 1976 (41 FR 44151, October 7, 1976).

2. Section 212.93(i)(2)(i)(B) effective July 1, 1976 (41 FR 24518, June 16, 1976).

3. Section 212.93(i)(2)(iii)(B) effective October 1, 1976 (41 FR 40452, September 20, 1976).

Because these amendments are only to correct inadvertent errors in previously adopted amendments to, or resulting from interpretative rulings regarding, the regulations, the Federal Energy Administration finds that good cause exists to issue these amendments immediately, without notice, or opportunity for comment.

As these amendments will not affect the quality of the environment, it is not necessary to submit them to the Administrator of the Environmental Protection Agency for comments.

FEA will review any written comments received within 30 days after the issuance of these amendments.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 212 of Chapter II, Title 10 of the Code of Federal Regulations is amended as set forth below, effective as of the dates set forth above.

Issued in Washington, D.C., July 28, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

1. Section 212.82 is amended by revising the definition of "cost of crude oil" as follows:

§ 212.82 Definitions.

• • • • •

"Cost of crude oil" means (1) for purposes of domestic crude oil, the first sale price or the purchase price if the transaction occurs after the first sale, provided that the first sale price or purchase price conforms with the requirements of Part 212, plus the cost of transportation. The cost of domestic crude oil also includes the cost of unfinished oils which were covered products as of May 31, 1976, and of synthetic fuels (crude oil substitutes) processed from oil shale, tar sands, coal, and other natural deposits that must be mined before the crude oil substitute can be extracted, provided that such oils or fuels are used in refining and are further refined; (2) for purposes of imported crude oil, the landed cost.

• • • • •

§ 212.83 is amended as follows:

2. § 212.83(a)(4) is deleted.

3. § 212.83(c)(2)(iii)(B) is amended by revising the definition of "D_i*" to read as follows:

4. Section 212.83(c)(2)(iii)(C) is amended by revising the definitions of "Q'", "O'", "R'" and "R_i'" to read as follows:

5. Section 212.83(c)(2)(iii)(E) is amended by revising the definitions of "R_i'", "R'", and "R'" and in subparagraph (I) the definition of "throughput" and the recordkeeping requirement as follows:

§ 212.83 Price rule.

(a) • • •

(4) [Deleted]

• • • • •

(c) *Allocation of increased costs.* • • •

(2) *Formulae.* • • •

(iii) *Definitions.* • • •

(B) *The "D" factors.* • • •

D_i*=The total dollar amount a refiner may apportion in the period "u" to general refinery products (i=4) in whatever amounts it deems appropriate to each particular general refinery product to compute the maximum allowable price. The formula for "D_i*" must be computed only once for i=4 (all general refinery products).

• • • • •

(C) *The "A" factor.* • • •

Q'=The total quantity or volume of crude oil purchased or landed in the period "t" for refining or for resale under § 211.65, provided however that this amount shall be reduced by the quantity of crude oil sold under § 211.65 in the period "t" "The quantity or volume of crude oil" includes quantities or volumes of unfinished oils which were covered products as of May 31, 1976 and of synthetic fuels (crude oil substitutes) processed from oil shale, tar sands, coal, and other natural deposits that must be mined before the crude oil substitute can be extracted, provided that such oils or fuels are used in refining and are further refined.

O'=The total quantity or volume of crude oil purchased or landed in the period "o" for refining or for resale under § 211.65, provided however that this amount shall be reduced by the quantity of crude oil sold under § 211.65 in the period "o". "The quantity or volume of crude oil" includes quantities or volumes of unfinished oils which were covered products as of May 31, 1976 and of synthetic fuels (crude oil substitutes) processed from oil shale, tar sands, coal, and other natural deposits that must be mined before the crude oil substitute can be extracted, provided that such oils or fuels are used in refining and are further refined.

R'=The total volume of all products refined by the refiner from crude oil (including product attributable to unfinished oils and additives) in the period "t".

R_i'=The total volume of a specific covered product of the type "i" refined by the refiner from crude oil (including product attributable to unfinished oils and to additives) in the period "t".

"The quantity or volume of crude oil" cludes quantities or volumes of unfinished oils which were covered products as of May 31, 1976 and of synthetic fuels (crude oil substitutes) processed from oil shale, tar sands, coal, and other natural deposits that must be mined before the crude oil substitute can be extracted, provided that such oils or fuels are used in refining and are further refined.

• • • • •

(E) *The "N" factor.* • • •

R_i'=The total volume of a specific product of the type "i" refined by the refiner from crude oil (including unfinished oils which were covered products as of May 31, 1976 and synthetic fuels), and including volumes attributable to additives in the period "t".

R'=The total volume of all products refined by the refiner from crude oil (including unfinished oils which were covered products as of May 31, 1976 and synthetic fuels), and including volumes attributable to additives, in the period "t".

• • • • •

R'=The total volume of all products refined by the refiner from crude oil (including unfinished oils which were covered products as of May 31, 1976 and synthetic fuels), and including volumes attributable to additives, in the period "t".

• • • • •

(I) *Refinery fuel cost increase.* • • •

"Throughput" means the volume of crude oil, unfinished oils, syntheic fuels and natural gas liquids refined during the time period specified.

Refiners shall maintain records of the volume and cost of products purchased or landed that are consumed as refinery fuel.

6. § 212.92 is amended in the definition of product in inventory" to read as follows:

§ 212.92 Definitions.

• • • • •

"Product in inventory" means, at the option of the seller concerned, either: (1) the entire, undivided stock of a product, no matter where located, purchased and held for resale by the seller concerned; or (2) that portion of the total stock of a product purchased and held for resale by the seller concerned which constitutes a separate inventory under generally accepted accounting principles consistently and historically applied by the seller concerned. However, the cost of transportation may be included as a cost of product in inventory only up to the point at which the product concerned first comes to rest in facilities which constitute a part of the seller's storage and distribution system.

• • • • •

7. § 212.93 is amended in paragraphs (b)(4)(VI), (e)(2) and (i)(2)(i), (ii), and (iv) and (i)(3)(i) and (ii) to read as follows:

§ 212.93 Price rule.

• • • • •

(b) Notwithstanding the provisions of paragraph (a) of this section: • • •

(4) With request to sales of propane, butane, and natural gasoline beginning with May 1977: • • •

(VI) *Depreciation cost increase.* Depreciation cost increase is computed by applying the formula for "E_n" above. For purposes of this computation "C" is the cost attributable to the depreciation of equipment, machinery, and the facility, which are associated with propane, butane, and natural gasoline sales operations; provided that such costs are computed according to generally accepted accounting practices historically and consistently applied by the firm and

to the extent that such costs are not otherwise covered by this section. If Form 10–k is filed with the Securities and Exchange Commission of an analogous report is filed with a state regulatory agency, the amount computed for depreciation cost increase must be consistent with the figures used in preparing Form 10–k or such analogous report. Accounting procedures used to compute depreciation cost increase by resellers and retailers which do not file such form or report, or on whose behalf such form or report is not filed, must be calculated according to generally accepted accounting practices historically and consistently applied by the firm concerned for certified annual financial reports prepared by an independent accounting firm. No capital investments may be included in non-product costs as expenses; all such investments may be capitalized and depreciated and included in the computation of "E_{n^t}" for depreciation cost increase.

* * * * *

(e) Notwithstanding the provisions of paragraph (a) of this section: * * *

(2) With respect to sellers of propane, butane, and natural gasoline beginning May 1, 1977, the amount of increased non-product cost calculated pursuant to paragraph (b) (4) of this section for propane, butane, or natural gasoline and not recouped by a price adjustment in the subsequent month pursuant to paragraph (b) (4) of this section may also be added to the May 15, 1973 selling price of propane, butane or natural gasoline at the time the selling prices are computed pursuant to paragraphs (a) and (b) (4) of this section.

* * * * *

(i) *Reallocation of increased product costs among products.* * * *

(2) Increased product costs may be reallocated only as follows: (i) *General refinery products.* * * *

(C) Beginning on July 1, 1976, no increased product costs for general refinery products other than propane, butane, natural gasoline, natural gas liquids, and aviation gasoline may be reallocated to prices for any other covered product.

(ii) *No. 2 oils.* (A) To the extent that a seller does not allocate its increased product costs for No. 2 oil to the prices for that product, it may reallocate the unallocated part of its increased product costs for that product to the prices for gasoline, in whatever amounts the seller deems appropriate. No increased product costs for No. 2 oils may be reallocated to the prices for any general refinery product or products, including propane, or for aviation jet fuel.

(B) Beginning on April 21, 1976, no increased product costs for No. 2 oils may be reallocated to prices for any covered product.

* * * * *

(iv) *Propane.* To the extent that a seller does not allocate its increased product costs for propane to the prices for that product, it may reallocate the unallocated part of its increased product costs for that product to the prices for gasoline or for any other general refinery product (or products), or for both or all of them, in whatever amounts the seller deems appropriate. No increased product costs for propane may be reallocated to the prices for No. 2 oils or for aviation jet fuel.

* * * * *

(3) With respect to each reallocation of increased product costs pursuant to this paragraph, a seller shall:

(i) Determine the increased product cost pursuant to the definition of § 212.92 of the product from which increased product costs are to be reallocated, but without regard to such reallocation, and then adjust downward the amount so determined, for purposes of determining prices of that product, by a per unit amount which is equal to the total dollar amount which is reallocated from such product, divided by the same number of units in inventory as was first used to determine the unadjusted amount of increased product cost of such product, and

(ii) Determine the increased product cost pursuant to the definition of § 212.92 of the product to which increased product costs are to be reallocated, but without regard to such reallocation, which amount may then be adjusted upward, for purposes of determining prices of that product, by a per unit amount which is not more than the total dollar amount which is reallocated to such product, divided by the same number of units in inventory as was first used to determine the adjusted product cost of such product.

Title 12—Banks and Banking

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER D—FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

[No. 77–473]

PART 563—OPERATIONS

Mortgage-Backed Bonds

JULY 27, 1977.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: This rule revises the Board's mortgage-backed-bond regulation to delegate authority to the Director of the Board's Office of Examinations and supervision to waive eligibility requirements and restrictions pertaining to such bonds. The Federal Home Loan Bank Board, acting in its capacity of operating head of the Federal Savings and Loan Insurance Corporation, believes this change is needed to shorten Board processing time with regard to waiver requests.

EFFECTIVE DATE: August 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Harry W. Quillian, Associate General Counsel, Federal Home Loan Bank Board, 202–376–3556.

SUPPLEMENTARY INFORMATION: The Board finds that (1) notice and public procedure are unnecessary under 5 U.S.C. 553(b) and 12 CFR 508.11, because the amendment is related to Board management and rules of Board organization, procedures and practice, and (2) publication of said amendment for the 30-day period specified in 5 U.S.C. 553(d) and 12 CFR 508.14 prior to effective date is unnecessary for the same reason.

Accordingly, 12 CFR Part 563 is amended by adding a new paragraph (g) to § 563.8–2, to read as follows:

§ 563.8–2 Issuance of mortgage-backed bonds.

* * * * *

(g) *Delegation of waiver authority to Director, Office of Examinations and Supervision.* Requests for waiver of eligibility requirements and restrictions prescribed under paragraphs (a) and (b) of this section, and all supporting information, shall be filed with the Supervisory Agent, who shall prepare a report and recommendation on the request to be submitted to the Director, Office of Examinations and Supervision, within 10 business days after receipt of such filing. The Director is authorized, on behalf of the Board, to grant such waiver or waivers if in his opinion the policies, condition, or operation of the requesting institution, relative to the terms of the proposed bond issue, do not afford a basis for supervisory objection thereto. In the event that the Director has not acted favorably on the request within 10 business days after receipt of such materials from the Supervisory Agent, the request shall be submitted for decision by the Corporation and the requesting institution shall be so informed.

(Sec. 402, 403, 407, 48 Stat. 1256, 1257, 1260, as amended (12 U.S.C. 1725, 1726, 1730). Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR 1943–48 Comp., p. 1071.)

By the Federal Home Loan Bank Board.

J. J. FINN,
Secretary.

Title 16—Commercial Practices

CHAPTER 1—FEDERAL TRADE COMMISSION

[Docket No. 8847–o]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

American General Insurance Co., Et Al.

AGENCY: Federal Trade Commission.

ACTION: Final order of divestiture.

SUMMARY: This order, among other things, requires a Houston, Texas insurance company to divest itself completely of the Fidelity & Deposit Co. of Maryland, subject to FTC approval, and prohibits the firm, for a ten-year period, from acquiring any U.S. company engaged in fidelity or surety underwriting, without prior Commission consent.

DATES: Complaint issued June 17, 1971. Final Order issued June 28, 1977.[1]

FOR FURTHER INFORMATION CONTACT:

David I. Wilson, Federal Trade Commission, Bureau of Competition, 6th and Pennsylvania Ave. NW., Washington, D.C. 20580, 202–724–1276.

SUPPLEMENTARY INFORMATION: In the Matter of American General Insurance Company, a corporation, respondent, and Fidelity & Deposit Co. of Maryland, a corporation, intervenor. The prohibited trade practices and/or corrective actions, as codified under 16 CFR 13, are as follows:

Subpart—Acquiring Corporate Stock or Assets: § 13.5 Acquiring corporate stock or assets.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 7, 38 Stat. 731, as amended; 15 U.S.C. 18.)

The Final Order of divestiture, including further requiring report of compliance therewith, is as follows:

FINAL ORDER

This matter having been heard by the Commission upon the appeal of respondent from the initial decision, and upon briefs and oral argument in support thereof and opposition thereto, and the Commission for the reasons stated in the accompanying Opinion having determined to sustain the initial decision with certain modifications:

It is ordered, That the initial decision of the administrative law judge, pages 1–48, be adopted as the Findings of Fact and Conclusions of Law of the Commission, except to the extent indicated in the accompanying Opinion.

Other Findings of Fact and Conclusions of Law of the Commission are contained in the accompanying Opinion.

It is further ordered, That the following Order to Cease and Desist be, and it hereby is, entered:

ORDER

It is ordered, That:

I.

Respondent, American General Insurance Company (hereinafter "American General"), a corporation, and its officers, directors, agents, representatives, employees, subsidiaries, affiliates, successors and assigns, within one year from the date this Order becomes final and subject to prior approval of the Federal Trade Commission, divest absolutely and in good faith, all stock, assets, title properties, interests, rights and privileges, of whatever nature, tangible and intangible, acquired by American General as a result of its acquisition of Fidelity and Deposit Company, together with all contract rights, premiums payable, buildings, improvements, equipment, additions and other property of whatever description which has been added since that acquisition or hereafter shall be added to the property or assets of Fidelity and Deposit Company of Maryland ("Fidelity and Deposit"), so as to restore Fidelity and Deposit as a going concern and effective competitor in the fidelity and surety bond businesses.

II.

By such divestiture none of the assets, properties, title, interest, rights or privileges described in Paragraph I of this Order shall be sold or transferred, directly or indirectly, to any person who is at the time of divestiture an officer, director, employee or agent of or under the control or direction of American General or any of its subsidiary or affiliate corporations, or who owns or controls, directly or indirectly, more than one (1) percent of the outstanding shares of common and/or preferred stock of American General.

III.

No method, plan or agreement of divestiture to comply with this Order shall be adopted or implemented by American General save upon such terms and conditions as first shall be approved by the Federal Trade Commission.

IV.

Pending divestiture, the assets and business acquired from Fidelity and Deposit shall be maintained and operated as a separate corporation with separate books of account, separate management, separate assets, and separate personnel.

V.

Pending divestiture, no substantial property or other assets of the separate corporation referred to in Paragraph IV herein shall be sold, leased, otherwise disposed of or encumbered, other than in the normal course of business, without the consent of the Federal Trade Commission, and American General shall not commingle any assets owned or controlled by such separate corporation with any assets owned or controlled by American General.

VI.

For the period of three years from the date on which this Order becomes final, no individual employed by Fidelity and Deposit or the separate corporation referred to in Paragraph IV herein shall be employed by American General.

VII.

Pending divestiture, the underwriting departments and selling and management personnel of the separate corporation referred to in Paragraph IV herein and American General shall be conducted independently of each other.

VIII.

Pending divestiture, American General shall maintain the separate corporation referred to in Paragraph IV herein as an independent entity and take no steps to impair such corporation's economic and financial position.

IX.

American General shall forthwith cease any and all representation on the board of directors of Fidelity and Deposit and cease and desist from taking any steps to nominate, seat, or admit any representative of Fidelity and Deposit to the board of directors of American General.

X.

Fidelity and Deposit shall forthwith cease any and all representation on the board of directors of American General and cease and desist from taking any steps to nominate, seat, or admit any representative of American General to the board of directors of Fidelity and Deposit.

XI.

American General shall forthwith cease and desist from acquiring, directly or indirectly, for a period of ten (10) years from the date on which this Order becomes final, without the prior approval of the Federal Trade Commission, the share capital, assets or interest of any corporation engaged in fidelity and/or surety underwriting in the United States.

The provisions of this paragraph shall include any arrangement pursuant to which American General acquires the market share, in whole or in part, of any concern, corporate or noncorporate, which is engaged in fidelity and/or surety underwriting in the United States, (a) through such concern's discontinuing the underwriting of such product lines or (b) by reason of such concern's discontinuing the underwriting of such product lines and thereafter transferring to American General customer and account lists or in any other way making available to American General access to customers or customer accounts.

XII.

Within thirty (30) days from the effective date of this Order and every sixty (60) days thereafter until it has fully complied with Paragraph I of this Order, American General shall submit a verified report in writing to the Federal Trade Commission setting forth in detail the manner and form in which it intends to comply, is complying or has complied therewith. All such reports shall include, in addition to such other information and documentation as may hereafter be requested, (a) a specification of the steps taken by American General to make public its desire to divest Fidelity and Deposit, (b) a list of all persons or organizations to whom notice of divestiture has been given, (c) a summary of all discussions and negotiations together with the identity and address of all interested persons or organizations, and (d) copies of

[1] Copies of the Complaint, Initial Decision, Opinion and Final Order filed with the original document.

all reports, internal memoranda, offers, counter-offers, communications and correspondence concerning said divestiture.

XIII.

American General shall notify the Commission of any proposed change at least 30 days prior to the proposed change in the corporate respondent, American General, such as dissolution, assignment or sale resulting in the emergence of a succesor corporation(s), the creation of dissolution of subsidiaries or any other change in the corporation which may affect compliance obligations arising out of this Order.

CAROL M. THOMAS,
Secretary.

CHAPTER I—UNITED STATES CUSTOMS SERVICE

[T.D. 77-188]

PART 153—ANTIDUMPING

Cast Iron Soil Pipe From Poland; Revocation

Correction

In FR Doc. 77-21538, published at page 38176, in the issue for Wednesday, July 27, 1977, the heading should read as set forth above.

Title 20—Employees' Benefits

CHAPTER VIII—JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

PART 901—REGULATIONS GOVERNING THE PERFORMANCE OF ACTUARIAL SERVICES UNDER THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

PART 902—RULES REGARDING AVAILABILITY OF INFORMATION

Adoption of Provisions Governing Enrollment of Actuaries and Public Availability of Information

AGENCY: Joint Board for the Enrollment of Actuaries.

ACTION: Final rule.

SUMMARY: This final rule is being adopted for the second time in order to comply with a July 22, 1977, order of the United States Court of Appeals for the District of Columbia in *Sol Tabor* v. *Joint Board for the Enrollment of Actuaries* (No. 76-1947). The Court's order remanded the case to the Board so that it could adopt new rules governing the enrollment of individuals who apply for enrollment before January 1, 1976, accompanied by a contemporaneous statement of basis and purpose as required by section 4(b) of the Administrative Procedure Act, 5 U.S.C. 553(c). This action is intended to comply with the Court's order, to enable interested persons to petition for changes in the rule, and to otherwise insure the present availability of individuals enrolled to perform actuarial services with respect to plans to which the Employee Retirement Income Security Act of 1974 applies.

EFFECTIVE DATE: January 14, 1976.

FOR FURTHER INFORMATION CONTACT:

Forest D. Montgomery, Counselor to the General Counsel, U.S. Department of the Treasury, Washington, D.C. 20220, 202-566-5311.

SUPPLEMENTARY INFORMATION: On July 22, 1977, the United States Court of Appeals for the District of Columbia Circuit held that the Joint Board for the Enrollment of Actuaries failed to comply with § 4(b) of the Administrative Procedure Act (APA) in promulgating its regulations governing enrollment of pre-1976 applicants. *Sol Tabor* v. *Joint Board for the Enrollment of Actuaries* (No. 76-1947). Those regulations, which appear in the FEDERAL REGISTER of January 14, 1976 (41 FR 2080) were vacated and the case "remanded to the Board to enable it to adopt new rules accompanied by a contemporaneous statement of basis and purpose." (As the Court's statement clearly indicates, the Board was directed to adopt new rules, not to initiate a new rulemaking proceeding. See also footnote 14 of the Court's opinion.) The Court held that the Board failed to explain the reasons why it did not adopt a "two-tier" method of enrollment, and also did not explain the basis and purpose of the enrollment requirements it imposed in addition to experience. The purpose of this statement is to remedy the Board's procedural defect in failing to meet the section 4(b) requirement of the APA, 5 U.S.C. 553(c), that an adopting agency "incorporate in the rules adopted a concise general statement of their basis and purpose."

HISTORY OF THE RULES

The Board was established by the Secretary of the Treasury and the Secretary of Labor in February 1975. On March 14, 1975, notice of a public meeting of the Board was published and public comment solicited on implementing section 3042 of the Employee Retirement Income Security Act of 1974 (ERISA). 40 FR 11918. That public meeting was held on March 19, 20, 1975. Proposed rules were issued on May 9, 1975, and comments solicited. 40 FR 20326. A public hearing was held on June 2, 1975. On August 27, 1975, the Board withdrew a substantial portion of the initial proposed rules in deference to widespread criticism. On the same date, a second set of proposed rules was issued to operate as temporary rules so that the Board could begin the enrollment process. 40 FR 38147. Comments were again invited and a hearing scheduled for November 24, 1975; that public hearing was held as scheduled. The proposed rules published in August were adopted as final on January 14, 1976, without substantive changes. 41 FR 2080. (It is the preamble to the final regulations published on January 14, 1976, which the Court found inadequate under section 4(b) of the APA.)

SUBSTANCE OF THE NEW RULES

The new rules which follow supersede those vacated by the Court on July 22, 1977. Following the Court's decision, the Board convened to consider whether substantive changes in those rules were warranted. After reconsidering the regulations vacated, the Board determined to issue new rules which are the same as the regulations vacated. The Board believes that its experience administering the enrollment of pre-1976 applicants has vindicated its rules and that any weakening of the requirements imposed for pre-1976 applicants could affect the actuarial soundness of pension plans serviced by individuals enrolled under weaker rules, possibly to the detriment of the plan participants. Moreover, any such weakening of the rules would be fundamentally unfair to those applicants previously enrolled. In making this decision, the Board was mindful of the Court's admonition that section 3042 of ERISA "reflects Congress' determination that only competent actuaries should be permitted to service private pension plans." (slip opinion, p. 2)

"TWO-TIER" ENROLLMENT SYSTEM

Some commenters suggested that the Board adopt a so-called "two-tier" system of enrollment, i.e., one enrollment standard for actuaries working on smaller and simpler plans who do not possess a high level of actuarial skills, and a second enrollment standard (or second tier) for persons with a high level of actuarial skills examining the larger pension plans. The rules herein adopted do not provide for such a system which, as the legislative history indicates, was to be adopted only if feasible. See Report of the Ways and Means Committee on H.R. 12855, H. Rept. 93-807, 93d Cong., p. 93 (1974). See also House Senate Conference Committee Report, H. Rept. 93-1280, 93d Cong., p. 362 (1974). It is noteworthy that H. Rept. 93-807 also states that actuaries enrolled under ERIS "should meet a reasonable standard of competence * * *."

The Board determined that a "two-tier" enrollment system was not feasible, and the regulations reflect this basic policy decision. There were many reasons for this decision of the Board, but the chief one was the extreme difficulty of formulating standards defining what is a "smaller and simpler plan." The immediate difficulty perceived by the Board was that smaller plans were not necessarily simpler plans. Indeed, on occasion they present difficult actuarial problems unencountered by larger plans. Some of the complicating factors in determining what are "simpler" plans are:

(1) Integration of the plan with social security benefits,

(2) Cost of living adjustments,

(3) Maximum and/or minimum benefit provisions,

(4) Disability benefits,

(5) Liberalized early retirement factors,

(6) Equity variable annuities,

(7) Dependents' income benefits, and

(8) Survivor annuities.

Such complex factors raised serious doubts about the feasibility of adequately defining a "simple" plan.

After regulations were developed, it would have been necessary to decide who would determine whether particular plans qualified as simple plans under the regulations. However, the Joint Board had no staff and no budget, and the staffs and budgets of the Department of Labor and of the Internal Revenue Service were expected to be barely adequate to meet their other responsibilities under ERISA. Even if funds were available, training new people would have put an additional strain on the key knowledgeable people already on hand. In addition, forms would have had to be developed or revised to determine what were smaller and simpler plans.

Prescribing standard tables (which the cited Conference Report recognized as a concomitant of the two-tier system) presented additional problems for which there were no satisfactory solutions, and hence indicated further that a two-tier system was not feasible. Who would have prescribed the standard tables, and on what basis? Would there have been tables using only one set of assumptions prescribed by the Board or would there have been a variety of such tables to choose from? If a variety, would the lower tier actuary have been free to select any of them, and would he have been qualified to make the choice? If only one table was used, would such enrolled actuary have been able to certify that it was his "best estimate" as required by ERISA? Since turnover varies greatly from group to group, how would this have been dealt with in standard tables? What about the variety of salary scales? Would lack of a salary scale or turnover, or use of standard tables, have been considered "reasonable actuarial assumptions" by IRS?

Other considerations also indicated that a two-tier system was not feasible. Regulations defining simple plans might have had socially undesirable effects upon pension plan design. For instance, plans might be structured to exclude benefits upon total disability or other benefits which could result in such plans not being treated as simple plans under the Board's regulations.

While the Board has not adopted a "two-tier" enrollment system in its rules, it has nevertheless effectuated the congressional purpose in suggesting a two-tier system, if it was feasible. The underlying reason for the two-tier proposal was to insure the enrollment of actuaries working on "smaller and simpler" plans who were thought generally not to possess the high level of skills of those actuaries evaluating the larger pension plans. The Board insured enrollment of actuaries not possessing such high skills by imposing an examination requirement, and designing its examinations to test only for the *minimum level of competence* needed to perform the actuarial services now required by ERISA, regardless of the size of the pension plan. Thus, even if the Board had issued regulations embodying an enrollment system setting forth two standards of enrollment, the second-tier enrollment requirements for the actuaries working on "smaller and simpler" plans *would have been the same as the enrollment requirements actually adopted*. In this fashion, the Board avoided the complexities inherent in a two-tier system, which the Board believes make such a system infeasible, and at the same time effectively carried out the intent Congress had in mind in suggesting the "two-tier" system—that actuaries with less than the highest skills who work on smaller and simpler plans should be enrolled.

The actuarial organizations commenting also favored a "one-tier" enrollment system.

ENROLLMENT REQUIREMENTS

Several comments expressed the view that there should be no standards and qualifications for those who apply for enrollment before January 1, 1976 other than experience. The Board has rejected the suggestion that such standards and qualifications be so restricted.

From the beginning the Board has been sensitive to its primary statutory responsibility, to enroll only those individuals competent to provide the actuarial services now required by ERISA. The major policy decision facing the Board was how to formulate reasonable standards and qualifications to insure enrollment only of those applicants meeting "a reasonable standard of competence." See H. Rept. 93-807, 93d Cong., 93 (1974).

The Board considered the problems inherent in basing its enrollment standards solely on the statutorily mandated experience requirement. (Section 3042 of ERISA provides that the Board's standards and qualifications for pre-1976 applicants shall include a requirement for "an appropriate period of responsible actuarial experience relating to pension plans.") The problems an experience-only standard would have engendered were manifest. A procedure confined to an analysis of experience alone would have necessarily had to rely to a great extent on the application (and any accompanying materials) of the individual applying for enrollment, particularly if the applicant was self-employed. The Board believed that applicants, in their own self-interest, could understandably be expected to paint as favorable a picture as possible of their actuarial experience. In some cases, that self-interest could be expected to exceed the bounds of candor. This would place applicants who described their experience in more mundane or humble terms at a disadvantage.

Nor would employer verifications or the statements of contemporaries of the applicant be immune from human frailty. An employer, asked to verify an applicant's experience and to express an opinion as to the worth of that experience, might be biased for or against the applicant. In any event, the employer's opinion would be inherently subjective and lead to varying evaluations of candidates with equal qualifications.

The problem reduced to the fact that if the Board were to rely on experience alone as the single criterion for enrollment, its decision would necessarily rest to a great extent on the application on its face and any employer's verification of the applicant's experience. The Board believed that basing its judgments on such inherently subjective information would prevent it from fulfilling its responsibility to enroll only those actuaries who had demonstrated a minimum level of competence.

Accordingly, the Board made the basic policy decision that the reasonable standards and qualifications for enrollment would include requirements designed to provide the Board with more objective evidence of each applicant's actuarial competence.

These standards are designed to afford an applicant the opportunity to objectively demonstrate his/her competence. They are set out in § 901.12 of the regulations published at the end of this statement. Without repeating the details of those rules, they may be said to require college-level education in the actuarial science field, or the passing of a proctored examination of certain actuarial organizations, or the passing of a Board examination.

The Board considered that an applicant who could meet any one of these alternative requirements would have objectively demonstrated a minimum level of competence. Although the level of competence thus demonstrated would vary to some extent with the academic courses taken, the school attended, or the proctored examinations of actuarial organizations taken and passed, the purpose of the Board in imposing these additional requirements was only to provide the Board with an objective demonstration of at least a minimum level of competence, and it was therefore immaterial if the applicant's level of competence exceeded the minimum required. That these requirements are reasonable is indicated by the opinion of the court in *Rasulis* v. *Weinberger*, 502 F. 2d 1006 (7th Cir. 1974), in which requirements similar to those imposed by the Board for pre-1976 applicants were upheld.

The examination and education requirements imposed by the Board for pre-1976 applicants are not substantially the same as the requirements it has imposed for those who apply on or after January 1, 1976. This can best be explained by a comparison of the two sets of requirements, which follows:

Pre-January 1, 1976	*On and after January 1, 1976*
Bachelor's or higher degree in which the major area of concentration was (1) actuarial science or (2) mathematics, statistics, or computer science and at least 6 semester hours or 9 quarter hours of life contingencies.	Bachelor's or higher degree (1) in which the major area of concentration was actuarial mathematics, or (2) which included at least as many semester hours or quarter hours each in mathematics, statistics, actuarial mathematics and other subjects as the Board determines represent equivalence to a major area of concentration in actuarial mathematics; and either the Board pension examination or a proctored pension examination of an actuarial organization, as described below.
[*or*]	[*or*]
One Board examination in actuarial mathematics and methodology related to pension plans, including the funding requirements of ERISA.	Two Board examinations: a basic examination in basic actuarial mathematics and methodology including compound interest, principles of life contingencies, commutation functions, multiple-decrement functions, and joint life annuities; and a pension examination in actuarial mathematics and methodology relating to pension plans, including the provisions of ERISA relating to the minimum funding requirements and allocation of assets on plan termination.
[*or*]	[*or*]
Protored examination of actuarial organizations to attain designated classes of membership therein.	Proctored basic examination(s) of actuarial organizations adequate in terms of passing score, subject areas covered, and level of difficulty to the basic examination of the Board; and proctored pension examination(s) adequate in terms of passing score, subject areas covered, and level of difficulty to the pension examination of the Board.

As previously mentioned, the Board designed its examination for pre-1976 applicants to test only for the minimum level of competence. Board examinations for 1977 and future years will be considerably more difficult. This comparison demonstrates that the Board has not applied substantially the same standards to pre-1976 applicants and post-1975 applicants.

The Board has of this date enrolled 2,535 actuaries who applied for enrollment before January 1, 1976. Of these 700 were enrolled, in part, on the basis of passing one of the three examinations administered by the Board. While these statistics may not relate directly to the basis and purpose of the rules adopted by the Board, they afford some evidence that the Board's enrollment process has proven workable; that the Board has enrolled an ample number of actuaries to perform services under ERISA; that in practice the enrollment requirements imposed have proven to be a reasonable method for assessing the experience and competence of actuaries; and that these requirements have served as a sound basis for the decisionmaking which is necessarily a part of the enrollment process.

The Board has made every effort in this statement to comply with the letter and spirit of section 4(b) of the APA so that any interested person can file an intelligent petition under 5 U.S.C. 553(e) for repeal of any provisions of the new rules. However, any interested person who is unable, after reading this statement, to file an intelligent petition for reconsideration of any provision in the Board's new rules, should write the Board explaining the deficiencies so that an amended statement can be issued forthwith if the criticisms made have merit. Since there may be further litigation on the issues raised in the *Sol Tabor* case, the Board has endeavored to prepare a statement which will explain regulatory requirements that have been imposed by the Board in addition to the statutory experience requirement.

In view of the above, Title 20 CFR Parts 901 and 902 are adopted as follow:

Dated: July 29, 1977.

FOREST D. MONTGOMERY,
Acting Chairman, Joint Board for the Enrollment of Actuaries.

Sec.

901.0 Scope.

Subpart A—Definitions and Eligibility To Perform Actuarial Services

901.1 Definitions.
901.2 Eligibility to perform actuarial services.

Subpart B—Enrollment of Actuaries

901.10 Application for enrollment.
901.11 Enrollment procedures.
901.12 Eligibility for enrollment of individuals applying for enrollment before January 1, 1976.
901.13 Eligibility for enrollment of individuals applying for enrollment on or after January 1, 1976.

Subpart C—Standards of Performance for Enrolled Actuaries

901.20 Standards of performance of actuarial services.

Subpart D—Suspension and Termination of Enrollment [Reserved]

Subpart E—General Provisions

901.40 Special orders.

AUTHORITY: Sec. 3042, Subtitle C, title 3, Employee Retirement Income Security Act of 1974. (88 Stat. 1002, 29 U.S.C. 1241, 1242).

§ 901.0 Scope.

This part contains rules governing the performance of actuarial services under the Employee Retirement Income Security Act of 1974, hereinafter also referred to as ERISA. Subpart A of this Part sets forth definitions and eligibility to perform actuarial services; Subpart B of this Part sets forth rules governing the enrollment of actuaries; Subpart C of this Part sets forth standards of performance to which enrolled actuaries must adhere; Subpart D of this Part is reserved and will set forth rules applicable to suspension and termination of enrollment; and Subpart E of this Part sets forth general provisions.

Subpart A—Definitions and Eligibility To Perform Actuarial Services

§ 901.1 Definitions.

As used in this Part, the term:

(a) "Actuarial experience" means the performance of, or the direct supervision of, services involving the application of principles of probability and compound interest to determine the present value of payments to be made upon the fulfillment of certain specified conditions or the occurrence of certain specified events.

(b) "Responsible actuarial experience" means actuarial experience:

(1) Involving participation in making determinations that the methods and assumptions adopted in the procedures followed in actuarial services are appropriate in the light of all pertinent circumstances, and

(2) Demonstrating a thorough understanding the principles and alternatives involved in such actuarial services.

(c) "Month of responsible actuarial experience" means a month during which the actuary spent a substantial amount of time in responsible actuarial experience.

(d) "Responsible pension actuarial experience" means responsible actuarial experience involving valuations of the liabilities of pension plans, wherein the performance of such valuations requires the application of principles of life contingencies and compound interest in the determination, under one or more standard actuarial cost methods, of such of the following as may be appropriate in the particular case:

(1) Normal cost.

(2) Accrued liability.

(3) Payment required to amortize a liability or other amount over a period of time.

(4) Actuarial gain or loss.

(e) "Month of responsible pension actuarial experience" means a month during which the actuary spent a substantial amount of time in responsible pension actuarial experience.

(f) "Applicant" means an individual who has filed an application to become an enrolled actuary.

(g) "Enrolled actuary" means an individual who has satisfied the standards and qualifications as set forth in this part and who has been approved by the Joint Board (or its designee) to perform actuarial services required under ERISA or regulations thereunder.

(h) "Actuarial services" means performance of actuarial valuations and preparation of any actuarial reports.

§ 901.2 Eligibility to perform actuarial services.

(a) *Enrolled actuary.* Subject to the standards of performance set forth in Subpart C of this part, any individual who is an enrolled actuary as defined in § 901.1(g) may perform actuarial services required under ERISA or regulations thereunder. Where a corporation, partnership, or other entity is engaged to provide actuarial services, such services may be provided on its behalf only by an enrolled actuary who is an employee, partner or consultant.

(b) *Government officers and employees.* No officer or employee of the United States in the executive, legislative, or judicial branch of the Government, or in any agency of the United States, including the District of Columbia, may perform actuarial services required under ERISA or regulations thereunder if such services would be in violation of 18 U.S.C. 205. No Member of Congress or Resident Commissioner (elect or serving) may perform such actuarial services if such services would be in violation of 18 U.S.C. 203 or 205.

(c) *Former government officers and employees*—(1) *Personal and substantial participation in the performance of actuarial services.* No former officer or employee of the executive branch of the United States Government, of any independent agency of the United States, or of the District of Columbia, shall perform actuarial services required under ERISA or regulations thereunder or aid or assist in the performance of such actuarial services, in regard to particular matters, involving a specific party or parties, in which the individual participated personally and substantially as such officer or employee.

(2) *Official responsibility.* No former officer or employee of the executive branch of the United States Government, of any independent agency of the United States, or of the District of Columbia, shall, within 1 year after his employment has ceased, perform actuarial services required under ERISA or regulations thereunder in regard to any particular matter involving a specific party or parties which was under the individual's official responsibility as an officer or employee of the Government at any time within a period of 1 year prior to the termination of such responsibility.

Subpart B—Enrollment of Actuaries

§ 901.10 Application for enrollment.

(a) *Form.* As a requirement for enrollment, an applicant shall file with the Executive Director of the Joint Board a properly executed application on a form or forms specified by the Joint Board, and shall agree to comply with the regulations of the Joint Board.

(b) *Additional information.* The Joint Board or Executive Director, as a condition to consideration of an application for enrollment, may require the applicant to file additional information and to submit to written or oral examination under oath or otherwise.

(c) *Denial of application.* If the Joint Board proposes to deny an application for enrollment, the Executive Director shall notify the applicant in writing of the proposed denial and the reasons therefor, of his rights to request reconsideration, of the address to which such request should be made and the date by which such request must be made. The applicant may, within 30 days from the date of the written proposed denial, file a written request for reconsideration therefrom, together with his reasons in support thereof, to the Joint Board. The Joint Board may afford an applicant the opportunity to make a personal appearance before the Joint Board. A decision on the request for reconsideration shall be rendered by the Joint Board as soon as practicable. In the absence of a request for reconsideration within the aforesaid 30 days, the proposed denial shall, without further proceeding, constitute a final decision of denial by the Joint Board.

§ 901.11 Enrollment procedures.

(a) *Enrollment.* The Joint Board shall enroll each applicant it determines has met the requirements of these regulations and shall so notify the applicant. Each enrollment shall be valid for a period of five years from its date or the date of any renewal thereof. Subject to the provisions of Subpart D of this Part, an enrollment shall, upon application made not more than six months before the date of the expiration of its original period or any renewal thereof, be automatically renewed for a period of five years from such date.

(b) *Enrollment certificate.* The Joint Board (or its designee) shall issue a certificate of enrollment to each actuary who is duly enrolled under this part.

(c) *Rosters.* The Executive Director shall maintain rosters of all actuaries who are duly enrolled under this part and of all individuals whose enrollment has been suspended or terminated.

§ 901.12 Eligibility for enrollment of individuals applying for enrollment before January 1, 1976.

(a) *In general.* An individual applying before January 1, 1976, to be an enrolled actuary must fulfill the experience requirements of paragraph (b) of this section and either the examination requirements of paragraph (c) of this section or the educational requirements of paragraph (d) of this section.

(b) *Qualifying experience.* Within a 15 year period immediately preceding the date of application, the applicant shall have completed either:

(1) A minimum of 36 months of responsible pension actuarial experience, or

(2) A minimum of 60 months of responsible actuarial experience, including at least 18 months of responsible pension actuarial experience.

(c) *Examination requirement.* The applicant shall satisfactorily complete the Joint Board examination requirement of paragraph (c)(1) of this section or the organization examination requirement of paragraph (c)(2) of this section.

(1) *Joint Board examination.* To satisfy the Joint Board examination requirement, the applicant shall have completed, to the satisfaction of the Joint Board, an examination prescribed by the Joint Board in actuarial mathematics and methodology related to pension plans, including the funding requirements of ERISA.

(2) *Organization examination.* (i) To satisfy the organization examination requirement, the applicant shall, before March 1, 1975, have attained by proctored examination one of the following classes of qualification in one of the following organizations:

(A) Member of the American Academy of Actuaries,

(B) Fellow or Member of the American Society of Pension Actuaries,

(C) Fellow or Associate of the Casualty Actuarial Society,

(D) Fellow or Member of the Conference of Actuaries in Public Practice,

(E) Fellow or Associate of the Society of Actuaries, or

(F) A class attained by proctored examination in any other actuarial organization in the United States or elsewhere if the Joint Board determines that the subject matter included in such examination, complexity of questions, and the minimum acceptable qualifying score are at least comparable to proctored examinations administered by any of the above organizations before March 1, 1975; or

(ii) On or after March 1, 1975, the applicant shall have attained one of the classes of qualification specified in paragraph (c)(2)(i) of this section, the attainment of such qualification having been by proctored examination under requirements determined by the Joint Board to be of not lower standards than the requirements for qualification during the 12 months immediately preceding March 1, 1975.

(d) *Qualifying formal education.* Prior to filing an application, the applicant shall have satisfied one of the following educational requirements:

(1) Received a bachelor's or higher degree from an accredited college or university, such degree having been granted after the satisfactory completion of a course of study in which the major area of concentration was actuarial science, or

(2) Received a bachelor's or higher degree from an accredited college or uni-

versity, such degree having been granted after the satisfactory completion of a course of study in which the major area of concentration was mathematics, statistics, or computer science, and shall have successfully completed at least 6 semester hours or 9 quarter hours of courses in life contingencies at an accredited college or university.

(e) *Disreputable conduct.* The applicant may be denied enrollment if it is found that he/she, after his/her eighteenth birthday, has:

(1) Engaged in any conduct evidencing fraud, dishonesty or breach of trust; or

(2) Been convicted of any of the offenses referred to in section 411 of ERISA; or

(3) Submitted false or misleading information on an application for enrollment to perform actuarial services or in any oral or written information submitted in connection therewith or in any report presenting actuarial information to any person, knowing the same to be false or misleading.

§ 901.13 Eligibility for enrollment of individuals applying for enrollment on or after January 1, 1976.

Subpart C—Standards of Performance for Enrolled Actuaries

§ 901.20 Standards of performance of actuarial services.

In the discharge of duties required by ERISA of enrolled actuaries with respect to any plan to which the Act applies:

(a) *In general.* An enrolled actuary shall undertake an actuarial assignment only when qualified to do so.

(b) *Professional duty.* An enrolled actuary shall not perform actuarial services for any person or organization which he/she believes or has reasonable grounds for believing may utilize his/her services in a fraudulent manner or in a manner inconsistent with law.

(c) *Advice or explanations.* An enrolled actuary shall provide to the plan administrator upon appropriate request, supplemental advice or explanation relative to any report signed or certified by such enrolled actuary.

(d) *Conflicts of interest.* In any situation in which the enrolled actuary has a conflict of interest with respect to the performance of actuarial services, of which the enrolled actuary has knowledge, he/she shall not perform such actuarial services except after full disclosure has been made to the plan trustees, any named fiduciary of the plan, the plan administrator, and, if the plan is subject to a collective bargaining agreement, the collective bargaining representative.

(e) *Assumptions, calculations and recommendations.* The enrolled actuary shall exercise due care, skill, prudence and diligence to ensure that:

(1) The actuarial assumptions are reasonable in the aggregate, and the actuarial cost method and the actuarial method of valuation of assets are appropriate,

(2) The calculations are accurately carried out, and

(3) The report, any recommendations to the plan administrator and any supplemental advice or explanation relative to the report reflect the results of the calculations.

(f) *Report or certificate.* An enrolled actuary shall include in any report or certificate stating actuarial costs or liabilities, a statement or reference describing or clearly identifying the data, any material inadequacies therein and the implications thereof, and the actuarial methods and assumptions employed.

(g) *Utilization of enrolled actuary designation.* An enrolled actuary shall not advertise his/her status as an enrolled actuary in any solicitation related to the performance of actuarial services, and shall not employ, accept employment in partnership, corporate, or any other form, or share fees with, any individual or entity who so solicits. However, the use of the term "enrolled actuary" to identify an individual who is named on the stationery, letterhead or business card of an enrolled actuary, or of a partnership, association, or corporation shall not be considered in violation of this section. In addition, the term "enrolled actuary" may appear after the general listing of an enrolled actuary's name in a telephone directory provided such listing is not of a distinctive nature.

Subpart D—Suspension and Termination of Enrollment [Reserved]

Subpart E—General Provisions

§ 901.40 Special orders.

The Joint Board reserves the power to issue such special orders as it may deem proper in any cases within the scope of this Part.

PART 902—RULES REGARDING AVAILABILITY OF INFORMATION

Sec.
902.1 Scope.
902.2 Definitions.
902.3 Published information.
902.4 Access to records.
902.5 Appeal.

AUTHORITY: Sec. 3042, Subtitle C, Title 3, Employee Retirement Income Security Act of 1974. (88 Stat. 1002, 29 U.S.C. 1241, 1242).

This Part is issued by the Joint Board for the Enrollment of Actuaries (the "Joint Board") pursuant to the requirements of section 552 of Title 5 of the United States Code, including the requirements that every Federal agency shall publish in the FEDERAL REGISTER, for the guidance of the public, descriptions of the established places at which, the officers from whom, and the methods whereby, the public may obtain information, make submittals or requests, or obtain decisions.

§ 902.2 Definitions.

(a) *"Records of the Joint Board."* For purposes of this Part, the term "records of the Joint Board" means rules, statements, opinions, orders, memoranda, letters, reports, accounts and other papers containing information in the possession of the Joint Board that constitute part of the Joint Board's official files.

(b) *"Unusual Circumstances."* For purposes of this Part, "unusual circumstances" means, but only to the extent reasonably necessary for the proper processing of the particular request:

(1) The need to search for and collect the requested records from other establishments that are separate from the Joint Board's office processing the request;

(2) The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(3) The need for consultation, which shall be conducted with all practicable speed, with another agency having a substantial interest in the determination of the request.

§ 902.3 Published information.

(a) FEDERAL REGISTER. Pursuant to sections 552 and 553 of Title 5 of the United States Code, and subject to the provisions of § 902.5, the Joint Board publishes in the FEDERAL REGISTER for the guidance of the public, in addition to this Part, descriptions of its organization and procedures, substantive rules of general applicability, and, as may from time to time be appropriate, statements of general policy, and interpretations of general applicability.

(b) *Other published information.* From time to time, the Joint Board issues statements to the press relating to its operations.

(c) *Obtaining printed information.* If not available through the Government Printing Office, printed information released by the Joint Board may be obtained without cost from the Executive Director of the Joint Board ("Executive Director").

§ 902.4 Access to records.

(a) *General rule.* All records of the Joint Board, including information set forth in section 552(a)(2) of Title 5 of the United States Code, are made available to any person, upon request, for inspection and copying in accordance with the provisions of this section and subject to the limitations stated in section 552(b) of Title 5 of the United States Code. Records falling within such limitations may nevertheless be made available in accordance with this section to the extent consistent, in the judgment of the Chairman of the Joint Board ("Chairman"), with the effective performance of the Joint Board's statutory responsibilities and with the avoidance of injury to a public or private interest intended to be protected by such limitations.

(b) *Obtaining access to records.* Records of the Joint Board subject to this section are available by appointment for public inspection or copying during regular business hours on regular business days at the office of the Executive Director. Every request for access to such records, other than published records described in § 902.3, shall be signed and submitted in writing to the Executive Director, Joint Board for the Enrollment of Actuaries, c/o Department of the Treasury, Washington, D.C. 20220, shall state the name and address of the person requesting such access, and shall describe such records in a manner reasonably sufficient to permit their identification without undue difficulty.

(c) *Fees.* A fee at the rate of $5.00 per hour or fraction thereof or the time required to locate such records, plus ten cents per standard page for any copying thereof, shall be paid by any person requesting records other than published records described in § 902.3. In addition, the cost of postage and any packaging and special handling shall be paid by the requester. Documents shall be provided without charge or at a reduced charge where the Chairman determines that waiver or reduction of the fee is in the public interest because furnishing the information can be considered as primarily benefiting the general public.

(d) *Actions on requests.* The Executive Director shall, within ten days (excepting Saturdays, Sundays and legal public holidays) from receipt of request, determine whether to comply with such request for records and shall immediately notify in writing the person making such request of such determination and the reason therefor, and of the right of such person to appeal any adverse determination, as provided in § 902.5. In unusual circumstances, the time limit for the determination may be extended by written notice to the person making such request setting forth the reasons for such extension and the date on which the determination is expected to be dispatched. No such notice shall specify a date that will result in an extension of more than ten working days.

§ 902.5 Appeal.

(a) Any person denied access to records requested under § 902.4, may within thirty days after notification of such denial, file a signed written appeal to the Joint Board. The appeal shall provide the name and address of the appellant, the identification of the records denied, and the dates of the original request and its denial.

(b) The Joint Board shall act upon any such appeal within twenty days (excepting Saturdays, Sundays and legal public holidays) of its receipt, unless for unusual circumstances the time for such action is deferred, subject to § 902.4(b), for not more than ten days. If action upon any such appeal is so deferred, the Joint Board shall notify the requester of the reasons for such deferral and the date on which the final reply is expected to be dispatched. If it is determined that the appeal from the initial denial shall be denied (in whole or in part), the requester shall be notified in writing of the denial, of the reasons therefor, of the fact the Joint Board is responsible for the denial, and of the provisions of section 552(a)(4) of Title 5 of the United States Code for judicial review of the determination.

(c) Any extension or extensions of time under §§ 902.4(d) and 902.5(b) shall not cumulatively total more than ten days (excepting Saturdays, Sundays and legal public holidays). If an extension is invoked in connection with an initial determination under § 902.4(d), any unused days of such extension may be invoked in connection with the determination on appeal under § 902.5(a), by written notice from the Joint Board.

[FR Doc.77-22325 Filed 7-29-77;4:42 pm]

Title 24—Housing and Urban Development

CHAPTER VIII—LOW INCOME HOUSING, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. R-77-334]

Tax Exemption of Obligations of Public Housing Agencies and Related Amendments

AGENCY: Department of Housing and Urban Development.

ACTION: Final rule.

SUMMARY: This regulation sets forth the conditions and procedures for HUD approval for the issuance of tax exempt obligations to finance Section 8 New Construction or Substantial Rehabilitation projects. The purpose is to clarify the existing regulation and to provide the requisite controls to carry out the purposes of the Federal tax exemption in relation to the provision of housing for lower-income families and persons under section 8 of the United States Housing Act.

ADDRESS: Rules Docket Clerk, Office of the Secretary, Department of Housing and Urban Development, 451 Seventh St. SW., Washington, D.C. 20410, 202-755-6703:

COMMENT DUE DATE: September 1, 1977. Comments should be filed with the Rules Docket Clerk.

EFFECTIVE DATE: August 3, 1977. Where all required HUD approval for tax exemptions under the Part 811 Subpart A regulations effective May 27, 1975, were issued prior to the effective date of these revised regulations, no further processing under these revised regulations is required even if the obligations have not been issued prior to the effective date of these revised regulations. If any HUD approvals pursuant to these revised regulations are required, such approval may be requested provided that the applicant complies with all provisions of these revised regulations.

FOR FURTHER INFORMATION CONTACT:

Joseph Burstein, Counsel to the Secretary, Department of Housing and Urban Development, Washington, D.C. 20410, 202-755-6480.

SUPPLEMENTARY INFORMATION: The Department gave notice on March 18, 1977, at 42 FR 15232 proposing to amend Title 24 of the Code of Federal Regulations by revising § 811.209(b). The comment period closed April 5, 1977.

By the deadline, the Department had received 22 comments from outside sources and three from its own offices in response to the March 18, 1977 publication. All comments including those received after the deadline were carefully considered, and changes have been made to the proposed regulations to reflect these comments as well as other changes in the proposed regulation, certain of which are technical clarification, others of which are substantive in nature and in the Secretary's judgment should be the subject of further public participation. The specific provisions on which the Secretary invites further comment are:

(1) Section 811.106(a)(4) includes a provision requiring that the loan on a project involving a profit-motivated owner may not exceed 90 percent of the reasonable development cost.

(2) Payment of Debt Service is permitted in the case of a physically completed project before all requirements for accepting the project (including EO requirements relating to construction) may have been met. However, full payments to the owner under the HAP Contract will not be made until all conditions applicable to full acceptance of the project are satisfied. Also, rent-up and occupancy are subject to such conditions, including those relating to EO and managerial responsibilities, as HUD may require. See § 811.108(b)(4).

(3) In order to further assure that the purpose of tax exemption, whether granted under the U.S. Housing Act of 1937 or by virtue of Section 103 of the Treasury Department's Regulations, 31 CFR Part 103, is carried out, the Regulation expands the conditions imposed with respect to tax exemption under Section 103 to include requirements relating to: (1) The amount of permanent obligations and the term of the HAP Contract; (2) Interim financing; and (3) Use of Project revenues. See §§ 880.115 and 881.115.

Changes described in items (1), (2), and (3) above are being made effective as part of Part 811; however, interested persons are invited to file comments, views and suggestions with respect to these changes. All comments should be filed with the office of Rules Docket Clerk.

Copies of all comments received will be available for inspection and copying in the Office of the Rule Docket Clerk.

All comments received will be considered before the Secretary adopts the changes described in items (1), (2), and (3) above on a final basis.

The Secretary finds that good cause exists for making the rule effective upon publication because of the many projects whose financing is being delayed pending this publication.

The prime direction of these regulatory changes is to provide a practical vehicle for financing section 8 housing with a type of security that will achieve the lowest possible interest cost, provent the abuses of the financing of the section 23 (predecessor to Section 8) program and promote the integrity of the Section 8 program. Although this Regulation basically applies to tax exemption under Section 11(b) of the United States Housing Act of 1937, certain of its provisions are made applicable even where the exemption is established pursuant to Section 103(b) of the Treasury Regulations.

This application is being made in order to assure that the provisions of the Regulation are not evaded by obtaining the exemption under Treasury Regulation as opposed to Part 811. The authority to make this requirement is pursuant to HUD's obligation and authority under Section 8 Regulations to approve the terms and conditions of financing of Section 8 projects.

These amendments do not establish any new authority to provide tax-exempt financing of Section 8 projects. All of the activities permitted by this Regulation have in the past been carried out under the previous Administration. This amendment will simply tighten up those existing methods of Section 8 tax exempt financing which have been in effect since October 30, 1975.

The policy implications concerning tax-exempt vs. taxable bond financing are not meant to be resolved by these amendments. In the coming months the Department, along with the Treasury Department, will be reviewing the current uses of tax-exempt financing in connection with housing. The type of section 8 tax-exempt financing covered by this Regulation, as well as by regulations and rulings of the Internal Revenue Service, will be included in that review.

Briefly, obligations, in order to be tax exempt under this Regulation, must be issued by a PHA (including an agency or instrumentality PHA) in connection with a Section 8 project approved by HUD, in an amount and on terms and conditions approved by HUD. Section 811.104 sets forth the provisions pertaining to an application to HUD for approval as a PHA, and § 811.105 sets forth the provisions pertaining to an application to HUD for approval as an agency or instrumentality. An agency or instrumentality may be created by the parent PHA, or it may be otherwise created, so long as the creation of the agency or instrumentality and its utilization by the parent are not prohibited by state law. Its activities must be limited to carrying out or assisting in carrying out one or more low-income housing projects, and the assistance may consist only of borrowing and lending funds for the project. Section 811.105 also sets forth provisions concerning the relationship between the parent and the agency or instrumentality.

Under § 811.106, the amount of permanent tax-exempt obligations outstanding for a project may not exceed the estimated reasonable development cost of the project as determined by HUD, less any equity investment plus the reasonable expenses of issuing the obligations, capitalized interest on the permanent obligations during construction, and a reserve for debt service. HUD will prescribe terms and conditions to assure continued operation of the project in the manner contemplated by the HAP Contract.

Under § 811.107, the proceeds of the permanent obligations must be placed in escrow, to be disbursed only upon completion of the project and execution of a HAP Contract covering the project except for prior disbursements for capitalized interest. In the event of failure to complete the project, the escrowed funds are used to redeem the obligations.

Section 811.108 contains the provisions pertaining to tax exemption for interim obligations. This section also makes it explicit that the risk of completion of the project is on the interim lender and/or owner, rather than holders of the permanent obligations. Provisions are also included, however, for PHA inspections during construction; for making the HAP Contract effective as of the date when HUD is required to inspect the project for completion, assuming that the inspection when made finds it to have been acceptable; and for execution of a HAP Contract after acceptable physical completion, even though other conditions to execution of the Contract have not been met, with the limitation that the HAP payments be limited to the debt service requirements.

Section 811.108 imposes certain requirements with regard to the use of project revenues.

Section 811.110 provides that after HUD finds that all the necessary approvals pursuant to this regulation and other applicable regulations have been made, and that an Agreement to Enter Into a HAP Contract or HAP Contract has been executed, HUD shall issue a notification of approval of tax exemption and that this notification shall not be subject to revocation by HUD.

A discussion of the changes and the more recurrent and significant comments is set forth below. The section numbers refer to the numbers as contained in the final regulations except for several references to the section numbers in the proposed rule where necessary to understand a particular explanation.

CHANGES IN PART 811 SUBPART A

1. Section 811.101 has been retitled Purpose and Scope, and the scope of Part 811, Subpart A, has been explicitly restricted to Section 8 projects pursuant to 24 CFR Parts 880, 881 and 883. Language has also been added to indicate that tax exemption pursuant to section 11(b) in connection with other low-income housing projects are not subject to this subpart. These are clarifications, since the intent of the regulation was to cover only Section 8 projects. The title of Subpart A was changed for the same reason.

2. Section 811.102 has been expanded to include definitions of a number of additional key terms. The newly defined terms are: (a) Agency or Instrumentality, (b) Development Cost, (c) Expenses of Issuing the Obligations, (d) HAP Contract, (e) Parent Entity, and (f) Trustee. The definition of Development Cost includes inspections by PHAs during construction. The definition of Obligations has been clarified to indicate that bonds and notes can be issued for either permanent or interim financing. The definition of Secretary has been deleted because the term HUD is used throughout. A sentence was added to the definition of Obligations to note the exclusion of the obligations of a public housing agency as mortgagor (this exclusion is required by section 319(b) of the Housing and Community Development Act of 1974).

3. Section 811.103(a) has been revised to include the statement contained in section 11(b) that the income derived by the PHA from the project is exempt from taxation.

4. Language has been added to § 811.103(b)(1) directing specific attention to the provisions of the section 8 regulations concerning contract rent reduction to reflect savings as a result of tax-exempt financing.

5. Section 811.103(b)(4) has been added to require HUD approval of the terms and conditions of the financing under these regulations and other applicable HUD regulations, such as § 880.125 of the Section 8 New Construction regulation.

6. Section 811.104 has been rearranged for clarification. In addition, the section now provides that, in the absence of evidence to the contrary, certain evidence shall be considered satisfactory to HUD.

There was a comment suggesting that the regulation make it clear that a Participating Agency under 24 CFR 883.103 qualifies as a PHA. Accordingly, a provision has been added to § 811.104 that where the applicant is such a Participating Agency, it should include with its application a statement that it has been previously approved as a Participating Agency under Part 883.

7. Section 811.104(b), requiring that subsequent amendments must also be approved by HUD, makes explicit a requirement that was intended under the proposed rule.

8. A new § 811.105, Approval of Agencies or Instrumentalities, has been provided. The material in § 811.104(b) of the proposed rule has been moved to the new section, thus consolidating all material on eligibility of an agency or instrumentality into one section.

Since both the parent and the agency or instrumentality must qualify as PHAs, § 811.105(a)(2) provides that each must meet all the requirements specified in § 811.104.

There was a misunderstanding that an agency or instrumentality may only undertake a single project. Although an agency or instrumentality must be limited in its activities to low-income housing projects, it may perform such activities in connection with more than one such project. Another question was whether the agency or instrumentality had to be the owner of the project, or whether its activities could be limited to providing the financing. Accordingly, the words "carrying out a low-income housing project" have been changed to "carrying out or assisting in carrying out a low-income housing project(s) (including assistance by borrowing and lending funds)" (§ 811.105(a)(2)(iv)).

With respect to both §§ 811.104 and 811.105 there were questions as to what is "sufficient evidence" to establish that an entity is a PHA or an agency or instrumentality, and it was suggested that a certification of counsel should be sufficient. To clarify HUD's position on this point, the term "sufficient evidence" has been changed to "evidence satisfactory to HUD". The opinion of counsel must be an "opinion of counsel acceptable to HUD."

9. Section 811.105(b) includes, with some changes, the provisions contained in § 811.104(b)(3) of the proposed rule, except for the provisions concerning the escrow and use of the proceeds of the obligations. The latter provisions should not have been placed under a heading referring only to agencies and instrumentalities because these provisions were intended to apply to all tax exempt permanent obligations of a PHA, whether or not the PHA is an agency or instrumentality. Accordingly, the provisions concerning the escrow and use of the proceeds of the permanent obligations are now set forth in a separate § 811.107, entitled Use of Proceeds of Permanent Obligations.

10. The first four of the provisions concerning the relationship between the agency or instrumentality and the parent entity are now characterized as "provisions requiring * * *", in order to make it clear that the requirement for HUD approval of tax exemption is the inclusion of provisions in the charter and/or other relevant documents. The continuing effect of the tax exemption is not dependent upon subsequent compliance with these provisions. Other changes in these provisions are the following:

(a) The charter or other organic document must provide that any amendments are subject to approval by HUD, as well as by the parent entity (§ 811.105(b)(1)).

(b) The documents must contain provisions requiring approval by the parent entity of each project, as well as of the projected program and expenditures of the agency or instrumentality (§ 811.105(b)(2)).

(c) The provision requiring approval by the parent entity of each issue of obligations not more than 60 days prior to the date of issue was misinterpreted as meaning that if there are any amendments the issue must be postponed for 60 days. To avoid such misunderstanding, a provision was added indicating that amendments may be approved at any time prior to the issuance of the obligations (§ 811.105(b)(3)).

(d) The provision requiring annual review by the parent entity of the activities and financial statements of the agency or instrumentality has been strengthened by requiring a financial audit, a review by the parent entity of the audit and of the activities of the agency or instrumentality, and the submission of a copy of the audit and review to HUD (§ 811.105(b)(4)).

11. A number of comments misinterpreted clause (vi) of § 811.104(b)(3) of the proposed rule (now § 811.105(b)(9) and (10)) as requiring that arrangements for transfer of title to the parent entity must be made in all cases. This was not the intent. The parent must agree in advance to accept title only in the following circumstances:

(a) In the event of dissolution of the agency or instrumentality.

(b) Where the parties have agreed that provision should be made in conjunction with the issuance of the obligations for title to be conveyed to the parent entity under specified circumstances. The inclusion or noninclusion of such provisions, however, in conjunction with the issuance of the obligations is not required by the regulations.

(c) In a third situation (discussed under comment 13(b) below), for the purpose of assuring continued operation of the project in the manner contemplated by the HAP Contract.

The foregoing intent has been clarified by incorporating specific references to the three situations, rearranging the provisions and changing the opening words of the former clause (vii) to indicate more explicitly that it is not a mandatory requirement.

12. A number of comments expressed the view that the provisions of the former clause (vii) (now § 811.105(b)(6)) were unduly rigid and restrictive particularly for cases involving syndicated ownership. Specifically, it was recommended that conveyance to the parent or another PHA be permitted, that the time or circumstances for the conveyance be for determination by the parties at the time the arrangements for financing are made, that conveyance of less than fee simple title might be appropriate in some situations (as where the agency or instrumentality holds only a lender's interest or a leasehold); and that arrangements other than escrow of title documents should be permissible. It was also pointed out that the provision requiring that the title be free of all encumbrances should make an exception for tenant leases. All of these recommendations have been incorporated by suitable language changes. In permitting alternatives to the escrow arrangement, the new language states that the alternative must provide comparable assurance of performance and must be approved by HUD.

13. Section 811.106 contains several important changes as follows:

(a) Paragraph (a)(1) states that the amount of outstanding permanent obligations tax-exempt under the regulation shall not exceed the estimated reasonable development cost of the low-income housing project as determined by HUD, less any equity investment, plus certain other amounts. (The words "less any equity investment" would be applicable in the case of a project where the Owner is making an equity investment toward the approved development cost). A new § 811.106(a)(2) make provisions for the issuance of additional obligations to finance additional development cost. Under these provisions, if the original issuance is in the full amount of the approved development cost, no additional tax-exempt obligations could be issued for the same project unless it is established to the satisfaction of HUD that the additional amount is needed for additional development cost and that this increase in the development cost is reasonable.

(b) Paragraph (a)(3) is a new provision which states that the owner shall be subject to such terms and conditions as HUD shall prescribe and that these terms and conditions shall include provisions designed to assure continued operation of the project as contemplated by the HAP Contract including provision for operation or ownership of the project by a PHA (other than an agency or instrumentality).

(c) If the project involves a profit-motivated owner, paragraph (a)(4) provides that the loan to the owner may not exceed 90 percent (determined in accordance with HUD rules) of the HUD-approved development cost.

(d) Paragraph (b) provides that the term of the HAP Contract may not exceed 30 years or the term of the obligations whichever is shorter. Section 101(c) of the Supplemental Housing Authorization Act of 1977 authorized, with certain exceptions, 30-year HAP Contracts for privately-owned, privately financed projects. It is assumed that a 30-year term should also be sufficient for publicly-owned or financed projects. However, because of the difficulty in meeting the low-income housing needs for non-elderly families, the term for such projects may with HUD approval be for up to 40 years.

(e) Paragraph (c) states that the anticipated interest cost and the ancillary costs of servicing the obligations must be shown to and approved by HUD as being reasonable in relation to prevailing costs in the tax exempt market for comparable obligations, taking into account any differences between the types of obligations.

(f) Paragraph (d) prohibits the issuance of tax exempt obligations under this regulation to refund permanent obligations. Refunding led to a wide variety of problems in the Section 23 program and this prohibition is deemed necessary to avoid such abuses. Comment 13(a) discusses necessary additional funding.

14. As noted in Comment 9, the provisions concerning the escrow of the proceeds of the permanent obligations and the use thereof are now included in a separate section (§ 811.107). It is now clear that the escrow requirement is applicable to all permanent tax-exempt obligations under the regulation except as provided in § 811.107(c) (see comment 14(d)). The new section incorporates the following significant changes:

(a) Several comments noted that the provisions permitting prior disbursement for expenses of issuance of the obligations was inconsistent with the provision requiring redemption of the obligations at par in the event of failure to complete the project. Accordingly, although the escrowed funds may include the amount of these expenses, disbursement may be made only upon completion and execution of a HAP Contract. Prior payment of the expenses of issuance may be made from the interim financing or by an ad-

vance from the developer/owner or contractor (§ 811.108(a)). Upon execution of the HAP Contract, the escrowed funds are to be disbursed for the debt service reserve fund, the expenses of issuing the obligations and the interim financing.

(b) Under paragraph (b), in the event the HAP Contract is not executed within the prescribed time, the permanent obligations must be redeemed from the funds in the escrow plus income from investment of the funds and less any debt service disbursements. This will provide for full redemption except in the event the payments for debt service exceed the the income from investments.

(c) Several comments expressed the view that the provision in the proposed rule concerning extensions of time were unduly restrictive, and that the interim lender or contractor, for example, might be willing to absorb or provide funds for additional costs. Accordingly, paragraph (b) now provides that the date for redemption may be extended to a later specified date in the event (1) the parties to the Agreement have agreed in writing to such extended date, and (2) additional funds, in the form of cash or an unconditional letter of credit, are added to the escrow to guarantee that there will be sufficient funds in the escrow on the extended date to pay all amounts that are then required to be paid from the escrow on at least as favorable a basis as if there had been no extension.

(d) In response to comments, paragraph (c) exempts from the escrow requirement three situations: (1) Where the obligations are unconditionally guaranteed by a State or by a county, city, or other unit of general local government, (2) where the construction advances are insured pursuant to the National Housing Act and (3) if the permanent obligations are not issued until after completion of construction. It was suggested that there might be other forms of guaranty or assurance providing comparable protection to the holders of the permanent obligations and HUD. Since no specific examples meeting this standard were cited, no additional exceptions were included in the regulation. It is anticipated that should there be other cases meeting this standard, they will be submitted to HUD with a request for waiver pursuant to 24 CFR Part 899.

(e) The regulation also provides that any amounts in the fund in excess of the original amount shall be available for any project purposes.

15. A number of comments directed attention to the fact that the failure of the proposed rule to deal specifically with the subject of interim financing created uncertainties in several respects, including the question of whether the interim financing could be tax exempt under the regulation and, if so, under what conditions. Accordingly, a new § 811.108, Interim Financing, has been added.

(a) Paragraph (a) states that the applicant may request a determination by HUD that the obligations for interim financing be tax exempt under this regulation. The amount may not exceed the estimated approved development cost of the project, plus the amount of the expenses of issuing the permanent obligations if these are to be paid prior to execution of the HAP Contract. The interim obligations must mature on a date not unreasonably beyond the stated date for completion of the project.

(b) Paragraph (b) contains a number of provisions which are applicable to interim financing whether or not such financing is tax exempt.

(c) Paragraph (b)(1) states that the terms and conditions must be consistent with those of the permanent obligations.

(d) Paragraph (b)(2) makes it explicit that the escrowed proceeds of the permanent obligations shall be available for repayment of the interim obligations, but only upon execution of the HAP Contract and otherwise in accordance with the terms of the escrow, and that the risk of completion is upon the developer/owner and the interim lender.

(e) A number of comments argued that under this system it would be impossible or difficult to obtain interim financing, and that at best it would add to the cost of the interim financing. Our experience in the Section 23 program, however, has shown that where the proceeds of the permanent obligations are used to finance development and construction, thus placing the risk of completion on the holders of those obligations, subsequent delays, cost overruns, or failures to complete construction, result in unacceptable difficulties including ultimate total costs far in excess of any possible additional interest cost of interim financing under the system provided by this regulation. It was also urged that performance and payment bonds and careful inspection during construction could provide sufficient protection without escrowing the proceeds of the permanent obligations. In our judgment, these are precautions and safeguards which can and should be taken by the interim lender, but they cannot provide the security of the interests of the permanent obligation holders and the Government provided by these regulations.

Our inquiries have indicated that interim lenders are ready and willing to accept the risk of completion, after satisfying themselves of the competence and reliability of the developer and/or construction contractor and imposing suitable requirements including bonding and construction inspection procedures of their own. In order to enhance the obtaining of interim financing at lower interest cost, consistent with the system under this regulation, the following new provisions have been added to § 811.108:

(1) Paragraph (b)(3) provides that the lender shall provide for such inspection during construction as the lender deems necessary; that copies of inspection reports shall be furnished to the PHA and to HUD; that the PHA shall to the extent of funds provided in the development cost also make inspections; that copies of these inspection reports as well as copies of any comments by the PHA on any inspection reports shall be furnished to the lender and HUD and that HUD shall promptly notify the parties that deficiencies must be corrected prior to completion of the project. However, failure of the PHA and/or HUD to make such inspections, comments or notifications shall not relieve the owner and lender of their obligation for completion of the project.

(2) In view of comments indicating concern about administrative delay on the part of HUD in making inspection upon completion or in execution of the HAP Contract, paragraph (b)(4) provides that if the HUD inspection when made finds the project to have been acceptable as of the date when the HUD inspection should have been made (10 working days after notification of project completion), the HAP Contract, when executed, shall be effective as of that earlier date.

(3) In view of comments that the interim lender is willing to be responsible for physical completion, but not for other requirements such as compliance with the approved marketing plan, paragraph (b)(5) provides that if HUD finds that the physical completion of the project is acceptable, but that there are other conditions to the execution of the HAP Contract that have not been met, HUD shall, upon request by the owner, execute or approve the execution of the HAP Contract on the basis that, until such evidence of completion is submitted to and found acceptable by HUD, (i) the Contract Rent for the purpose of computing Housing Assistance Payments shall be the monthly amount of the debt service on the permanent obligations attributable to the unit, and (ii) rent-up and occupancy shall be subject to such conditions as HUD may require.

16. A new § 811.109 has been added to provide that the trust indenture shall provide for the maintenance of reserves and/or accounts to assure that there are funds as necessary to meet all project requirements.

17. Several comments stated that there was a need for an official HUD determination in writing to the effect that the obligations have been found to qualify for tax exemption under the regulation, and that this determination would not be subject to revocation by HUD. Since this was intended to be the effect of the approval of the tax-exempt status of the obligations, a new section has been added to carry it out (§ 811.110, Approval of Obligations as Tax Exempt). Paragraph (a) provides for the issuance of such a HUD determination when all the necessary approvals have been made, with specific references to interim obligations where tax exemption for these as well as the permanent obligations was applied for and has been approved. Paragraph (b) states that the HUD notification of approval shall not be subject to revocation by HUD.

18. Section 811.105(b) of the proposed rule, which prohibited arbitrage obligations with an exception for temporary obligations to finance construction, has been deleted in the final regulations. Many questions were raised as to the meaning and effect of this language in the proposed rule. It was determined that the purpose of these regulations would be better accomplished by deleting the language using the term arbitrage, and incorporating other controls, particularly the limitation on the amount of tax exempt obligations which may be outstanding (§ 811.106(a)), the prohibition of refunding obligations (§ 811.106(d)) and the new § 811.108 on Interim Financing.

19. There was a suggestion that language permitting exceptions by HUD be inserted in various places in the regulation. This suggestion has not been adopted because it would tend to encourage wholesale requests for exceptions and ultimately undermine the effectiveness of the regulation. Where unusual circumstances indicate a need for exception, a waiver pursuant to 24 CFR Part 899 can be requested.

CHANGES IN RELATED PROVISIONS OF OTHER REGULATIONS

20. With respect to the proposed amendment to §§ 880.106(a) and 881.106(a), comments indicated there was a need to clarify the distinction between the fee payable by HUD for administration of the HAP Contract and the HFDA's charge for costs related to its financing activities. Accordingly, the language of this paragraph has been changed to clarify this distinction and to indicate expressly that the HFDA's cost of borrowing includes "the ancillary costs of servicing the obligations, such as trustee fees, maintenance of books and accounts and audit expenses."

21. With respect to the proposed amendment adding new §§ 880.115(c) and 881.115(c), comments indicated there was a need to clarify the meaning of the exception for a "Participating Agency under Part 883". Accordingly, the language of the exception has been changed to "other than an agency notified by HUD pursuant to 24 CFR 883.103 that it is a qualified Participating Agency."

22. In the proposed amendment of § 883.203(a), relating to the same subject matter as the amendment to §§ 880.106(a) and 881.106(a), language changes have been made corresponding to those discussed in comment 16.

23. A related amendment is being made to the title and opening paragraph of §§ 880.125 and 881.125 to clarify that the section applies where the permanent financing for a project is to be provided by a public agency or other entity including a PHA.

Because of the importance of this regulation in making financing available for Section 8 projects, it has been determined in the public interest to make these amendments effective on publication. However because of the many changes that were made as a result of considering the comments, the Department invites further comments on this Final Rule. Comments received will be carefully reviewed, along with experience under this Final Rule for consideration of any further amendments.

A finding of Inapplicability regarding the National Environmental Policy Act of 1969 has been made in accordance with HUD procedures. A copy of this Finding of Inapplicability will be available for public inspection during regular business hours at the office of the Rules Docket Clerk, Office of the Secretary, Room 5218, Department of Housing and Urban Development, 451 Seventh Street SW., Washington, D.C.

Accordingly, Title 24 of the Code of Federal Regulations is amended as follows:

PART 811—TAX EXEMPTION OF OBLIGATIONS OF PUBLIC HOUSING AGENCIES AND RELATED AMENDMENTS

Title 24, Chapter VIII is amended to delete the present Part 811 and to substitute a new Part 811 reading as follows:

Subpart A—Tax Exemption Under Section 11(b) of the Act of Obligations of Public Housing Agencies Issued To Finance Section 8 Projects

Sec.

811.101 Purpose and scope.
811.102 Definitions.
811.103 Tax exemption of obligations.
811.104 Approval of public housing agencies.
811.105 Approval of agencies or instrumentalities.
811.106 Amount of permanent obligations and term of HAP contract.
811.107 Use of proceeds of permanent obligations.
811.108 Interim financing.
811.109 Use of project revenues.
811.110 Approval of obligations as tax exempt.
811.111 Limited applicability to tax exemption other than under section 11(b).

AUTHORITY: Sec. 7(d) Department of HUD Act (42 U.S.C. 3535(d)); secs. 3(6), 5(b)8, 11(b) of the United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, 1437f, and 1437).

Subpart A—Tax Exemption Under Section 11(b) of the Act of Obligations of Public Housing Agencies Issued to Finance Section 8 Projects

§ 811.101 Purpose and scope.

The purpose of this Subpart A is to provide a basis for determining tax exemption of obligations issued by Public Housing Agencies pursuant to section 11 (b) of the United States Housing Act of 1937 and this subpart for Section 8 New Construction or Substantial Rehabilitation projects (24 CFR Parts 880, 881, and 883). The tax exemption pursuant to section 11(b) in connection with other low-income housing projects under the Act is not subject to this subpart.

§ 811.102 Definitions.

Act.—The United States Housing Act of 1937 (42 U.S.C. 1437, et seq.).

Agency or Instrumentality.—A not-for-profit entity (which as to form may be a corporation, trust, commission, bureau, tribe, district, authority, unincorporated association, partnership, or other form of organization) which is a PHA created or utilized by another PHA (the parent entity) in accordance with this subpart.

Development Cost.—Estimated cost approved by HUD for planning, land acquisition, demolition, construction, rehabilitation, or equipment, cost of PHA inspections during construction, cost of other items necessary for the development or acquisition of a low-income housing project, and the necessary costs of the interim financing. In the case of HUD-insured mortgage financing, the development cost is the amount approved by HUD for purposes of determining the amount of the mortgage.

Expenses of Issuing the Obligations.—Necessary costs in connection with the issuance of the obligations, consisting of attorney's fes, underwriter/issuer fees, rating agency's fees, trustee's initial fee, printing costs, and such other fees or expenses as are shown to and approved by HUD as being necessary and consistent with economy in the total costs of issuance. All costs must be shown to and approved by HUD as being reasonable in relation to the prevailing costs of issuing comparable obligations, taking into account any differences between the types of obligations. In making its determination of reasonableness, HUD will take into consideration that the prime purpose of tax exempt financing under this subpart is to effect maximum feasible savings in housing costs.

HUD.—The Department of Housing and Urban Development or its designee.

HAP Contract.—Housing Assistance Payments Contract pursuant to Section 8 of the Act and the applicable HUD regulations.

Low-Income Housing.—Housing for families and persons of lower income pursuant to Section 8 of the Act, including those within that income range who may otherwise be referred to as moderate-income families and persons.

Low-income housing project.—Any low-income housing, including all necessary appurtenances thereto, developed, acquired, or assisted by PHA under the Act, and the improvement of any such housing.

Obligations.—This term includes bonds and notes (whether or not secured by a mortgage) issued to provide interim or permanent financing of a low-income housing project. Pursuant to section 319 (b) of the Housing and Community Development Act of 1974, the term obligations shall not include any obligation secured by a mortgage which is insured under section 221(d)(3) of the National Housing Act and issued by a public agency as mortgagor in connection with the financing of a project assisted under section 8 of the Act (this exclusion does not apply to a public agency as mortgagee).

Parent Entity.—A PHA, other than an agency or instrumentality, which creates or utilizes an agency or instrumentality in accordance with the provisions of this Subpart.

Public Housing Agency (PHA).—Any State, county, municipality, or other governmental entity or public body (or agency or instrumentality thereof) which is authorized to engage in or assist in the development or operation of low-income housing.

Trustee.—A bank or other entity which is qualified and experienced in performing fiduciary responsibilities with respect to care and investment of funds com-

parable to those involved in the financing of the project.

§ 811.103 Tax exemption of obligations.

(a) Obligations, permanent or interim, including interest thereon, issued by PHAs in connection with Section 8 projects pursuant to and approved by HUD under this Subpart shall be exempt from all taxation now or hereafter imposed by the United States whether paid by such PHA or by HUD. The income derived by such PHAs from such projects shall also be exempt from all taxation now or hereafter imposed by the United States (section 11(b) of the Act).

(b) In order for obligations to be tax exempt under this subpart:

(1) The obligations must be issued in connection with a low-income housing project approved by HUD under the Act and the applicable regulations including, but not limited to, the regulations relating to the reduction of Contract Rents to reflect savings as a result of tax-exempt financing;

(2) The obligations must be issued by an entity approved by HUD as a PHA pursuant to § 811.104 or § 811.105;

(3) The amount of the obligations, the term of the HAP Contract, and the use of the obligations must be approved by HUD pursuant to §§ 811.106, 811.107, and 811.108; and

(4) The terms and conditions of the financing must be approved by HUD in accordance with the other provisions of this subpart and the provisions of other applicable HUD regulations.

§ 811.104 Approval of Public Housing Agencies.

(a) (1) An application to HUD for approval as a Public Housing Agency for purposes of this subpart shall be supported by evidence satisfactory to HUD to establish that:

(i) The applicant is legally authorized to engage in or assist in the development or operation of low-income housing;

(ii) The applicant has the legal capacity to carry out the low-income housing project, or the financing thereof, as described in its application, including the legal capacity to carry out the responsibilities required of it under HUD regulations applicable to the project.

(2) Such evidence shall include any facts or documents relevant to the determination including identification of any pending application the applicant has submitted under the Act. In the absence of evidence to the contrary, the following evidence shall be considered satisfactory to HUD:

(i) Identification of any previous HUD approval of the applicant as a PHA pursuant to this § 811.104;

(ii) Identification of any prior annual contributions contact with the applicant under the Act (or under the United States Housing Act of 1937 prior to its amendment by the Housing and Community Development Act of 1974); or

(iii) A statement, where applicable, that the applicant is an approved Participating Agency under Part 883 of this chapter.

(b) Any subsequent amendments to the documents submitted to HUD pursuant to this § 811.104 must be approved by HUD.

§ 811.105 Approval of Agencies or Instrumentalities.

(a) An application to HUD for approval as an agency or instrumentality for purposes of this subpart shall:

(1) Identify the parent entity;

(2) Establish by evidence satisfactory to HUD that—

(i) The applicant was designated or created as the duly authorized agency or instrumentality of the parent entity and that such creation and utilization is not prohibited by state law.

(ii) The parent entity meets the requirements of § 811.104,

(iii) The applicant meets the requirements of § 811.104,

(iv) The activities to be performed by the applicant, and funds and assets connected therewith, shall be limited to carrying out or assisting in carrying out a low-income housing project(s) (including assistance by borrowing and lending funds), which project(s) has been approved by the parent entity, and

(v) The applicant understands and agrees that, prior to the date of issuance of the obligations, an Agreement to Enter into a HAP Contract or a HAP Contract pursuant to the Act will have been executed and, where applicable, approved in writing by HUD in accordance with an Annual Contributions Contract with HUD; and

(3 Furnish an opinion of counsel acceptable to HUD that the applicant meets the requirements of this § 811.105(a).

(b) The documents submitted shall include the following with respect to the relationship between the parent entity and the agency or instrumentality:

(1) Provisions requiring approval by the parent entity of the charter or other organic document and of the by-laws which organic instrument and by-laws shall specify that any amendments are subject to approval by the parent entity and by HUD.

(2) Provisions requiring approval by the parent entity of each project and of the projected program and projected expenditures of the applicant.

(3) Provisions requiring approval by the parent entity of each issue of obligations of the applicant not more than 60 days prior to the date of issue and approval of any amendments prior to the date of issue.

(4) Provisions requiring an annual financial audit of the applicant by an independent certified public accountant, review by the parent entity of the audit and of the applicant's activities, and submission of a copy of the audit and review to HUD.

(5) Provisions giving the parent entity right of access at any time to all books and records of the applicant.

(6) Where the parties have agreed that provision should be made in conjunction with the issuance of the obligations for title to or other interest in the real and personal property financed by the obligations to be conveyed at a specified time and/or under specified conditions to the parent entity or another PHA, instruments making such conveyance shall be placed in escrow with instructions that the escrow agent deliver the instruments to the parent entity or other PHA a such specified time and in accordance with such specified conditions. A method other than this escrow procedure may be used if it provides comparable assurance of performance and is approved by HUD. Any conveyance to the parent entity or other PHA shall be free of encumbrances (other than tenant leases) created subsequent to the establishment of the lien to secure the permanent obligations except as otherwise consented to by the parent entity or other PHA with the approval of HUD.

(7) Any net earnings of the applicant (beyond those necessary for retirement of the indebtedness or to carry out the low-income housing project) may not inure to the benefit of any person or entity other than the parent entity.

(8) Upon dissolution of the applicant, title to or other interest in any real or personal property owned by such applicant shall vest in the parent entity.

(9) Agreement by the parent entity to accept title to or other interest in any real or personal property pursuant to § 811.105(b)(8).

(10) Agreement by the parent entity or another PHA to accept title to any real or personal property financed by the obligations pursuant to §§ 811.105(b)(6) and 811.106(a)(3), if applicable.

(c) Any subsequent amendments to the documents submitted to HUD pursuant to this § 811.105 must be approved by HUD.

§ 811.106 Amount of permanent obligations and term of HAP Contract.

(a) (1) The amount of outstanding permanent obligations tax-exempt under this Subpart shall not exceed the estimated reasonable development cost of the low-income housing project as determined by HUD, less any equity investment, and plus the reasonable expenses of issuing the obligations, capitalized interest on the permanent obligations duirng construction and an amount sufficient to establish a reserve fund up to one year's debt service.

(2) Additional tax-exempt obligations may be issued to finance additional development costs which are shown to be reasonable and are approved by HUD pursuant to this subpart.

(3) The owner shall be subject to such terms and conditions as HUD shall prescribe. Such terms and conditions shall include provisions designed to assure continued operation of the project for the housing of low-income families as contemplated by the HAP Contract, including, if the project is not so operated, provision for operation or ownership of the project by a PHA (other than an agency or instrumentality).

(4) In the case of obligations used to finance a low-income housing project involving private profit-motivated owners, the loan to the owner shall not exceed 90 percent (determined in accordance with HUD standards) of the HUD-approved development cost.

(b) The term of the HAP contract securing the permanent obligations under this subpart shall not exceed 30 years or the term of the obligations whichever is shorter, except that in the case of projects other than those designed for the elderly HUD may approve a term of not to exceed 40 years or the term of the obligations, whichever is shorter.

(c) The anticipated interest cost and the ancillary costs of servicing the obligations, such as trustee fees, maintenance of books and accounts and audit expenses, must be shown to and approved by HUD as being reasonable in relation to prevailing costs in the tax exempt market for comparable obligations, taking into account any differences between the types of obligations.

(d) Issuance of obligations to refund outstanding permanent obligations is prohibited.

§ 811.107 Use of proceeds of permanent obligations.

(a) The proceeds of permanent obligations issued pursuant to this Subpart shall upon receipt be placed in escrow with the trustee in accordance with the trust indenture and shall be invested to earn interest. The escrowed funds shall be disbursed only upon execution of a HAP Contract covering the project with respect to which the obligations were issued except for prior disbursements for capitalized interest. Upon execution of the HAP Contract, the escrowed funds shall be disbursed for the debt service reserve fund, the expenses of issuing the obligations and the interim financing.

(b) In the event that the HAP Contract is not executed within 60 days of the date by which completion is required under the applicable Agreement to Enter into HAP Contract, the permanent obligations shall be redeemed from the funds in escrow plus income from investment of the escrowed funds and less any debt service disbursements. However, such date for redemption may be extended to a later specified date in the event (1) The parties to the Agreement have agreed in writing to such extended date, and (2) additional funds, in the form of cash or an unconditional letter of credit, are added to the escrow to guarantee that there will be sufficient funds in the escrow on the extended date to pay all amounts that are then required to be paid from the escrow on at least as favorable a basis as if there had been no extension.

(c) The provisions of § 811.107 (a) and (b) shall not apply to permanent obligations issued pursuant to this subpart where (1) The obligations are unconditionally guaranteed as to both principal and interest by a State or by a county, city, or other unit of general local government, (2) construction advances are insured pursuant to the National Housing Act, or (3) permanent obligations are not issued until after completion of construction.

(d) After execution of the HAP Contract and disbursement of the escrow, the debt service reserve fund, if any, shall be invested to earn interest and shall be maintained by the trustee in accordance with the trust indenture. This fund and interest income, which may be accumulated therein, shall be available only for the purpose of paying principal, interest, or premiums on the permanent obligations as long as these obligations are outstanding; except that any amounts in the fund in excess of the original amount shall be available for any project purposes as provided in the trust indenture.

§ 811.108 Interim Financing.

(a) The applicant may also request a determination by HUD that the obligations for interim financing be tax exempt pursuant to this subpart. The amount of such obligations shall not exceed the estimated development cost of the low-income housing project, as determined by HUD. If the expenses of issuing the permanent obligations are to be paid prior to execution of the HAP Contract, these expenses may be included in the amount of the interim obligations or they may be advanced by the developer/owner or contractor to be repaid upon disbursement of the escrow § 811.107). The interim obligations shall mature on a specified date not unreasonably beyond the stated date by which completion is required under the applicable Agreement to Enter into HAP Contract.

(b) The following provisions are applicable whether or not interim financing is tax-exempt:

(1) The terms and conditions of any interim financing shall be consistent with the terms and conditions of the permanent obligations which are proposed or committed for issuance.

(2) The proceeds of the permanent obligations shall be available for repayment of the interim obligations, but only upon execution of the HAP Contract and otherwise in accordance with the terms of the escrow. The risk of completion of the project is upon the developer/owner and the entity providing the interim financing.

(3) The entity providing the interim financing shall provide for such inspection during construction, either directly or by agreement with the owner, as the lender deems necessary to protect its interest. Copies of inspection reports shall be furnished to the PHA (including the parent entity and the agency or instrumentality where applicable) and to HUD. The PHA shall to the extent of the funding provided in the development cost make independent inspections, and copies of any reports resulting from such independent inspections as well as copies of any comments by the PHA on any inspection reports shall be furnished to the lender and to HUD. HUD shall promptly notify the Owner, with copies to the lender, contractor, and PHA, of any deficiencies noted in such reports or comments, with a statement that evidence of the correction of such deficiencies will be required at the time of the HUD inspection for evidence of completion. However, failure by the PHA to make such independent inspections or comments or failure by HUD to give such notifications shall not relieve the owner and lender of their obligation for completion of the project in accordance with the Agreement to Enter into HAP Contract.

(4) The effective date of the HAP Contract shall be 10 working days after the notification of project completion to HUD, or the date of the HUD inspection if earlier, provided that the Owner's and Architect's Certifications and other evidence of completion is found by HUD to be acceptable as of that date. If the certifications and other evidence of completion is found not to be acceptable as of that date, the effective date of the HAP Contract shall be the earliest subsequent date as of which the evidence of completion is found by HUD to be acceptable.

(5) If HUD finds that the evidence of completion is acceptable with respect to the physical completion of the project, including the certificate and/or official approvals required for occupancy, but the evidence of completion in other respects is not acceptable, HUD shall upon request by the Owner execute or approve the execution of the HAP Contract; in such case, however, until such evidence of completion is submitted to and found acceptable by HUD, (i) The Contract Rent for the purpose of computing the Housing Assistance Payment with respect to any unit shall be the monthly amount of the debt service on the permanent obligations attributable to the unit, and (ii) rent-up and occupancy shall be subject to such conditions as HUD may require.

§ 811.109 Use of Project Revenues.

The trust indenture shall provide for the maintenance of reserves and/or accounts to assure that there are funds as necessary to meet all project requirements, including, but not limited to, a reserve or account sufficient to provide for the routine and non-routine maintenance over the life of the project.

§ 811.110 Approval of Obligations as Tax Exempt.

(a) If HUD finds that (1) Obligations proposed to be issued for the financing of a low-income housing project are in compliance with this subpart, (2) the terms and conditions of the financing have been approved pursuant to other applicable HUD regulations, and (3) the Agreement to Enter into HAP Contract or the HAP Contract has been executed and, where applicable, approved in writing by HUD, the Field Office Director shall notify the applicant of these findings.

(b) This notification shall include a statement that (1) Pursuant to this subpart and the Act, HUD has found the applicant to be a PHA, (2) the obligations when issued in accordance with the approved application shall be exempt from all taxation now or hereafter imposed by the United States whether paid by the PHA or by HUD, and (3) the income derived by the PHA from the low-income housing project shall be exempt from all taxation now or hereafter imposed by the United States.

(c) If the application included tax exempt interim financing, the notification shall include a comparable statement with regard to such interim financing.

(d) This notification of approval of tax exemption shall not be subject to revocation by HUD.

§ 811.111 Limited applicability to tax exemption other than under Section 11(b).

This subpart shall not be applicable to obligations issued pursuant to, or purporting to be tax exempt under, any other provision of law or Governmental regulation, except as provided in 24 CFR 880.115(c) and 881.115(c).

CHANGES TO RELATED REGULATIONS

PART 880—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—NEW CONSTRUCTION

1. Section 880.106(a) is amended by inserting the following at the end thereof:

§ 880.106 Maximum Total ACC Commitment and Project Account (Private-Owner/PHA Projects).

(a) * * * Where the PHA is a State Housing Finance and Development Agency, the maximum total annual contribution shall not include a fee payable by HUD for the regular costs of administration of the HAP Contract, nor shall the agency be eligible for a fee payable by HUD for the preliminary costs of administration of the HAP Contract, if the amount charged for the permanent loan by the agency to the Owner ancillary is greater than the agency's cost of borrowing including costs of servicing the obligations, such as trustee fees, maintenance of books and accounts and audit expenses.

* * * * *

2. A new § 880.115(c) is added to read as follows:

§ 880.115 Financing.

* * * * *

(c) *Applicability of Certain Provisions of 24 CFR, Part 811, Where Financing is by a PHA or Entity Created or Utilized by a PHA.*—Where the permanent financing is by obligations of a PHA (other than an agency notified by HUD pursuant to 24 CFR 883.103 that it is a qualified Participating Agency) or an entity created or utilized by such a PHA, which obligations are tax exempt pursuant to Treasury Department regulations, rather than 24 CFR Part 811, "Tax Exemption under Section 11(b) of the Act of Obligations of PHAs Issued to Finance Section 8 Projects," §§ 811.106, 811.107, 811.108(b), and 811.109 shall nevertheless be applicable.

3. Section 880.125(a) is amended to read as follows:

§ 880.125 Projects Financed with Proceeds of Obligations issued by a Public Agency.

(a) *Applicability.*—The provisions of this section shall apply where permanent financing for a project is to be provided by a public agency or other entity including a PHA ("financing agency").

* * * * *

PART 881—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—SUBSTANTIAL REHABILITATION

4. Section 881.106(a) is amended by inserting the following at the end thereof:

§ 881.106 Maximum Total ACC Commitment and Project Account (Private-Owner/PHA Projects).

(a) * * * Where the PHA is a State Housing Finance and Development Agency, the maximum total annual contribution shall not include a fee payable by HUD for the regular costs of administration of the HAP Contract, nor shall the agency be eligible for a fee payable by HUD for the preliminary costs of administration of the HAP Contract, if the amount charged for the permanent loan by the agency to the Owner is greater than the agency's cost of borrowing including ancillary costs of servicing the obligations, such as trustee fees, maintenance of books and accounts and audit expenses.

* * * * *

5. A new § 881.115(c) is added to read as follows:

§ 881.115 Financing.

* * * * *

(c) *Applicability of Certain Provisions of 24 CFR Part 811, Where Financing is by a PHA or Entity Created or Utilized by a PHA.*—Where the permanent financing is by obligations of a PHA (other than agency notified by HUD pursuant to 24 CFR 883.103 that it is a qualified Participating Agency) or an entity created or utilized by such a PHA, which obligations are tax exempt pursuant to Treasury Department regulations, rather than 24 CFR, Part 811, "Tax Exemption of Obligations of PHAs under section 11(b) of the Act," §§ 811.106, 811.107, 811.108(b), 811.109 shall nevertheless be applicable.

6. Section 881.125(a) is amended to read as follows:

§ 881.125 Projects Financed with Proceeds of Obligations issued by a Public Agency.

(a) *Applicability.*—The provisions of this section shall apply where permanent financing for a project is to be provided by a public agency or other entity including a PHA ("financing agency").

* * * * *

PART 883—SECTION 8 HOUSING ASSISTANCE PAYMENTS PROGRAM—HOUSING FINANCE AND DEVELOPMENT AGENCIES AND NEW CONSTRUCTION SET-ASIDE FOR SECTION 515 RURAL RENTAL HOUSING PROJECTS

7. Section 883.203(a) is amended to read as follows:

883.203 Maximum total ACC commitment and project account.

(a) *Maximum total ACC commitment.*—The maximum total annual contribution that may be contracted for in the ACC for a project shall be the total of the Gross Rents for all the Contract units in the project, plus a Financing Cost Contingency (if the HFA is using its set-aside for the project) for possible increases in Contract Rents resulting from higher financing costs, pursuant to § 883.205(c)(2). In addition, the maximum total annual contribution may include a fee payable by HUD for the regular cost of HFA administration of the HAP Contract if the amount charged for the permanent loan by the HFA to the Owner is no greater than the HFA's cost of borrowing, including the ancillary costs of servicing the obligations, such as trustee fees, maintenance of books and accounts and audit expenses. Where the HFA qualifies for a fee payable by HUD for the regular costs of administration of the HAP Contract, HUD-approved preliminary costs for administration of the HAP Contract (including administrative costs in connection with HFA activities related to relocation of occupants) shall also be payable out of the maximum total annual contribution.

* * * * *

(Sec. 7(d), Department of HUD Act (42 U.S.C. 3535(d)); secs. 3(6), 5(b) 8, 11(b) of the United States Housing Act of 1937 (42 U.S.C. 1437a, 1437c, 1437f and 1437).)

NOTE.—It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with Executive Order No. 11821.

Issued at Washington, D.C., July 28, 1977.

LAWRENCE B. SIMONS,
Assistant Secretary for Housing, Federal Housing Commissioner.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

[Order No. 739-77]

PART 17—REGULATIONS RELATING TO THE CLASSIFICATION AND DECLASSIFICATION OF NATIONAL SECURITY INFORMATION AND MATERIAL PURSUANT TO EXECUTIVE ORDER NO. 11652

Dissemination; Delegation of Authority to Assistant Attorney General for Administration

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This document delegates the authority to establish special procedural requirements for the handling of classified information to the Assistant Attorney General for Administration. This delegation will allow the Justice Department to more efficiently handle the increased number of persons requesting access to classified information.

EFFECTIVE DATE: July 26, 1977.

FOR FURTHER INFORMATION CONTACT:

J. Michael Kelly, Counselor to the Attorney General, Office of the Attorney General, Washington, D.C. 20530, 202-739-3892.

SUPPLEMENTARY INFORMATION: This amendment delegates to the Assistant Attorney General for Administration the authority to establish special requirements, in addition to those set forth in Part 17, with respect to access, distribution, protection, and dissemination outside the Executive branch of classified information and material originated or held by the Department and to assure the proper protection of such national security information. Under existing regulations, this authority is vested only in the Attorney General.

This delegation to the Assistant Attorney General for Administration relates only to the establishment of special procedural requirements and does not extend to the determination of what information will be disseminated inside or outside of the Executive branch, which determination shall continue to be made by the responsible official or employee as provided in § 17.59 of this Part.

Recently there has been a substantial increase in the number of personnel outside the Executive branch requiring access clearance to national security information in connection with court cases and, to a lesser extent, with providing very sensitive contractual services to the Department. These personnel include contractors, attorneys, law clerks, judges' secretaries, and court reporters.

The Attorney General is currently required to personally approve each special requirement for the granting of security clearances for access to national security information outside the Executive branch on a case-by-case basis. This delegation of authority will result in relieving the Attorney General of this burden and will authorize the Assistant Attorney General for Administration to promulgate orders and instructions governing the procedures to be followed in obtaining security clearances for non-executive branch personnel.

This delegation will also enable the Assistant Attorney General for Administration to create and manage a Special Security Program within the Department to establish and enforce procedures for the control of Sensitive Compartmented Information (SCI), a highly sensitive class of national security information that is flowing into the Department in a steadily increasing volume.

By virtue of the authority vested in me by 5 U.S.C. 301 and 28 U.S.C. 509, 510, Sections 17.63 and 17.64 of Subpart J, Part 17 of Chapter I of Title 28, Code of Federal Regulations, are amended as follows:

§ 17.63 [Amended]

1. Section 17.63 is amended by adding "or the Assistant Attorney General for Administration" at the end thereof.

§ 17.64 [Amended]

2. Section 17.64 is amended by inserting "or the Assistant Attorney General for Administration" immediately after "Attorney General".

Dated: July 26, 1977.

GRIFFIN B. BELL,
Attorney General.

Title 32—National Defense

CHAPTER I—OFFICE OF THE SECRETARY OF DEFENSE

ARMED SERVICES PROCUREMENT REGULATION

Adoption of the 1976 ASPR

AGENCY: Department of Defense.

ACTION: Promulgation of the 1976 ASPR.

SUMMARY: The purpose of this document is to announce that the 1976 edition of the Armed Services Procurement Regulation (ASPR) is filed with the Administrative Committee of the Federal Register for publication in the Code of Federal Regulations rather than in the FEDERAL REGISTER, in order to save on printing costs for this large volume of regulations.

EFFECTIVE DATE: October 1, 1976.

FOR FURTHER INFORMATION CONTACT:

Executive Secretary, ASPR Committee, Room 3D 776, Pentagon, Washington, D.C. 20301. Telephone: 202-697-4796.

SUPPLEMENTARY INFORMATION:

BACKGROUND

In 1975, the Armed Services Procurement Regulation (ASPR) Committee and the Office of the Federal Register (OFR) held several discussions on creating an appropriate format for publication of the 1975 edition of the ASPR. A different method was necessary because the 1975 ASPR consisted of 3,000 pages and a normal press run of a FEDERAL REGISTER issue is over 50,000 copies. Thus the cost of promulgating the ASPR in the usual manner would have been extremely high.

To facilitate publication of the 1975 ASPR and save on printing costs, it was decided:

1. Not to print the full text of the ASPR in the daily issue of the FEDERAL REGISTER, but instead, to use the CFR as the means of promulgation.

2. To waive the CFR numbering requirements and adopt the same codification system the Defense Department uses in their loose leaf edition of the ASPR.

3. To offer free distribution of the CFR volumes to all subscribers of the FEDERAL REGISTER who made timely application.

PROMULGATION OF THE 1976 EDITION

The decisions made concerning the 1975 ASPR are equally applicable to the 1976 edition.

The OFR is repeating its offer of free distribution of the CFR volumes. (For details, see the editorial note following this document.)

Because of delays experienced in publishing this 1976 edition, it will not reflect changes made to the ASPR by Defense Procurement Circulars (DPC) 76-1 and all subsequent 76 DPS's that have been issued to date.

These DPC's will be filed with the Administrative Committee at a later date. A document will be published in the FEDERAL REGISTER noting that the DPC's have been filed and can be inspected at the Office of the Federal Register or that copies may be obtained through purchase from the Superintendent of Documents, Washington, D.C. 20402, or by writing to the ASPR committee.

Therefore, the 1976 edition of the Armed Services Procurement Regulation is hereby promulgated in Title 32 CFR, Subchapter A, Parts 1-39, Volumes I, II, and III, thereby replacing in its entirety the 1975 edition of the ASPR previously promulgated in the CFR.

Effective date: October 1, 1976.

(5 U.S.C. 301, 10 U.S.C. 2202, DOD Directive 5129.1 of April 20, 1977)

T. G. CASSIDY,
Executive Secretary, Armed Services Procurement Regulation Committee.

[FR Doc.77-22410 Filed 8-2-77;8:45 am]

NOTE.—FEDERAL REGISTER subscribers will, on request, receive these CFR volumes containing the ASPR free of charge. To order the volumes, subscribers must send by August 31, 1977, the order form set forth below to:

ASPR Distribution, Office of the Federal Register, National Archives and Records Service, Washington, D.C. 20408.

A copy of the subscriber's mailing label from the FEDERAL REGISTER is also required, and should be attached to the order form. It is anticipated that distribution of these volumes will be made in the early fall of 1977.

Those persons who are not FEDERAL REGISTER subscribers but who would be interested in purchasing these volumes will be notified by a FEDERAL REGISTER announcement when the volumes are available for normal ordering from the Superintendent of Documents, Government Printing Office.

[OSD Admin. Inst. No. 81]

PART 286b—PERSONAL PRIVACY AND RIGHTS OF INDIVIDUALS REGARDING THEIR PERSONAL RECORDS

AGENCY: Office of the Secretary of Defense (OSD), DOD.

ACTION: Final rule.

SUMMARY: This document adds two specific exemptions to the Privacy Act regulations of the Office of the Secretary of Defense. The addition of these exemptions is designed to clarify previous requirements.

EFFECTIVE DATE: This final rule becomes effective August 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. James S. Nash, OSD Privacy Act Officer, Office of the Deputy Assistant Secretary of Defense (Administration), Washington, D.C. 20301, 202–697–2501.

SUPPLEMENTARY INFORMATION: On June 10, 1977 (42 FR 29935) a proposed rulemaking amendment was published by the Office of the Secretary of Defense (OSD) to amend Part 286b by revising § 286b.11. The revised § 286b.11 was intended to add clarity and add two additional specific exemptions as § 286b.11(c)(4) and (5). No comments were received on the proposed amendment, therefore the Office of the Secretary of Defense adopts, without change, the amended § 286b.11.

Accordingly, 32 CFR 286b.11 is amended as follows:

§ 286b.11 Exemptions.

(a) *General information.* The Secretary of Defense designates those Office of the Secrettary of Defense (OSD) systems of records which will be exempt from certain provisions of the Privacy Act. There are two types of exemptions, general and specific. The general exemption authorizes the exemption of a system of records from all but a few requirements of the Act. The specific exemption authorizes exemption of a system of records or portion thereof, from only a few specific requirements. If an OSD Component originates a new system of records for which it proposes an exemption, or if it proposes an additional or new exemption for an existing system of records, it shall submit the recommended exemption with the records system notice as outlined in § 286b.9(c). No exemption of a system of records shall be considered automatic for all records in the system. The systems manager shall review each requested record and apply the exemptions only when this will serve a significant and legitimate Government purpose.

(b) *General exemptions.* [Reserved]

(c) *Specific exemptions.* All systems of records maintained by any OSD Component shall be exempt from the requirements of 5 U.S.C. 552a(d) pursuant to subsection (k)(1) of that section to the extent that the system contains any information properly classified under Executive Order 11652, "Classification and Declassification of National Security Information and Material," dated March 8, 1972 (37 FR 10053, May 19, 1972), and required by the Executive Order to be kept classified in the interest of national defense or foreign policy. This exemption, which may be applicable to parts of all systems of records, is necessary because certain record systems not otherwise specifically designated for exemptions may contain isolated information which has been properly classified. The Secretary of Defense has designated the following OSD systems of records described below specifically exempted from the appropriate provisions of the Privacy Act pursuant to the designated authority contained therein:

(1) SYSID–DCOMP P26, SYSNAME. Protective Service File:

Exemption. This system of records is exempt from subsections (c)(3), (d), (e)(1), (e)(4)(G), (H), and (I) and (f) of 5 U.S.C. 552a, which would require the disclosure of investigatory material compiled for law enforcement purposes; or a record maintained in connection with providing protective services to the President of the United States or other individuals pursuant to 18 U.S.C. 3056. If any individual is denied any right, privilege, or benefit that he would otherwise be entitled by Federal law, or otherwise be eligible, as a result of the maintenance of the material compiled for law enforcement purposes, the material shall be provided to that individual, except to the extent that its disclosure would reveal the identity of a source who furnished information to the Government under an express promise or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. At the time of the request for a record, a determination will be made concerning whether a right, privilege, or benefit is denied or specific information would reveal the identity of a source.

Authority. 5 U.S.C. 552a(k)(2) and (3).

Reasons. These exemptions are necessary to maintain the confidentiality of the records compiled for the purpose of law enforcement, or protecting the President of the United States or others pursuant to 18 U.S.C. 3056.

(2) SYSID–DCOMP P28, SYSNAME. The Office of the Secretary of Defense Clearance File:

Exemption. This system of records is exempt from subsections (c)(3) and (d) of 5 U.S.C. 552a, which would require the disclosure of investigatory material compiled solely for the purpose of determining access to classified information but only to the extent that disclosure of such material would reveal the identity of a source who furnished information to the Government under an expressed promise that the identity of the source would be held in confidence or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. A determination will be made at the time of the request for a record concerning the specific information which would reveal the identity of the source.

Authority. 5 U.S.C. 552a(k)(5).

Reasons. This exemption is required to protect the confidentiality of the sources of information compiled for the purpose of determining access to classified information. This confidentiality helps maintain the Government's continued access to information from persons who would otherwise refuse to give it.

(3) SYSID–DCOMP SP02, SYSNAME. Industrial Personnel Security Clearance Case Files:

Exemption. This system of records is exempt from subsections (c)(3) and (d) of Sections 552a of 5 U.S.C. which would require the disclosure of investigatory material compiled solely for the purpose of determining access to classified information, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an expressed promise that the identity of the source would be held in confidence or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. A determination will be made at the time of the request for a record concerning whether specific information would reveal the identity of a source.

Authority. 5 U.S.C. 552a(k)(5).

Reasons. This exemption is required in order to protect the confidentiality of the sources of information compiled for the purpose of determining access to classified information. This confidentiality helps maintain the Government's continued access to information from persons who would otherwise refuse to give it.

(4) SYSID–DCOMP P32, SYSNAME. Standards of Conduct Inquiry File:

Exemption. This system of records is exempted from subsections (c)(3) and (d) of 5 U.S.C. 552a, which would require the disclosure of: investigatory material compiled for law enforcement purposes; or investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, or Federal contracts, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. If any individual is denied any right, privilege, or benefit that he would otherwise be entitled by Federal law, or otherwise be eligible, as a result of the maintenance of investigatory material compiled for law enforcement purpose, the material shall be provided to that individual, except to the extent that its disclosure would reveal the identity of a source who furnished information to the Government under an express promise or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. At the time of the request for a record, a determination will be made concerning whether a right, privilege, or benefit is denied or specific information would reveal the identity of a source.

Authority. 5 U.S.C. 552a(k)(2) and (5).

Reasons. These exemptions are necessary to protect the confidentiality of the records compiled for the purpose of: enforcement of the conflict of interest statutes by the Department of Defense Standards of Conduct Counselor, General Counsel, or their designees; and determining suitability, eligibility or qualifications for Federal civilian employment, military service, or Federal contracts of those alleged to have violated or caused others to violate the Standards of Conduct regulations of the Department of Defense.

(5) SYSID–DGC 03, SYSNAME. General Administrative File:

Exemption. This system of records is exempt from subsections (c)(3) and (d), Title 5 U.S.C. 552a, which would require the disclosure of: investigatory material compiled for law enforcement purposes; investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts or access to classified information, but only to the extent that the disclosure of such material would reveal the identity of a source who furnished information to the Government under an express promise or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence; or any record maintained in connection with providing protective services to the President of the United States or other individuals pursuant to 18 U.S.C. 3056. If any individual is denied any right, privilege, or benefit that he would otherwise be entitled by Federal law, or otherwise be eligible, as a result of the maintenance of material compiled for law enforcement purposes, the material shall be provided to that individual, except to the extent that its disclosure would reveal the identity of a source who furnished information to the Government under an express promise or, prior to September 27, 1975, under an implied promise that the identity of the source would be held in confidence. At the time of the request for a record, a determination will be made concerning whether a right, privilege, or benefit is denied or specific information would reveal the identity of a source.

Authority. 5 U.S.C. 552a(k)(2), (3) and (5).

Reasons. These exemptions are necessary to protect the confidentiality of the records compiled for the purpose of enforcing the law by or at the request of the General Counsel or his professional staff, determining suitability, eligibility, or qualifications for Federal civilian employment, military service, Federal contracts, or access to classified information, or protecting the President of the United States or others pursuant to 18 U.S.C. 3056.

MAURICE W. ROCHE,
Director, Correspondence and Directives, OASD (Comptroller).

Title 41—Public Contracts and Property Management

CHAPTER I—FEDERAL PROCUREMENT REGULATIONS

[FPR Amdt. 180]

PART 1–4—SPECIAL TYPES AND METHODS OF PROCUREMENT

Unsolicited Proposals

AGENCY: General Services Administration.

ACTION: Final rule.

SUMMARY: This amendment of the Federal Procurement Regulations (FPR) prescribes policies and procedures concerning the receipt, evaluation, and acceptance of unsolicited proposals. It applies not only to unsolicited proposals for research or development of methods or approaches but also for the conduct of services or the delivery of items. The amendment is designed to foster and encourage the submission of unsolicited proposals that could enhance, benefit, and/or provide valuable input to some area of an agency's mission responsibilities. The circumstance which created the need for the action was recommendation B–7 of the Commission on Government Procurement.

EFFECTIVE DATE: February 8, 1978.

FOR FURTHER INFORMATION CONTACT:

Philip G. Read, Director of Federal Procurement Regulations (703–557–8947).

The table of contents for Part 1–4 is amended to add the following new entries:

Subpart 1–4.9—Unsolicited Proposals

Sec.
1–4.900 Scope of subpart.
1–4.901 General.
1–4.902 Policy.
1–4.903 Agency program direction and operation.
1–4.904 Definitions.
1–4.905 Advance guidance.
1–4.906 Content of unsolicited proposals.
1–4.907 Time of submission.
1–4.908 Agency point of contact.
1–4.909 Receipt, review, and evaluation.
1–4.910 Method of procurement.
1–4.911 Prohibitions.
1–4.912 Interagency coordination.
1–4.913 Limited use of data.

AUTHORITY: Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c)).

Section 1–4.000 is revised as follows:

§ 1–4.000 Scope and applicability of part.

This part sets forth policies and procedures regarding special types and methods of procurement which include public utility services, livestock products, architect-engineer services, unsolicited proposals, and automatic data processing equipment and services.

New Subpart 1–4.9 is added as follows:

Subpart 1–4.9—Unsolicited Proposals

§ 1–4.900 Scope of subpart.

This subpart, sets forth policies and procedures concerning the receipt,

evaluation, and acceptance of unsolicited proposals.

§ 1–4.901 General.

The unsolicited proposal is a valuable means by which unique or innovative methods or approaches which have originated or developed outside the Government can be made available to Government agencies for use in the accomplishment of their missions. It is offered in the hope that the Government will enter into a contract with the offeror for (a) research on or development of the methods, approaches, or ideas it contains, or (b) the conduct of the activity or services or the delivery of the items it proposes. It should not be merely an advance proposal for a specific agency requirement which would normally be procured by competitive methods. An unsolicited proposal should be prepared independent of Government supervision. It often represents a substantial investment of time and effort by the offeror. It should present the proposed work in sufficient detail to allow a determination that Government support could be worthwhile and that the proposed work could enhance, benefit, and/or provide valuable input to an agency's research and development mission or to some other area of agency responsibility.

§ 1–4.902 Policy.

It is the policy of the Government to foster and encourage the submission of unsolicited proposals.

§ 1–4.903 Agency program direction and operation.

Each agency shall adopt and publish policies and procedures which will encourage the submission of unsolicited proposals relating to the agency's mission. Such policies and procedures shall be consistent with the requirements of this Subpart 1–4.9. They shall be developed with an objective to eliminate restraints which discourage the generation and acceptance of innovative ideas through unsolicited proposals.

§ 1–4.904 Definitions.

As used in this Subpart 1–4.9, the following terms have the meanings stated:

(a) "Unsolicited proposal" means a written offer to perform a proposed task or effort, initiated and submitted to the Government by a prospective contractor (offeror) without a solicitation by the Government, with the objective of obtaining a contract. Advertising material, commercial product offerings, contributions, or technical correspondence as defined in paragraphs (b) through (e) of this § 1–4.904 which are submitted to an agency shall not be considered to constitute unsolicited proposals within the intent of this Subpart 1–4.9.

(b) "Advertising material" means material designed to acquaint the Government with a prospective contractor's present off-the-shelf products or potential capabilities, or designed to determine the Government's interest in buying such products.

(c) "Commercial product offerings" mean offers of standard commercial products usually sold in substantial quantities to the general public and which the vendor wishes to see introduced in the Government's supply system as an alternate or replacement for an existing supply item.

(d) "Contributions" mean concepts, suggestions, or merely ideas presented to the Government for its use, with no indication on the part of the offeror that he will devote any further effort in relation to such concepts, suggestions, or ideas on behalf of the Government.

(e) "Technical correspondence" includes written inquiries regarding Government interest in research areas, preproposal explorations, technical inquiries, and research descriptions.

§ 1–4.905 Advance guidance.

Organizations or individuals who are interested in submitting an unsolicited proposal should be encouraged, before expending extensive effort in preparing a detailed unsolicited proposal or submitting any proprietary information to the Government, to make preliminary inquiries as to the general need for the type of effort contemplated.

(a) Prior contact with agency technical personnel is permissible and should be encouraged with the limited objectives of conveying to the prospective offeror an understanding of the agency mission and needs relative to the type of effort contemplated.

(b) Agencies shall make free written information available to potential offerors regarding policies and procedures for unsolicited proposals. As a minimum, the following information shall be made available to potential offerors.

(1) Definition of an unsolicited proposal, consistent with that set forth in § 1–4.904.

(2) Characteristics of a suitable proposal acceptable for formal evaluation. Also see §§ 1–4.906 and 1–4.910.

(3) Requirements concerning (i) responsible prospective contractors (see Subpart 1–1.12), (ii) organizational conflicts of interest, and (iii) where applicable, cost sharing.

(4) Role of technical correspondence prior to proposal preparation.

(5) Agency points of contact for information regarding advertising, contributions, bidders mailing lists, and other types of transactions frequently misconstrued as unsolicited proposals.

(6) Information regarding unsolicited proposal submission procedures.

(7) Information regarding evaluation procedures of the agency.

(8) Sources of information on agency objectives and areas of potential interest suitable for unsolicited proposal submissions.

(9) Instructions to the offeror that he identify proprietary information contained in his proposal and that any restrictive legend appearing in his proposal shall conform to the legend set forth in § 1–4.913(a).

(10) Advice to the prospective offeror that an unsolicited proposal shall conform to the procedural and submission guidelines of the agency to which it is submitted.

(c) Personal contacts shall be conducted in a manner that will preclude agency commitments regarding acceptance of unsolicited proposals.

§ 1–4.906 Content of unsolicited proposals.

Unsolicited proposals should contain the following information in order to permit consideration in an objective and timely manner.

(a) *Basic information.* This includes the name and address of the offeror; if an organization, indicate type; e.g., profit, nonprofit, educational, small business; names and telephone numbers of the offeror's technical and business personnel whom the agency may contact for evaluation or negotiation purposes; identification of any proprietary data which the offeror intends to be used by the agency only for evaluation purposes (see § 1–4.913); names of any other Federal, State, local agencies or other parties receiving the proposal and/or funding the proposed effort or activity; date of submission; and signature of a responsible official or authorized representative of the organization or a person authorized to contractually obligate the organization.

(b) *Technical information.* This includes a concise title and an abstract (approximately 200 words) of the proposed effort; a reasonably complete discussion stating the objectives of the effort or activity, the method of approach and extent of effort to be employed, the nature and extent of the anticipated results, and the manner in which the work will help to support accomplishment of the agency's mission; the names and brief biographical information of the offeror's key personnel (including alternates, if desired) who would be involved, and the type of support, if any, the offeror requests of the agency; e.g., facilities, equipment, materials, or personnel resources.

(c) *Supporting information.* This includes a proposed price or total estimated cost; a cost estimate for the proposed effort sufficiently detailed by element of cost for meaningful evaluation; the type of contract preferred; period of time for which the proposal is valid (a minimum of 6 months is suggested); proposed duration of effort; statements, if applicable, regarding cost sharing, organizational conflicts of interest, security clearance status, and environmental impacts, and brief descriptions of the organization, previous work or experience in the field of the proposal, and facilities to be utilized for the work, where appropriate for understanding the proposal.

§ 1–4.907 Time of submission.

Unsolicited proposals should be submitted well in advance of the offeror's desired beginning of the proposed effort or activity in order to allow the agency sufficient time to evaluate the proposal and negotiate any resultant contract. Agencies may establish procedures governing the time for submission and number of copies of proposals for the purpose of maintaining orderly and efficient evaluation procedures.

§ 1–4.908 Agency point of contact.

Each agency shall establish procedures within the agency to coordinate the receipt and handling of unsolicited proposals. Since the early involvement of procurement personnel is essential to the proper processing, evaluation, and possible contract award, agencies should consider designating their procurement activities for this purpose.

Each agency shall establish uniform procedures that provide for the coordinated control of the receipt, evaluation, and disposition of proposals. Because of the sensitivity of the evaluation process, particular attention should be devoted to the conduct of evaluations. The procedures shall be consistent with the provisions of §§ 1–4.909 through 1–4.913. Agency procedures shall also address reproduction (duplicating) and disposition of proposal material, particularly data which the offeror has identified as subject to duplication, use, and disclosure restrictions (see § 1–4.913(a)).

(a) Unsolicited proposals shall be acknowledged as soon as possible by the office which has been assigned the coordination responsibility (see § 1–4.908), and processed in an expeditious manner.

(b) Prior to making a comprehensive evaluation of an unsolicited proposal, the coordinating office (see § 1–4.908) shall determine that the document:

(1) Contains sufficient technical and cost information to permit a meaningful evaluation; and

(2) Has been approved by a responsible official or authorized representative of the organization submitting the proposal or a person authorized to contractually obligate the organization.

(c) If the document does not meet the requirements in paragraph (b) of this § 1–4.909, the offeror shall be given the opportunity to provide the required data. A comprehensive evaluation of an unsolicited proposal need not be made if the proposal is not within the purview of the mission of the agency (also see § 1–4.912(a)). In such cases, the submitter shall be furnished a prompt reply, stating how the document is being interpreted by the agency, the reason(s) for not evaluating it, and the disposition or intended dispositon of the material submitted. The agency shall not deny reconsideration of a timely and appropriately revised or supplemented proposal which is responsive to such an initial agency determination.

(d) Comprehensive evaluations shall be coordinated by the organizational entity designated in accordance with § 1–4.908. Each unsolicited proposal that is circulated for a comprehensive evaluation within the agency shall have attached or imprinted a legend identifying it as an unsolicited proposal, and stating that it shall be used only for purposes of evaluation see § 1–4.913 (c)). In evaluating an unsolicited proposal, agency personnel shall consider, in addition to any othe criteria, the following:

(1) Unique, innovative, or meritorius methods, approaches, or ideas which have originated with or are assembled together by the offeror that are contained in the proposed effort or activity.

(2) Overall scientific, technical, or socio-economic merits of the proposed effort or activity.

(3) Potential contribution which the proposed effort is expected to make to the agency's specific mission, if pursued at this time.

(4) Capabilities, related experience, facilities, or techniques, or unique combinations thereof which the offerer possesses and offers and which are considered to be integral factors for achieving the scientific, technical, or socio-economic objective(s) of the proposal.

(5) Qualifications, capabilities, and experience of the proposed principal investigator, team leader, or key personnel who are considered to be critical in achieving the objectives of the proposal.

(e) Upon completion of the comprehensive evaluation of an unsolicited proposal, agency evaluation personnel shall, in accordance with agency procedures, notify the coordinating office (see § 1–4.908) of their conclusions together with recommendations for further action.

§ 1–4.910 Method of procurement.

(a) A favorable comprehensive evaluation of an unsolicited proposal is not, in itself, sufficient justification for negotiating on a noncompetitive basis with the offeror. When a document qualifies as an unsolicited proposal (see §§ 1–4.904 (a) and 1–4.909(b)) but the substance (1) is available to the Government without restriction from another source, or (2) closely resembles that of a pending competitive solicitation, or (3) is otherwise not sufficiently unique to justify acceptance (see § 1–4.909(b)), the unsolicited proposal shall not be acceptable. When procurement is intended and competition is feasible, the proposal shall be returned to the offeror together with the reasons for the return (see § 1–4.909(e)).

(b) A negotiated, noncompetitive procurement is permissible when an unsolicited proposal has received a favorable technical evaluation, unless it is determined that the substance thereof is available to the Government without restriction from another source, or a competitive procurement is otherwise appropriate. The agency technical office sponsoring the procurement shall support its recommendation with a justification for noncompetitive procurement. The justification shall be based on a comprehensive evaluation of the proposal. The justification shall include the facts and circumstances that operate to preclude competition and that support the recommended noncompetitive action. Consideration shall include the evaluation factors listed in § 1–4.909(d).

(c) When it is determined that the subject matter of an unsolicited proposal is acceptable for award on a noncompetitive basis, the unsolicited proposal will serve as the basis for negotiation.

§ 1–4.911 Prohibitions.

Agencies shall not permit all or any part of an unsolicited proposal to be used as the basis, or as a portion, of a solicitation, or in negotiation with other firms unless the offeror is notified and agrees to the intended use. However, nothing herein precludes the Government from using any data, concept, or idea which it could have used had the unsolicited proposal not been submitted. With respect to data (see § 1–4.913(a)) tendered in an unsolicited proposal, disclosure of information which concerns or relates to trade secrets, processes, operations, style of work, or apparatus, and other matters may result in the imposition of a criminal penalty pursuant to the provisions of 18 U.S.C. 1905.

§ 1–4.912 Interagency coordination.

When it is determined that a meritorious unsolicited proposal is not related to the mission of the recipient agency or may be of interest to other agencies in addition to the recipient agency, the recipient agency may identify for the offeror other agencies whose missions bear a relationship to the subject matter of the unsolicited proposal.

§ 1–4.913 Limited use of data.

(a) An unsolicited proposal may include data which the offeror does not want disclosed for any purpose other than evaluation of the proposal. If the offeror wishes to impose such a restriction on his unsolicited proposal he shall mark the title page with the following legend:

USE AND DISCLOSURE OF DATA

This data shall not be disclosed outside the Government and shall not be duplicated, used, or disclosed in whole or in part for any purpose other than to evaluate the proposal; *Provided*, That if a contract is awarded to this offeror as a result of or in connection with the submission of this data, the Government shall have the right to duplicate, use, or disclose the data to the extent provided in the contract. This restriction does not limit the Government's right to use information contained in the data if it is obtainable from another source without restriction. The data subject to this restriction is contained in Sheets ----------

The offeror also shall mark each sheet which he wishes to restrict with the following legend:

Use or disclosure of proposal data is subject to the restriction on the title page of this Proposal.

(b) An unsolicited proposal shall be returned to the offeror if it is marked with a different legend than that provided in paragraph (a) of this § 1–4.913. The offeror shall be informed that the proposal cannot be considered because it is impracticable for the Government to comply with the legend. However, he shall also be informed that the proposal will be considered if it is resubmitted with the legend provided in paragraph (a).

(c) Except as provided in paragraphs (d) or (e) below, the coordinating office (see § 1–4.908) shall place a cover sheet on the proposal or the proposal

shall be otherwise clearly marked as follows unless the offeror gives a clear written indication that he does not wish to impose any restrictions on the disclosure or use of the data contained in the proposal.

UNSOLICITED PROPOSAL USE OF DATA LIMITED

All Government personnel handling this proposal shall exercise extreme care to insure that the information contained herein is not disclosed outside the Government and is not duplicated, used, or disclosed in whole or in part for any purpose other than to evaluate the proposal, without the written permission of the offeror (except that if a contract is awarded on the basis of this proposal, the terms of the contract shall control disclosure and use).

This notice does not limit the Government's right to use the information contained in the proposal if it is obtainable from another source without restriction.

This is a Government notice, and shall not by itself be construed to impose any liability upon the Government or Government personnel for any disclosure or use of data contained in this proposal.

The notice in this paragraph (c) is used by the Government solely as a manner of handling unsolicited proposals which will be compatible with the provisions of this section. Nevertheless, the use of the notice in this paragraph (c) shall not be used by the Government to justify the withholding of a document (record) nor to improperly deny access to a document to an individual (the public) where an obligation is imposed on the agency by the Freedom of Information Act, 5 U.S.C. 552, as amended. Matters which the prospective offeror considers to be trade secrets and commercial or financial information and privileged or confidential should be identified by the offeror upon submission to the Government in accordance with paragraph (a) of this § 1-4.913.

(d) If an unsolicited proposal is received without any restrictive legend from an educational or nonprofit organization or institution and it is necessary or appropriate to obtain an evaluation of the proposal outside the Government by leading scientists or other preeminent experts, to ascertain the merits of the proposal, a cover sheet shall be placed on the proposal or the proposal shall be clearly marked with the legend set forth in paragraph (c), above, modified by changing the first two words to read "All Government and non-Government and by deleting the words "is not disclosed outside the Government and". A written agreement shall be obtained from any non-Government evaluator that the evaluator will not disclose information in the proposal outside the Government. If the proposal is received with the restrictive legend specified in paragraph (a) of this § 1-4.913, the modified cover sheet shall also be used and permission shall be obtained from the offeror, prior to release, for the release of the proposal for outside evaluation.

(e) If an unsolicited proposal is received from other than an education or nonprofit organization or institution irrespective of whether it contains a restrictive legend, and it is necessary or appropriate to obtain an evaluation of the proposal by Government personnel outside the agency and/or by leading scientists or preeminent experts outside the Government, written permission shall be obtained from the offeror prior to release of the proposal for such evaluation. A cover sheet shall be placed on the proposal or the proposal shall be clearly marked with the notice set forth in paragraph (c), above, or as modified in accordance with paragraph (d), above, if appropriate. A written agreement shall be obtained from any non-Government evaluator that the evaluator will not disclose information in the proposal outside the Government.

(Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c)).)

NOTE.—The General Services Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: July 25, 1977.

JOEL W. SOLOMON,
Administrator of General Services.

[FR Doc.77-22304 Filed 8-2-77;8:45 am]

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 196—DOMESTIC MINING AND MINERAL FUEL CONSERVATION FELLOWSHIPS

Award of Fellowships

AGENCY: U.S. Office of Education, HEW.

ACTION: Final regulation.

SUMMARY: The Education Amendments of 1976 included several amendments to the statute governing this program. This final regulation implements these amendments, including setting the amount of the fellowship and establishing weighting factors for criteria used in the evaluation of the applications.

EFFECTIVE DATE: Pursuant to section 431(d) of the General Education Provision Act, as amended (20 U.S.C. 1232(d)), this regulation has been transmitted to the Congress concurrently with the publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

FOR FURTHER INFORMATION CONTACT:

Dr. Clarence B. Lindquist, Bureau of Higher and Continuing Education, 7th and D Streets SW., Regional Office Building 3, Room 3060, Washington, D.C. 20202, telephone 202-245-2347.

SUPPLEMENTARY INFORMATION: A Notice of Proposed Rulemaking published in the FEDERAL REGISTER on March 28, 1977 (42 FR 16448) incorporated proposed amendments to the existing regulation which had been published in final form on July 15, 1976 (41 FR 29123). The objective of the proposed regulation was:

(1) To implement the statutory provision permitting the Commissioner, in certain cases, to award an additional 12 months of fellowship tenure to a fellow who has already received 36 months of fellowship support;

(2) To implement the statutory provision allowing a fellow to interrupt his or her studies in certain circumstances for a period up to 12 months;

(3) To set the stipend, the dependency allowance, and the institutional allowance at levels consistent with prevailing practices in comparable federally supported programs, as is now required by statute;

(4) To delete the provision concerning the payment of travel allowances (formerly § 196.9), which are no longer authorized by the statute; and

(5) To establish weighting factors for the criteria (§ 196.10) used in evaluating the applications.

SUMMARY OF COMMENTS AND RESPONSES

Comment. One written comment to the proposed regulation was received. The commenter recommended that the stipend and dependency allowance paid to fellows be set at levels no less than those in comparable federally supported programs and that the dollar amount of the stipend not be specified in the regulation.

Response. The statute requires the Commissioner to pay such stipends (including such allowances for subsistence and other expenses for fellows and their dependents) as he may determine to be consistent with prevailing practices under comparable federally supported programs. The Commissioner believes that it is appropriate to publish these amounts in the regulation. The proposed regulation set the annual stipend at $3,600; the annual dependency allowance for each qualified dependent at $300; and the annual institutional allowance for each fellow at $3,600. To achieve consistency with other comparable federally supported programs and to conform with departmental policy, dependency allowances are being eliminated and the stipend and institutional allowance are both being set at $3,900 in the final regulation.

The Office of Education has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Catalog of Federal Domestic Assistance Program No. 13.567; Domestic Mining and Mineral and Mineral Fuel Conservation Fellowships.)

Dated: June 22, 1977.

ERNEST L. BOYER,
U.S. Commissioner of Education.

Approved: July 28, 1977.

JOSEPH A. CALIFANO, JR.,
Secretary of Health, Education, and Welfare.

Title 45 of the Code of Federal Regulations is amended by revising Part 196, to read as follows:

Sec.
196.1 Definitions.
196.2 Purpose.
196.3 Award procedures.
196.4 Types of fellowships.
196.5 Eligibility for fellowships.
196.6 Fellowship conditions.
196.7 Stipend.
196.8 [Reserved]
196.9 Institutional allowance.
196.10 Criteria for allocating fellowships to institutions of higher education.
196.11 Reward of vacated fellowships.
196.12 Payment procedures.
196.13 Criteria for determining financial need.
196.14 Records and reports.

AUTHORITY: Title IX, Part D, sections 961-965 of Pub. L. 89-329, as amended (20 U.S.C. 1134n-1134r), unless otherwise noted.

§ 196.1 Definitions.

As used in this part:

(a) "Act" means the Higher Education Act of 1965, as amended.

(b) "Domestic Mining" is defined as the means by which mineral and mineral fuel resources of the United States are extracted from the earth.

(c) "Fellow" means a person to whom the Commissioner awards a fellowship under this part.

(d) "Fellowship" means an award by the Commissioner under this part.

(e) "Institution of higher education" is defined in Section 1201(a) of the Higher Education Act of 1965, as amended 20 U.S.C. 1141(a).)

(f) "Mineral and Mineral Fuel Conservation" is defined as the means by which an adequate supply of the Nation's non-renewable resources is maintained, either through exploration for new sources, more efficient extraction of existing reserves, or better utilization of already processed minerals and mineral fuels.

(20 U.S.C. 1134n.)

§ 196.2 Purpose.

It is the purpose of this program to provide fellowships to assist graduate students of exceptional ability who demonstrate a financial need for advanced study in domestic mining and mineral and mineral fuel conservation including oil, gas, coal, oil shale and uranium.

(20 U.S.C. 1134n(a).)

§ 196.3 Award procedures.

Fellowships will be allocated to institutions of higher education which apply for a fellowship allocation and which offer a graduate program leading to an advanced or professional degree in the field of domestic mining or mineral and mineral fuel conservation on the basis of the criteria set forth in § 196.10. Institutions receiving such an allocation shall recommend eligible students to the Commissioner for fellowship award.

(20 U.S.C. 1134n(b)(1); 1134(c).)

§ 196.4 Types of fellowships.

The types of fellowships that will be awarded under this part are as follows:

(a) Fellowships for individuals for graduate study leading to an advanced or professional degree in a field of domestic mining or mineral and mineral fuel conservation.

(1) These fellowships will be awarded to individuals who have been accepted for graduate study at an institution of higher education that has received a fellowship allocation under this part.

(2) The fellowships will be allocated each year to institutions of higher education and will consist of two categories: new fellowships and continuation fellowships. Continuation fellowships will only be awarded to individuals who previously received an award under this part and who are continuing their study leading to an advanced or professional degree.

(3) An individual may receive assistance under this part for up to 36 months, except that the Commissioner may award a fellowship for an additional 12 month period to allow a student who has completed all course work and comprehensive examinations (if any) to complete the doctoral dissertation.

(b) Doctoral dissertation fellowships. These fellowships are one-year fellowships for persons who have completed all course work required for granting a doctoral degree or an equivalent degree (except such course work credited on the dissertation) and comprehensive examinations where appropriate, and whose doctoral dissertation (or other equivalent dissertation) proposal has been approved by appropriate officials of an institution of higher education that has received a fellowship allocation for this purpose.

(c)(1) A fellow may take a leave of absence for a period up to 12 months for the purpose of work, travel, or independent study away from the campus, if (i) the leave of absence is approved by the institution at which the fellow is enrolled and by the Commissioner; and (ii) the independent study is supportive of the fellow's academic program.

(2) The Commissioner shall make no payments to the fellow or the institution during this period. The fellowship is not vacated during this period and no reaward of the fellowship to another student may be made.

(20 U.S.C. 1134n(c); 1134n(d); 1134o.)

§ 196.5 Eligibility for fellowships.

Recipients of fellowships under this part must:

(a) Be of exceptional ability, as determined by the institution of higher education;

(b) Demonstrate financial need, as determined by the institution of higher education under the criteria set forth in § 196.13; and

(c) Be a national of the United States or be in the United States for other than a temporary purpose and intend to become a permanent resident thereof, or be a permanent resident of the Trust Territory of the Pacific Islands.

(20 U.S.C. 1134n(a)(1).)

§ 196.6 Fellowship conditions.

In order to continue receiving payments under the provisions of this part, a fellow must:

(a) Maintain satisfactory proficiency in the approved program in which he or she is registered;

(b) Continue to devote full-time to study or research in the field in which the fellowship was awarded; and

(c) Not engage in gainful employment during the period of the fellowship tenure, except in an internship or research activity under faculty supervision in the field in which he or she is studying.

(20 U.S.C. 1134q(a).)

§ 196.7 Stipend.

(a) The stipend to which a fellow is entitled will be $3,900 for an academic year consisting of twelve months.

(b) A fellow who is enrolled in the program of study for less than twelve months shall only be entitled to receive a pro rata share of the annual entitlement. For purposes of this section, a fellow who is enrolled in the program for the entire academic year (including summer sessions) at an institution of higher education shall be considered to be enrolled in the program for the full twelve months.

(20 U.S.C. 1134p(a).)

§ 196.8 [Reserved]

§ 196.9 Institutional allowance.

The institution of higher education at which the fellow is pursuing his or her course of study shall be paid $3,900 per twelve month period, except that any amount charged to and collected from the fellow by the institution for tuition and other expenses required by the institution as part of the fellow's instructional program shall be deducted from this amount. If the fellow is enrolled for less than 12 months, the institution will be paid a pro rata share of this amount.

(20 U.S.C. 1134p(b).)

§ 196.10 Criteria for allocating fellowships to institutions of higher education.

The allocation of fellowships among institutions of higher education which apply for participation in this program and which offer a graduate program leading to an advanced or professional degree in the field of domestic mining or mineral and mineral fuel conservation will be based on the following criteria:

(a) Highest priority will be given to allocate fellowships to institutions of higher education where the fellowships will be used to support fellows who are currently receiving assistance under this part or who are returning from an approved leave of absence (see § 196.4(c))

if there is evidence that these individuals have made satisfactory progress toward completing their course of study during the time when they are (or were) enrolled at the institution.

(b) The remaining fellowships will be allocated among institutions of higher education based on the degree (calculated according to the maximum point scores as shown) to which there is demonstrated evidence that the educational program at that institution:

(1) Is designed to address one or both of the following national needs (25 points):

(i) The need for trained individuals to improve the technologies for the efficient extraction and processing of nonrenewable mineral and mineral fuels including the development of improved systems of underground, underwater, and surface mining techniques, improved methods to protect the health and safety of people working in extraction and processing operations, and improved methods to protect and restore the environment in extraction and processing operations;

(ii) The need for training individuals to develop ways to ensure the availability of non-renewable minerals and mineral fuels through improved exploration or discovery techniques, optimum recovery of existing mineral and mineral fuel reserves, improved utilization of processed minerals and mineral fuels through recycling technology, and improved understanding of mineral economics;

(2) Is of high quality in terms of course offerings (20 points);

(3) Leads to immediate career opportunities in domestic mining and mineral and mineral fuels industries, including careers in teaching in those subject areas at institutions of higher education (5 points);

(4) Offers an opportunity for relevant supervised practicum, internship, or field experience (5 points);

(5) Has a program director and teaching staff which have the education, background, research interests, and experience to plan and implement a successful program of domestic mining and mineral and mineral fuel conservation education (20 points);

(6) Has the necessary institutional resources (facilities, equipment, library, etc.) to meet program objectives (20 points); and

(7) Has developed procedures to measure the effectiveness of the program (5 points).

(20 U.S.C. 134n(c).)

§ 196.11 Reaward of vacated fellowships.

If a fellowship is vacated prior to the end of a period for which it was awarded, the institution to which the fellowship is allocated may recommend to the Commissioner another individual to receive the fellowship. This individual must meet all the eligibility requirements set forth in § 196.5. The duration of a reawarded fellowship shall be for a period of graduate or professional work or research not in excess of the remainder of the period for which the fellowship it replaces was awarded.

(20 U.S.C. 1134n(b)(2).)

§ 196.12 Payment procedures.

(a) The Commissioner will pay to the approved institution of higher education the stipend and institutional allowance (calculated pursuant to §§ 196.7 and 196.9) for each fellowship allocated to that institution. The institution of higher education is responsible for disbursing all funds due the recipient.

(b) The timing of payments to fellows will be left to the discretion of each institution of higher education, although no fewer than two payments a year shall be made. Institutions are responsible for recovery of excess payments made to students who, for any reason, fail to complete the academic year for which they are registered.

(20 U.S.C. 1134p.)

§ 196.13 Criteria for determining financial need.

In determining whether a student has financial need for the purposes of this fellowship program, the institution must consider the student's projected costs for the year including tuition, fees, books, materials, and supplies, plus other reasonable costs that a student might have for room and board in comparison with the student's resources (including available income and contribution from available assets).

(20 U.S.C. 1134n(a).)

§ 196.14 Records and reports.

Each institution of higher education which receives an allocation of fellowships under this part, and each individual who is awarded a fellowship shall keep such records and submit such reports as are required by the Commissioner. Such reports shall include a certificate from an appropriate official at the institution of higher education, library, archive, or other research center approved by the Commissioner, stating that the fellow is making satisfactory progress in and is devoting essentially full time to the program for which the fellowship was awarded.

(20 U.S.C. 1134q(b).)

Title 49—Transportation

Subtitle A—Office of the Secretary of Transportation

[OST Docket No. 16, Amdt. 99-12]

PART 99—EMPLOYEE RESPONSIBILITIES AND CONDUCT

Statements of Employment and Financial Interests

AGENCY: Department of Transportation, DOT.

ACTION: Final rule.

SUMMARY: The purpose of this amendment is to revise Appendix C of the Department of Transportation's regulations governing employee conflict of interest. This document makes several additions to the list of positions the incumbents of which are required to submit statements of employment and financial interests.

EFFECTIVE DATE: August 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Booker T. Wade, Jr., Attorney-Advisor, Office of the General Counsel, Department of Transportation, Washington, D.C. 20590. (202-426-4723).

SUPPLEMENTARY INFORMATION: The persons principally responsible for drafting this document are: Program—Aubrey B. Robertson, Office of Personnel and Training; legal—Booker T. Wade, Jr., Office of the General Counsel.

Since this amendment relates to Departmental management, procedures, and practices, notice and public procedure thereon are unnecessary and it may be made effective in fewer than 30 days after publication in the FEDERAL REGISTER.

In consideration of the foregoing, Part 99 of title 49, Code of Federal Regulations, is amended as follows:

Appendix C [Amended]

In Appendix C, Section I, under the caption "Office of the Assistant Secretary for Systems Development and Technology," the following amendments are made:

After the listing of "Director, Office of Noise Abatement," the following caption and listings are inserted:

* * * * *

TRANSPORTATION SYSTEMS CENTER

Director
Deputy Director
Executive Assistant
Equal Opportunity Officer
Chief Counsel
Patent Advisor
Chief, Office of Plans and Programs
Chief, Office of Advanced Systems
Director, Office of Systems Research and Analysis
Chief, National Transportation Research Division
Chief, Transportation Information Division
Chief, Urban and Regional Research Division
Director, Office of Energy and Environment
Chief, Energy Programs Division
Chief, Environmental and Test Programs Division
Director, Office of Air and Marine Systems
Chief, Systems Development Division
Chief, Systems Technology Division
Director, Office of Ground Systems
Deputy Director, Office of Ground Systems
Chief, Urban Systems Division
Chief, Intercity Systems Division
Chief, Vehicles and Engineering Division
Director, Office of Administration
Chief, Budget Office
Chief, Management Systems Division

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Amdt. No. 4 to Service Order No. 1242]

PART 1033—CAR SERVICE

Kansas City Southern Railway Co. Authorized To Operate Over Certain Tracks of Southern Pacific Transportation Co.

Service date: July 29, 1977.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Amendment No. 4 to Service Order No. 1242).

SUMMARY: Service Order No. 1242 authorizes the Kansas City Southern to operate over tracks of the Southern Pacific Transportation Co. at Lake Charles, La. The Kansas City Southern Railway's drawbridge over the Calcasieu River at Lake Charles is unserviceable because of failure of the operating machinery used to open and close the span, isolating a major industrial district served by the Kansas City Southern from the remainder of the system. Operation of Kansas City Southern trains over the parallel bridge of the Southern Pacific enables the Kansas City Southern to continue service to shippers served by the tracks disconnected from the remainder of the system by the failure of the operating mechanism of the bridge. Amendment No. 4 extends Service Order No. 1242 for six months.

DATES: Effective 11:59 p.m., July 31, 1977. Expires January 31, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Utilization and Distribution Branch, Interstate Commerce Commerce Commission, Washington, D.C. 20423, Telephone 202-275-7840.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

At a session of the Interstate Commerce Commission Railroad Service Board held in Washington, D.C., on the 28th dav of July 1977.

Upon further consideration of Service Order No. 1242 (41 FR 18053, 31824, 48344; and 42 FR 6584), and good cause appearing therefor:

It is ordered, That Service Order No. 1242 be, and it is hereby, amended by substituting the following paragraph (e) for paragraph (e) thereof:

§ 1033.1242 Service Order No. 1242.

(a) The Kansas City Southern Railway Co. authorized to operate over tracks of Southern Pacific Transportation.* * *

* * * * *

(e) Expiration date: The provisions of this order shall expire at 11:59 p.m., January 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date: This amendment shall become effective at 11:59 p.m., July 31, 1977.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies secs. 1(10)-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

[Amdt. No. 2 to Service Order No. 1248]

PART 1033—CAR SERVICE

Norfolk & Western Railway Co. Authorized To Operate Over Tracks of Burlington Northern, Inc.

Service date: July 28,1977.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Amendment No. 2 to Service Order No. 1248).

SUMMARY: Service Order No. 1248 authorizes the Norfolk and Western Railway to operate over 18.86 miles of the Burlington Northern, Inc., between Hannibal, Mo., and Quincy, Ill., in lieu of operations over a parallel line of the Burlington Northern between East Hannibal, Ill., and Quincy. The line on the east bank of the Mississippi River formerly used by the Norfolk and Western is unserviceable because of deteriorated track. An application for permanent authoritv to operate over the west bank line of the Burlington Northern has been filed by the Norfolk and Western. Amendment No. 2 extends Service Order No. 1248 for six months.

DATES: Effective 11:59 p.m., July 31, 1977. Expires 11:59 p.m., January 31, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, Telephone 202-275-7840, Telex 89 2742.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 27th day of July 1977.

Upon further consideration of Service Order No. 1248 (41 FR 31222 and 42 FR 6371), and good cause appearing therefor:

It is ordered, That Service Order No. 1248 be, and it is hereby, amended by substituting the following paragraph (e) for paragraph (e) thereof:

§ 1033.1248 Service Order No. 1248.

(a) Norfolk and Western Railway Co. authorized to operate over tracks of Burlington Northern, Inc. * * *

* * * * *

(e) Expiration date: The provisions of this order shall expire at 11:59 p.m., January 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date: This amendment shall become effective at 11:59 p.m., July 31, 1977.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies secs. 1(10-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael.

Acting Secretary.

[FR Doc.77-22328 Filed 8-2-77;8:45 am]

[Amdt. No. 6 to Revised Service Order No. 1210]

PART 1033—CAR SERVICE

Providence & Worcester Co. Authorized To Operate Over Tracks of Consolidated Rail Corp. and Consolidated Rail Corp. Authorized To Operate Over Tracks of Providence & Worcester Co.

Service date: July 29, 1977.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency order (Amendment No. 6 to Revised Service Order No. 1210).

SUMMARY: Because of abandonments by the former Penn Central, two short segments of the Consolidated Rail Corp.'s

lines in Rhode Island known as the Slatersville and Wrenthan branches are isolated from the remainder of its system. Revised Service Order No. 1210 authorizes the Providence and Worcester Co. which has the sole rail connections with these two Consolidated Rail Corp. branches to operate them for the account of Consolidated Rail, pending approval by the Commission of a joint operating contract covering these lines. Amendment No. 6 extends Revised Service Order for six months.

DATES: Effective 11:59 p.m., July 31, 1977. Expires 11:59 p.m., January 31, 1978.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, Telephone 202–275–7840.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

At a session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 28th day of July 1977.

Upon further consideration of Revised Service Order No. 1210, (40 FR 7452, 19478, 41 FR 4929, 15414, 32430; and 42 FR 6817), and good cause appearing therefor:

It is ordered, That Revised Service Order No. 1210 be, and it is hereby, amended by substituting the following paragraph (h) for paragraph (h) thereof:

§ 1033.1210 Service Order No. 1210.

(a) Providence and Worcester Co. authorized to operate over tracks of Consolidated Rail Corp. and Consolidated Rail Corp. authorized to operate over tracks of Providence and Worcester Co.

* * *

* * * * *

(h) Expiration date: The provisions of this order shall expire at 11:59 p.m., January 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date: This amendment shall become effective at 11:59 p.m., July 31, 1977.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17 (2). Interprets or applies secs. ((10–17), 15 (4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17 (2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Stabilization and Conservation Service

[7 CFR Part 780]

APPEAL REGULATIONS

Appraisals With Respect to Technical Determinations for Wheat; Feed Grain, Upland Cotton and Rice Programs

AGENCY: Agricultural Stabilization and Conservation Service.

ACTION: Proposed rule.

SUMMARY: The proposed rule provides that appraisals by Federal Crop Insurance Corporation and Agricultural Stabilization and Conservation Service appraisers with respect to technical determinations for wheat, feed grain, upland cotton, and rice programs shall be binding on the reviewing authority and are not appealable to the Deputy Administrator, Programs. Experience has proven that proper judgment decisions on appeal matters such as these become increasingly difficult when handled beyond the State committee level. By the time this type of appeal reaches the National level, the familiarity of local surroundings decreases and any contributions to effective program administration resulting from appeals beyond the State committee level is minimal.

DATE: Comments must be received on or before September 2, 1977.

ADDRESS: Mail comments or objections regarding the proposed change to the Director, Program Appeals Staff, Agricultural Stabilization and Conservation Service, Room 3649, South Building, Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Arthur Reynolds, Program Appeals Staff, 202–447–3901.

SUPPLEMENTARY INFORMATION:

All references to programs for which the authorizing statutory language has expired such as the Land Use Adjustment and Soil Bank Programs are hereby removed.

PART 780—APPEAL REGULATIONS

In accordance with the above, it is proposed that § 780.11(a) of the Appeal Regulations, 7 CFR Part 780, be amended to read as follows:

§ 780.11 Requests for reconsideration and appeals requiring special handling.

(a) Determinations made by a State committee with respect to (1) the establishment of farm yields for wheat, feed grain, and cotton, (2) the establishment of wheat allotments, (3) the establishment of farm feed grain allotments, (4) the establishment of upland cotton base acreage allotments, (5) matters rising under the tobacco discount variety program, (6) eligibility provisions of the livestock feed program, (7) the disaster provisions of the wheat, feed grain, and upland cotton programs that a loss on a farm was due in whole or in part to causes other than the natural disaster or conditions beyond the control of the producer, (8) the establishment of rice allotments, and (9) crop appraisals by the Agricultural Stabilization and Conservation Service (ASCS) and by Federal Crop Insurance Corporation for ASCS are not appealable to the Deputy Administrator, Programs.

(b) In matters arising under the Agricultural Conservation Program involving the misuse of a purchase order by a vendor of conservation materials and services, the vendor may appeal to the Deputy Administrator only on the issue as to whether the facts reasonaly support the determination of the State committee.

(c) Matters arising under the (1) Agricultural Conservation Program involving a finding or certification by a technician of the Soil Conservation Services or Forest Service, or (2) appraisal redeterminations under the wheat, feed grain, upland cotton, or rice programs by Federal Crop Insurance Corporation or Agricultural Stabilization and Conservation Service, shall be binding on the reviewing authority.

RAY FITZGERALD,
Administrator, Agricultural Stabilization and Conservation Service.

[FR Doc.77–22271 Filed 8–2–77;8:45 am]

FEDERAL TRADE COMMISSION

[16 CFR Part 705]

REASONABLE DUTIES UNDER A FULL WARRANTY

Inquiry and Proceeding on Proposed Trade Regulation Rule

AGENCY: Federal Trade Commission.

ACTION: Notice of Inquiry and Proposed Rule Proceeding.

SUMMARY: The Commission is proposing a rule applicable to only "full" warranties which will define certain duties which are not reasonable within the meaning of Section 104(b)(1) of the Magnuson-Moss Warranty Act. The rule proposes that eight duties or obligations, when imposed upon a consumer as a condition of securitg a remedy after a consumer product malfunctions, may not be placed in a "full" warranty. The rule is intended to provide guidance to warrantors offering full warranties regarding unreasonable conditions which may not be imposed as a precondition to obtaining warranty performance. The proposed rule covers the following issues: (1) The cost of returning consumer products for warranty service; (2) the safety of returning consumer products for warranty service; (3) warranty registration requirements; (4) service of built-in consumer products; (5) repackaging consumer products for return for warranty service; (6) return of consumer products to authorized dealers; (7) methods which consumers may use for notification of warrantors of defects; and (8) the time in which consumers must notify warrantors of defects.

DATES: Written comments must be received on or before September 15, 1977. Hearings will commence in Chicago, Illinois on October 3, 1977, in Los Angeles, California on November 7, 1977, and in Washington, D.C. on December 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Gary Laden, Attorney, 202–724–1145, Division of Special Statutes, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580.

SUPPLEMENTARY INFORMATION: Section 104(b)(1) of the Magnuson-Moss Warranty Act, Pub. L. 93–637 (15 U.S.C. 2304) (the Act), authorizes the Federal Trade Commission to make rules setting forth what is an unreasonable duty when imposed by a warrantor on a consumer as a condition of securing a remedy under a full warranty of any consumer product which malfunctions, is defective, or does not conform to the written warranty.

A "full warranty" is a written warranty which meets the minimum standards of Section 104. Neither that Section nor this proposed rule apply to limited warranties.

The proposed rule is intended to define and identify certain duties which are not reasonable within the meaning of Section 104(b)(1) of the Act. That section provides that a warrantor "shall not impose any duty other than notification upon any consumer as a condition of securing a remedy * * * unless the warrantor has demonstrated in a rulemaking proceeding, or can demonstrate in an administrative or judicial enforcement proceeding (including private enforcement), or in an informal dispute settlement proceeding, that such a duty is reasonable." The burden of showing that a duty is reasonable rests with the warrantor. The proposed rule does not

include all duties which may be unreasonable under Section 104(b)(1). Rather, the proposed rule covers those duties which the Commission currently has reason to believe constitute unreasonable duties if imposed in a full warranty. Other duties, not addressed by the proposed rule, may be dealt with in the future on a case-by-case basis in an adjudicatory proceeding, or in future rulemaking proceedings as provided in Section 104(b)(1). Furthermore, duties not included here in may be found to be unreasonable by a court or dispute settlement mechanism in a case or dispute under the Act.

Section 110(b) of the Act states that failure by any person to comply with any requirement imposed on such person by the Act, or by a rule thereunder, shall be a violation of Section 5(a)(1) of the Federal Trade Commission Act (15 U.S.C. 45(a)(1)). Should instances of noncompliance with these requirements occur, the Commission may exercise its injunctive powers, or take other action to enforce Section 5 of the Federal Trade Commission Act or Section 110 of the Act.

The Commission also wishes to conduct an inquiry into various issues raised by the proposed rule. The Commission wishes to invite comment on a number of questions raised by this proceeding. These questions are designed not only to solicit data, views and arguments on the appropriateness of the proposed rule but also to develop alternative approaches to those suggested by the Commission's proposed rule should such alternatives be warranted and found to be in the public interest.

The documents supporting the proposed rule, and a report of the Commission's staff discussing the proposed rule and the supporting documents, will be made available for examination by interested persons in Room 130 of the Division of Legal and Public Records, Federal Trade Commission, Washington, D.C.

SECTION A. PROPOSED RULE

In consideration of the foregoing, the Commission proposes the following rule implementing Section 104(b)(1) of the Act, and to amend Title 16, Chapter 1, by adding to subchapter G—Rules, Regulations, Statements, and Interpretations under the Magnuson-Moss Warranty Act, a new Part 705 under that subchapter as follows:

PART 705—REASONABLE DUTIES UNDER A FULL WARRANTY

Sec.
705.1 Definitions.
705.2 Scope.
705.3 Unreasonable Duties.

AUTHORITY: The provisions of this Part 705 issued under 15 U.S.C. 2304 and 2309.

§ 705.1 Definitions.

(a) "The Act"—means the Magnuson-Moss Warranty-Federal Trade Commission Improvement Act, 15 U.S.C. 2301, et seq.

(b) "Built-in"—means any consumer product which is attached, fastened, or installed in or on to real or personal property.

(c) "Consumer"—means a buyer (other than for purposes of resale or use in the ordinary course of the buyer's business) of any consumer product, any person to whom such product is transferred during the duration of an implied or written warranty applicable to the product, and any other person who is entitled by the terms of such warranty or under applicable state law to enforce against the warrantor the obligations of the warranty.

(d) "Consumer product"—means any tangible personal property which is distributed in commerce and which is normally used for personal, family, or household purposes (including any such property intended to be attached to or installed in any real property without regard to whether it is so attached or installed).

(e) "Duty"—means any obligation imposed upon a consumer by a warrantor in a written warranty which is or appears to be a condition of securing a remedy of a consumer product which malfunctions, is defective, or does not conform to the written warranty.

(f) "Full warranty"—means a written warranty which meets or is deemed to meet the Federal minimum standards under section 2304 of the Act.

(g) "Remedy"—means whichever of the following actions the warrantor elects: (1) Repair (2) replacement, or (3) refund; except that the warrantor may not elect refund unless (i) the warrantor is unable to provide replacement and repair is not commercially practicable or cannot be timely made, or (ii) the consumer is willing to accept such refund.

(h) "Warrantor"—means any supplier or other person who gives or offers to give a written warranty.

(i) "Written warranty"—means (A) Any written affirmation of fact or promise made in connection with the sale of a consumer product by a supplier to a buyer which relates to the nature of the material and workmanship and affirms or promises that such material or workmanship is defect free or will meet a specified level of performance over a specified period of time, or

(B) Any undertaking in writing in connection with the sale by a supplier of a consumer product to refund, repair, replace, or take other remedial action with respect to such product in the event that such product fails to meet the specifications set forth in the undertaking, which written affirmation, promise, or undertaking becomes part of the basis of the bargain between a supplier and a buyer for purposes other than resale of such product.

(j) "Warranty service point"—means the place of business of the warrantor or of any designated representative for the performance of service under a written warranty.

(k) "Warranty service"—means any repair, replacement, refund, or other remedial action which a warrantor or a warrantor's designated representative is obligated to perform pursuant to a written warranty.

§ 705.2 Scope.

The regulations in this part define certain duties that warrantors offering full warranties may not impose upon consumers as a condition of securing a remedy of any consumer product. These regulations are not intended to give a complete list of such duties.

§ 705.3 Unreasonable duties.

It is a violation of Section 104(b)(1) of the Act, and as provided in Section 110(b) of the Act, a violation of Section 5(a)(1) of the Federal Trade Commission Act, for a warrantor offering a full warranty to a consumer on a consumer product to require or appear to require of the consumer, as a condition of securing a remedy, any unreasonable duty. The following are unreasonable duties:

(a) Requiring that a consumer assume the costs of mailing or shipping, including insurance, to send a product to or from a warranty service point. (NOTE.—A warrantor may require that a consumer initially pay these costs if the warrantor reimburses the consumer for them. In this case, reimbursement must be made no later than the time the product is returned to the consumer. Only documented costs must be reimbursed. The warrantor need not assume the costs of transportation to and from a mailing or shipping point, although a warrantor may choose to do so.)

(b) Requiring that a consumer mail, ship, or carry a consumer product which:
(1) Weights more than 15.9 kg (35 lbs);
(2) Is not designed to permit safe and convenient handling on stairways and through doorways; or
(3) Has any hazardous handling characteristics, including, but not limited to: (i) Sharp edges which may come in contact with a person handling the product; (ii) Hazardous or inadequate lift points, handholds or handles; (iii) Improperly located lift points, handholds or handles, especially on products which have uneven weight distribution.

NOTE 1.—It shall also be an unreasonable duty to require that a consumer mail a consumer product which is not mailable under current regulations of the United States Postal Service, if the product must be mailed to a warranty service point. United States Postal Service regulations include 39 CFR Part 124; United States Postal Service Manual Chapter 1, Part 123 and 124; and any other applicable regulations of the United States Postal Service or any amendments and supplements thereto.

NOTE 2.—Section 705.3(b) does not apply to operable motorized vehicles which are suitable for travel on public roads or waterways such as automobiles, motorcycles, and boats, and which can be returned to a warranty service point without unreasonable risk of damage to the vehicle or danger to persons. If a motorized vehicle is inoperable or cannot be returned for any of these reasons as a result of a warranty-related defect, the warrantor shall be responsible for returning (or assuming the cost of returning) the vehicle for warranty service.

(c) Requiring that a consumer complete and return any card shortly after purchase of a product (such as an owner's registration card, a warranty registration card, or the like), to make all or any part of the warranty effective. (NOTE: A warrantor may require a consumer to submit evidence that a product is under warranty at the time a remedy is sought (e.g., evidence of date of purchase), except where a warranty is offered without a time limit. Evidence that a product is under warranty at the time a remedy is sought may include a requirement that a card (which may, at the customer's option, be the warranty registration card) or other evidence that the product is still under warranty, be presented as a condition for warranty coverage. A warrantor may suggest the return of a warranty registration card shortly after purchase of a product, as one means of submitting evidence of date of purchase, but it may not be required or implied as the only means of evidencing date of purchase. Any such suggestion or implication that a consumer return a warranty registration card, or that the warranty registration card is in any way connected to the warranty, must be accompanied by the following notice, printed clearly and conspicuously: "You do not have to return this (the) card. Failure to return the card will not affect your warranty rights." The following are examples of implications which would trigger this notice: Labeling a card a warranty card, warranty registration card, or the like; placing the text of the warranty on the card or attaching the warranty text to the card; representing or distributing the card as part of the warranty material.)

(d) Requiring that a built-in consumer product be removed and returned by a consumer for warranty service or reinstalled by a consumer after warranty service unless the product can be removed, returned, and reinstalled by the average consumer without special tools, skills, or without the expenditure of a substantial amount of time.

(e) Requiring that a consumer return a product in its original package. (NOTE.—A warrantor may require a consumer to take precautions in repackaging a consumer product that are reasonably calculated to protect it from damage in shipping or mailing. In this case, the warranty must include simple and readily understood instructions on how to repackage the product.)

(f) Requiring that a consumer product be returned for warranty service only to the selling dealer, where a warrantor has more than one warranty service point.

(g) Requiring that a consumer's notice of a defect, malfunction, or a failure to conform with the written warranty be in writing. Notice of a defect under a full warranty may be any communication reasonably calculated to inform the warrantor of the defect, malfunction, or lack of conformity of the consumer product.

(h) Requiring that a consumer give notice of a defect within a specified period of time other than a "reasonable period of time."

SECTION B. QUESTIONS FOR COMMENT

All interested persons are urged to provide data, views or arguments on any or all aspects of the proposed rule, including recommended revisions and alternative approaches. The Commission specifically invites comments on the following questions:

1. What duties, other than those addressed in the proposed rule, might be deemed to be unreasonable in violation of Section 104(b)(1) of the Act?

2. Section 705.3(a) would prohibit warrantors from requiring a consumer to pay mailing or shipping costs to return a product for warranty service. Is there an alternative formula for determining whether a consumer should bear the mailing costs when a product is returned for warranty service? Would limiting the amount of shipping charges a consumer would have to pay to a percentage of the purchase price of the product be a viable alternative? If so, how could such an approach be practically implemented? Are there other alternatives and how could each be implemented?

3. To provide as much certainty as possible, § 705.3(b)(1) provides a specified weight limit to guide warrantors in the question of reasonableness with regard to portability. However, it has been suggested that with respect to the issue of consumer product return, alternative criteria might be preferable in determining whether or not a duty to carry back a product is unreasonable. One alternative suggested has been to define reasonableness by reference to whether or not a consumer initially carried the product home from the place of purchase. Another alternative theory suggests that the nature of the use of the product itself might be one relevant criterion. For example, a vacuum cleaner or lawn mower on wheels might be reasonable to roll back if it did not have to be carried. Should either of these alternatives serve as a basis for formulating a rule, rather than establishing a maximum reasonable weight standard? What other criteria might be used to address the issue of the reasonableness of consumer product return requirements?

4. Section 705.3(b)(2) and (3) would prohibit warrantors from requiring return of any product which was not safe and convenient to handle on stairways or through doorways or which has hazardous handling characteristics. Is it possible to define more specifically what handling characteristics are too hazardous? How may the Commission provide more specific guidance on the issue of what may make a product too unsafe for a consumer to carry back for warranty service? Have manufacturers of consumer products studied these issues and developed guidelines for product design?

5. Section 705.3(d) would prohibit any requirement that consumers, return, remove, or reinstall a built-in consumer product "unless the product can be returned, removed, and reinstalled by an average consumer without special tools, skills, or without the expenditure of a substantial amount of time." The Commission wishes to invite comment on how it may provide more specific guidance on when a consumer may not be required to return a built-in item for warranty repair. Are there better terms to define the concepts of "average consumer" and "special tools and skills"? What is the expenditure of a substantial amount of time for removal and reinstallation? Is there another formula which addresses this question more specifically?

6. As an alternative to the approach presently embodied in § 705.3(b) and (d) of the proposed rule, should warrantors be able to require consumers to arrange for return of products over 35 lbs., or to remove built-in products, providing the warrantor bears the expense of removal and return? Would warrantors use such a system if allowed, and how could it be practically implemented? Would it be feasible, for example, to impose limitations on reimbursable costs of returning a product?

7. Section 705.3(c) would prohibit any requirement that a consumer return a card shortly after purchase as a prerequisite to make a warranty effective. However, the rule does not prohibit a warrantor from requiring that a purchaser produce a card at the time warranty service is sought. See also § 700.7 of Federal Trade Commission, "Interpretations of the Magnuson-Moss Act," 42 FR 36111, at 36116. Should a warrantor's requirement that a consumer return a card at the time a remedy is sought, as evidence that the product is still under warranty, be an unreasonable duty? Where the warranty period is of a lengthy duration, is there potential for consumers being denied warranty service because of loss of a card? Under what circumstances would a service card requirement amount to an unreasonable burden on the exercise of full warranty rights?

8. Section 705.3(f) would prohibit warrantors who have more than one service center from requiring consumers to return products for service only to the selling dealer. Will this requirement create any inefficiencies in the administration of a warranty program which includes more than one service center? What are the nature of these inefficiencies? For example, do consumer products receive their final inspection, testing, preparation, or assembly from retailers? Would retailers of such products sold under the terms of a full warranty perform these duties less diligently if consumers were no longer required to have warranty repairs performed by the dealer from whom the product was originally purchased? How would any such inefficiencies compare to the burden imposed on consumers? Please provide factual data in support of any comments.

9. Proposed § 705.3(h) would prevent warrantors from imposing time limitations for notice of defect which are more restrictive than a "reasonable time." The Commission wishes to invite comments on whether any specific time limitation for notice of defect, apart from the use

of the words "reasonable time," would constitute an unreasonable duty under Section 104(b)(1) of the Act? Please provide facts to the extent possible in support of any time period suggested.

10. What will be the additional costs of compliance, if any, with this rule for warrantors who give full warranties?

11. This rule was designed to give those offering full warranties guidance on what duties are unreasonable in full warranties. Should the rule try to provide guidance for all consumer products or should some or all of the issues raised by the proposed rule be considered by product groups or categories? Should there be different standards of unreasonableness for different product categories? Should the Commission define unreasonable duties on a case-by-case approach rather than through rulemaking?

SECTION C—WRITTEN COMMENTS

All interested persons are hereby notified that they may submit written data, views, or arguments on any issue of fact, law, or policy, which may have some bearing upon the proposed rule. Such written comments should be submitted to John A. Gray, Presiding Officer, Federal Trade Commission, Washington, D.C. 20580, on or before September 15, 1977. To assure prompt consideration comments should be identified as "Full Warranty Duties Comments" and submitted when possible and not burdensome, in three copies.

SECTION D—PUBLIC HEARINGS DATES AND PLACES

1. Public hearings will begin on October 3, 1977 at 9:30 a.m. in Room 280, Everett M. Dirksen Federal Building, 219 South Dearborn Street, Chicago, Illinois 60604.

2. Public hearings will begin on November 7, 1977 at 9:30 a.m. in Room 13114, 11000 Wilshire Boulevard, Los Angeles, California 90024.

3. Public hearings will begin on December 6, 1977 at 9:30 a.m. in Room 532, Federal Trade Commission Building, Pennsylvania Avenue at Sixth Street, N.W., Washington, D.C. 20580.

SECTION E—INSTRUCTIONS FOR WITNESSES

1. *Advance notice.* Persons wishing to testify at a hearing should contact the Commission representative for that hearing location immediately. This will enable us to assist you in complying with the requirements set forth below. You may testify at only one hearing. In addition, all persons desiring to deliver a prepared statement at any of the hearings should file such statement together with supporting factual material with the Commission representative for that hearing location, two weeks before the commencement of the particular hearing.

2. *Notification and filing requirements.* (a) If you want to testify at the Chicago hearing, contact Alline G. Brown, 312–353–3775, Federal Trade Commission, 55 East Monroe Street, Chicago, Illinois 60603. If you plan to deliver a prepared statement at this hearing file such statement with Ms. Brown no later than September 19, 1977.

(b) If you want to testify at the Los Angeles hearing contact Paul M. Updegrove, 213–824–7575, Federal Trade Commission, 11000 Wilshire Boulevard, Los Angeles, California 90024. If you plan to deliver a prepared statement at this hearing file such statement with Mr. Updegrove no later than October 24, 1977.

(c) If you want to testify at the Washington, D.C. hearing contact Gary M. Laden, 202–724–1145, Division of Special Statutes, Federal Trade Commission, Washington, D.C. 20580. If you plan to deliver a prepared statement at this hearing file such statement with Mr. Laden no later than November 22, 1977.

3. *Use of Exhibits.* Use of exhibits during oral testimony is encouraged, especially when they clarify technical or complex matters.

(a) If you plan to offer documents as exhibits, file them as soon as possible during the general comment period (on or before September 15, 1977) so they can be studied by interested persons.

(b) If such documents are unavailable during the period, file them as soon as you can but not later than two weeks before the hearing at which you intend to present your testimony.

(c) Mark each document with your name, and number it in sequence, *e.g.* Jones Exhibit 1.

4. *Expert Witnesses.* If you are going to testify as an expert witness submit a curriculum vitae, biographical sketch, resume, or summary of your professional background and a bibliography of your publications. In addition, it would be helpful if you would include documentation for the opinions and conclusions you express. If your testimony is based upon or chiefly concerned with one or two major scientific works, copies should be furnished.

5. *Results of surveys and other research studies.* If you present in your testimony the results of a survey or other research study, you must also submit as an exhibit or exhibits in compliance with paragraph 3 above the following:

(a) A complete report of the survey or other research study and the information and documents listed in (b) through (e) below if they are not included in that report.

(b) A description of the sampling procedures and selection process including the number of persons contacted, the number of interviews completed, and the number of persons who refused to participate in the survey.

(c) Copies of all questionnaires or interview reports used in conducting the survey or study if respondents were permitted to answer questions in words of their choice rather than to select an answer from one or more answers printed on the questionnaire or suggested by the interviewer.

(d) A description of the methodology used in conducting the survey or other research study including the selection of instructions to interviewers, introductory remarks by interviewers to respondents, and a sample questionnaire or other data collection instruments.

(e) A description of the statistical procedures used to analyze the data and all data tables which underlie the results reported.

Other interested parties may wish to examine the questionnaires, data collection forms, and any other underlying data not offered as exhibits and which serve as a basis for your testimony. This information along with punch cards or computer tapes which were used to conduct analyses should be made available (with appropriate explanatory data) upon the request of the Presiding Officer who will then be in a position to permit their use by other interested parties or their counsel.

6. *General.* Copies of all materials filed by witnesses will be made available for examination at each hearing location specified above for the submission of such material. Any person who desires to obtain copies of the above materials for his own use must make arrangements in advance with the Commission representative specified above.

7. *Reason for requirements.* The foregoing requirements are necessary to permit us to schedule the time for your appearance as well as that of other witnesses in an orderly fashion. The Commission staff and the Presiding Officer need the requested documents for study before the hearing to prepare appropriate questions. Also, such data should be of assistance to interested persons in the preparation of the filing of contradictory statements (rebuttals).

8. *Content of testimony.* In your testimony you can discuss any questions of fact, law, or policy concerning the proposed rule.

9. *Procedures and time limits.* These hearings will be informal and courtroom rules of evidence will not apply. You will not be put under oath unless the Presiding Officer so requires. The Presiding Officer may set reasonable time limits on your testimony. If you submit a prepared statement of testimony you may summarize the statement in your testimony, and the entire written statement will be introduced into the record as an exhibit.

Issued: August 3, 1977.

By the Commission.

CAROL M. THOMAS,
Secretary.

[19 CFR Part 134]

COUNTRY OF ORIGIN MARKING

Proposed Change of Position Relating to Country of Origin Marking of Radios, Stereo Systems, Television Sets, and Other Similar Consumer Electronic Products

JULY 28, 1977.

AGENCY: United States Customs Service, Treasury.

ACTION: Notice of proposed change of position.

SUMMARY: This document describes a proposed change of position relating to the country of origin marking of radios, stereo systems, television sets, and other similar consumer electronic products. This change is being considered because contemporary marketing practices make the current practice of placing the country of origin marking on the back of such products unacceptable as a means of conspicuously marking the products as to country of origin, as required by law and regulations.

DATES: Comments must be received on or before September 2, 1977.

ADDRESS: Comments should be addressed to the Commissioner of Customs, Attention: Regulations and Legal Publications Division, 1301 Constitution Avenue NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:

Diane Bratter, Attorney, Regulations and Legal Publications Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229 (202–566–8237).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Unless otherwise provided by law, section 304 of the Tariff Act of 1930, as amended (19 U.S.C. 1304), and the Customs Regulations promulgated thereunder (19 CFR Part 134), require every article of foreign origin (or its container) imported into the United States to be marked in a conspicuous place, as legibly, indelibly, and permanently as the nature of the article (or the container of the article) will permit, in such a manner as to indicate to the ultimate purchaser of the article in the United States the English name of the country of origin of the article.

The United States Customs Court, in *Charles A. Redden (Inc.)* v. *United States*, T.D. 44964 (1931), held that section 304 of the Tariff Act does not require that an article be marked with the country of origin in the most conspicuous place, but merely that it be so marked "in any conspicuous place which shall not be covered or obscured by subsequent attachments or arrangements." Under the rationale of the *Redden* case, it has been the practice of the Customs Service to permit television sets, stereo systems, radios, and similar articles to be marked as to the country of origin on the back of the article, where labels showing the model number and other technical data are normally affixed.

It has come to the attention of the Customs Service that many such articles of foreign origin carry a brand name which does not suggest foreign origin and, when offered for sale, are displayed in such a manner that prospective purchaser is unable to examine the merchandise to determine the country of origin until the article has been purchased and unpacked at home. Consequently, the Customs Service has determined that the current practice of marking these articles may no longer result, in a substantial number of cases, in such articles being conspicuously marked in a manner that will indicate to the ultimate purchaser the country of origin of the article.

PROPOSED CHANGE

Accordingly, it is proposed to require that radios, stereo systems, television sets, and similar consumer electronic products be marked with the country of origin on the front, top, or sides of the article in a manner which would ensure the visibility of the marking when the article is on display.

This change is being proposed under the authority of sections 304 and 624, 46 Stat. 687, as amended, 759 (19 U.S.C. 1304, 1624). Notice of this proposed change is being published for public comment pursuant to section 177.10(c)(2) of the Customs Regulations (19 CFR 177.10(c)(2)).

COMMENTS

Before adopting this proposed rule, consideration will be given to any written comments submitted to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with § 103.8(b) of the Customs Regulations (19 CFR 103.8(b)) during regular business hours at the Regulations and Legal Publications Division, Headquarters, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229.

DRAFTING INFORMATION

The principal author of this proposed rule is Diane Bratter, Attorney, Regulations and Legal Publications Division of the Office of Regulations and Rulings, United States Customs Service. However, personnel from other offices of the United States Customs Service participated in its development, both on matters of substance and style.

LEONARD LEHMAN,
Assistant Commissioner, Regulations and Rulings.

INCOME TAX RETURN PREPARERS

Proposed Rulemaking

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to persons who prepare for compensation income tax returns and claims for refund. Changes to the applicable tax law were made by the Tax Reform Act of 1976. The regulations would affect all these persons and would provide them with the guidance needed to comply with the law.

DATE: Written comments must be delivered or mailed by September 2, 1977. The regulations are proposed to apply to documents prepared after December 31, 1977.

ADDRESS: Send comments to: Commissioner of Internal Revenue, attention: CC:LR:T (LR–295–76), Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

Mark L. Yecies, Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, attention: CC:LR:T, 202–566–3328 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1), the Procedure and Administration Regulations (26 CFR Part 301), and the Temporary Regulations on Procedure and Administration under the Tax Reform Act of 1976 (26 CFR Part 404) under sections 6060, 6107, 6109(a)(4), 6694, 6695, and 7701(a)(36), of the Internal Revenue Code of 1954, relating to income tax return preparers. These amendments are proposed to conform the regulations to section 1203 of the Tax Reform Act of 1976 (90 Stat. 1688) and are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

The Tax Reform Act of 1976 established duties for persons who prepare for compensation income tax returns or claims for refund, and provided penalties for the breach of these duties and procedures with resepct to the collection of these penalties. These proposed regulations would implement the provisions of the Act.

DESCRIPTION OF PROPOSED REGULATION

In general, § 1.6060–1 requires an income tax return preparer to file an information return identifying each preparer employed by the preparer.

Section 1.6107–1 requires a preparer to furnish a copy of the completed return or claim for refund to the taxpayer before filing and to keep a copy of the completed return or claim for refund, or a list identifying the return or claim for refund available for inspection by the district director.

Section 1.6109–2 requires each return or claim for refund to bear the business address of the preparer where the document was prepared and the identification number of the preparer required to sign the document.

Section 1.6695–1(b) requires a preparer who has the primary responsibility for the accuracy of a return or claim for refund to manually sign the return or claim for refund before presenting it to the taxpayer.

Section 1.6695–1 provides penalties for the failure to file a correct information return, the failure to furnish a completed copy of the return or claim for refund to the taxpayer, the failure to retain a copy or list of returns and claims for refund, the failure to furnish identifying numbers, and the failure to manually sign the return. In addition, § 1.6695–1(f) provides a penalty for the endorsement or negotiation by a preparer of a refund check issued to a taxpayer for a return or claim for refund prepared by the preparer.

Section 1.6694–1 prohibits a preparer from negligently or intentionally disregarding rules or regulations, resulting in an understatement of tax liability, and from willfully understating tax liability. This section also provides penalties for the breach of these prohibitions. Section 1.6694–2 establishes procedures with respect to the collection of these penalties and the contest by the preparer of the preparer's liability for these penalties.

Section 301.7701–15 defines the terms "income tax return preparer", "return", and "claim for refund".

Temporary regulations relating to income tax return preparers were published in the FEDERAL REGISTER on December 29, 1976 (41 FR 56631), March 31, 1977 (42 FR 17124), and April 1, 1977 (42 FR 17452). In contrast to these temporary regulations, the proposed regulations require that the return or claim for refund bear the identifying number of the preparer required to sign the return or claim for refund. In addition, under certain circumstances, the proposed regulations permit, upon notice to, but without the approval of, the Internal Revenue Service, the return or claim for refund to bear only the ZIP code of the preparer as the preparer's address. Finally, the proposed regulations provide two limited alternatives to strict compliance by the preparer with the manual signature requirement.

COMMENTS—PUBLIC HEARING

Before adopting these proposed regulations, consideration will be given to any written comments that are submitted (preferably six copies) to the Commissioner of Internal Revenue. All comments will be available for public inspection and copying. A public hearing will be held in accordance with the notice of hearing published in this issue of the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal author of these proposed regulations was Mark L. Yecies of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

Proposed amendments to the regulations.—The proposed amendments to 26 CFR Parts 1, 301, and 404 are as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The following new section is added immediately after § 1.6056–1:

§ 1.6060–1 Information returns of income tax return preparers.

(a) *In general.*—(1) Each person who employs (or engages) one or more income tax return preparers as employees or independent contractors to prepare any return of tax under subtitle A of the Internal Revenue Code of 1954 or claim for refund of tax under subtitle A of the Internal Revenue Code of 1954, other than for the person, at any time during a return period shall file an information return setting forth the name, taxpayer identification number, and place of work of each income tax return preparer employed by the person at any time during such period.

(2) For the definition of the term "income tax return preparer", see section 7701(a)(36) and § 301.7701–15. For the definition of the term "return period", see section 6060(c) and paragraph (c) of this section.

(3) (i) For purposes of this section, any individual who, in acting as an income tax return preparer, is not employed by another income tax return preparer shall be treated as his own employer. Thus, a sole proprietor without any employee-preparers shall file the information return.

(ii) A partnership shall, for purposes of this section, be treated as the employer of the partners of the partnership and shall file the information return.

(4) Form 5717 is the return form prescribed for filing the information required under this section. The information return shall be filed with the Internal Revenue Service Center on or before the first July 31 following the end of the return period to which the return relates.

(b) *Alternative reporting method.*—(1) Any person required to file an information return under paragraph (a) of this section may request approval of an alternative reporting method which the person wishes to use to comply with paragraph (a) of this section. Such a requested alternative reporting method may include, for example, the filing, on a consistent basis, of the information required on magnetic tape. However, no approval will be given to an alternative reporting method that does not require some form of annual filing of all the information required by paragraph (a) of this section.

(2) Any request for approval of an alternative reporting method shall be in writing, shall be filed at least 90 days prior to the date the return is due, and shall be directed to the Office of the Assistant Commissioner (Accounts, Collection, and Taxpayer Service), Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (attention: ACTS:R). The information required shall be filed when due on the prescribed form if the request is denied (or not approved) by the date when the return is due. If the request is approved, the approval shall continue in effect with respect to all return periods until modified or revoked by written notice to the person required to file the return.

(c) *Return period defined.*—For purposes of this section, the term "return period" means the 12-month period beginning on July 1 of each year, except that the first return period shall be the 6-month period beginning on January 1, 1977, and ending on June 30, 1977.

(d) *Penalty.*—For the civil penalty for failure to file an information return required under this section, or for failure to set forth an item in the return as required under this section, see section 6695(e) and § 1.6695–1(e).

Par. 2. The following new section is added immediately after § 1.6102–1:

§ 1.6107–1 Income tax return preparer must furnish copy of return to taxpayer and must retain a copy or list.

(a) *Furnishing copy to taxpayer.*—The person who is an income tax return preparer of any return of tax under subtitle A of the Internal Revenue Code of 1954 or claim for refund of tax under subtitle A of the Internal Revenue Code of 1954 shall furnish a completed copy of the original return or claim for refund to the taxpayer not later than the time the original return or claim for refund is presented for the taxpayer's signature.

(b) *Copy or list to be retained.*—The person who is an income tax return preparer of any return or claim for refund shall—

(1) (i) Retain a completed copy of the return or claim for refund; or

(ii) Retain, on a list, the name, taxpayer identification number, and taxable year of the taxpayer for whom the return or claim for refund was prepared and the type of return or claim for refund prepared;

(2) Retain a record for each return or claim for refund presented to the taxpayer of the name of the individual preparer required to sign the return or claim for refund pursuant to § 1.6695–1(b); and

(3) Make the copy or list and record available for inspection upon request by the district director.

The material described in this paragraph (b) shall be retained and kept available for inspection for the 3-year period following the close of the return period during which the return or claim for refund was presented to the taxpayer. However, in the case of a return which becomes due (with extensions, if any) during a return period following the return period during which the return was presented to the taxpayer, the material shall be retained and kept available for inspection for the 3-year period following the close of the later return period in which the return became due. For the definition of "return period" see section 6060(c) and § 1.6060–1(c).

(c) *Preparer.*—For the definition of "income tax return preparer", see section 7701(a)(36) and § 301.7701–15. For purposes of applying this section, in the case of—

(1) An employment arrangement between two or more income tax return preparers, the person who employs one or more other preparers to prepare for compensation any return or claim for refund other than for the person shall be considered to be the sole income tax return preparer; and

(2) A partnership arrangement for the preparation of returns and claims for refund, the partnership shall be considered to be the sole income tax return preparer.

(d) *Penalties.*—(1) For the civil penalty for failure to furnish a copy of the return or claim for refund to the taxpayer as required under paragraphs (a) and (c) of this section, see section 6695(a) and § 1.6695–1(a).

(2) For the civil penalty for failure to retain a copy of the return or claim for refund, or to retain a list, as required under paragraphs (b) and (c) of this section, see section 6695(d) and § 1.6695–1(d).

§ 1.6109 [Deleted]

Par. 3. Section 1.6109 is deleted.

Par. 4. The following new section is added immediately after § 1.6109–1:

§ 1.6109–2 Furnishing identifying number of income tax return preparer.

(a) *Furnishing identifying number.*—Each return of tax under subtitle A of the Internal Revenue Code of 1954 or claim for refund of tax under subtitle A of the Internal Revenue Code of 1954 prepared by one or more income tax return preparers shall bear the identifying number of the preparer required by § 1.6695–1(b) to sign the return or claim for refund. In addition, if there is a partnership or employment arrangement between two or more preparers, the identifying number of the partnership or the person who employs (or engages) one or more other persons to prepare for compensation the return or claim for refund shall also appear on the return or claim for refund. If the preparer is—

(1) An individual (not described in subparagraph (2) of this paragraph (a)) who is a citizen or resident of the United States, such preparer's social security account number shall be affixed; and

(2) A person (whether an individual, corporation, or partnership) who employs one or more persons to prepare the return or claim for refund, such preparer's employer identification number shall be affixed.

For the definition of the term "income tax return preparer" (or "preparer") see section 7701(a)(36) and § 301.7701–15.

(b) *Furnishing address.*—(1) Each return or claim for refund which is prepared by an income tax return preparer shall bear the street address, city, State, and postal ZIP code of the preparer's place of business where the return or claim for refund was prepared. However, if the place of business where the return or claim for refund was prepared is not maintained by the preparer as a place of business on a year-round basis, the return or claim for refund shall bear the street address, city, State, and postal ZIP code of the preparer's principal office or business location which is maintained on a year-round basis, or if none, the preparer's residence.

(2) For purposes of satisfying the requirement of the first sentence of paragraph (b)(1) of this section, an income tax return preparer may, on returns and claims for refund, disclose only the postal ZIP code of the described place of business as a satisfactory address, but only if the preparer first by written notice advises the Internal Revenue Service Center that he intends to follow this practice.

(c) *Penalty.*—For the civil penalty for failure to furnish an identifying number as required under paragraph (a) of this section, see section 6695(c) and § 1.6695–1(c).

Par. 5. The following new sections are added immediately after § 1.6655–5:

§ 1.6694–1 Understatement of taxpayer's liability by income tax return preparer.

(a) *Negligent or intentional disregard of rules and regulations.*—(1) If any part of an understatement of liability relating to a return of tax under subtitle A of the Internal Revenue Code of 1954 or claim for refund of tax under subtitle A of the Internal Revenue Code of 1954 is due to negligent or intentional disregard of one or more rules or regulations by one or more income tax return preparers of the return or claim for refund, each such preparer shall be subject to a separate penalty of $100. However, an employer of a preparer subject to this penalty is not also subject to the penalty, unless the employer (or one or more of its chief officers) also participated in the negligent or intentional disregard of one or more rules or regulations. A preparer is not considered to have negligently or intentionally disregarded a rule or regulation if the preparer exercises due diligence in an effort to apply the rules and regulations to the information given to the preparer to determine the taxpayer's correct liability for tax.

(2) For the definition of the term "understatement of liability", see section 6694(e) and paragraph (d) of this section.

(3) The term "rules or regulations" includes the provisions of the Internal Revenue Code of 1954, the Treasury regulations issued under the Code, and Internal Revenue Service revenue rulings published in the Cumulative Bulletin.

(4) If a preparer in good faith and with reasonable basis believes that a rule or regulation does not accurately reflect the Code and does not follow it, the preparer has not negligently or intentionally disregarded the rule or regulation. This test shall be applied in the same manner as it is applied under section 6653(a) and the regulations thereunder (relating to disregard of rules and regulations by taxpayers). For example, if a preparer reasonably believes in good faith that a judicial decision conflicts with a rule or regulation and that the decision reflects the Code more accurately, the preparation of a return or claim for refund by the preparer on the basis of the decision is not a negligent or intentional disregard of the rule or regulation. For purposes of this paragraph (a), the view of the taxpayer concerning a rule or regulation is not material.

(5) In any proceeding with respect to the penalty imposed by this paragraph (a), the preparer shall bear the burden of proof on the issue whether the preparer has negligently or intentionally disregarded a rule or regulation. If the preparer presents evidence that the normal practice of the preparer concerning the treatment of a particular credit, allowance, deduction, or item of income was not negligent and that this normal practice was followed, the preparer has satisfied the burden of proof that he did not negligently disregard a rule or regulation, unless the Internal Revenue Service presents contrary evidence.

(b) *Willful understatement of liability.*—(1) If any part of an understatement of liability relating to a return of tax under subtitle A of the Internal Revenue Code of 1954 or claim for refund of tax under subtitle A of the Internal Revenue Code of 1954 is due to a willful attempt in any manner to understate liability for tax by one or more income tax return preparers of the return or claim for refund, each such preparer shall be subject to a separate penalty of $500. However, an employer of a preparer subject to this penalty is not also subject to the penalty, unless the employer (or one or more of its chief officers) also participated in the willful attempt to understate liability.

(2) (i) A preparer is considered to have willfully attempted to understate liability if the preparer disregards information furnished by the taxpayer or other persons in an attempt wrongfully to reduce the tax liability of the taxpayer. For example, if a preparer disregards information concerning certain items of taxable income furnished by the taxpayer or other persons, the preparer would be subject to the penalty. Simi-

larly, if a taxpayer states to a preparer that the taxpayer has only two dependents, and the preparer reports six dependents on the return, the preparer would be subject to the penalty.

(ii) Generally, in preparing a return, the preparer may in good faith rely without verification upon information furnished by the taxpayer. To avoid the penalty, the preparer is not required to examine or review documents or other evidence in order to verify independently the taxpayer's information. However, the preparer may not ignore the implications of information furnished. The preparer shall make reasonable inquiries if the information as furnished appears to be incorrect or incomplete. Additionally, many sections of the Code require the existence of specific facts and circumstances, such as maintenance of specific documentation, before a deduction may properly be claimed. The preparer shall make appropriate inquiries of the taxpayer to determine the existence of facts and circumstances required by a Code section or regulations incident to claiming a deduction.

(iii) For example, assume that a taxpayer, during the tax interview conducted by a preparer, stated that he had paid $2,500 in doctor bills and $4,000 in deductible travel and entertainment expenses during the tax year when in fact he had paid smaller amounts. On the basis of the information, the preparer properly calculated deductions for medical expenses and for travel and entertainment expenses which resulted in an understatement of liability for tax. The preparer had no reason to believe that the medical expense and travel and entertainment expense information presented was incorrect or incomplete. The preparer did not ask for underlying documentation of the medical expenses and, upon inquiry, was satisfied by the taxpayer's representations that the taxpayer had adequate records (or other sufficient corroborative evidence) for the deduction of $4,000 for travel and entertainment expenses. The preparer is not subject to the penalty.

(iv) In certain situations, a preparer shall be subject both to a penalty under paragraph (a) of this section for intentional disregard of rules and regulations and to a penalty under this paragraph (b) for willful understatement of liability. A penalty for willful understatement of liability may be based on an intentional disregard of rules and regulations. For example, a preparer who claims a personal exemption deduction for the taxpayer's mother with knowledge that the taxpayer is not entitled to the deduction will have both intentionally disregarded rules and regulations within the meaning of paragraph (a) of this section and willfully understated liability for tax within the meaning of this paragraph (b).

(3) For the definition of the term "understatement of liability", see section 6694(e) and paragraph (d) of this section.

(4) If a penalty is assessed against a preparer, and collected at least in part, under paragraph (a) of this section for a return or claim for refund, then the amount of a penalty for which the preparer may be subject under this paragraph (b) for the same return or claim for refund is $500, reduced by the amount collceted under paragraph (a) of this section for the return or claim for refund.

(5) In any proceeding with respect to the penalty imposed by this paragraph (b), the Internal Revenue Service shall bear the burden of proof on the issue whether the preparer has willfully attempted to understate the liability for tax. See section 7427.

(c) *Abatement of penalty where taxpayer's liability not understated.*—If a penalty or penalties under section 6694(a) and paragraph (a) of this section or under section 6694(b) and paragraph (b) of this section concerning a return or claim for refund have been assessed against one or more income tax return preparers, and if at any time in a final administrative determination or a final judicial decision it is established that there was no understatement of liability relating to the return or claim for refund, then—

(1) The assessment shall be abated; and

(2) If any amount of the penalty or penalties was paid, that amount shall be refunded to the person or persons who so paid, as if the payment were an overpayment of taxes, without consideration of any period of limitations.

(d) *Understatement of liability defined.*—For purposes of this section, the term "understatement of liability" means any understatement of the net amount payable of any tax under subtitle A of the Internal Revenue Code of 1954, or any overstatement of the net amount creditable or refundable of any tax under subtitle A of the Internal Revenue Code of 1954. Except as provided in paragraph (c) of this section, the determination of whether an understatement of liability exists may be made in a proceeding involving the preparer apart from any proceeding involving the taxpayer.

§ 1.6694–2 Extension of period of collection where preparer pays 15 percent of a penalty for understatement of taxpayer's liability and certain other procedural matters.

(a) *In general.*—(1) The Internal Revenue Service shall investigate the preparation by the income tax return preparer of the return of tax under subtitle A of the Internal Revenue Code of 1954 or claim for refund of tax under subtitle A of the Internal Revenue Code of 1954 and shall send a report of examination to the preparer before the assessment of either—

(i) The penalty for negligent or intentional disregard of rules and regulations under § 1.6694–1(a); or

(ii) The penalty for willful understatement of liability under § 1.6694–1(b).

Unless the period of limitation (if any) under section 6696(d) may expire without adequate opportunity for assessment, the Internal Revenue Service shall also, before the assessment of either penalty, send a 30-day letter to the preparer notifying him of the proposed penalty or penalties and offering an opportunity to the preparer to request further administrative consideration and a final administrative determination by the Internal Revenue Service concerning the assessment. If the preparer then makes a timely request, assessment may not be made until the Internal Revenue Service makes a final administrative determination adverse to the preparer.

(2) If the Internal Revenue Service assesses either of the two penalties described in paragraph (a)(1)(i) and (ii) of this section, it shall send to the preparer a statement of notice and demand, separate from any notice of a tax deficiency, for payment of the amount assessed.

(3) Within 30 days after the day on which notice and demand of either of the two penalties described in paragraph (a)(1)(i) and (ii) of this section is made against the preparer, that preparer shall either—

(i) Pay the entire amount assessed (and may file a claim for refund of the amount paid at any time not later than 3 years after the date of payment); or

(ii) Pay an amount which is not less than 15 percent of the entire amount assessed and shall file a claim for refund of the entire amount paid.

(4) If the preparer pays an amount and files a claim for refund under paragraph (a)(3)(ii) of this section, the Internal Revenue Service may not make, begin, or prosecute a levy or proceeding in court for collection of the unpaid remainder of the amount assessed until—

(i) A date which is more than 30 days after—

(A) The day on which the preparer's claim for refund is denied; or

(B) The expiration of 6 months after the day on which the preparer filed the claim for refund; and

(ii) Final resolution of any proceeding begun as provided in paragraph (b) of this section.

Final resolution of a proceeding includes any settlement between the Internal Revenue Service and the preparer, any final determination by the court (for which the period for appeal, if any, has expired), and, generally, the types of determinations provided under section 1313(a) (relating to taxpayer deficiencies). Notwithstanding section 7421(a) (relating to suits to restrain assessment or collection), the beginning of a levy or proceeding in court by the Internal Revenue Service in contravention of this subparagraph (4) may be enjoined by a proceeding in the proper court.

(b) *Preparer must bring suit in district court to determine liability for penalty.*—(1) If, within 30 days after the earlier of—

(i) The day on which the preparer's claim for refund filed under paragraph (a)(3)(ii) of this section is denied; or

(ii) The expiration of 6 months after the day on which the preparer filed the claim for refund.

the preparer fails to begin a proceeding for refund in the appropriate United States district court, then the Internal Revenue Service may proceed with collection of the amount of the penalty not paid under paragraph (a)(3)(ii) of this section.

(2) (i) If the preparer begins a proceeding for refund within the applicable 30-day period of paragraph (b)(1) of this section, then the Internal Revenue Service may not make, begin, or prosecute a levy or proceeding in court for collection of the unpaid remainder of the penalty until final resolution of the proceeding.

(ii) If the preparer begins a proceeding for refund under this paragraph (b), then the Internal Revenue Service need not bring a counterclaim in the proceeding for the unpaid remainder of the penalty, because any judicial decision on the refund will apply as well to the unpaid remainder of the penalty.

(c) *Suspension of running of period of limitations on collection.*—The running of the period of limitations provided in section 6502 on the collection by levy or by a proceeding in court of the unpaid amount of a penalty or penalties described in § 1.6694–1(a) or (b) shall be suspended for the period during which the Internal Revenue Service, under paragraphs (a)(4) and (b)(2)(i) of this section, may not collect the unpaid amount of the penalty or penalties by levy or a proceeding in court.

§ 1.6695–1 Other assessable penalties with respect to the preparation of income tax returns for other persons.

(a) *Failure to furnish copy to taxpayer.*—(1) A person who is an income tax return preparer of any return of tax under subtitle A of the Internal Revenue Code of 1954 or claim for refund of tax under subtitle A of the Internal Revenue Code of 1954 and who fails to satisfy the requirement imposed upon him by section 6107(a) and § 1.6107–1(a) and (c) to furnish a copy of the return or claim for refund to the taxpayer shall be subject to a penalty of $25 for the failure, unless it is shown that the failure is due to reasonable cause and not due to willful neglect. Thus, no penalty may be imposed under section 6695(a) and this paragraph (a)(1) upon a person who is an income tax return preparer solely by reason of—

(i) Section 301.7701–15(a)(2) and (b) on account of having given advice on specific issues of law; or

(ii) Section 301.7701–15(b)(3) on account of having prepared the return solely because of having prepared another return which affects amounts reported on the return.

(2) No penalty may be imposed under section 6695(a) and paragraph (a)(1) of this section upon an income tax return preparer who furnishes a copy of the return or claim for refund to a taxpayer—

(i) Who holds an elected or politically appointed position with the government of the United States or a State or political subdivision thereof; and

(ii) Who, in order faithfully to carry out his official duties, has so arranged his affairs that the has less than full knowledge of the property which he holds or of the debts for which he is responsible, if information is deleted from the copy in order to preserve or maintain this arrangement.

(b) *Failure to sign return.*—(1) An individual who is an income tax return preparer with respect to a return of tax under subtitle A of the Internal Revenue Code of 1954 or claim for refund of tax under subtitle A of the Internal Revenue Code of 1954 shall manually sign the return or claim for refund (which may be a photocopy) in the appropriate space provided on the return or claim for refund after it is completed and before it is presented to the taxpayer for signature. An individual preparer may not satisfy this requirement by use of a facsimile signature stamp or signed gummed label. If the preparer is unavailable for signature, another preparer shall so advise the taxpayer, shall review the entire prepared of the return or claim for refund, and then shall manually sign the return or claim for refund.

(2) If more than one income tax return preparer is involved in the preparation of the return or claim for refund, the individual prepared who has the primary responsibility as between or among the preparers for the overall accuracy of the preparation of such return or claim for refund shall be considered to be the income tax return preparer for purposes of this paragraph.

(3) The application of paragraph (b)(1) and (2) of this section is illustrated by the following examples:

Example (1).—X law firm employs Y, a lawyer, to prepare for compensation returns and claims for refund of taxes. X is employed by T, a taxpayer, to prepare his 1977 Federal tax return. X assigns Y to prepare T's return. Y obtains the information necessary for completing the return from T and makes determinations with respect to the proper application of the tax laws to such information in order to determine T's tax liability. Y then forwards such information to C, a computer tax service which perfroms the mathematical computations and prints the return form by means of computers. C then sends the completed return to Y who reviews the accuracy of the return. Y is the individual preparer who is primarily responsible for the overall accuracy of T's return. Y must sign the return as preparer.

Example (2).—X partnership is a national accounting firm which prepares for compensation returns and claims for refund of taxes. A and B, employees of X, are involved in preparing the 1977 tax return of T Corporation. After they complete the return, including the gathering of the necessary information, the proper application of the tax laws to such information, and the performance of the necessary mathematical computations, P, a partner in X, reviews the return. As part of this review, P checks for mathematical mistakes, reviews the information provided, and makes the final determination with respect to the proper application of the tax laws to the information in order to determine T's tax liability. P is in the individual preparer who is primarily responsible for the overall accuracy of T's return. P must sign the return as preparer.

Example (3).—C corporation maintains an office in Seattle, Washington, for the purpose of preparing for compensation returns and claims for refund of taxes. C makes compensatory arrangements with individuals (but provides no working facilities) in several States to collect information from taxpayers and to make determinations with respect to the proper application of the tax laws to the information in order to determine the tax liabilities of such taxpayers. E, an individual, who has such an arrangement in Los Angeles with C, collects information from T, a taxpayer, and completes a worksheet kit supplied by C which is stamped with E's name and an identification number assigned to E by C. In this process, E classifies this information in appropriate income and deduction categories for the tax determination. The completed worksheet kit signed by E, is then mailed to C. D, an employee in C's office, reviews the worksheet kit to make sure it was properly completed. D does not review the information obtained from T for its validity or accuracy. Neither does he make the final determination with respect to the proper application of tax laws to the information. The data from the worksheet is entered into a computer and the return form is completed. The return is prepared for submission to T with filing instructions. E is the individual preparer primarily responsible for the overall accuracy of T's return. E must sign the return as preparer.

Example (4).—X employs A, B, and C to prepare income tax returns for taxpayers. After A and B have collected the information from the taxpayer and applied the tax laws to the information, the return form is completed by computer service. On the day the returns prepared by A and B are ready for their signatures, A is away from the city for 1 week on another assignment and B is on detail to another office for the day. C may sign the returns prepared by A, provided that (i) C notifies each taxpayer that he as preparer (and not A) is primarily responsible for the preparation of the return, (ii) C reviews with each taxpayer the information obtained by A relative to the taxpayer, and (iii) C reviews the preparation of each return prepared by A. C may not sign the returns prepared by B because B is available.

(4) (i) The manual signature requirement of paragraph (b)(1) and (2) of this section may be satisfied by a photocopy of a copy of the return or claim for refund which copy is manually signed by the preparer after completion of its preparation. After a copy of the return or claim for refund is signed by the preparer and before it is photocopied, no person other than the preparer may alter any entries on the copy other than to correct arithmetical errors discernable on the return or claim for refund. The employer of the preparer or the partnership in which the preparer is a partner, or the preparer (if not employed by a preparer and not a partner of a partnership which is a preparer), shall retain the manually signed copy of the return or claim for refund. A record of any arithmetical errors corrected shall be retained by the person required to retain the manually signed copy of the return or claim for refund and made available upon request.

(ii) If mechanical preparation of the return or claim for refund is accomplished by computer not under the control of the individual preparer, then the manual signature requirement of paragraph (b)(1) and (2) of this section may be satisfied by a manually signed

attestation by the individual preparer attached to the return or claim for refund that all the information contained in the return or claim for refund was obtained from the taxpayer and is true and correct to the best of his knowledge, but only if that information (including any supplemental written information provided and signed by the preparer) is not altered on the return or claim for refund by another person. For purposes of the preceding sentence, the correction of arithmetical errors discernable from the information submitted by the preparer does not constitute an alteration. The information submitted by the preparer shall be retained by the employer of the preparer or by the partnership in which the preparer is a partner, or by the preparer (if not employed by a preparer and not a partner of a partnership which is a preparer). A record of any arithmetical errors corrected shall be retained by the person required to retain the information submitted by the preparer and made available upon request.

(iii) If the district director determines that a preparer or preparers have abused the permissive signature rules of this subparagraph (4) by altering the return or claim for refund after signature (in contravention of subdivision (i) of this subparagraph), or by altering information on the return or claim for refund after attestation (in contravention of subdivision (ii) of this subparagraph), then the district director may, by written notice, prospectively deny to the preparer or preparers the right to use these permissive signature rules.

(5) An individual required by this paragraph (b) to sign a return or claim for refund shall be subject to a penalty of $25 for each failure to sign, unless it is shown that the failure is due to reasonable cause and not due to willful neglect. For purposes of this paragraph, "reasonable cause" is a cause which arises despite ordinary care and prudence exercised by the individual preparer. Thus, no penalty may be imposed under section 6695(b) and this paragraph (b) upon a person who is an income tax return preparer solely by reason of—

(i) Section 301.7701–15 (a) (2) and (b) on account of having given advice on specific issues of law; or

(ii) Section 301.7701–15(b) (3) on account of having prepared the return solely because of having prepared another return which affects amounts reported on the return.

If the preparer asserts reasonable cause for failure to sign, the Service shall require a written statement in substantiation of the preparer's claim of reasonable cause.

(c) *Failure to furnish identifying number.*—(1) A person who is an income tax return preparer of any return of tax under subtitle A of the Internal Revenue Code of 1954 or claim for refund of tax under subtitle A of the Internal Revenue Code of 1954 and who fails to satisfy the requirement of section 6109(a)(4) and § 1.6109–2(a) to furnish one or more identifying numbers of preparers on a return or claim for refund shall be subject to a penalty of $25 for the failure, unless it is shown that the failure is due to reasonable cause and not due to willful neglect. Thus, no penalty may be imposed under section 6695(c) and this paragraph (c) (1) upon a person who is an income tax return preparer solely by reason of—

(i) Section 301.7701–15 (a) (2) and (b) on account of having given advice on specific issues of law; or

(ii) Section 301.7701–15(b) (3) on account of having prepared the return solely because of having prepared another return which affects amounts reported on the return.

(2) No penalty may be imposed under section 6695(c) and paragraph (c) (1) of this section upon—

(i) A preparer who is the employee of a person who is also a preparer of the return or claim for refund, or

(ii) A preparer who is a partner in a partnership which is also a preparer of the return or claim for refund.

(3) No more than one penalty of $25 may be imposed under section 6695(c) and paragraph (c) (1) of this section with respect to a single return or claim for refund.

(d) *Failure to retain copy or list.*—(1) A person who is an income tax return preparer of any return of tax under subtitle A of the Internal Revenue Code of 1954 or claim for refund of tax under subtitle A of the Internal Revenue Code of 1954 and who fails to satisfy the requirements imposed upon him by section 6107(b) and § 1.6107–1 (b) and (c) (other than the record requirement described in § 1.6107–1(b) (2) and (3)) to retain and make available a copy of the return or claim for refund, or to include the return or claim for refund on a list and make the list available for inspection, shall be subject to a penalty of $50 for the failure, unless it is shown that the failure is due to reasonable cause and not due to willful neglect. Thus, no penalty may be imposed under section 6695(d) and this paragraph (d) (1) upon a person who is an income tax return preparer solely by reason of—

(i) Section 301.7701–15 (a) (2) and (b) on account of having given advice on specific issues of law; or

(ii) Section 301.7701–15(b) (3) on account of having prepared the return solely because of having prepared another return which affects amounts reported on the return.

(2) A person may not, for returns or claims for refund presented to the taxpayers during any single return period, be subject to more than $25,000 in penalties under section 6695(d) and paragraph (d) (1) of this section.

(e) *Failure to file correct information return.*—A person who is subject to the reporting requirements of section 6060 an § 1.6060–1 and who fails to satisfy these requirements shall be subject to penalties as set forth in this paragraph, unless it is shown that the failure is due to reasonable cause and not due to willful neglect.

(1) $100, for failure to file an information return as required (or to comply with an approved alternative reporting method), plus

(2) $5, for each failure to report as required an item on the information return (or under the approved alternative reporting method).

A person may not, for failure to satisfy the reporting requirements for any single return period, be subject to more than $20,000 in penalties under section 6695 (e) and this section.

(f) *Negotiation of check.*—(1) No person who is an income tax return preparer may endorse or otherwise negotiate, directly or through an agent, a check for the refund of tax under subtitle A of the Internal Revenue Code of 1954 which is issued to a taxpayer other than the preparer if the person was a preparer of the return or claim for refund which gave rise to the refund check.

(2) Section 6695(f) and paragraph (f) (1) and (3) of this section do not apply to a preparer-bank which cashes a refund check and remits all of the cash to the taxpayer or accepts a refund check for deposit to a taxpayer's account, so long as the bank does not initially endorse or negotiate the check. A preparer-bank may also subsequently endorse or negotiate a refund check as a part of the check-clearing process through the financial system after initial endorsement or negotiation.

(3) The preparer shall be subject to a penalty of $500 for each endorsement or negotiation of a check prohibited under section 6695(f) and paragraph (f) (1) of this section.

PART 301—PROCEDURE AND ADMINISTRATION

Par. 6. Section 301.7701–15 is changed to § 301.7701–16 and is amended to read as follows:

§ 301.7701–16 Other terms.

Any terms which are defined in section 7701 and which are not defined in §§ 301.7701–1 to 301.7701–15, inclusive, shall, when used in this chapter, have the meanings assigned to them in section 7701.

Par. 7. The following new section is added immediately after § 301.7701–14:

§ 301.7701–15 Income tax return preparer.

(a) *In general.*—An income tax return preparer is any person who prepares for compensation, or who employs one or more persons to prepare for compensation, any return of tax under subtitle A of the Internal Revenue Code of 1954 or any claim for refund of tax under subtitle A of the Internal Revenue Code of 1954.

(1) A person who furnishes to a taxpayer or other preparer sufficient information and advice so that completion of the return or claim for refund is largely a mechanical or clerical matter is considered an income tax return preparer, even though that person does not actually place or review placement of information on the return or claim for refund. See also paragraph (b) of this section.

(2) A person who only gives advice on specific issues of law shall not be considered an income tax return preparer, unless—

(i) The advice is given with respect to events which have occurred at the time the advice is rendered and is not given with respect to the consequences of contemplated actions; and

(ii) The advice is directly relevant to the determination of the existence, characterization, or amount of an entry on a return or claim for refund. For example, if a lawyer gives an opinion on a transaction which a corporation has consummated, solely to satisfy an accountant (not a preparer of the corporation's return) who is attempting to determine whether the reserve for taxes set forth in the corporation's financial statement is reasonable, the lawyer shall not be considered a tax return preparer solely by reason of rendering such opinion.

(3) A person may be an income tax return preparer without regard to educational qualifications and professional status requirements.

(4) A person must prepare a return or claim for refund for compensation to be an income tax return preparer. A person who prepares a return or claim for refund for a taxpayer with no explicit or implicit agreement for compensation is not a preparer, even though the person receives a gift or return service or favor.

(5) A person who prepared a return or claim for refund outside the United States is an income tax return preparer, regardless of his nationality, residence, or the locations of his places of business, if the person otherwise satisfied the definition of income tax return preparer. Notwithstanding the provisions of § 301.6109–1(g), the person shall secure an employer identifying number if he is an employer of another preparer or is not employed by another preparer. The person shall comply with the provisions of section 1203 of the Tax Reform Act of 1976 and the regulations thereunder.

(6) An official or employee of the Internal Revenue Service performing his official duties is not an income tax return preparer.

(b) *Substantial preparation.*—(1) Only a person (or persons acting in concert) who prepares all or a substantial portion of a return or claim for refund shall be considered to be a preparer (or preparers) of the return or claim for refund. A person who renders advice which is directly relevant to the determination of the existence, characterization, or amount of an entry on a return or claim for refund, will be regarded as having prepared that entry. Whether a schedule, entry, or other portion of a return or claim for refund is a substantial portion is determined by comparing the length and complexity of, and the tax liability or refund involved in, that portion to the length and complexity of, and tax liability or refund involved in, the return or claim for refund as a whole.

(2) For purposes of applying the rule of paragraph (b) (1) of this section, if the schedule, entry, or other portion of the return or claim for refund involves amounts of gross income, amounts of deductions, or amounts on the basis of which credits are determined which are—

(i) Less than $2,000; or

(ii) Less than $100,000, and also less than 20 percent of the gross income (or adjusted gross income if the taxpayer is an individual) as shown on the return or claim for refund,

then the schedule or other portion is not considered to be a substantial portion. If more than one schedule, entry or other portion is involved, they shall be aggregated in applying the rule of this subparagraph (2). Thus, if a person, for an individual taxpayer's return, prepares a schedule for dividend income which totals $1,500 and gives advice making him a preparer of a schedule of medical expenses which results in a deduction for medical expenses of $1,500, the person is not a preparer if the taxpayer's adjusted gross income shown on the return is more than $15,000. This subparagraph shall not apply to a person who prepares all of a return or claim for refund.

(3) A preparer of a return is not considered to be a preparer of another return merely because an entry or entries reported on the return may affect an entry reported on the other return, unless the entry or entries reported on the prepared return are directly reflected on the other return and constitute a substantial portion of the other return. For example, the sole preparer of a partnership return of income or a small business corporation income tax return is considered a preparer of a partner's or a shareholder's return if the entry or entries on the partnership or small business corporation return reportable on the partner's or shareholder's return constitute a substantial portion of the partner's or shareholder's return.

(c) *Return and claim for refund.*—(1) *Return.*—A return of tax under subtitle A is a return filed by or on behalf of a taxpayer reporting the liability of the taxpayer for tax under subtitle A. A return of tax under subtitle A also includes an information return filed by or on behalf of a person or entity that is not a taxable entity and which reports information which is or may be reported on the return of a taxpayer of tax under subtitle A.

(i) A return of tax under subtitle A includes an individual or corporation income tax return, a fiduciary income tax return (for a trust or estate), a regulated investment company undistributed capital gains tax return, a return of a charitable remainder trust, a return by a transferor of stock or securities to a foreign corporation, foreign trust, or foreign partnership, a partnership return of income, a small business corporation income tax return, and a DISC return.

(ii) A return of tax under subtitle A does not include an estate tax return, a gift tax return, any other return of excise taxes or income taxes collected at source on wages, an individual or corporation declaration of estimated tax, or an informational statement on any Form 1099 or similar form.

(2) *Claim for refund.*—A claim for refund of tax under subtitle A includes a claim for credit against any tax under subtitle A.

(d) *Persons who are not preparers.*—A person shall not be considered to be a preparer of a return or claim for refund if the person performs only one or more of the following services:

(1) Typing, reproduction, or other mechanical assistance in the preparation of a return or claim for refund.

(2) Preparation of a return or claim for refund of the employer, or an officer or employee of the employer, by whom the person is regularly and continuously employed.

(3) Preparation of a return or claim for refund for a trust or estate of which the person either is a fiduciary or is an officer or employee of the fiduciary.

(4) Preparation of a claim for refund for a taxpayer in response to—

(i) A notice of deficiency issued to the taxpayer; or

(ii) A waiver of restriction after initiation of an audit of the taxpayer or another taxpayer if a determination in the audit of the other taxpayer affects, directly or indirectly, the liability of the taxpayer for tax under subtitle A.

For purposes of paragraph (d)(2) of this section, the employee of a corporation more than 50 percent of the voting power of which is owned by another corporation is considered the employee of such other corporation as well. For purposes of paragraph (d)(3) of this section, an estate, guardianship, conservatorship, committee, and any similar arrangement for a taxpayer under a legal disability (such as a minor, an incompetent, or an infirm individual) is considered a trust or estate.

PART 404—TEMPORARY REGULATIONS ON PROCEDURE AND ADMINISTRATION UNDER THE TAX REFORM ACT OF 1976

§§ 404.6060–1; 404.6107–1; 404.6109–1; 404.6694–1; 404.6695–1; 404.6695–2; 404.7701–10 [Deleted]

Par. 8. The following sections are deleted: Sections 404.6060–1; 404.6107–1; 404.6109–1; 404.6694–1; 404.6695–1, 404.6695–2; 404.7701–1.

JEROME KURTZ,
Commissioner of Internal Revenue.

INCOME TAX RETURN PREPARERS

Public Hearing on Proposed Regulations

AGENCY: Internal Revenue Service, Treasury.

ACTION: Public hearing on proposed regulations.

SUMMARY: This document provides notice o fa public hearing on proposed regulations relating to persons who prepare for compensation income tax returns and claims for refund.

DATES: The public hearing will be held on September 19, 1977, beginning at 10 a.m. Outlines of oral comments must be delivered or mailed by September 2, 1977.

ADDRESS: The public hearing will be hel din the IRS Auditorium, Seventh Floor, 7400 Corridor, Internal Revenue Bnuilding, 1111 Constitution Avenue NW., Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

George Bradley, Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224, 202-566-3935 (not a toll-free call).

SUPPLEMENTARY INFORMATION: The subject of the public hearing is proposed regulations under sections 6060, 6107, 6109(a)(4), 6694, 6695, and 7701(a)(36) of the Internal Revenue Code of 1954. These proposed regulations appear in this issue of the FEDERAL REGISTER. The statutory provisions relate to persons who prepare for compensation income tax returns and claims for refund.

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR Part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who desire to present oral comments at the hearing on the proposed regulations should submit an outline of the comments to be presented at the hearing and the time they wish to devote to each subject by September 2, 1977. The outlines should be submitted to the Commissioner of Internal Revenue, attention: CC:LR:T (LR-295-76), Washington, D.C. 20224. Each speaker will be limited to 10 minutes for an oral presentation exclusive of time consumed by questions from the panel for the Government and answers to these questions.

An agenda showing the scheduling of the speakers will be made after outlines are received from the speakers. Copies of the agenda will be available free of charge at the hearing.

ROBERT A. BLEY,
Director, Legislation and Regulations Division.

DEPARTMENT OF DEFENSE

Office of the Secretary

[32 CFR Part 114]

DEPARTMENT OF DEFENSE RESERVE COMPONENTS

Common Personnel Data System

AGENCY: Office of the Secretary of Defense.

ACTION: Proposed rule.

SUMMARY: This proposed rule establishes Department of Defense (DoD) policies and procedures for the Reserve Components Common Personnel Data System (RCCPDS) to meet statutory requirements. The requirements provide that adequate and current personnel records be maintained to ensure proper management and mobilization readiness of Reserve Components. This proposed rule outlines the processes and assigns responsibilities to comply with those requirements.

DATES: Comments must be received on or before September 2, 1977.

ADDRESSES: Office of the Deputy Assistant Secretary of Defense (Reserve Affairs), The Pentagon, Room 3C980, Washington, D.C. 20301.

FOR FURTHER INFORMATION CONTACT:

Major Donald M. McCabe, USAF, Telephone: 697-4334 or 697-0624

Accordingly, it is proposed to publish 32 CFR Part 114 as follows:

PART 114—DEPARTMENT OF DEFENSE RESERVE COMPONENTS

Sec.
114.1 Applicability and scope.
114.2 Statutory requirement.
114.3 Preservation of privacy.
114.4 Responsibilities.
114.5 Furnishing Selective Service with information.
114.6 Effective date and implementation.

AUTHORITY: Title 10, U.S.C. section 275.

§ 114.1 Applicability and scope.

(a) The provisions of this part apply to the Office of the Secretary of Defense, the Military Departments, the Organization of the Joint Chiefs of Staff and the Defense Agencies. Additionally, the Coast Guard of the Department of Transportation has agreed to provide information in conformance with this Part.

(b) Its provisions govern all male and female officers, warrant officers, and enlisted personnel assigned to the Ready Reserve, the Standby Reserve, and the Retired Reserve. Included are reservists on active duty for training who continue their assignment with a Reserve Component.

(c) Individuals who are enlisted members of a Regular component and also have a Reserve commission should not be reported in the Reserve Components Common Personnel Data System (RCCPDS).

(d) Individuals on extended active duty who are part of the active force should not be reported.

§ 114.2 Statutory requirement.

(a) Title 10, United States Code, section 275 requires the Armed Force to maintain adequate and current personnel records of Reserve Components, which shall include each member's:

(1) Physical condition.

(2) Dependence status.

(3) Military qualifications.

(4) Civilian occupation skills.

(5) Availability for service, and such other information as the Secretary of the Military Department concerned may prescribe.

(b) *Common DoD Data Base.* A computerized common data base has been established to meet the above statutory requirement and to provide statistical tabulations of Reserve Components strengths and related data for use throughout the Department of Defense, by other Government Agencies and by the Congress, and for appropriate public release by the Assistant Secretary of Defense (Public Affairs).

(c) *Minimum data requirements.* The items of personnel data included in this reporting system partially satisfy the minimum essential data items needed to meet the statutory requirements of 10 U.S.C. Additionally, data falling within the following categories will be maintained in individual records (either in a manual or automated mode) to satisfy fully statutory requirements:

(1) Retirement Points Earnings (all point earning reservists).

(2) Retirement Authority (all retired reservists).

(3) Professional Military Education for Enlisted Members (all point earning enlisted members).

(4) Servicemen's Group Life Insurance Option Selected (all point earning reservists).

(d) *Data Maintenance Policy.* The Military Departments shall maintain only such additional items of data on an individual as necessary to (1) manage adequately their Guard and Reserve Forces, and (2) ensure mobilization readiness.

§ 114.3 Preservation of Privacy.

The requirements and procedures prescribed by the Privacy Act, 5 U.S.C. 552a, and 32 CFR Part 286a must be followed in order to safeguard the personnel data maintained in this reporting system. Individuals having access to identifiable personnel information may be held personally responsible and punishable under the law for making unauthorized disclosures.

§ 114.4 Responsibilities.

(a) The Assistant Secretary of Defense (Manpower, Reserve Affairs, and Logistics) or his designee, the Deputy Assistant Secretary of Defense (Reserve Affairs), shall be responsible for:

(1) Collecting, summarizing and publishing, on a periodic basis, the "Official Manpower Strengths and Statistics" report for the Reserve Components of the Department of Defense and, through the Office of the Assistant Secretary of Defense (Public Affairs), for public release.

(2) Providing access to the DoD Data Base to each of the Military Departments through an on-line time sharing terminal system. The Guard and Reserve Components will have access only to their portion of the data base by means of assigned passwords controlled by the Deputy Assistant Secretary of Defense (Reserve Affairs).

(b) The Secretaries of the Military Departments shall be responsible for:

(1) Implementing Directives.

(2) Providing their respective Guard and Reserve Components the necessary support to establish personnel data systems that support readiness requirements in addition to this reporting requirement.

(3) Preparing, at the end of each month, a Master Officer and Master Enlisted File reflecting the status of each member of the Guard and Reserve as of the last day of each month.

(4) Preparing, at the end of each month, an Officer Transaction File and an Enlisted Transaction File reflecting the gains, losses, reenlishment or extensions of Selected Reserve personnel that occurred during the reporting month.

(5) Editing monthly submissions in support of the editing concept.

(6) Performing a quality control validation of the data prior to submission to the Office of the Secretary of Defense.

(7) Assuring accuracy of data considered "critical data items" since they are required by either statutes, directives, or regulations, and should be 100 percent accurate to insure acceptability in the system.

(8) It is our policy that the data reliability objectives apply equally to the Ready, Standby and Retired Reserve Categories, if the data item must be reported. Similarly, the data reliability rates are goals of data accuracy which should eventually be achieved by each Reserve Component.

§ 114.5 Furnishing selective service with information.

Any information available in RCCPDS which is required by the Director of Selective Service will be provided by magnetic tape extracts of data submitted in compliance with this part.

NOTE.—This paragraph is effective after the requirements of the Privacy Act are fulfilled.

§ 114.6 Effective data and implementation.

(a) This part is effective 1 year from the date of issuance. Each Reserve Component shall be formally advised of the specific implementation date by separate correspondence.

(b) When implementation occurs, each record in the initial submission will be expanded to provide fields for all new data items. All new data which is available either directly or through data extrapolation will be provided at that time.

(c) The Retired Reserve data was incorporated into this reporting system during January 1977. Retired Reserve records will expand with all other Reserve Categories for the initial submission. Records in this category shall be considered as part of the parallel validation which will be conducted during the first 2 months following implementation.

(d) Beginning with the initial submission under this part, a complete record containing all new data items will be provided on accessions. The collection of new data on existing records will be handled incrementally after that time. Our goal is to have all new data collected and in the system within a three-to-four year period.

(e) At the time of conversion to this part, unknown and unavailable data items will be left blank.

MAURICE W. ROCHE,
Director, Correspondence & Directives, Office of Assistant Secretary of Defense (Comptroller).

ENVIRONMENTAL PROTECTION AGENCY

[FRL 771-4]

[40 CFR Part 52]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS, DISTRICT OF COLUMBIA

Pilot Bikelane

AGENCY: Environmental Protection Agency.

ACTION: Approval and Promulgation of Implementation Plans.

SUMMARY: This notice announces that the District of Columbia has formally requested the Regional Administrator to take no further action on a proposed revision to its Implementation Plan. The proposed revision, if approved by the EPA, would have resulted in substitution of EPA's requirement for a pilot bikelane along Pennsylvania Avenue with another bikelane network consisting of 14.87 miles in the District of Columbia.

EFFECTIVE DATE: This Notice of Withdrawal is effective immediately on August 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Raymond Cyphers, State Implementation Planning Section, Air Programs Branch, Air and Hazardous Materials Division, U.S. Environmental Protection Agency, Curtis Building, Tenth Floor, 6th and Walnut Streets, Philadelphia, Pa. 19106.

SUPPLEMENTARY INFORMATION: On May 9, 1975, the District of Columbia submitted to the Regional Administrator an amendment to its Transportation Control Plan. The District requested that the amendments be reviewed and processed as a revision to its State Implementation Plan (SIP).

The amendment called for a network consisting of 14.87 lane-miles of bicycle lanes. The District requested that this program be considered as a substitute for EPA's requirement for the establishment of a pilot bicycle lane along Pennsylvania Avenue (40 CFR 52.491(g), 38 FR 33702).

The District provided adequate proof that a public hearing was held in the District on December 10, 1974, in accordance with the requirements set forth in 40 CFR Section 51.4.

On September 4, 1975 (40 CFR 40855), the Administrator acknowledged receipt of the District's bicycle lane program, proposed the submittal as a revision to the District SIP and provided for a 30-day public comment period, ending October 6, 1975. Upon request of interested citizens' groups, EPA extended the public comment period until November 7, 1975. During this time EPA received comments from the Washington Area Bicyclists Association (WABA) and a private citizen. The comments essentially contended that while certain links of the bicycle lane network were adequate for bicycle use, the overall network was disjointed rather than coordinated. Similarly, the lanes described in this pilot bicycle lane program were characterized as being too narrow and failed to provide adequate separation between bicycle traffic and vehicular traffic.

There followed a series of discussions between the District and EPA concerning the approvability of the bicycle network. The EPA was concerned that expected emission reductions would not be realized if network design inadequacies cited by critics resulted in lowered use of the network than originally intended.

In early January, 1977, the District advised EPA that in light of a new comprehensive bicycle plant, they no longer wanted EPA to take further action on this proposed State Implementation Plan revision. This was confirmed in a letter dated March 4, 1977, from the Mayor of the District of Columbia to the Regional Administrator.

In response to this request, the Regional Administrator hereby formally withdraws his proposal of this amendment from any further consideration as a revision to the District of Columbia Implementation Plan.

(42 U.S.C. 1857c-5.)

Dated: July 13, 1977.

A. R. MORRIS,
Acting Regional Administrator.

[FRL 771-3]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS, MASSACHUSETTS

Change in Sulfur Content of Fuel Burned in Berkshire Air Pollution Control District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The proposed revision to the State Implementation Plan (SIP) changes Regulation 5.1, "Sulfur Content of Fuels and Control Thereof," to allow fuel burning sources in the Berkshire Air Pollution Control District to burn 2.2 percent sulfur content residual fuel

oil, which is the sulfur content specified by Chapter 353 of the Acts of 1974 for fuel oil burned in this District. Regulation 5.1 of the present SIP allows the use of fuel oil having a sulfur content not greater than 1.0 percent.

DATE: Comments must be received on or before September 2, 1977.

ADDRESSES: Copies of the Massachusetts submittal and EPA's evaluation are available for public inspection during normal business hours at the Environmental Protection Agency, Region I, Room 2113, JFK Federal Building, Boston, Mass. 02203; Public Information Reference Unit, Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460; and the Massachusetts Department of Environmental Quality Engineering, Division of Air and Hazardous Materials, Room 320, 600 Washington Street, Boston, Mass. 02111.

Comments should be submitted to the Regional Administrator, Region I, Environmental Protection Agency, Room 2203, JFK Federal Building, Boston, Mass. 02203.

FOR FURTHER INFORMATION CONTACT:

Wallace Woo, Air Branch, EPA, Region I, Room 2113, JFK Federal Building, Boston, Mass. 02203, 617-223-5609.

SUPPLEMENTARY INFORMATION: On May 31, 1972 (37 FR 10872), pursuant to Section 110 of the Clean Air Act and 40 CFR Part 51, the Administrator approved, with exceptions, the Massachusetts Implementation Plan for the attainment of National Ambient Air Quality Standards (NAAQS).

On April 14, 1977, the Commissioner of the Massachusetts Department of Environmental Quality Engineering (the Massachusetts Department) submitted a revision to the State Implementation Plan (SIP) which would increase the allowable sulfur content of fossil fuel burned in the Berkshire Air Pollution Control District (BAPCD). The BAPCD is the same geographic area as the Berkshire Intrastate Air Quality Control Region (AQCR). Regulation 5.1 of the present SIP, "Sulfur Content of Fuels and Control Thereof," permits fossil fuel utilization facilities in the BAPCD to burn fossil fuel with a sulfur content not in excess of 0.55 pounds per million Btu heat release potential (approximately equivalent to 1.0 percent sulfur content residual fuel oil by weight). The proposed SIP revision would change Regulation 5.1 to allow burning of fossil fuel with a sulfur content not in excess of 1.21 pounds per million Btu heat release potential (approximately equivalent to 2.2 percent sulfur content residual fuel oil by weight). Approval of the revision to Regulation 5.1 would eliminate the conflict between the SIP and Chapter 353 of the Acts of 1974, "An Act Permitting the Burning of Fuel with Sulfur Content of Two and Two Tenths Per Cent for Residual Fuel Oil Utilization Facilities in the Berkshire Air Pollution Control District."

Air quality dispersion modeling was used to predict annual and 24-hour SO_2 concentrations that could occur when sources in the BAPCD burn 2.2 percent sulfur content residual fuel oil. The model utilizes point and area source emission data and meteorological data as input, and accounts for the varying topography which characterizes the BAPCD. Violations of the annual NAAQS for SO_2 predicted by the modeling in the Lenox-Lee area are largely attributable to Kimberly-Clark's Columbia Mill. Violations of the 24-hour NAAQS for SO_2 were predicted in North Adams, Dalton, and Lee, and are attributable, respectively, to the Sprague Electric Company, the Crane Paper Company, and the Kimberly-Clark Columbia Mill. Although ambient monitoring data recorded at monitoring stations in the BAPCD since 1973 do not show violations of the NAAQS for SO_2, none of the monitoring stations is located in an area where the maximum concentrations are predicted. Consequently, EPA is proposing that these three sources be disapproved. The modeling indicates that other sources in the BAPCD could burn the higher sulfur content fuel in accordance with Regulation 5.1 as revised, without causing violations of the NAAQS for SO_2.

Unless comments received during the comment period show the analysis to be incorrect, or appropriate technical information demonstrates that NAAQS will not be violated, the aforementioned three sources will be required to burn fuel oil having a sulfur content not greater than 1.0 percent.

EPA's evaluation of the impact of burning higher sulfur fuel indicates that an increase in particulate emissions may occur with an increase in the sulfur content of fuel. Since a violation of the secondary 24-hour NAAQS for total suspended particulates (TSP) occurred in the AQCR in 1976, EPA has called upon the Massachusetts Department to evaluate whether or not a more stringent SIP should be devised to control ambient particulate levels. The results of that evaluation, together with any necessary changes in the SIP, will be submitted to EPA by November 1, 1978. At present, it is not possible to make a reliable quantitative estimate as to what effect, if any, this SIP revision will have on TSP levels to be recorded at monitors in the AQCR; accordingly, EPA has determined that requiring the Massachusetts Department to develop an attainment plan is an adequate measure to assure that any violations of the NAAQS for TSP, whether or not attributable to the use of higher sulfur fuel, will be corrected in a timely manner.

The Administrator's decision to approve or disapprove the plan revision will be based on whether it meets the requirements of Sections 110(a)(2)(A)-(H) and 110(a)(3) of the Clean Air Act, as amended, and EPA regulations in 40 CFR Part 51. This revision is being proposed pursuant to Sections 110(a) and 301 of the Clean Air Act, as amended (42 U.S.C. 1857c-(5)(a) and 1857(g)).

Dated: July 25, 1977.

WILLIAM R. ADAMS, Jr.,
Regional Administrator, Region I.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 63]

[Docket No. 18875; FCC 77-536]

TRANSATLANTIC COMMUNICATIONS

Policy To Be Followed in Future Licensing of Facilities

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Communications Commission issues a number of alternative plans it is considering to set the policy the Commission will follow in licensing transatlantic communications facilities through 1985. The Commission also states its tentative preference for one of these plans. This action is intended to result in a comprehensive plan for construction and use of facilities to meet the transatlantic communications needs of this time period.

DATE: Comments must be received on or before August 31, 1977.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Raymond B. Crowell, International Programs Staff, Common Carrier Bureau, Federal Communications Commission, Washington, D.C. 20554, 202-632-3214.

SUPPLEMENTAL INFORMATION:

MEMORANDUM OPINION, ORDER AND NOTICE OF PROPOSED RULEMAKING

Adopted: July 20, 1977.

Released: August 1, 1977.

In the matter of policy to be followed in future licensing of facilities for overseas communications.

1. On November 29, 1976, we issued a Further Statement of Policy and Guidelines in the above-captioned proceeding, "Overseas Communications," 62 F.C.C. 2d 451, in which we announced that we would develop an overall, comprehensive facilities construction and use plan to meet United States-CEPT[1] tra-

[1] CEPT, The Conference Europeenne des Administrations des Postes et des Telecommunications, is an association of the communications entities of thirty European countries. In 1975, CEPT formed a subsidiary CEPT Liaison Committee for Transatlantic Telecommunications (CLTA) for the purpose of establishing an ongoing dialogue with the FCC and the Canadian overseas communications entity (Teleglobe) concerning issues of common interest in developing communications facilities for the North Atlantic region.

fic requirements through year-end 1985 and announced procedures we proposed to follow in developing that plan. In that connection, we reaffirmed our 1971 Policy Statement in this proceeding, "Overseas Communications," 30 F.C.C. 2d 571, 572, which had adopted the following policy guidelines:

(a) The public interest requires that we promote the continued development of both cable and satellite technologies and their most effective and timely applications to meet future requirements for international communications services;

(b) The public interest also requires that we authorize the most modern and effective facilities available via both cable and satellite technology with due regard for efficiency, economy, diversity and redundancy;

(c) The public interest and due regard for the concerns of the Administrations which operate the foreign end of the cables require that care should be taken to minimize the need for imposing artificial formulae to govern the distribution of traffic among available media;

(d) The public interest requires that the economies available from each advance in technology be reflected in charges for service. (Citations omitted).

Further, we clarified and amplified our 1971 policies by adopting, 62 F.C.C. 2d at 458-9, the following additional policy guidelines:

(a) The continuing availability of adequate, reliable, low cost communications facilities and services between Europe and North America is a matter of common interest and concern to communications users, operating entities, and governments in Europe and North America.

(b) This Commission does not, as a matter of policy, favor the use of one technology over another nor any predetermined distribution of traffic or transmission capacity among alternative technologies or suppliers. Pursuant to our statutory mandate, our primary policy objective has been and remains the achievement and efficient utilization of the lowest cost combination of facilities which can satisfy valid traffic needs and service objectives, irrespective of technology or supplier, within this basic policy framework, both cable and satellite technologies—as well as any other—can and should be afforded the opportunity to evolve.

(c) The existing operational structure and attendant economic and other incentives of the international communications industry are not such as to lead automatically to the realization of the basic public interest policy objectives enunciated above. Accordingly, this Commission must and will continue to scrutinize thoroughly both facility installation and utilization proposals of U.S. carriers prior to the authorizing these carriers' participation in such facilities programs, in order to ensure that U.S. communications users are not unnecessarily burdened with excessive facility investments or inefficient utilization of authorized facilities.

(d) The need to consider such interrelated factors as diversity, redundancy, restoration and other means to provide continuity of service within the context of the operational structure and varying economic and other incentives and preferences previously cited severely limits our ability to make the necessary public interest evaluations in the context of isolated applications for individual facility authorization. Accordingly, we will not in the future consider the authorization of major facility investments and utilization proposals as isolated instances, but will instead evaluate them in the context of a comprehensive long-range plan for the establishment and use of facilities to serve a particular geographic area during a specified future planning period. To ensure that all interested and affected parties have a full opportunity to participate in the evolution of a mutually acceptable long range plan for future facility establishment and use, we shall approach the adoption of such a plan through an iterative process as set forth in the Annex to this decision.

(a) In our public interest evaluation of both long range plans and specific facility applications, the primary criteria shall be those set forth in (b) above. For the purpose of cost analysis and comparisons, we shall consider as relevant only historical and/or projected investment and operating expenses—as opposed to lease charges or tariff rates. Moreover, before we can adopt any such long range plan as a basis for specific facility planning and authorization, we would necessarily require comparable commitments regarding the use of cable and satellite facilities.

(f) The evolution of mutually acceptable long range facility plans and the subsequent authorization of specific facilities will necessarily be a difficult and time-consuming process, given the necessity of accommodating this process to the differing legal requirements and operating arrangements of the sovereign nations involved. We shall make every effort to ensure the success of this effort, within our basic statutory mandate, public interest obligations and legal system. As a part of our effort to achieve an acceptable plan, we also desire to explore, where beneficial, changes in the present ownership arrangements and provision of circuits within future transatlantic facilities. Specifically, we propose to explore the feasibility and desirability of substituting end-to-end provision of whole circuits within facilities, for the present arrangement whereby each terminal country provides fifty percent of each transatlantic circuit.

In addition to setting forth the policy guidelines we would use to develop our overall facilities plan, we also announced the procedures we proposed to follow in that task.

2. First, we requested the United States International Service Carriers[1] (USISC) and the Communications Satellite Corporation (Comsat) to submit proposed facilities plans and supporting data so as to provide us with information necessary to arrive at an overall, comprehensive facilities construction and use plan. Second, we proposed that after consideration of these proposals we would issue for public comment a tentative facilities plan. Finally, after adoption of a final plan, we stated we would receive appropriate applications for authority to implement the plan. To the extent that those applications were consistent with our final plan, we envisioned a relatively automatic grant of authority. We noted, however, that should an application deviate significantly from the plan, we would consider it de novo, subject to the full process of comment, review and authorization. See 62 F.C.C. 2d at 461 (Annex 1).[1] Concurrently, we noted that we would continue as an integral part of our process the consultation with CEPT and Canadian representatives we have been pursuing since 1974.

3. Pursuant to our request, Comsat, on April 26, and the USISC, on April 29, 1977, filed their respective proposed facilities construction and use plans and supporting data. Comsat and the USISC each submitted a number of alternative plans. However, each of the respondents employed a different methodology in developing its plans and based them on different traffic forecasts, cost elements, methods of estimating costs, assumptions as to the availability of facilities and methods of circuit distribution. For example, the USISC included in their plans the costs of handling traffic between the U.S. and points other than CEPT countries, while Comsat limited its plans to CEPT points. Further, the USISC provided information on international record carrier services in only one of their five alternatives while Comsat included such costs in all of its alternatives. As a result of such differences, direct comparison of the plans as submitted was not feasible. Accordingly, the staff first reduced the USISC and Comsat plans to a common format, and subsequently reviewed both these and several staff-generated alternatives. In its review, the staff subjected the proposals to analysis in accordance with the following basic criteria:

(a) Ability to satisfy forecasted circuit requirements;

(b) Degree of service reliability provided; and

[1] These specific procedures set forth in the Further Statement were amended somewhat by Memorandum Opinion and Order, Overseas Communications, FCC 77-386, ------ F.C.C. 2d ----, released June 7, 1977, and Memorandum Opinion and Order, Overseas Communications, FCC 77-4660, ------ F.C.C. 2d ----, released July 8, 1977. However, the amended procedures retain the basic provision in the Further Statement for issuance of a Commission final facilities plan and subsequent processing of authorization applications; the later orders merely spell out in detail the steps leading to issuance of the final plan.

[2] Those carriers are American Telephone and Telegraph Company (AT&T), The French Telegraph Cable Company, ITT World Communications Inc. (ITT Worldcom), RCA Global Communications, Inc. (RCA Globcom), TRT Telecommunications Corporation and Western Union International, Inc. (WUI).

(c) The total cost associated with construction and maintenance of the facilities called for.

4. Under the procedures in our Further Statement, we had proposed to develop a single tentative facilities plan which we would issue for public comment. This tentative plan was to be submitted for discussion at the consultative meeting with CEPT and Canadian representatives in Rome, Italy. See 62 F.C.C. 2d at 461. However, for the reasons stated in our Memorandum Opinion and Order, released June 7, 1977, FCC 77-386, ------ F.C.C. ------ (June 7 Order), the staff found it necessary to develop a number of alternative plans. We concluded that all these plans should be made available for public comment and therefore we modified the procedures of our November 29 Order. We also concluded that these alternative plans should be presented for discussion at the Rome meeting.

5. On June 13-15, 1977, Commission representatives met in Rome, Italy, with representatives of 20 CEPT countries and Canada to discuss the plans prepared by the staff and the CEPT Master Plan which was prepared by the CEPT nations. Following the Rome Meeting, we issued on July 8, 1977, a Memorandum Opinion and Order herein, Overseas Communications, FCC 77-460, ------ F.C.C. 2d ------ (July 8 Order), in which we further clarified the procedures we shall follow in developing our final, comprehensive facilities construction and use plan and adopted a timetable for the various steps in that procedure:

(1) No later than July 31, 1977, we shall issue for public comment the five alternative plans including any proposed alternatives or modifications and will designate which of those is the Commission's tentative preferred plan.

(2) Comments on the alternative plans will be due no later than August 31, 1977.

(3) Following receipt of the comments, the Commission will analyze the plans in light of the comments received and begin to prepare its final plan.

(4) With the agreement of CEPT and Canadian officials, the Commission will also schedule a one-day meeting in Washington, D.C. for the purpose of further discussions with representatives from those nations having decisional responsibilities within their respective countries concerning international communications facilities. We anticipate that such a meeting will occur on September 19, 1977.

(5) Following such a meeting, we would allow 15 days for the filing of a final round of comments from interested persons—due October 5, 1977.

(6) The Commission would then consider the material before it and issue its final plan on November 1, 1977.

6. In the course of examining the carriers filings; alternative methods of using basic transmission facilities once established; and the effect of alternative traffic forecasts, circuit distribution procedure, etc., our staff has formulated a number of "plans" for purposes of analysis. Several of these which have been subjected to detailed analysis and comparison as regards traffic handling capabilities, service reliability, and cost are set forth in this Order and its Attachment I for further comment. Essentially, however, there are only three basic facility planning and implementation options under review and consideration. The first option, advanced primarily by the USISC and CEPT and embodied in Plans 1 and 1-M, would introduce a new TAT-7 cable in 1981. The second option, reflected in both Comsat's filing and various staff analyses and embodied in Plans 2, 4, 4-M and 5, would not include a new transatlantic cable at any time within the planning period (i.e. through 1985). The third option, designed by the staff to test the merits of an intermediate position regarding additional cable facilities, and embodied in Plan 3, would introduce a new TAT-7 cable in 1983. A brief description of each of the several "plans" falling under these three basic facility options follows:

PLAN 1. This plan represents, to the extent possible, the proposed USISC plan. It uses the USISC traffic forecasts; introduces TAT-7 in 1981; uses TASI-C beginning in 1982 to increase the capacity of TAT-5, TAT-6, TAT-7 and CANTAT-2 for telephony; and assumes a greater USISC use of CANTAT-2 than is presently authorized. Circuits used for telephony are distributed on a balanced-route basis with exceptions to some countries. No overall rationale for distribution of circuits used for record traffic could be discerned.

PLAN 1-M. This plan represents a modified PLAN 1 as a result of changes to the circuit forecast and distribution of circuits used in PLAN 1. While the circuit forecasts used in PLAN 1 and PLAN 1-M are essentially the same, the circuit distribution plans differ in several respects. PLAN 1-M reflects the circuit forecast and utilization of facilities developed by the CEPT countries and used in the CEPT Master Plan presented at the June 13-15, 1977, meeting in Rome, Italy. PLAN 1-M does not represent the CEPT Plan. It only represents the changes necessary in the distribution of circuits used in PLAN 1 to conform to the distribution of circuits used in the CEPT Plan.

PLAN 2. This plan represents, to the extent possible, the fourth alternative plan submited by Comsat. This plan uses the U.S. interim forecast (high estimate) submitted at the October, 1976, meeting in Rome. Under this plan, the introduction of TAT-7 is deferred beyond the planning period under consideration. No TASI-C is used in this plan. It is assumed that all of the CANTAT-2 circuits the USISC are authorized to use until year-end 1980 (373 telephony circuits and 60 record circuits) will continue to be available throughout the planning period. This plan assumes that both telephone and record circuits will be distributed in the ratio of satellite to cable capacity calculated by Comsat to be available between the U.S. and the CEPT countries.

PLAN 3. This is a staff-generated plan using the USISC forecast. Under this plan: TAT-7 is introduced in 1983; TASI-C is used on the TAT-5, TAT-6, TAT-7 and CANTAT-2 cables to the maximum extent possible, if needed to balance routes for telehony circuits; USISC use of CANTAT-2 basic circuits is limited to that presently authorized, and circuit growth for both telephony and record is distributed using the balanced-route approach.

PLAN 4. This is a staff-generated plan using the USISC forecast. This plan assumes: no TAT-7 during the planning period; use of TASI-C on the TAT-5, TAT-6 and CANTAT-2 cables to the maximum extent possible if needed to balance routes for telephony circuits; increased USISC use of CANTAT-2 circuits. Circuit growth for both telephony and record services is distributed using the balanced route approach.

PLAN 4-M. This plan represents a modified PLAN 4, resulting from a reduction in the use of TASI-C. The distributions of circuits contained in PLAN 4 and PLAN 4-M are different due to this change. The other basic assumptions used in PLAN 4 are also used in PLAN 4-M.

PLAN 5. This plan assumes no TAT-7 and no TASI-C during the planning period, and beginning in 1980, telephony and record circuits are distributed to achieve balance among available routes to the extent possible. There is an additional condition that total activated cable and total activated satellite circuits are not less than those in use as of April 30, 1977. A staff-generated estimate of circuits is used.

7. Attachment I sets forth in greater detail these several plans and analyses, as well as the information and methods employed by the staff to analyze traffic requirements, service reliability and costs. Information in addition to that submitted to the Rome meeting is included and errors found in the document submitted at Rome have been corrected. We believe it would be beneficial to make observations regarding the analysis performed to date and our basis for selecting one of these plans as our preferred plan. In so doing, we wish to make clear that factors in addition to those considered herein need to be addressed and fully considered before we make our final decision. In this regard, we are also seeking comments concerning the additional factors we believe should be addressed by all the concerned U.S. parties to this proceeding. As indicated earlier, we expect to meet with European and Canadian officials on September 19, 1977, in Washington, D.C., to discuss issues of mutual concern and responsibility before the Commission makes its final decision on this matter.

EVALUATION

8. *Traffic Requirements.* The several circuit forecasts and the staff's estimate of circuit requirements during the period under consideration are presented in the Attachment. Information concerning circuit and traffic requirements is presented and discussed. The circuit estimates made by the staff are considerably lower than the circuit forecasts provided by the USISC and others, which raises significant questions regarding the need to re-evaluate the methods employed to forecast traffic and circuit requirements. Nevertheless, the staff has used the higher forecasts, and not the lower staff estimate, in all plans under consideration, with the exception of Plan 5 which is included to demonstrate the effect on the cost of Plan 4 or Plan 4-M if the higher traffic forecast by USISC and CEPT does not materialize.[4] It appears to us that any of the plans under consideration will provide more than sufficient capacity to accommodate any of the circuit projections we have considered. Therefore, in selecting a preferred plan we did not need to discount any of the plans because it provides insufficient capacity.

9. *Service Reliability.* In order to assess the factors of service reliability, we required in our November 1976 Further Statement of Policy and Guidelines that the carriers and Comsat specify: (a) Their service and reliability objectives; (b) the analytical methods used to determine the trade-offs between diversity and restoration in maintaining the stated grade of service; and (c) the methods used to assess any differences in meeting the grade of service among various alternative mixes of facilities and levels of use of those facilities. The submissions of the USISC and Comsat failed to provide such information. The USISC filing evaluated its various plans by general statements whether a plan provided for "adequate" or "inadequate" diversity—without either defining the terms or showing the effect of diversity on service reliability. Comsat concluded, without presenting supporting information, that the same high level of service reliability provided in the past could be maintained under any of the alternative plans it considered. Lacking any meaningful assessment of service reliability by the carriers or Comsat the staff used blocking probability calculations[5] as a common indicator of relative service reliability to assess various mixes of facilities and levels of use of those facilities. The method is described in Attachment I.

10. The analysis performed by the staff allows the resulting blocking probabilities associated with each of the plans to be compared. Using CCITT Recommendation E.542[6] as a guide, it appears that prompt restoration will be required for circuits lost due to major facility failure under any of the plans. There are differences when comparing the blocking probabilities associated with each plan on a facility-by-facility, point-by-point, year-by-year basis. However, on the information before us, we are unable to determine any significant differences among the plans which would lead us to conclude that one plan provides superior service reliability vis a vis another. We recognize that other factors also bear upon overall service reliability. They include the speed and level of restoration required under emergency conditions and reliance on network management techniques to prevent rapid congestion of switching machines. It seems to us that these factors require detailed consideration by the operating entities concerned, irrespective of the plan finally adopted. The provision of leased-channel services to a customer on a full-availability basis would also require, in our opinion, special consideration under any of the tentative plans. All of these factors, including blocking probabilities, are concerned with emergency conditions where special measures need to be taken. During normal conditions, there should be no difference in the quality or level of service provided under any of the plans presented herein. We regret that the carriers and Comsat have not provided the kind of information or analysis we deem necessary to fully assess the various factors which affect service reliability. We do expect that they will review the analysis performed by the staff and address the specific questions contained herein so that we may have as complete and thorough a record as possible for our final decision.

11. *Costs.* The data, methodology and analysis employed by the staff to assess the costs associated with each of the plans considered are presented in Attachment I. The objective of the cost analysis is to estimate the relevant U.S. costs which will be incurred from mid-1977 through 1985 to provide, maintain and operate facilities for U.S.-CEPT traffic included in each alternative plan. The relevant costs include capital expenditures for new facilities and operating and maintenance expenses for all facilities. Since the facilities will also be used to provide communications service to non-CEPT countries, some cost allocation is necessary to isolate the U.S.-CEPT costs. Throughout the analysis, the general basis for allocating costs is relative use. The costs are estimated for each year of the 1977-1985 period and discounted to mid-1977 so as to equalize costs incurred at different times. An interest rate of 12 per cent is used. An allowance is made for capital equipment placed in service during the study period and useful beyond 1985. No allowance is made for inflation because relative costs are the relevant considerations under analysis. It is assumed that inflation will not affect relative costs. Based on this analysis the relevant costs to compare (net present value mid-1977-1985) are as follows:

Plan 1	$208,565,000
Plan 1-M	209,884,000
Plan 2	170,459,000
Plan 3	191,586,000
Plan 4	174,314,000
Plan 4-M	171,382,000
Plan 5	118,359,000

SELECTION OF PREFERRED PLAN

12. At this stage of our proceeding we have the benefit of the information now before us and the staff's analysis contained in the Attachment I. We stated in our November 29 Further Statement that "[w]here no significant differences arise in the resulting levels of service reliability between alternative means of meeting stated service objectives, considerations of service reliability is not a determining factor in the selection of the least cost combination of facilities." 62 F.C.C. 2d at 456, f.n. 2. Based upon the information considered thus far, we believe that any of the seven plans can be expected to provide adequate capacity and essentially the same level of service reliability. Therefore, we have no reason at this time to prefer one plan over another because of capacity or service reliability considerations. It is obvious from the staff's analysis of the plans presented herein that those plans which do not include a TAT-7 cable within the planning period (i.e. Plans 2, 4, 4-M and 5) represent the least cost alternatives. Depending on whether the staff's estimate or the USISC/CEPT estimates of future traffic growth are assumed these plans are less costly than Plan 1 to the American ratepayer, by amounts of $34 million to $90 million, according to this analysis.

13. The levels of traffic that will be realized in the future cannot be known with certainty. Indeed there is a substantial difference between the USISC forecast and the staff's estimate of circuit requirements. While this disparty needs to be considered in greater detail we do not believe it must be resolved now. More than sufficient capacity appears to be available under the plans considered to accommodate the range of traffic levels in question.

14. We believe the future of TASI-C technology is promising and economically attractive. Its application should be planned in the time period being considered. We have noted the uncertainty inherent in forecasting levels of demand. Recognizing this, we believe service handling capability should be planned to accommodate this uncertainty so long as the costs are not excessive. Therefore, we believe Plan 4-M is the most reasonable plan and select it as our preferred plan.

15. As indicated in our July 8 Order, adopting a final comprehensive facilities construction and use plan by November 1 is a difficult but attainable goal if we receive the cooperation of all concerned. Accordingly, to develop a full record on

[4] The important point is that either Plan 4 or 4-M, if adopted, could be readily adjusted to accommodate lower traffic requirements at lower cost. This adjustment could be periodic and based upon up-dated forecasts resulting from actual traffic levels being experienced and, possibly, a refined method of forecasting.

[5] The blocking probability number is a measure of the congestion (blocking) that may be expected in the International Direct Distance Dialling (IDDD) environment during the busy hour as a result of the loss of the number of circuits on each facility to each point should the facility fail. It indicates on the average, the number of telephone calls out of every 100 calls that may fail to seize an overseas circuit.

[6] CCITT Recommendation E.542—Acceptable reduction in the number of circuits of a final route in the extent of a breakdown. See Volume II-A—Rec. E.542, Volume VI—Rec. Q.96.

which to base our final decision, we desire to have the views of the carriers and the public on all seven of the alternative plans set forth in Attachment I. To aid us in this process, we shall make each of the USISC and Comsat a party to this proceeding and direct the parties to exchange copies of their comments with each other. The clarity, completeness and prompt filing of the parties' comments is of paramount importance in realizing our objective. We therefore urge each party to exercise particular care to assure that its comments provide all the information, support and descriptions of methodologies it uses so that the other parties and the Commission can promptly analyze the proposals, positions and recommendations. We would point out that the time schedule to which we must adhere does not permit the second round of pleadings which would be required if additional information must be requested after the filing of these comments. In order to aid the parties in the preparation of their comments and, to elicit information we believe pertinent, we shall require the parties to respond to a number of questions and specifically address a number of issues.

16. As set forth in Attachment I, the USISC and Comsat's April, 1977, filings failed to contain substantial amounts of information which would have aided the staff in formulating the tentative plans being issued for comment. We believe that much of this information also will be of value in analyzing the comments filed in this phase of the proceeding. Therefore, we are setting forth, in Section I of Attachment 2 to this decision, questions and information requests to solicit that information.

17. The tentative plans we are issuing for comment have been analyzed thus far from the standpoint of Traffic requirements, service reliability, and costs. There are other relevant factors to consider in adopting a final comprehensive plan (e.g. International Comity, foreign relations, etc.). One important factor is the effect selection of a particular plan will have on telecommunications plans of the CEPT nations and the procedures the Commission should follow to resolve issues if the final plans adopted on either side of the Atlantic are in conflict regarding the construction and use of transatlantic facilities. Another factor is the impact on the research, design and manufacturing of submarine cables in the U.S. To this end, we request all parties to address these issues. We are also requiring that the carriers and Comsat respond to the specific questions pertaining to these issues. We have also set forth in Section 3 of Attachment 2 questions pertaining to service reliability, to which we will require the carriers and Comsat to respond.

18. While the parties may submit information and raise issues in addition to those set forth herein, we request that they respond to the questions and information requests in Attachment 2 separately from other portions of their comments.

19. Finally, we will address the comments, petitions for reconsideration, partial reconsideration and clarification filed in regard to our November 29 Further Statement.[1] In the main, these pleadings do not appear to request the Commission to take specific actions. They suggest that we consider various effects that could result from following the course adopted in our Further Statement. However, some requests were made for specific action. These include requests that the Commission clarify certain aspects of the decision and consider the various alternatives proposed in the pleadings.

20. We believe that this Order, together with its attachments, provides much of the clarification requested. In addition, the procedural modification to facilitate development of a comprehensive facilities plan, may alter the basis for or obviate some of the requests made in these pleadings. Finally, we believe many of the comments and suggestions can better be considered by all parties in light of our preferred plan and tentative plans presented in the rulemaking phase of this proceeding.

21. With regard to the procedure being followed, the various comments and petitions include a request by ITT Worldcom that we reconsider the depth of our involvement in the planning of facilities for overseas communications; and a request by WUI that the Commission reconsider its guidelines and adopt one or more of the alternatives it proposed. To the extent the petitioner seeks reconsideration of the procedures set forth in our Further Statement, we shall deny them. The procedures we have adopted do not involve the Commission in the regulation of any aspect of overseas facilities construction in which it has not been involved heretofore. Prior Commission authorization of the construction of overseas transmission facilities has been mandatory since enactment of the Communications Act of 1934. Consideration of the capacity available in existing facilities in determining whether additional facilities should be authorized has also been required since that time. The question of appropriate use of existing and planned satellite and cable facilities has been pleaded before, and determined by, the Commission since 1966. The departure from overseas facilities planning by ad hoc action on individual facility applications to the development of a long range policy began with the issuance of our first Notice of Inquiry in this Docket in 1970. Discussions between Commission representatives and representatives of the CEPT nations to discuss matters of mutual interest began in 1971 and were regularized in 1974 with the establishment of the present consultative mechanism. The procedures implemented in November, 1976, make no significant additions to these Commission activities. The only major new element introduced by these procedures is the timing of determinations the Commission is required to make in the facilities authorization process.

22. As is clear from the foregoing, adoption of a comprehensive plan following consideration of alternative plans and comments filed thereon will not be the first Commission action where public comments filed thereon will not be the first Commission action where public interest determinations are made regarding the construction and use of proposesd overseas facilities. It will be the first time the Commission has been able to make both of these determinations at the same time. Such course of action is, we believe, responsive to the objections made by overseas telecommunications entities as well as the carriers and other interested parties to this proceeding concerning the timing of past Commission actions. Two other benefits are gained from our proposed procedures. First, the U.S. Carriers and Comsat are afforded an increased opportunity to present, support, and comment on various plans for cable and satellite construction and use in a more meaningful manner than is possible when considering applications on a case-by-case, facility-by-facility basis. Second, we are afforded the benefits of considering a range of possible plans and therefore take actions based on a more complete record. We continue to believe that the procedures we have adopted will better serve the public interest and see no reason to change them.

23. We referred earlier to the WUI petition which contains four alternative proposals. WUI requests that we "reconsider our Guidelines" and "clarify them by adopting one or more of the WUI alternative proposals in the interests of harmonius international relations and for the benefit of the telecommunications users throughout the world." We interpret WUI's pleading as a request that we substitute one of its proposals for the policies and guidelines established in our November 29 Order. Three of WUI's alternative proposals would permit the carriers to earn a rate of return on satellite circuits leased from Comsat. The first of these proposals would permit the carriers to capitalize satellite lease payments thus making the includable in the carriers' rate bases. The second proposal would require Comsat to issue Capital Participations Shares to the carriers in 50 percent of their satellite circuits. Such shares would then be included in the carriers' rate bases. The third alternative proposed by WUI is the Commission's adoption of an Operating Ratio Criterion for rate-making. Under this approach, the carriers would be permitted an "appropriate spread" between revenues and expenses allocated to leased satellite facilities. WUI's fourth alternative would permit the carriers to elect to compensate Comsat for a reasonable allocated share of its justified overhead

[1] AT&T and Comsat filed comments. ITT Worldcom, RCA Globcom and WUI filed petitions requesting reconsideration and clarification of various aspects of our policy guidelines or procedures. Additionally, AT&T filed an opposition to Comsat's comments to which Comsat responded.

costs but not of costs related to INTELSAT because such costs could be reduced to the extent of non-use of satellite circuits. WUI says that such compensation would be more logical economically and less burdensome upon the rate payers than any Guidelines compelling the carriers to lease satellite circuits for which they have no need while their owned cable circuits are idle. It further asserts that this proposal "might also defer a costly generation of INTELSAT spacecraft, or at least relieve congestion of the Atlantic primary satellite and permit the deferment of the proposed costly three satellite configuration."

24. WUI submits that any of these alternatives, or reasonable combinations or variations thereof, would provide the solution to the cable vs. satellite controversy without impairing this country's fragile international relations in the telecommunications sector. Adoption of any of the first three alternatives according to WUI could result in the carriers' being economically motivated to use more satellite circuits. WUI states

> The U.S. carriers could then endeavor to negotiate agreements with their foreign correspondents to maintain or acquire matching satellite circuits. The sovereign foreign administrations would, thus, be relieved of the irksome coercion, direct or indirect, from this Commission. The traditional relationship between international telecommunications operators—foreign administrations and U.S. carriers—would be restored. Additionally, the U.S. carriers could elect to compensate Comsat for non-use of satellite circuits (WUI alternative 4); and the carriers and their foreign correspondents would be free once again to configure their networks in an optimum manner for service reliability as only network operators can mutually decide. Comsat's ownership share in INTELSAT might be adjusted downward as a result with no adverse impact upon the ultimate U.S. ratepayers or upon the viability of Comsat.

It is not clear from the foregoing whether WUI proposes its fourth alternative as a substitute for or as an adjunct to any of the first three proposals.

25. We believe that the first three WUI proposals and its fourth proposal would have opposite effects on facilities use. If, as WUI suggests, the increased economic incentives produced by the first three proposals resulted in carriers' increased use of satellite circuits, it would seem a permissible conclusion that the need for additional cable facilities during the planning period under consideration would be delayed or, possibly, eliminated. However, WUI does not provide any indication as to the level of increased satellite use it would expect to result. It also fails to indicate the effect such increased use of satellite circuits would have on service reliability. No information is provided as to whether cost savings from deferring additional cable facilities would exceed the additional burden on the ratepayers caused by including satellite circuits in both Comsat's and the carriers' rate bases. Finally, no indication is given as to the effect that the increased economic incentive for the U.S. carriers to use satellite circuits would have on the determinations of overseas telecommunication's entities concerning service reliability and costs.

26. WUI indicates its fourth proposal would result in a decrease in the number of satellite circuits actually used. It would seem permissible to conclude that should such a decrease occur, the need for additional cable facilities during the planning period under study may be increased. However, WUI again provides no indication as to the magnitude of decrease it would expect to occur. While WUI seems to imply that decreased satellite circuit usage would increase service reliability, it provides no information with which one could test the reasonableness of that hypothesis. WUI also does not provide any information concerning the effect of its proposal on the cost of service to the ratepayer. It appears also to assert that the anticipated reduction in use of satellite circuits will be sufficient to warrant delaying the introduction of the INTELSAT–V series of satellites and deferring implementation of a three-satellite path configuration in the Atlantic basin. However, WUI gives no indication of the magnitude of cost savings such eventualities would produce. WUI also suggests that the reduced level of satellite use will result in diminishing Comsat's share of INTELSAT ownership and costs. However, it does not indicate the degree to which Comsat's costs would be reduced.

27. While all of WUI's proposals have the potential to affect the planning of future facilities, they are not substitutes for planning; nor, in our opinion, for the procedures we have adopted. The adoption of one or more of WUI's proposals would not terminate the legal requirement that prior approval be obtained for the construction and operation of overseas facilities; reduce our statutory duty to certify that the public interest requires construction of those facilities; or change the procedures to be followed in acting upon applications for overseas facilities. The objective of our procedures in this docket is to shape the required authorization process to a more meaningful and responsive process given the complexities of international facilities planning. The manner in which WUI's proposals would accomplish similar objectives is not obvious. They may be relevant considerations within the planning process. However, the cursory description provided sheds little light on the effect these proposals will have on the need, timing, and use of future facilities. Nevertheless we invite comments on these proposals by interested parties at the time they file the comments required herein.

28. In addition to the pleadings previously mentioned, we received a letter, dated January 27, 1977, from the Office of Telecommunications Policy (OTP) commenting on a number of aspects of our procedures. Some of OTP's comments have already been discussed. Its concern about the depth of the Commission involvement in facilities planning and the question of increasing the carriers' incentives to use satellite circuits were also raised in other pleadings discussed above. Regarding OTP's concern that factors other than cost and facilities used by considered in reaching a decision in this matter, we are inviting comments and supporting information regarding all issues to be considered, including those other than costs, service reliability, and traffic requirements. OTP has also raised other issues which we believe are more appropriately addressed in this phase of the proceedings and we invite interested parties to include comments on the OTP letter in their filings.

29. We will, however, address at this time OTP's request that we abandon the comprehensive facilities plan approach we adopted in our November, 1976, Further Statement. OTP views the procedure adopted, and in particular the detailed analysis of costs and facilities use with our concomitant information requests, as unduly coercive with respect to the European Telecommunications entities. OTP urges the Commission to reconsider the necessity for the comprehensive plan approach. In its view, the regulatory judgments as to the prudence of new cable or satellite facilities should be determined at the time applications for those facilities are filed. OTP recognizes that one important consideration in analyzing such applications is the prudent use of all existing facilities and that commitments to continue to reduce spare capacity can be demanded of the carriers if necessary, before new facilities are authorized. OTP states that the U.S. carriers, in turn, will be obliged to reach agreements with their operating partners consistent with such commitments. Such a procedure would, according to OTP, serve U.S. interests better than the procedures set forth in our Further Statement.

30. As indicated in our earlier discussion of the pleadings filed, our goal in adopting these procedures is to expedite Commission determination of the need of future facilities and to indicate our findings at the earliest possible time in order to minimize distruption of agreements already reached among the carriers and the overseas operating entities. As we also earlier indicated, these procedures allow the Commission to consider a number of alternative plans and provide for more input of views and information from all interested parties.

31. Past experience with *ad hoc* applications has shown that the same detailed consideration of cost, traffic requirements and service reliability is required. However, as we fully described in our November 29 Further Statement, this approach has proved to be unsatisfactory to adequately address these issues and reach timely decisions. While we do not presume to state that the procedures we have instituted cannot be improved, given the complexity of international

telecommunications facilities planning, we continue to believe that they offer a significant improvement to the application processes which in the past have yielded unsatisfactory results.

32. *Accordingly, it is ordered,* Pursuant to, sections 4(i), 4(j), 214, and 403 of the Communications Act of 1934, as amended 47 U.S.C. 154(i), 154(j), 214 and 403 (1971), and section 201(c) of the Communications Satellite Act of 1962, 47 U.S.C. 721(c) (1971), that the parties named herein shall, and all other interested persons may, file comments on the seven alternative proposed facilities construction and use plans set forth in Attachment 1 hereto.

33. *It is further ordered,* That the proposed PLAN 4–M is designated to Commission's tentatively-preferred facilities construction and use plan.

34. *It is further ordered,* For purposes of the comments called for here, American Telephone and Telegraph Company, Communications Satellite Corporation, the French Telegraph Cable Company, ITT World Communications Inc., RCA Global Communications, Inc., TRT Telecommunications Corporation, Western Union International, Inc. are named parties respondent to this proceeding.

35. *It is further ordered,* Pursuant to § 1.419 of the Commission's rules and regulations, 47 CFR 1.419 (1976), that all parties herein shall, and other interested persons may, on or before August 31, 1977, file an original and eleven copies of comments on the Commission's tentatively-preferred facilities construction and use plan and all alternative proposed plans set forth in Attachment I hereto. Each person named a party to this proceeding shall also provide the information called for in Attachment 2 to the extent that a particular question is aplicable to it. In addition to the material filed in response to this order, the Commission may consider any other relevant material before it. Copies of responses in this proceeding shall be available for public inspection at its headquarters at 1919 M Street, NW., Washington, D.C.

36. *It is further ordered,* That to the extent the pleadings and comments filed in regard to the Commission's Further Statement of Policy and Guidelines in this proceeding request abolition of the comprehensive facilities plan approach set forth herein, they are hereby denied.

FEDERAL COMMUNICATIONS COMMISSION,[*]
VINCENT J. MULLINS,
Secretary.

NOTE.—Attachments 1 and 2 are filed as part of the original document and may be inspected at the office of the FEDERAL REGISTER. A limited number of copies of these attachments are available from the Federal Communications Commission.

[*] See attached statements of Commissioners Fogarty and White. Commissioners Hooks and Quello concurring in the result.

CONCURRING STATEMENT OF COMMISSIONERS JOSEPH R. FOGARTY AND MARGITA E. WHITE

IN RE: POLICY TO BE FOLLOWED IN FUTURE LICENSING OF FACILITIES FOR OVERSEAS COMMUNICATIONS (DOCKET 18875)

Although we concur in the Commission's decision to designate Plan 4–M as a tentative preferred plan, we believe it is essential to emphasize that this preference is strictly a preliminary assessment of the alternative plans before the Commission and the complex technical and policy questions involved. While we accept the conclusion of the staff's preliminary analysis of the plans, our concurrence is based solely upon the limited record now before us.

In this regard, we are hampered by the lack of probative data and analysis in the submissions of the USISC and Comsat, particularly with respect to the critical comparative issues of quality of service, reliability of service, and costs presented by the various plans. Clearly, before this Commission can move with any confidence from a tentative preferred to a final plan, more is needed by way of comment, analysis, and evaluation.

In particular, we are not convinced that sufficient attention has been given to the question of quality of service in either the parties' comments or the Commissions analysis. Further, we question the impact that the adoption of the preferred plan will have both upon the distribution of circuits between cable and satellite in meeting overall traffic demand, and upon the route diversity available for traffic to and from individual countries.

In this regard, we are attaching to this statement a comparison of plans 4–M and 1 which graphically illustrates the differences in the country-by-country and overall distribution of cable and satellite circuits under these respective plans. The historically recognized need for both redundancy and diversity in transatlantic telecommunications may be compromised under plan 4–M to the possible detriment of all the region's consumers.

We further recognize—as we believe do our colleagues—that principles of international comity must also be considered in the Commission's ultimate decision. Indeed, international comity is a fundamental an element of our statutory public interest mandate as are the factors thus far considered. In expressing a tentative preference which results in cable/satellite allocations so dramatically different from those favored by the European nations, the Commission may find it more difficult to reach agreement on a final United States-CEPT plan after November 1, 1977. In our judgment, the element of comity must be given due consideration in the Commission's further deliberations leading to the adoption of the final comprehensive plan.

In view of the substantial issues which remain at this time unresolved, we urge the participants in this proceeding to provide the additional data and analysis necessary for the Commission to make a responsible and fully informed decision which will reflect and accommodate the best interests of all transatlantic telecommunications consumers.

Comparison of Satellite vs Cable Circuits for each Country Plans 4M and 1*

Country	PLAN 4M		PLAN 1	
	No. of Cable Circuits	No. of Satellite Circuits	No. of Cable Circuits	No. of Satellite Circuits
Austria	62	94	66	90
Belgium	316	656	521	451
Cyprus	7	13	12	8
Denmark	53	130	117	66

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1106]

[Ex Parte No. 332]

INDEPENDENT VOTING TRUSTS

Guidelines for the Establishment, Approval and Maintenance

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document proposes to institute a proceeding for adopting appropriate regulations for the establishment, Commission approval and administration of proper independent voting trusts. To insure the independent administration of voting trusts. To define clearly the circumstances and to set forth guidelines to be followed to insure the independent administration of voting trusts.

DATES: Notice of intent to participate must be received on or before August 18, 1977.

ADDRESSES: Notices of intent to participate should refer to docket Ex Parte No. 332. An original and four copies should be submitted to the Office of Proceedings Room 5349, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Philip Israel, Deputy Director, Section of Finance, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, 202–275–7245.

SUPPLEMENTARY INFORMATION: This proceeding is being instituted on our own motion to consider adopting certain guidelines pertaining to the establishment, Commission approval, and administration of proper independent voting trusts. These regulations shall pertain to all carriers under our jurisdiction.

Section 5(5) of the Interstate Commerce Act makes it unlawful except with the approval and authorization of the Commission as provided in section 5(2) of the Act for any person to enter into any transaction whereby that person would obtain "control or management in a common interest of any two or more carriers, however such result is attained, whether directly or indirectly, by use of common directors, officers, or stockholders, a holding or investment company or companies, a voting trust or trusts, or in any other manner whatsoever." (emphasis added). This section of the Act does not preclude the use of voting trusts in proceedings wherein the acquisition of control or management was obtained without prior Commission approval, because it has been determined in several cases decided by Federal courts, "that creation of an independent voting trust for stock, the prior control of which without Commission approval constituted a section 5(4)[1] violation was effective to avoid the violation and the Commission was authorized to give it that effect" (emphasis added). *B. F. Goodrich Co. v. Northwest Industries, Inc.*, 303 F. Supp. 53, 61 (D. Del. 1969), aff'd 424 F. 2d 1349) (3rd Cir. 1970), cert. denied, 400 U.S. 822 (1971). This and other decisions make it clear that the wording of Section 5(5) of the Act does not prohibit voting trusts so long as the trustee is truly independent of the acquiring carrier settlor. See, *Illinois Central R.R. Co. v. United States*, 293 F. Supp., 421–429 (N.D. Ill. 1966), affirmed per curiam, 385 U.S. 457 (1967).

Several recent proceedings involving section 5(2) control acquisitions have been complicated by the improper use of voting trusts by the settlor. In almost every instance, the voting trusts were established after the acquiring carrier had purchased a sufficient amount of the target carrier's publicly held voting securities to be considered in control of such publicly held target carrier.[2] Additionally, the voting trusts were frequently found not to have been administered independently from the control of the settlor, but were conduits through which the settlor continued in control of the publicly held carrier. These condi-

[1] Section 5(4) of the Interstate Commerce Act became section 5(5) by virtue of the amendments to section 5 in Pub. L. 94–210, the Railroad Revitalization and Regulatory Reform Act of 1976, enacted February 5, 1976.

[2] Unlike certain public utility regulatory statutes, the Interstate Commerce Act (49 U.S.C. § 1(3)(b) does not define control in terms of a fixed percentage of stock ownership with result that the point at which "control" or "power to control" exists, is defined by the circumstances of each individual case, *Gilbertville Trucking Co. v. United States*, 371 U.S. 115, 123–125 (1962).

tions led to a number of instances where the Commission determined that the settlor had violated section 5(5) of the Act, that is, acquired control of a carrier without Commission approval. Commission policy does not require the section 5(2) application to be denied merely because section 5(5) has been found to have been violated, though it is a factor to be considered. In three cases, notwithstanding section 5(5) violations involving improper usage of voting trusts, the Commission has granted approval of the section 5(2) applications where, in each instance, the evidence of record demonstrated that overriding public benefits would be derived from the resulting control to warrant a finding that the public should not be deprived of those benefits because of the section 5 (5) violation. See "East Texas Motor Frt.—Control—Consolidated," 109 M.C.C. 213 (1969), "Alleghany Corporation—Control and Purchase, 109 M.C.C. 333 (1970), and "Eastern Freight Ways, Inc.—Invest. of Control," 122 M.C.C. 142 (1975).

This situation need not arise. It is the purpose of these proposed regulations to define clearly the circumstances and to set forth guidelines which, if followed prior to the "acquisition of control" or "power to control", should insure that voting trusts will be administered independently from the settlor.

The proposed regulations will provide for the mandatory submission of the final draft of the trust agreement for Commission approval prior to execution of the trust agreement and the receipt by the trustee of any voting securities under the trust. The purpose for requiring Commission approval of the trust agreement is to insure that the trust agreement places the trustee under a legal obligation to observe the guidelines for independent administration of the trust contained in the proposed regulations.

The guidelines set forth the practices which should be adhered to by both the trustee and the settlor. In addition, the lack of any dealings or relationship between the trustee and the settlor (other than the trust itself) will be required to insure absolute insulation of the trustee and target carrier from any influence by the settlor. The attached proposed regulations contain the standards which we believe will enable voting trusts to be administered properly and independently from the control of the settlor.

The proposed action is not expected to affect significantly the quality of the human environment within the meaning of the National Environmental Policy Act of 1969.

Any interested person may participate in this proceeding by submitting an initial and/or reply statement of views, arguments, or other comments regarding the proposed regulations. The parties are also asked to comment on the need for the proposed regulations. The parties furthermore are requested to comment on the need for the voting trust in these proceedings. In addition the parties are asked to comment on whether or not interested parties should be permitted to comment on agreements submitted to the Commission, as provided by the proposed regulations. Any person intending to participate in this proceeding shall, on or before 15 days from first publication in the FEDERAL REGISTER, notify the Commission of his or her intention to participate by filing an original and 4 copies of a written notice of intent to participate with the Office of Proceedings, Room 5349, Interstate Commerce Commission, Washington, D.C. 20423. Since the Commission desires (a) to conserve time, (b) to avoid unnecessary expense, and (c) to limit the service of statements in this proceeding to persons who intend actively to participate, each notice of intent to participate shall include a detailed statement of (1) whether the person's interest extends merely to receiving Commission releases in this proceeding; (2) whether the person wishes to participate by filing and receiving initial and/or reply statements; (3) whether, if the person intends to participate as described in "(2)", the person's interests can be consolidated with those of other persons through joint statements; and (4) any other pertinent information to aid in limiting the service list to be issued in this proceeding.

The Commission will prepare and make available to all persons submitting notices of intent to participate a service list which will contain the names and addresses of all persons participating in this proceeding. An original and 19 copies of each statement shall be filed with the Commission and a copy of each statement shall be served upon each person on the service list. Initial and reply statements shall be filed with the Commission and served on each person on the service list in accordance with the schedule for submissions of comments and reply statements to be set by an order to be served concurrently with issuance of the service list of participants in the proceeding.

All written submissions will be available for public inspection during regular business hours at the Offices of the Interstate Commerce Commission, 12th Street and Constitution Avenue, Washington, D.C. 20423.

This notice of proposed rulemaking is issued under section 552, 553, and 559 of the Administrative Procedure Act (5 U.S.C. 552, 553, and 559) and section 5 of the Interstate Commerce Act (49 U.S.C. 5), as amended.

By the Commission, Commissioner Christian not participating.

H. G. HOMME, Jr.,
Acting Secretary.

PART 1106—STANDARDS FOR JUSTIFICATION OF THE INDEPENDENCE OF VOTING TRUSTS

Sec.

1106.1 Scope and applicability of the standards.
1106.2 Definitions.
1106.3 Submission of voting trusts for Commission approval.
1106.4 Mandatory provisions to be included in voting trust agreement.
1106.5 Standards of independence in the business relationship between the trustee and the settlor.
1106.6 Reporting requirements.
1106.7 Filing and acceptance of Section 5(2) applications.
1106.8 Denial because of nonindependence of trustee.

§ 1106.1 Scope and applicability of the standards.

The regulations set forth in this part govern the establishment, Commission approval, and administration of independent voting trusts. An independent voting trust may be established by a deed of trust or other written instrument and utilized by a carrier, or those controlling or affiliated with a carrier (hereinafter jointly referred to as carrier), which seeks to acquire control, through the purchase of, or through any other means to obtain ownership of, voting securities of a carrier, the control of which requires approval under section 5(2) of the Interstate Commerce Act (hereinafter Act), to avoid a violation of section 5(5) of the Act. In order to avoid a section 5(5) violation, the independent voting trust should be established before a controlling block of voting securities is purchased.

§ 1106.2 Definitions.

As used in this part: (a) The term "Act" means the Interstate Commerce Act, as amended.

(b) The term "voting trust" means any device resulting in the accumulation of voting shares or corporate securities of a carrier the control of which requires approval under the Act in trust for the purpose, among other things, of insulating the settlor from control of the business of the carrier whose shares are so held.

(c) The term "settlor" means any person, as defined in section 1(3)(a) of the Act, who has provided the consideration for the purchase of the corporate voting shares which are placed in the voting trust.

(d) The term "cestui que trust" means any person, as defined in section 1(3)(a) of the Act, who possesses a beneficial or equitable interest in the voting securities comprising or to comprise the corpus of the voting trust.

(e) The term "trustee" means any person, as defined in section 1(3)(a) of the Act, who holds legal title to the corpus of the voting trust and administers the trust for the benefit of the cestui que trust.

(f) The term "trust arrangement" means the arrangement encompassing the trust agreement, and the relationship between the trustee and the settlor at the time the trust is established.

§ 1106.3 Submission of voting trusts for Commission approval.

(a) Any person who proposes to establish an independent trust for the purpose of avoiding a violation of section 5(5) of the Act shall submit to the Commission five copies of a petition requesting Commission approval of the proposed voting trust arrangement. Attached to said petition shall be the unexecuted trust agreement in its final draft form, as assented to by both the settlor and trustee. Execution of the trust agreement and receipt by the trustee of any voting securities shall not occur prior to the effective date of the order of the Commission approving the unexecuted trust agreement. The petition requesting approval of proposed voting trust arrangements shall also attach thereto an affidavit of the trustee attesting to compliance with the standards of independence of the business relationship between the trustee and settlor as set forth below in § 1106.5.

(b) Approval of the proposed voting trust arrangement by the Commission will not foreclose reconsideration, or a subsequent determination that the voting trust arrangement was not independent, on the basis of facts not known to the decisional Commission body at the time of its approval.

(c) Approval of the proposed voting trust arrangement by the Commission shall cease to be of any further force and effect should the terms of the executed voting trust agreement differ in any material respect from the terms of the unexecuted trust agreement, or should the relationship between the trustee and settlor change, in any material respect, from the relationship, as it existed at the time of execution by the trustee of the affidavit attesting to compliance with the standards of independence, unless Commission approval has first been obtained for the subsequent modifications in the terms of the voting trust agreement, or change in the relationship between the trustee and settlor.

(d) A request for expeditious handling may be filed concurrently with the petition requesting approval of the proposed voting trust agreement. The petition should set forth the exigent circumstances necessitating extraordinary processing of the agreement.

§ 1106.4 Mandatory provisions to be included in trust agreements.

No proposed voting trust arrangement will receive Commission approval unless there are contained in the voting trust agreement provisions encompassing the following concepts:

(a) The trust and the nomination of the trustee during the term of the trust shall be irrevocable, and the trust is to remain in effect until the occurrence of specific events specified therein, but none other. The specified events referred to above may be, inter alia, (1) a sale of all the deposited securities, provided the sale is made to persons not affiliated with the settlor; (2) the delivery to the trustee of an order of this Commission authorizing settlor to acquire control of the carrier whose corporate securities constitute the corpus of the trust or to purchase any of its properties, or authorizing the release of the securities of any reason, or otherwise affecting the trust. At no time shall such event be one which it is within the power of the settlor to control other than the filing of an application for appropriate authorization from this Commission.

(b) The trustee must not exercise the voting power of the trust in any way so as to cause any dependence or intercorporate relationship between the settlor and the carrier whose corporate securities constitute the corpus of the trust.

(c) The trustee shall not use the voting powers of the trust in any matters relating to the acquisition of control of the carrier whose corporate securities constitute the corpus of the trust except as may be authorized in advance by this Commission or required by a court of proper jurisdiction.

(d) The trustee shall not use the voting powers of the trust to elect common officers or directors of the settlor and the carrier whose corporate securities constitute the corpus of the trust, without the prior consent of the Commission.

(e) The trustee shall be empowered to vote stock held in the trust with regard to all other proposals which will, in his determination, affect the well being of the carrier whose corporate securities constitute the corpus of the trust in the manner deemed by him to be consistent with the best interests of such carrier.

(f) Notwithstanding the fact that the trust was created by the settlor for the ultimate benefit of the settlor, as cestui que trust, the interests of the settlor, as cestui que trust, may conflict with the other interests of the settlor which are extraneous to the trust. As a result, during the term of the trust, the trustee shall never take into account the extraneous interests of, or act for the benefit of, the settlor in utilizing the voting power of the trust, if doing so would in any way conflict with the obligation imposed by paragraph (e) of this section. The trustee may not be held liable to the cestui que trust for any detriment occurring to the corpus of the trust as a consequence of any act of the trustee, which was done in good faith and belief that such act was for the benefit of the carrier whose securities constitute the corpus of the trust: *Provided, however,* That this should not preclude the trustee from being held to the standard of conduct of a reasonably prudent businessman acting in good faith on behalf of the carrier whose securities comprise the corpus of the trust.

(g) The trustee shall be entitled to receive cash dividends declared and paid upon the trustee voting corporate securities and turn the same over to the cestui que trust. Dividends other than cash are to be received and held by the trustee upon the same terms and conditions as the voting corporate securities which constitute the corpus of the trust.

§ 1106.5 Standards of independence in the business relationship between the trustee and the settlor.

To ensure independent administration of the voting trust by the trustee and to prevent the settlor from controlling the trustee in any manner, the following standards should be followed:

(a) The trustee or any parent, subsidiary, or affiliated corporation of the trustee may not have any officers, or members on their respective boards of directors in common with either the settlor or any parent, subsidiary, or affiliated corporation of the settlor.

(b) The trustee or any parent, subsidiary, or affiliated corporation of the trustee may not have any direct or indirect business arrangements or dealings, financial or otherwise, with the settlor, or any parent, subsidiary, or affiliated corporation of the settlor, other than those dealings pertaining to establishment of the voting trust pursuant to these regulations. Mere investment in the corporation stock or securities of the settlor by the trustee short of obtaining a controlling interest will not be considered as an arrangement by which the trustee might be subject to the control of the settlor, but in no event should the investment by the trustee in the voting securities of the settlor exceed 5 percent of its outstanding shares, and in no event should the trustee hold a proportion of the settlor's securities so substantial as to permit the trustee in any way to control, or direct the affairs of the settlor.

(c) Upon execution of the trust agreement, the settlor shall neither communicate nor attempt to communicate with the trustee, whether directly or indirectly, except to advise him of the occurrence of an event terminating the trust as specified in § 1106.4(a) above. The prohibition against communications between settlor and trustee shall not be deemed to preclude the trustee from apprising the settlor of the status of stock shares received by the trustee pursuant to a tender offer of the settlor, nor from responding to questions regarding the transmittal of cash dividends.

§ 1106.6 Reporting requirements.

(a) The trustee of any voting trust in which the voting arrangement has been approved by the Commission under this part shall report to the Commission when voting securities held by the cestui que of the outstanding voting securities of the carrier which is the subject of the proposed acquisition of control, or at such earlier time as the Commission may by order direct. The trustee shall thereafter file quarterly reports with the Commission reflecting the percentage of the subject carrier's outstanding voting securities that are held by the cestui que trust and trustee: *And providing,* The following additional information:

(i) A summary of all communications made between the trustee and settlor during the quarter.

(ii) A description of all proposals to shareholders of the subject carrier for which the trustee exercised its voting power during the quarter.

(b) The quarterly report shall be titled "Voting Trustee's Quarterly Report" and shall be filed with the Deputy

Director of the Section of Finance (or the Chairman of Division 3) of the Interstate Commerce Commission, within 15 days from the close of the quarter.

(c) The trustee shall filed with the Commission a copy of any report or document filed with the Securities and Exchange Commission in connection with the proposed transaction.

§ 1106.7 Filing and acceptance of section 5(2) application.

(a) The Commission may be order specify a date by which an application under section 5(2) of the Act for approval of a proposed acquisition shall be filed. An application shall be filed no later than the date so specified.

(b) No application under section 5(2) of the Act for approval of a proposed acquisition of control through ownership of voting securities, which proposal involved the use of a voting trust, will be accepted for filing unless the application reflects that:

(1) An independent voting trust arrangement was created and approved by the Commission in accordance with the regulations in this part.

(2) The trustee has complied with all reporting requirements under this part.

(3) The application is filed no later than the date specified for such filing by the Commission pursuant to paragraph (a) of this section.

§ 1106.8 Denial because of nonindependence of trustee.

If the Commission finds that the trustee has not complied with the mandatory provisions to be included in the trust agereement as set forth in § 1106.4 and thus was not independent of the settlor, it will deny the section 5(2) application, unless the applicant shows and the Commission finds that the breach of independence was unintentional and that denial of the application will substantially disserve the public interest and the national transportation policy, taking into account the need for effective deterrence.

CIVIL AERONAUTICS BOARD

[Order 77-7-148; Docket Nos. 30969, 28269]

EASTERN AIR LINES, INC.

Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 29th day of July 1977.

By applications filed June 5, 1977, Eastern Air Lines requests an amendment to its certificate of public convenience and necessity for Route 10 so as to delete segment 7 (Chicago-New Orleans) of that certificate along with the conditions pertaining to service on that segment. Eastern also asks for a continuation of its temporary suspension on segment 7 until 90 days after final action by the Board on Eastern's application for deletion in Docket 30969.

In support of its applications, Eastern alleges that the primary reason for the award of segment 7, to provide nonstop service between New Orleans and Chicago, no longer exists because of the Board's decision in the Chicago-New Orleans Nonstop Route Proceeding, Order 77-2-58, served February 11, 1977, and Order 77-5-35, served May 9, 1977, to delete Eastern's nonstop authority between Chicago and New Orleans; that all of the authority on segment 7 is available on other Eastern routes with the exception of New Orleans-Huntsville, and that the latter market is adequately served today by Southern Airways; that Eastern's service over segment 7 was suspended by Order 75-10-83, October 21, 1975, and that this suspension continues in effect until 90 days after final decision in Docket 27990; and that Eastern is only asking for the maintenance of the status quo of its current suspension of service over segment 7.

An answer in support of Eastern's application for renewal of its temporary suspension of service was filed by the City of New Orleans and the Chamber of Commerce of the New Orleans Area (New Orleans). New Orleans contends that Eastern should not be burdened by one-stop service between New Orleans and Chicago; that service between New Orleans and Birmingham is authorized on Eastern's segment 1, Route 5; and that service between New Orleans and Huntsville is adequately provided by Southern Airways.

Upon consideration of the pleadings and all the relevant facts, we have decided that the public interest requires the grant to Eastern of authority to suspend service temporarily on segment 7 of Route 10 (Chicago-Huntsville-Birmingham-New Orleans).[1] We have also decided to issue an order to show cause why the deletion should not be granted.[2] Accordingly, we tentatively find and conclude that the public convenience and necessity require the amendment of Eastern's certificate for Route 10 so as to delete segment 7.[3] The facts which we have tentatively found to support our ultimate conclusion are discussed below.

With the deletion of Eastern's nonstop authority in the Chicago-New Orleans market, the primary reason for the award of segment 7, the provision of nonstop service between the two points, no longer exists. Moreover, Eastern's service over segment 7 has been suspended for a considerable amount of time. By Order 75-10-83, October 21, 1975, the Board authorized Eastern, effective December 9, 1975, to suspend service temporarily until 90 days after the final decision in Docket 27990.[4] Before that (and before Eastern reinstituted service in May, 1975) by Orders 74-1-33, 74-6-1, 74-11-59, Eastern had authority to suspend service for six-month periods or until the end of the fuel shortage. Thus, except for a seven-month period, service over Eastern's segment 7 has been suspended since 1974 with no adverse effect on the markets involved. All of the authority on segment 7, with the exception of New Orleans-Huntsville, is available on other Eastern routes. Eastern also can combine certain authority so as to operate, for example, Chicago-Birmingham-New Orleans without using the segment 7 rights. The New Orleans-Huntsville market is now served by Southern Airways, which provides two daily round trips for approximately 20 passengers per day each way.[5] Thus, the traffic can be accommodated by Southern, which has been fulfilling the needs of the market during Eastern's suspension of service. Finally, the absence of any civic opposition to Eastern's application and New Orlean's support of the suspension renewal application support our tentative conclusion that the public convenience and necessity require the deletion of segment 7 from Eastern's certificate for Route 10.[6]

Interested persons will be given twenty days following service of this order to show cause why the tentative findings and conclusions set forth in this order should not be made final. We expect such persons to support their objections, if any, with detailed answers, specifically setting forth the tentative findings and conclusions to which objection is taken. Such objections should be accompanied by arguments of fact or law and should be supported by legal precedent or detailed economic analysis. If an evidentiary hearing is requested, the objector should state in detail why such hearing is considered necessary and what relevant and material facts he would expect to establish through such a hearing that cannot be established in written pleadings. General, vague, or unsupported objections will not be entertained.

Accordingly, it is ordered, That: 1. All interested persons be directed to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here and amending the certificate of public convenience and necessity of Eastern Air Lines for route 10 so as to delete segment 7;

2. Any interested persons having objections to the issuance of an order making final any of the proposed findings, conclusions or certificate amendments set forth here shall, within 20 days after service of a copy of this order, file with the Board and serve upon all persons listed in paragraph 7 a statement of objections together with a summary of testimony, statistical data and other evidence expected to be relied upon to support the stated objections. Answers to such objections shall be filed within 10 days thereof;

[1] Eastern's request that it be relieved of the requirement to submit data required by Part 205 of the Board's Economic Regulations will be granted.

[2] The suspension authority granted in this order will remain in effect until 90 days after the finalization of the show cause order.

[3] We also tentatively find that Eastern is fit, willing and able properly to perform the air transportation authorized by the certificate proposed to be issued herein and to conform to the provisions of the Act and the Board's rules, regulations, and requirements thereunder.

[4] The Board's order on reconsideration in Docket 27-990, Order 77-5-35, was served on May 9, 1977.

[5] Official Airline Guide, April 1, 1977, and CAB O&D Surveys.

[6] Since the deletion of segment 7 will result in no change from Eastern's current operations in the markets serviced by that segment, we also tentatively find and conclude that the Board action sought by Eastern will not result in a major federal action significantly affecting the environment within the meaning of the National Environmental Protection Act of 1969.

3. If timely and properly supported objections are filed, full consideration will be accorded the matters and issues raised by the objections before further action is taken by the Board;

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived and the Board may proceed to enter an order in accordance with the tentative findings and conclusions set forth in this order;

5. Eastern Air Lines be authorized to suspend service temporarily over segment 7 of route 10 until 90 days after final decision on its deletion application in Docket 30969;

. 6. Eastern's request that it be relieved of the requirement to submit data required by Part 205 of the Board's Economic Regulations be granted;

7. A copy of this order shall be served on Eastern Air Lines; Mayor, City of Chicago, Illinois; Governor, State of Illinois; Mayor, City of New Orleans, Louisiana; Chamber of Commerce of the New Orleans Area; Governor, State of Louisiana; Mayor, City of Huntsville, Alabama; Mayor, City of Birmingham, Alabama; Governor, State of Alabama; Airport Manager, O'Hare Airport; Airport Manager, Moisant International Airport; Airport Manager, Madison County Airport; Airport Manager, Birmingham Municipal Airport; Southern Airways; and the U.S. Postal Service; and

8. The authority granted in paragraph 5 above may be amended or revoked at any time at the discretion of the Board without hearing.

This order will be published in the FEDERAL REGISTER.

By Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[Order 77-7-146; Docket 30687]

S.A. DE TRANSPORT AERIEN (SATA)

Order to Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 29th day of July, 1977.

By application filed April 1, 1977, S.A. de Transport Aerien (SATA) requests renewal of its foreign air carrier permit issued pursuant to Order 75-4-101, served April 22, 1975. That permit authorizes SATA to engage in charter air transportation between the Swiss Confederation, the U.S. and various other countries. Applicant asks for renewed authority identical to its current authority, except for the duration. SATA now seeks a five-year, instead of a two-year, permit.

On June 1, 1977, SATA filed a motion for an order to show cause why the Board should not renew its permit for an additional five-year period, subject to approval of the President. Attached to the motion were 41 supporting exhibits.

No answers were filed in response to the motion.

Upon consideration of the pleadings and all the relevant facts, the Board has decided to grant SATA's motion, and, for the reasons stated below, has tentatively concluded that SATA's foreign air carrier permit should be renewed for a period of five years.

OWNERSHIP AND CONTROL

SATA is an independent, publicly held corporation formed in 1966 pursuant to the laws of the Swiss Confederation. The capital is fixed at 32,000,000 Swiss francs, divided into two classes of stock: 213,400 nominative shares issued and outstanding, and 10,660 bearer shares issued and outstanding. Each share has one vote. The applicant has also issued 15,000,000 francs worth of bonds, worth 1000 frances each, which can be exchanged for 8 registered shares worth 100 francs each, or a 25 percent premium.

Swiss law requires that the corporation be controlled by Swiss nationals, and 95 pecent of its stock is owned by Swiss nationals.

All of SATA's directors and officers are Swiss citizens except Louis Henry and Philippe Doubre, who are French citizens.

None of SATA's officers, directors, or key personnel are employees of or affiliated with, any other air carrier, foreign air carrier, common carrier, person engaged in any phase of aeronautics or person whose principal business is the holding of stock in any such enterprise.

In light of these facts, the Board tentatively finds that SATA is effectively owned and controlled by Swiss citizens.

FITNESS

SATA holds a permit from the Swiss government authorizing it to operate passenger and cargo charter service world-wide. No authority held by the carrier has ever been suspended, revoked, or otherwise terminated.

SATA owns and operates the following aircraft: two DC-8-63's, four Super Caravelles, two Cessnas, and one Pilatus Porter. In addition it operates, but does not own a DC-8-53 and a Cessna 340. Its transatlantic charter service is conducted with the three DC-8 aircraft.

Applicant submitted two certificates of insurance evidencing the following coverage on its DC-8's and Super Caravelles: 72,500 Swiss francs per person and 400,000,000 Swiss francs per incident. In addition, for flight operations to the U.S., coverage is provided in accordance with the Montreal Agreement.

SATA has been operating charter service pursuant to its present permit for about two years, and the Board has no evidence that its services and operations have been unsatisfactory.

Applicant's operations have experienced steady growth. According to its exhibit 40, between 1970 and 1976 revenues increased at an annual compound rate of 40.5 percent, while the annual compound rate of increase was 21.2 percent for passengers carried and 19.8 percent for flying time. The company's assets in 1976 totaled 126,661,000 Swiss francs, and its after tax profit for that year was 1,422,000 Swiss francs.[1]

[1] Exchange rate: 2.5 Swiss francs=1 U.S. dollar.

Based on this information the Board tentatively finds that SATA is fit, willing and able properly to perform the foreign air transportation proposed in its application, and to conform to the Federal Aviation Act of 1958, as amended, and to the rules, regulations and requirements of the Board thereunder.

PUBLIC INTEREST

There is at present no bilateral agreement between the U.S. and Switzerland pertaining to the subject application. Therefore, the determination of the public interest turns primarily on considerations of comity and reciprocity.

When SATA's permit was originally issued by Order 75-4-101, the Board adopted the administrative law judge's finding that the Swiss government treats U.S. flag carriers such that the principles of comity and reciprocity would justify the granting of the permit. The Board is unaware of any change in the Swiss government's treatment of U.S. air carriers. Therefore, we tentatively find that it would be in the public interest to grant SATA the authority it requests.

On the basis of the foregoing and all the facts of record, it is tentatively found that:

1. It is in the public interst to issue a foreign air carrier permit to S.A. de Transport Aerien authorizing it to engage in charter foreign air transportation as described in the text of this order;

2. S.A. de Transport Aerien is substantially owned and effectively controlled by citizens of Switzerland;

3. The exercise of the privileges granted by the foreign air carrier permit described above should be subject to the terms, conditions, and limitations contained in the specimen form of permit attached hereto, and to such other reasonable terms, conditions, and limitations as the Board may prescribe in the public interest;

4. S.A. de Transport Aerien is fit, willing, and able properly to perform the above-described foreign air transportation and to conform to the provisions of the Act and the rules, regulations, and requirements of the Board thereunder;

5. Except to the extent granted herein, the application of S.A. de Transport Aerien in Docket 30687 should be denied; and

6. An evidentiary hearing is not required in the public interest.[2]

On the basis of the foregoing, and all the facts of record, the Board tentatively finds that an evidentiary hearing is not required in he public interest, and that SATA should be issued a foreign air carrier permit for a period of five years, subject to the terms, conditions, and limitations set forth in the attached specimen permit.

[2] A Notice of Environmental Rejection, issued today, states that the Chief of the Legal Division, Bureau of Operating Rights, has reviewed the environmental evaluation submitted with SATA's motion, and has found, pursuant to § 312.13 of the Board's Procedural Regulations, that the action contemplated herein would not constitute a major Federal action significantly affecting the quality of the environment within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969.

Accordingly, it is ordered That:

1. All interested persons be directed to show cause why the Board should not make final the tentative findings stated herein, and why a foreign air carrier permit, in the form of the specimen permit attached, should not, subject to the approval of the President pursuant to section 801 of the Act, be issued to SATA;

2. Any interested person objecting to the issuance of an order making final the tentative findings, or to the issuance of the proposed foreign air carrier permit, shall file a statement of objections, fully supported by evidence, within 21 days after the Board adopts this order; answers to objections shall be filed within 10 days thereafter;

3. If timely and properly supported objections are filed, the Board will accord full consideration to all matters and issues raised by the objections before it takes further action;[3]

4. If no objections are filed, all further procedural steps will be considered waived, and the Board may enter an order adopting as final the tentative findings set forth herein; and

5. This order shall be served on SATA, Pan American World Airways, Capitol International Airways, Overseas National Airways, Trans International Airways, World Airways, and the Ambassador of Switzerland in Washington, D.C., and the United States Department of State.

This order will be published in the FEDERAL REGISTER and transmitted to the President.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

PERMIT TO FOREIGN AIR CARRIER

Societe Anonyme De Transport Aerien (SATA) is hereby authorized, subject to the provisions hereinafter set forth, the provisions of the Federal Aviation Act of 1958, and the orders, rules, and regulations issued thereunder, to engage in charter foreign air transportation as follows:

1. Charter flights with respect to persons and their accompanying baggage between any point or points in the Swiss Confederation and any point or points in the United States.

2. Plane load charter flights with respect to property between any point or points in the Swiss Confederation and any point or points in the United States, limited to ten one-way flights within any calendar year.

3. Inclusive tour charter flights with respect to persons and their accompanying baggage between any point or points in the Swiss Confederation and any point or points in the United States.

4. Circle tour charter flights (including inclusive tour charters) with respect to persons and their accompanying baggage which originate and terminate at a point or points in the Swiss Confederation and serve a point or points in the United States and a point or points in any country other than the Swiss Confederation and the United States.

5. Charter flights (including inclusive tour charters) with respect to persons and their accompanying baggage between a point or points in Austria, Belgium, Cyprus, Denmark, Finland, France, Federal Republic of Germany, Greece, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, United Kingdom of Great Britain and Northern Ireland, and Yugoslavia, and any point or points in the United States, limited to charter flights which originate in a named European country.

6. Circle tour charter flights (including inclusive tour charters) with respect to persons and their accompanying baggage which originate and terminate at a point or points in Austria, Belgium, Cyprus, Denmark, Finland, France, Federal Republic of Germany, Greece, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Spain, Sweden, United Kingdom of Great Britain and Northern Ireland, and Yugoslavia, and serve a point or points in the United States and a point or points in any country other than a named European country and the United States.

This permit shall be subject to the following terms, conditions, and limitations:

(1) With respect to the authorizations contained in paragraphs 1, 2, 3, and 4 above, the holder shall not engage in foreign air transportation between the United States and any point or points, other than a point or points in the Swiss Confederation, or transport any persons whose journey, by any means of transportation, begins or ends at a point not in the United States or the Swiss Confederation: *Provided*, That this condition shall not prevent the holder, under the authorization contained in paragraph 4 above, from serving a point or points in any foreign country between the point of origin and the point of termination of the charter flight in the Swiss Confederation, or prevent the holder from carrying between a point or points in the Swiss Confederation and a point or points in the United States charters originating in one of the European countries named in paragraph 5 or 6 above.

(2) During any calendar year in which the holder: (a) operates less than 18 charter trips originating outside the United States, the number of United States-originated charter trips shall not exceed those originating outside the United States by more than six; (b) operates between 18 and 45 charter trips originating outside the United States, the number of United States-originated charter trips shall not exceed those originating outside the United States by more than one-third; (c) operates more than 45 charter trips originating outside the United States, the number of United States-originated charter trips shall not exceed those originating outside the United States by more than 15. Any charter originating in one country and flown to another, whether one-way or round-trip, will be considered one charter trip for these purposes.

(3) The authority of the holder to perform inclusive tour charters originating in the Swiss Confederation shall be subject to the terms, conditions, and limitations contained in licenses to be issued by the Swiss Federal Air Office (or other appropriate aviation authority) authorizing the performance of such charters: *Provided, however*, That, except as may be otherwise authorized by the Board, such inclusive tours shall also conform to the provisions of § 378.2(b)(4) of the Board's Special Regulations, or any other provision of the Board's Regulations governing the minimum charge to passengers for an inclusive tour (including land or other accommodations). The authority of the holder to perform inclusive tour charters originating in the United States shall be subject to the provisions of Part 378 of the Board's Special Regulations, and all amendments and revisions thereof as the Board, by order or regulation and without hearing, may adopt. The authority of the holder to perform inclusive tour charters originating in a European country named in paragraphs 5 or 6 above shall be subject to the following conditions:

(a) Each tour shall provide overnight hotel accommodations at a minimum of three places other than the point of origin, such places to be no less than 50 air miles from each other.

(b) If more than one group is carried, each of the groups shall consist of 40 or more tour participants.

(c) The Board, by order or regulation and without hearing, may waive conditions (a) and (b) in whole or in part.

(4) The exercise of the privileges granted by this permit, except with respect to inclusive tour charters, shall be subject to the provisions of Part 214 of the Board's Economic Regulations, and all amendments and revisions thereof as the Board, by order or regulation and without hearing, may adopt.

(5) The Board, by order or regulation and without hearing, may require advance approval of individual charter trips conducted by the holder pursuant to the authority granted by this permit, if it finds such action to be required in the public interest.

(6) The holder shall conform to the airworthiness and airman competency requirements prescribed by the Government of the Swiss Confederation for Swiss international air service.

(7) The holder shall keep on deposit with the Board a signed counterpart of CAB Agreement 18900, an agreement relating to liability limitations of the Warsaw Convention and the Hague Protocol approved by Board Order E-23680 dated May 13, 1966, and a signed counterpart of any amendment or amendments to such agreement which may be approved by the Board and to which the holder becomes a party.

(8) The holder (1) shall not provide foreign air transportation under this permit unless there is in effect third-party liability insurance in the amount of $1,000,000 or more to meet potential liability claims which may arise in connection with its operations under this permit, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the third-party liability insurance provided, and (2) shall not provide foreign air transportation with respect to persons unless there is in effect liability insurance sufficient to cover the obligations assumed in CAB Agreement 18900, and unless there is on file with the Docket Section of the Board a statement showing the name and address of the insurance carrier and the amounts and liability limits of the passenger liability insurance provided. Upon request, the Board may authorize the holder to supply the name and address of an insurance syndicate in lieu of the names and addresses of the member insurers.

(9) By accepting this permit the holder waives any right it may possess to assert any defense of sovereign immunity from suit in any action or proceeding instituted against the holder in any court or other tribunal in the United States (or its territories or possessions) based upon any claim arising out of operations by the holder under this permit.

(10) The holder shall not commence any service authorized herein, except pursuant to an initial tariff setting forth rates, fares

[3] Since the Board has provided for the filing of objections to this order, it will not entertain petitions for reconsideration.

and charges no lower than rates, fares or charges that are then in effect for any U.S. supplemental air carrier in the same foreign air transportation.

(11) The holder shall not operate charters for or on behalf of air freight forwarders.

(12) This permit shall be subject to all applicable provisions of any treaty, convention, or agreement affecting international air transportation now in effect, or that may become effective during the period this permit remains in effect, to which the United States and the Swiss Confederation shall be parties.

The exercise of the privileges granted by this permit shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

This permit shall be effective on _____ and shall terminate five years thereafter: *Provided, however,* That if during said period the operation of the foreign air transportation herein authorized becomes the subject of any treaty, convention, or agreement to which the United States and the Swiss Confederation are or shall become parties, then and in that event this permit is continued in effect during the period provided in such treaty, convention, or agreement.

In witness whereof, the Civil Aeronautics Board has caused this permit to be executed by the Secretary of the Board, and the seal of the Board to be affixed hereto, on the _____

(SEAL) _____
Secretary.

[Docket 30687]

S.A. DE TRANSPORT AERIEN (SATA)

Environmental Rejection

By application filed April 1, 1977, SATA requests renewal of its foreign air carrier permit authorizing it to engage in charter air transportation between the Swiss Confederation, the U.S., and various other countries. On April 8, 1977, applicant filed an environmental evaluation pursuant to Part 312 of the Board's Economic Regulations.

Applicant based its calculations on the assumption that its proposed operations would increase the base period daily operations by 4 at New York (2 daytime and 2 nighttime flights), 2 at Los Angeles (both daytime flights) and 4 at Bangor, Maine (2 daytime and 2 nighttime flights). These flights would be operated with DC-8-63 and DC-8-55 equipment.

Pursuant to §§ 312.8 and 312.13 of the Board's Procedural Regulations, the undersigned—having reviewed the environmental evaluations and other available information with respect to the applications described above, and having been duly designated by the Director, Bureau of Operating Rights, pursuant to § 312.8—finds that any subsequent Board action approving, denying, or otherwise acting upon SATA's application would not constitute a "major Federal action significantly affecting the quality of the environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969.

Dated at Washington, D.C., July 29, 1977.

BARBARA A. CLARK,
Chief, Legal Division,
Bureau of Operating Rights.

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Public Law 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Special Import Programs Division, Office of Import Programs, Washington, D.C. 20230, on or before August 23, 1977.

Amended regulations issued under cited Act, (15 CFR 301) prescribe the requirements applicable to comments.

A copy of each application is on file, and may be examined during ordinary Commerce Department business hours at the Special Import Programs Division, Department of Commerce, Washington, D.C. 20230.

Docket number: 77-00269. Applicant: University of North Carolina at Chapel Hill, Biological Sciences Research Center, 411 Preclinical Educational Building 228H, Chapel Hill, N.C. 27514. Article: Ultramicrotom, Model LKB 8800A and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for studies of tissues of the central and peripheral nervous systems, isolated cerebral capillaries, subcellular fractions, avian red cells, liver and kidney of animals. Human brain and brain tumors will also be studied. Fine structural changes produced by environmental pollutants and toxins will be investigated. Of particular interest are changes in the synaptic organization of the central nervous system and the myelin and axonal relationships in the peripheral nervous system. These fine structural systems will be further analyzed by applying seriologic techniques for obtaining morphometric analyses. Cytochemical studies for localizing putative transmitters will be undertaken. Also, immunocytochemical studies will be done in order to define the subcellular localization of enzymes and polypeptides important to brain function. Application received by Commissioner of Customs: June 28, 1977.

Docket number: 77-00271. Applicant: University of North Carolina, Department of Anatomy, 111 Swing Building 217H, Chapel Hill, N.C. 27514. Article: Scanning Electron Microscope, Model JSM-35U and Accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used for studies of the binding site distribution on normal vs. malignant cells. Hormones, IgG, oncogenic drugs, and pollutants will be conjudgated to either ferritin or hemocyanin and used as specific visual probes for the distribution of hormone, specific IgG, oncogenic drug pollutant binding sites. Changes in the distribution of such sites will be studied after challenging cells with low temperature, acid pH, divalent cations, and other physiological and non-physiological variables. In addition, the article will be used to train a limited number of graduate students and post doctoral fellows on an individual basis in the general areas of experimental cell and membrane biology. Application received by Commissioner of Customs: June 22, 1977.

Docket number: 77-00272. Applicant: University of North Carolina, Department of Anatomy, 111 Swing Building 217H, Chapel Hill, N.C. 27514. Article: Electron Microscope, Model JEM-100C (Standard Top Entry Type) and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used in high resolution studies of conformational and redistributional changes of proteins on or within organelle and cell membranes which occur during change in the state of organelle and cell function. The identification of specific proteins on or in cellular membranes will be investigated using antibody and other protein tagging techniques in a research program devoted to studies in the molecular anatomy of membranes. Protein identification and orientation in biomembranes as well as conformation of solubilized proteins, will be studied by high resolution freeze-cleaving electron microscopy, dark field electron microscopy and negative staining. In addition, the article will be used to train a limited number of graduate students and post doctoral fellows on an individual basis on the general areas of experimental cell and membrane biology. Application received by Commissioner of Customs: June 22, 1977.

Docket number: 77-00273. Applicant: University of North Carolina, Department of Anatomy, 111 Swing Building 217H, Chapel Hill, N.C. 27514. Article: Electron Microscope, Model JEM-100C (SEG) and accessories. Manufacturer: JEOL Ltd., Japan. Intended use of article: The article is intended to be used in high resolution TEM and SEM studies of the distribution and lateral translation diffusion of integral proteins in biomembrane and reconstituted membrane systems. Antibody ferritin conjugates will be utilized in SEM studies to follow protein diffusion laterally on the surface of biomembranes. Diffusion will be induced by thermotropic lipid phase transitions. Diffusion of transmembrane

proteins in the lateral plane of the hydrophobic interior of the lipid bilayer will be determined by high resolution freeze-fracture TEM. Energy dispersive X-ray analysis will be carried out on various organelle and membrane systems after binding of various divalent cations such as calcium and magnesium. The effect of divalent cations on the lateral translation diffusion of integral proteins and on theracotropic lipid phase transitions will be determined. Application received by Commissioner of Customs: June 22, 1977.

Docket number: 77-00274. Article: National Radio Astronomy Observatory, P.O. Box O, Socorro, New Mexico 87801. Article: 110 (each) Rigid Helix 20 mm waveguide, 52 (each) Flexible sheathed helix 20 mm waveguide 2.0m long, and 38 (each) Waveguide Tapers 20/60 and 50 (each) Coupling Sleeves. Manufacturer: Fujikura Cable Works, Ltd., Japan. Intended use of article: The article is intended to be used as part of the Very Large Array radio telescope to transmit radio wavelength radiation received from extraterrestrial objects to recording apparatus. The study of this radiation enables astronomers to study sources of energy, origin, and evolution of the universe. The waveguide coupling components when used in conjunction with TE 01 mode circular waveguide is the only feasible method of transmission for the bandwidth required. Application received by Commissioner of Customs: June 22, 1977.

Docket number: 77-00276. Applicant: National Radio Astronomy Observatory Associated Universities, Inc., 2010 N. Forbes Blvd., Suite 100, Tucson, Arizona 85705. Article: Repair of Varian Klystron Type VRB2113A30 SN70414J6. Manufacturer: Varian Associates of Canada. Intended use of article: The article is intended to be used as a phase-locked local oscillator in a millimeter wave radio astronomy receiver. This receiver is used in conjunction with a microwave antenna to measure the intensity, polarization frequency and direction of cosmic radiation. Application received by Commissioner of Customs: June 23, 1977.

Docket number: 77-00277. Applicant: University of Notre Dame, Radiation Laboratory—ERDA Contract EY-76-C-02-0038, Notre Dame, Indiana 46556. Article: Housing for Hanovia 1kW-UV-Lamp including elliptical mirror, plane mirror and igniter. Manufacturer: Physical-Chemistry Dept., University of Zurich, Switzerland. Intended use of article: The article is intended to be used as a source for high intensity UV irradiation which is needed to initiate transient radicals in liquids to study their structure and chemical reactivity by means of electron spin resonance. Application received by Commissioner of Customs: June 23, 1977.

Docket number: 77-00278. Applicant: The University of Michigan, Department of Physical Education, 401 Washtenaw Avenue, Ann Arbor, Michigan 48109. Article: Electron Microscope, Model EM 9S-2 and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for studying the structural characteristics of muscle and the associated intracellular changes with aging and exercise and the relationship of the capillary network to muscle function. The objectives of the experiments to be conducted are to characterize the structural changes associated with exercise, training, and aging found in the tissues of rats and humans. It is hoped that through these experiments it will be possible to ascertain methods to optimally achieve the training effect and/or to retard the aging process. In addition, the article will be used for educational purposes in the courses: Physiological and Kinesiological Bases of Human Movement, Physiological Bases of Physical Activity, Special Problems in Physical Education, and Exercise Physiology. The objectives of these courses are to associate the students with the physiological bases of movement and how muscle and heart are structured to allow for optimal movement. Application received by Commissioner of Customs: June 24, 1977.

Docket number: 77-00279. Applicant: College of Medicine and Dentistry of New Jersey, 100 Bergen Street, Newark, New Jersey 07103. Article: Electron Microscope, Model EM 301. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used for studies of nerve tissue, cardiac tissue, and renal tissue. Both experimental animals and specimens of diseased human tissue will be investigated. The animal experiments will be designed as models to elucidate pathological conditions that exist in humans; the human specimens will be studied to characterize changes within cells. The article will also aid post graduate and graduate students to become proficient in their given field of study. Application received by Commissioner of Customs: June 24, 1977.

Docket number: 77-00280. Applicant: Oral Roberts University, 7777 S. Lewis, Tulsa, Oklahoma 74171. Article: Electron Microscope, Model EM 400 HTG and Accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used for studying fixed biological material and prepared special materials used in dentistry. In addition, the article will be used as an aid in teaching and training graduate, medical and dental students in the following proposed courses: Normal Microscopic Anatomy (Histology, Cell Biology, Virology); pathology; dental materials; introduction to ultrastracture; introduction to electron microscopy; advanced methodology in microscopy; ultrastructural cytochemistry; problems course in electron microscopy. Application received by Commissioner of Customs: June 24, 1977.

Docket number: 77-00281. Applicant: National Institutes of Health, National Institute of Dental Research, 9000 Rockville Pike, Bethesda, Maryland 20014. Article: Electron Microscope, Model EM 10A and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used to examine biological material including: bone, tooth, salivary and lacrimal glands, tissue culture material, and negatively stained or heavy metal shadowed tissue component. Some inorganic material will also be studied. Areas under investigation will include the process of biological mineralization, examination of the crystalline structure, inorganic calcium phosphate and related compounds by transmission electron microscopy and electron diffraction, studies correlating the structure and function of exocrine gland acinar cells in both normal and pathological conditions. In addition, the article will be used to train people in basic electron microscopy, cytochemistry and energy dispersive X-ray analysis. Application received by Commissioner of Customs: June 27, 1977.

Docket number: 77-00284. Applicant: Arizona State University, Dept. of Botany & Microbiology, Tempe, Arizona 85281. Article: Electron Microscope, Model EM 201 and accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used for the investigation of the location of NADP dependent isocitrate dehydrogenase in the bacterium *Escherichia coli* employing electron immunocytochemical technics. The article will also be used to train graduate students and post-doctoral researchers in a formal course, Biological Electron Microscopy, BIO 512. Application received by Commissioner of Customs: June 27, 1977.

Docket number: 77-00285. Applicant: Blodgett Memorial Medical Center, 1840 Wealthy Street S.E., Grand Rapids, Michigan 49506. Article: Electron Microscope, Model EM 9S-2, TI-Coolwell Recirculating Cooling System, Model COOL-5W and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used in the pathology laboratory on human and animal tissues as an adjunct to light microscopy for diagnosis of pathologic conditions. Specific areas of research will be in brain and muscle disease comparing the electron microscopic findings with light microscopy, clinical history, physician exam, laboratory and x-ray studies. The information acquired will be used in many educational medical meetings at the Center. Application received by Commissioner of Customs: June 27, 1977.

Docket number: 77-00286. Applicant: Yale University, 10½ Hillhouse Avenue, New Haven, Connecticut 06520. Article: Laser, Model TEA-103-2, Multimode Front Optic, Model 505FCO$_2$ and Reflector, Model 503. Manufacturer: Lumonics Research Limited, Canada. Intended use of article: The article is intended to be used to create energetic plasma, and to initiate capacitor discharge in plasmas physics research. The materials to be investigated will include solid laser targets: carbon, lithium, etc. The article will also be used to teach op-

eration and use of lasers in plasma research. Application received by Commissioner of Customs: June 27, 1977.

Docket Number: 77–00287. Applicant: State University of New York—College at Purchase, Division of Natural Sciences, Purchase, N.Y. 10577. Article: Electron Microscope, Model EM 9S–2. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used in a general instructional program in cellular biology. The main courses of study are: (1) Cell Biology—An introduction to the structure and function of the cells of plants, animals and micro-organisms with emphasis on their description in contemporary chemical, physical and ultrastructural terms, (2) Ultrastructure Techniques—An intensive training period during which students will learn and practice basic techniques of cell and tissue fixation, imbedment, thin sectioning, mounting and staining sections, and (3) Senior Research Project—Coherent and significant scientific investigation. Application received by Commissioner of Customs: June 27, 1977.

Docket Number: 77–00288. Applicant: Washington State University, Division of Purchasing, Pullman, WA 99164. Article: Particle Electrophoresis Apparatus, Mark II and accessories. Manufacturer: Rank Brothers, United Kingdom. Intended use of article: The article is intended to be used for the investigation of surface charge of the outer cell surface of red blood cells, bacterial cells and lymphocytes. This study will be correlated with other experiments in the laboratory. The article will also be used by graduate students conducting Ph.D. thesis research in biochemistry. Application received by Commissioner of Customs: June 30, 1977.

Docket Number: 77–00289. Applicant: Arizona State University, Tempe, Arizona 85281. Article: Scanning Transmission Electron Microscope, Model HB5 and Accessories. Manufacturer: VG Microscopes Ltd., United Kingdom. Intended use of article: The article is intended to be used to explore the applications of high resolution scanning transmission electron microscopy for the study of structures and defects of thin crystals and the configurations of small groups of atoms or single atoms on surfaces. It will then be modified and developed for a range of new operational modes which have shown theoretically to offer important new capabilities of a type not accessible to conventional transmission electron microscopy. A program of research on the study of biological specimens will include methods for the resolution of heavy atom labels on macromolecules, the study of chromosome structures and the development of methods for three-dimensional reconstruction of the structures of thicker specimens. Application received by Commissioner of Customs: June 30, 1977.

Docket Number: 77–00290. Applicant: Vanderbilt University—School of Medicine, 21st Avenue South, Nashville, Tenn. 37232. Article: Ultramicrotome, Model LKB 8800A and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for preparing specimens of human and animal tissue to be studied in the field of muscular dystrophy. Investigations will include the ultrastructural studies on normal and abnormal skeletal muscle and other animal tissues in the study and treatment of muscular dystrophy. Application received by Commissioner of Customs: July 1, 1977.

Docket number: 77–00291. Applicant: Sandia Laboratories, Kirtland AFB East Albuquerque, New Mexico 87115. Article: Imacon 675/51 Ultra Fast Camera System and Accessories. Manufacturer: John Hadland Photonics Ltd., United Kingdom. Intended use of article: The article is intended to be used in carrying out several long-term experiments which require the acquisition of optical data in very short time frames. Specific experiments include continuing laser oscillator development studies, the iodine laser development program and laser produced plasma-target interaction studies and a planned rather extensive laser-materials damage program. Application received by commissioner of customs: July 5, 1977.

Docket number: 77–00293. Applicant: Massachusetts Institute of Technology, 77 Massachusetts Avenue, Cambridge, Mass. 02139. Article: Two (2) Recording Current Meters, Model 5 (RCM5) and one (1) Sea Link Type 325 Release/Transponder and accessories. Manufacturer: Aanderaa Instruments Co., Norway. Intended use of article: The article is intended to be used for studies of flow frequency current variability in two different configurations: near bottom in great depths of water (5000+m) and in conjunction with pressure sensors set on equatorial islands. Application received by Commissioner of Customs: July 6, 1977.

Docket number: 77–00294. Applicant: Stanford University, 851 Welch Road, Palo Alto, CA 94304. Article: Electron Microscope, Model EM 400 HTG, and Accessories. Manufacturer: Philips Electronic Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used for studies of tissue preparations taken from a number of commonly used experimental animals, e.g. rat, mouse, leech, and frog and from established cell culture lines. These studies will be directed toward understanding the sequence of steps in the formation of synapses and the mechanisms underlying synaptic development. Specific projects include: regenerating mammalian and amphibian neuromuscular junction, regenerating axons in the central nervous system of the leech, determining the factors that influence the growth of neurons during development. The article will also be used in the courses Neurobiology 212 and Neurobiology 209 to teach the structure of the nervous system at the cellular level and developmental neurobiology. Application received by Commissioner of Customs: July 6, 1977.

Docket number: 77–00295. Applicant: Sandia laboratories, Kirtland AFB East, Albuquerque, NM 87115. Article: TEA–100 CO_2 Lasers and Accessories. Manufacturer: Lumonics Roch Ltd., Canada. Intended use of article: The article is intended to be used to study chemical processes crucial to the development of an economical atomic iodine laser. The atomic iodine laser utilizes expensive starting chemicals which are destroyed during operation of the laser. Experiments will be conducted which are aimed at finding techniques for regenerating starting chemicals from iodine laser by products. Application received by Commissioner of Customs: July 6, 1977.

Docket number: 77–00296. Applicant: The Curators of the University of Missouri, 807 Stadium Road, Columbia, Missouri 65201. Article. AECL Radiation Therapy Treatment Couch Model 26. Manufacturer: Atomic Energy of Canada, Ltd., Canada. Intended use of article: The article is intended to be used in studies of the response of malignant neoplasms to radiation therapy. The experiments to be conducted are a continuation of on-going clinical research into the optimal radiotherapeutic time-dose-fractionation treatment protocols for cancer patients. The article will also be used in Radiologic Technology courses to train qualified radiation therapy technologists and in Nuclear Engineering courses to train qualified radiation therapy physicists. Application received by Commissioner of Customs: July 7, 1977.

Docket number: 77–00297. Applicant: Stanford University, 851 Welch Road, Palo Alto, CA 94304. Article: Electron Microscope, Model EM 201, Plate Camera, Watt Water Chiller and accessories. Manufacturer: Philips Electronics Instruments, NVD, The Netherlands. Intended use of Article: The article is intended to be used for studies of tissue preparations taken from a number of commonly used experimental animals, e.g., leech rat, mouse, and frog. Studies will be directed toward understanding the structure, function and maintenance of synaptic connections between nerve cells and between nerve and muscle cells. The objectives of the experiments conducted are to learn how synapses function, how they can be modified, and how interaction between pre- and post-synaptic cells influence their maintenance. In addition, the article will be used in the courses Neurobiology 212 and Neurobiology 209 to teach the structure of the nervous system at the cellular level. Application received by Commissioner of Customs: July 7, 1977.

Maritime Administration

[Docket No. S–567]

LYKES BROS. STEAMSHIP CO., INC.

Application

Notice is hereby given that Lykes Bros. Steamship Co., Inc. has applied for permission to deviate the SS *Louise Lykes*, or substitute, operating outbound on its Line D (Trade Route No. 22), to Longview, Washington, to discharge approximately 1,200 measurement tons (950 long tons) of nuclear reactor components on or about September 18, 1977, which are scheduled for loading at New Orleans, Louisiana, on approximately September 1, 1977. In order to carry cargo in the domestic trade, Lykes must first obtain written permission from the Maritime Administration under section 805 (a) of the Merchant Marine Act, 1936, as amended.

Interested parties may inspect the foregoing application in the Office of the Secretary, Maritime Administration, Room No. 3099B, Department of Commerce Building, Fourteenth and E Streets, NW., Washington, D.C. 20230.

Any person, firm, or corporation having any interest (within the meaning of section 805(a)) in such application and desiring to be heard on issues pertinent to section 805(a) and desiring to submit comments or views concerning the application must, by close of business on August 10, 1977 file same with the Secretary, Maritime Administration, in writing, in triplicate, together with petition for leave to intervene which shall state clearly and concisely the grounds of interest, and the alleged facts relied on for relief.

If no petitions for leave to intervene are received within the specified time or if it is determined that petitions filed do not demonstrate sufficient interest to warrant a hearing, the Maritime Administration will take such action as may be deemed appropriate.

In the event petitions regarding the relevant section 805(a) issues are received from parties with standing to be heard, a hearing will be held, the purpose of which will be to receive evidence under section 805(a) relative to whether the proposed operations (a) could result in unfair competition to any person, firm, or corporation operating exclusively in the coastwise or intercoastal service, or (b) would be prejudicial to the objects and policy of the Act relative to domestic trade operations.

(Catalog of Federal Domestic Assistance Program No. 11.504 Operating-Differential Subsidies (ODS).)

By Order of the Assistant Secretary for Maritime Affairs.

Date: July 28, 1977.

JAMES S. DAWSON, JR.,
Secretary.

National Oceanic and Atmospheric Administration

SOUTH ATLANTIC FISHERY MANAGEMENT COUNCIL

Public Meeting

Notice is hereby given of a meeting of the South Atlantic Fishery Management Council, established by Section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94–265).

The South Atlantic Fishery Management Council has authority, effective March 1, 1977, over fisheries within the fishery conservation zone adjacent to the east coast of Florida, Georgia, North Carolina, and South Carolina. The Council will, among other things, prepare and submit to the Secretary of Commerce fishery management plans with respect to the fisheries within its area of authority, prepare comments on foreign fishing applications, and conduct public hearings.

The Council will meet Tuesday through Thursday, August 23, 24, and 25, 1977, at the Downtowner Motor Inn, 201 West Oglethorpe Avenue, Savannah, Ga. The meeting will convene at 1:30 p.m. on August 23 and adjourn at about noon on August 25. The daily sessions will start at 9 a.m. and adjourn at 5 p.m., except as otherwise noted. The meeting may be extended or shortened depending on progress on the agenda.

Proposed Agenda

1. Discussions pertinent to progress on management plan development for billfish, snapper grouper, and king and Spanish mackerel.
2. Election of Chairman and Vice-Chairman.
3. Consideration of administrative and technical matters as deemed necessary.
4. Other management business.

At the same location as the Council meeting, on the evening of August 22, 1977, a public meeting will be held relative to development of the billfish fishery management plan which has been published separately in the FEDERAL REGISTER.

This meeting is open to the public and there will be seating for a limited number of public members available on a first-come, first-served basis. Members of the public having an interest in specific items for discussion are also advised that agenda changes are at times made prior to the meetings. To receive information on changes, if any, made to the agenda, interested members of the public should contact, on or about August 16, 1977:

Mr. Ernest D. Premetz, Executive Director, South Atlantic Fishery Management Council, Southpark Building, Suite 306, #1 Southpark Circle, Charleston, S.C. 29407 (803–571–4366).

At the discretion of the Council, interested members of the public may be permitted to speak at times which will allow the orderly conduct of official business. Interested members of the public who wish to submit written comments should do so by addressing the Executive Director at the aforementioned address. To receive due consideration and to facilitate inclusion of these comments in the record of the meetings, typewritten statements should be received within 10 days after the close of the meetings.

Dated: August 1, 1977.

WINFRED H. MEIBOHM,
Associate Director,
National Marine Fisheries Service.

[FR Doc.77-22396 Filed 8-2-77;8:45 am]

COMMUNITY SERVICES ADMINISTRATION

[CSA Instruction 6800–9]

UNIFORM FEDERAL STANDARDS

Monitoring and Reporting Program Performance; Interim Instructions

On April 28, 1977, the Community Services Administration published in the FEDERAL REGISTER (42 FR 21623) a proposed rule on Montoring and Reporting Performance Requirements (CSA Instruction 6800–9/§ 1050.80) which was accompanied by a request for comments from interested parties. Twenty four comments were received from the public and the proposed rule and its accompanying form have been modified to reflect the comments where warranted.

Final publication of the policy is awaiting review and approval of the form by the Office of Management and Budget as required by OMB Circular A–40. Therefore, the provisions of OEO Instruction 7031–1, Grantee Program Progress Review, remain in effect and grantees should continue to submit the form promulgated by that Instruction (CSA Form 440) at the time and for the periods indicated in the Instruction until such time as § 1050.80 (CSA Instruction 6800–9) is published as a final rule.

GRACIELA (GRACE) OLIVAREZ
Director.

CONSUMER PRODUCT SAFETY COMMISSION

[Petition CP 75–4]

AIRLESS PAINT SPRAY GUNS

Denial of Petition

AGENCY: Consumer Product Safety Commission.

ACTION: Denial of Petition.

SUMMARY: In this document, the Commission denies a petition to issue a consumer product safety rule for airless paint spray guns because, in light of enforcement action the Commission has taken, and the current precautionary labeling practices of industry, the Commission has decided no regulatory action is necessary.

FOR FURTHER INFORMATION CONTACT:

Bert Simson, Office of Program Management, Consumer Product Safety Commission, Washington, D.C. 20207, 301–492–6554.

SUPPLEMENTARY INFORMATION: Section 10 of the Consumer Product Safety Act (15 U.S.C. 2059) provides that any interested person may petition the Commission to begin a proceeding to issue a consumer product safety rule. Section 10 also provides that if the Commission denies such a petition, it shall publish its reasons for denial in the FEDERAL REGISTER.

In a letter dated September 13, 1974 to Dr. Albert Esch, the Commission's Medical Director, Dr. Richard F. Edlich requested that the Commission issue a consumer product safety rule for high pressure airless paint spray guns. He stated that if the high pressure jet of paint from such a gun strikes an extremeity "even though the nozzle is some distance away, the paint will be blasted through the skin and will spread rapidly through the fascial planes and tendon sheaths. The end result of the majority of these accidental injuries is amputation despite immediate treatment." To alleviate this hazard, Dr. Edlich suggested development of safety devices to protect the consumer who uses spray paint guns, proper instructions for users, and also the design of safety gloves to be used with the product.

After the staff developed further information regarding this product, the Commission considered the petition on May 8, 1975. At that time, the Commission decided to address the hazards of airless paint spray guns through action under section 15 of the Consumer Product Safety Act (15 U.S.C. 2064), which allows the Commission to take action against manufacturers, distributors, and retailers of consumer products that create substantial product hazards. The Commission directed the staff to identify the manufacturers, private labelers and distributors of airless paint spray guns being primarily marketed for use by consumers that could, in the staff's judgment, present a substantial hazard to consumers. Proceedings would then be instituted under section 15 of the CPSA.

After a full investigation, the staff initiated one enforcement action under section 15 against a manufacturer of airless paint spray guns (In the Matter of "Spray Tech Corporation, Wagner/Spray Tech Corporation," and "Peter E. Bader," CPSC Docket No. 75–7). The Commission accepted a consent agreement involving a retrofit of affected paint guns, and dismissed that action by order dated October 14, 1975.

The Commission recently considered again the need for regulatory action as to airless spray guns. The staff found that airless paint spray guns for consumer use are either labeled or supplied with cautionary tags and instructions which caution the user not to point the spray gun at any part of the body. In light of the above enforcement action and the precautionary labeling practices of airless paint spray gun manufacturers, the Commission has decided that no regulatory action is necessary. Accordingly, the Commission has denied Dr. Edlich's petition.

Copies of the petition and the staff's briefing packages to the Commission on the petition and documents related to the enforcement proceeding may be seen in or obtained from the Office of the Secretary, Consumer Product Safety Commission, 3rd Floor, 1111 18th Street NW., Washington, D.C. 20207, during working hours Monday through Friday.

Dated: July 29, 1977.

SADYE E. DUNN,
Deputy Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF SCIENTIFIC ADVISORY BOARD

Meeting

JULY 25, 1977.

The meeting of the USAF Scientific Advisory Board ad hoc Committee on Avionics Acquisition scheduled for July 28 and 29, 1977 in the Pentagon, as published FR Doc. 77–19029 (42 FR 34364 July 5, 1977) has been cancelled. This meeting will not be rescheduled.

For further information contact the Scientific Advisory Board Secretariat at (202) 697–4811.

FRANKIE S. ESTEP,
Air Force Federal Register Liaison Officer, Directorate of Administration.

[FR Doc 77-22217 Filed 8-2-77;8:45 am]

USAF SCIENTIFIC ADVISORY BOARD

Meeting

JULY 21, 1977.

The USAF Scientific Advisory Board ad hoc Committee on Cruise Missile Technology will hold a meeting on September 23, 1977 from 9:00 a.m. to 5:00 p.m. at Langley AFB, Virginia

The Committee will receive classified briefings on the Tactical Air Command concept of operations vis-a-vis cruise missiles.

The meeting concerns matters listed in Section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly the meeting will be closed to the public.

For further information, contact the Scientific Advisory Board Secretariat at (202) 697–4648.

FRANKIE S. ESTEP,
Air Force Federal Register Liaison Officer, Directorate of Administration.

[FR Doc 77-22291 Filed 8-12-77;8:45 am]

Department of the Navy

REGIONAL DISCHARGE REVIEW SYSTEM

Hearing Locations

In FEDERAL REGISTER Document 75–27207, published on October 9, 1975, 40 FR 47524, the Department of the Navy published notice that, beginning in November, 1975, the Naval Discharge Review Board would convene and conduct hearings for a number of days each quarter in certain announced locations. In FEDERAL REGISTER Document 76–20384, published on July 15, 1976, 41 FR 29190, the Department of the Navy published notice that approval had been granted for the Naval Discharge Review Board to conduct hearings, within assigned resources, on a noncontinuing basis, in cities other than the announced locations when the concentration of petitioners in a geographical area so warrants. This expanded availability has facilitated the opportunity for personal appearances before the Board and the initially announced hearing schedule has been modified accordingly.

The following itinerary for August, 1977, through January, 1978, has been approved, but remains subject to modification if necessary:

August—Dallas, TX; Kansas City, MO; Columbus, OH.
September—San Diego, CA; San Francisco, CA; Salt Lake City, UT.
October—Chicago, IL; Minneapolis St Paul, MN.
November—Atlanta, GA; New Orleans, LA; (Tampa, FL if required).
January—Denver, CO; Seattle, WA; San Francisco, CA; San Diego, CA.

Any former member of the Navy or Marine Corps who desires to obtain a review of his or her discharge, either in Washington, D.C. or in one of the other cities in which the Board will conduct hearings, should file an application with the Board using DD Form 293. If a personal appearance is requested, the petitioner should indicate which scheduled location is preferred. Application forms (DD 293) may be obtained from, and the completed application should be mailed to the following address:

Naval Discharge Review Board,
Suite 905,
801 North Randolph Street,
Arlington, VA 22203

Notice is hereby given that, since the foregoing itinerary is subject to modification and since, following receipt of a new application, the Naval Discharge Review Board must obtain the petitioner's military records before a hearing may be scheduled, the receipt of an application by the Naval Discharge Review Board is not tantamount to scheduling such hearing. Petitioners and/or their counsel will be notified by mail of the date and place of their scheduled hearing when personal appearance is requested.

For further information contact:

Captain John G. Shaw, U.S. Navy, Executive Secretary, Naval Discharge Review Board, Suite 905, 801 North Randolph Street, Arlington, VA 22203, 202–692–4628.

Dated: July 29, 1977.

K. D. LAWRENCE,
Deputy Assistant Judge Advocate General (Administrative Law).

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

GENERAL ADVISORY COMMITTEE

Meeting

AUGUST 1, 1977.

Pursuant to provisions of the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770) in accordance with the purpose of Section 26 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2036) and Section 104(d) of the Energy Reorganization Act of 1974 (42 U.S.C. 2814), notice is hereby given that the General Advisory Committee will hold a meeting on August 23 in Washington, D.C. The meeting, which is open to the public, will be held in Room 4222C at ERDA Headquarters Building, 20 Massachusetts Avenue NW., Washington, D.C. The agenda is as follows:

9:00—Discussion of Solar Related Programs with the Division of Basic Energy Sciences.
9:30—Discussion of Solar Related Programs with the Assistant Administrator for Conservation.
10:30–12 Noon—Solar Study (discussion with Stanford Research Institute).
2:00–5:00—Solar Study (discussion with Stanford Research Institute).

Practical considerations may dictate alterations in the above agenda or schedule.

The Chairman is empowered to conduct the meeting in a manner that in his judgment will facilitate the orderly conduct of business.

With respect to public participation in agenda items, scheduled above, the following requirements shall apply:

(a) Persons wishing to submit written statements on agenda items may do so by mailing 13 copies thereof, postmarked no later than August 15, 1977, to the Secretary, General Advisory Committee, U.S. Energy Research and Development Administration, Washington, D.C. 20545. Comments shall be based on the above agenda items. Minutes of the meeting will be kept open for 30 days for the receipt of written statements for the record.

(b) Information as to whether the meeting has been rescheduled or relocated can be obtained by a prepaid telephone call to the Office of the Secretary of the Committee on 202–376–4678 between 8:30 a.m. and 5 p.m., eastern time. Members of the public who are interested in attending are urged to call since the location or schedule may change.

(c) Questions at the meeting may be propounded only by members of the General Advisory Committee.

(d) Seating to the public will be made available on a first-come, first-served basis.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the course of the meeting, will be permitted both before and after the meeting and during any recess. The use of equipment will not, however, be allowed while the meeting is in session.

(f) Copies of the minutes will be made available for copying, following their certification by the Chairman, in accordance with the Federal Advisory Committee Act, at the Energy Research and Development Administration's Public Document Room, 20 Massachusetts Avenue NW., Washington, D.C. 20545, upon payment of all charges required by law.

HARRY PEEBLES,
Deputy Advisory Committee Management Officer.

[Report No. 868]

FEDERAL COMMUNICATIONS COMMISSION

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

JULY 25, 1977.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (see § 309(c) of the Communications Act), applications filed under Part 68, applications filed under Part 63 relative to small projects, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and Section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's Rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier: (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. [See § 1.227(b)(3) and 21.30(b) of the Commission's Rules.]

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE:

21424–CD–P–77 Airsignal International, Inc. (KIF650), C.P. for additional Standby facilities to operate on 72.96 MHz, Control at Loc. No. 1: Atop Red Mountain, Birmingham, Alabama.
21490–CD–P–77 Airsignal International, Inc (KOA796), C.P. for additional Standby facilities to operate on 72.28 MHz, Control at Loc. No. 1: 4636 S.W. Council Crest Drive, Portland, Oregon.
21492–CD–MP–(2)–77 Airsignal of Colorado, Inc. (KWU523), Mod. of C.P. for additional Standby Control facilities to operate on 75.46 MHz at Loc No. 1: 22 Miles South of Golden, Colorado.
21753–CD–P–77 Tel-Illinois, Inc. (KUC903), C.P. for additional Control facilities to operate on 454.300 MHz at a new Loc. No. 3: Adjacent to south edge of Indian Hills Country Club, Mt. Vernon, Illinois
21754–CD–P–77 QMC Paging (new), C.P. for a new 1-way signaling station to operate on 43.58 MHz to be located at Knox Butte, 2.1 miles East of Albany, Oregon.
21755–CD–P–77 Mobile Communication Service, Inc. (new), C.P. for a new 1-way signaling station to operate on 158.70 MHz to be located at 551 State Street, Meadville Pennsylvania.
21756–CD–P–77 Southwestern Bell Telephone Company (KKD290), C.P. to change antenna system and replace transmitter operating on 152.63 MHz located 3.8 mi NE Lingleville, Texas.
21757–CD–P–77 Indiana Bell Telephone Company, Inc. (KSD323), C.P. to relocate facilities, change antenna system and replacement transmitter operating on 152.57 MHz to be located at 2727 Central Avenue, Columbus, Indiana.
21758–CD–P–77 Empire Paging Corporation (KRS674), C.P. for additional facilities to operate on 454.150 MHz at a new Loc. No. 18: 7th & Linden St., Northgate Apartments, Camden, New Jersey.
21759–CD–P–77 Airsignal International of Philadelphia, Pennsylvania, Inc. (KGC223), C.P. for additional Standby Control facilities to operate on 72.96 MHz at Loc No 7: Lewis Tower Bldg., 225 S. 15th Street, Philadelphia, Pennsylvania.
21760–CD–AL–77 Arthur Sciotto and Kathleen Sciotto, d.b.a. Neveda Mobile Telephone Company, Consent to Assignment of License from Arthur Sciotto and Kathleen Sciotto, d.b.a. Neveda Mobile Telephone Company, Assignor to Nevtelco., Inc., Assignee. Station: KSV953, Elko, Nevada.
21761–CD–AL–77 North Carolina Telephone Company Consent to Assignment of License from North Carolina Telephone Company, Assignor to Mid-Carolina Telephone Company, Assignee. Station: KIY787, Mathews, North Carolina.

21762–CD–P–77 **Intrastate Radio Telephone, Inc. of San Francisco (KMA833), C.P. for additional facilities to operate on 152.12 MHz at Loc. No. 1: Wells Fargo Building, 44 Montgomery Street, San Francisco, California.**

21763–CD–P–77 L. D. Garvey and J. D. Garvey, dba. Radiofone (KWU274), C.P. for additional facilities to operate on 35.58 MHz at a new Loc. No. 2: 2 miles WNW. of Tickfaw, Louisiana.

21764–CD–P–77 **Comex, Incorporated (KCC–797), C.P. for additional facilities to operate on 454.300 MHz at Loc. No. 1: Uncanoonuc, New Hampshire.**

21765–CD–P–77 Tel-Rad Message Center (KEC620), C.P. for additional facilities to operate on 152.15 MHz at a new Loc. No. 2: 88 Derrick Drive, Fishkill, New York.

21766–CD–P–(5)–77 Two-Way Radio of Carolina, Inc. (KIY441), C.P. to relocate facilities and change antenna system operating on 152.03, 152.06, 152.09, 152.15 and 152.21 MHz at Loc. No. 1: 400 S. Tryon Street, Charlotte, North Carolina.

21767–CD–AL–(2)–77 T. D. Miller, III Consent to Assignment of License from T. D. Miller, III, ASSIGNOR to T. D. Miller, III Mobile Communications, Inc. Stations: KRH660 and KUA283, Burlington, North Carolina.

21768–CD–77 Telephone Communications Inc. (new), C.P. for a new 1-way signaling station to operate on 43.22 MHz to be located at 5301 Central Avenue, N.E., Albuquerque, New Mexico.

MAJOR AMENDMENT.

20613 CD P–(02)–77 Airsignal International, Inc., Sarasota, Florida (KIJ358) Amend to change the Control frequency to 2174.0 MHz and to change the Repeater frequency to 2124.0 MHz. All other particulars are to remain as reported on PN No. 842, dated January 24, 1977.

RURAL RADIO:

60349–CR–ML–77 Business Communications, Inc., d./b./a. New Orleans Mobilfone (KKB33). Mod. of License for additional facilities to operate on 158.55, 158.61 and 158.67 MHz to be located in any temporary fixed location within the territory of the grantee.

21503–CD–ML–77 The Mountain States Telephone and Telegraph Company (KAR 68). Mod. of License for additional facilities to operate on 152.84 MHz located in any temporary fixed location within the territory of the grantee.

POINT TO POINT MICROWAVE RADIO SERVICE

3142–CF–P–77 The Mountain States Telephone and Telegraph Company (KPH75), Glendive Jct. 11 miles E. of Glendive, Montana. Lat. 47°07'05" N., Long. 104°28'35" W. C. P. to replace antenna on frequencies 6019.3H, 10756V MHz toward Richey, Montana.

3143–CF–P–77 Same (KPH76), 7.6 miles SE of Richey, Montana. Lat. 47°35'17" N., Long. 104°55'12" W. C.P. to add frequencies 6241.7H MHz toward Vida; change polarization from horizontal to vertical on 6241.7 MHz toward Glendive; replace transmitter and move and replace antenna on 11685V MHz toward Glendive and on 11405V MHz toward Vide.

3144–CF–P–77 **Same (KPH77), 6.9 miles NNW. of Vide, Montana. Lat. 47°55'35" N., Long. 105°30'36" W. C.P. to change frequencies 5937.8V to 6241.7H MHz toward Richey; replace transmitter and move and replace antenna on 10955V MHz toward Richey**

FM BROADCAST APPLICATIONS READY AND AVAILABLE FOR PROCESSING

Adopted: July 22, 1977.

Released: July 29, 1977.

Notice is hereby given, pursuant to Section 1.573(d) of the Commission's Rules, that the FM broadcast applications listed in the attached Appendix will be considered as ready and available for processing on September 5, 1977. Since the listed applications are timely filed and mutually exclusive with the earlier-filed and cut-off application of Indianapolis Broadcasting, Inc., File No. BPH–10164, no other applications which involve conflict with these applications may be filed. Rather, the purpose of this Notice is to establish a date by which the parties to the forthcoming comparative hearing may compute the deadlines for filing amendments as a matter of right under § 1.522(a) (2) of the Rules and pleadings to specify issues pursuant to § 1.584.

The attention of any party in interest desiring to file a petition to deny any listed application pursuant to Section 309(d)(1) of the Communications Act of 1934, as amended, is directed to § 1.580(i) of the Commission's Rules for provisions governing the time for filing and other requirements relating to such pleadings.

FEDERAL COMMUNICATIONS COMMISSION.
VINCENT J. MULLINS,
Secretary.

1979 WORLD ADMINISTRATIVE RADIO CONFERENCE, SATELLITE BROADCASTING SERVICE GROUP

Change in Meeting Date

JULY 28, 1977.

Pursuant to Pub. L. 92–463, notice is hereby given of the following meeting for August 1977.

WARC–79 SATELLITE BROADCASTING SERVICE GROUP

The Satellite Broadcasting Service Group, previously scheduled to meet at 9:30 a.m. on Friday, August 12, 1977, will meet instead on Wednesday, August 24, 1977 at 9:30 a.m. This meeting will be held in room 8210 of the Commission's offices at 2025 "M" Street NW., Washington, D.C. 20554.

The agenda will be as follows:

1. Call to Order and Announcements by the Chairman.

2. Approval of Minutes of Previous Meeting.

3. Discussion of Comments for Fifth Notice of Inquiry in Docket 22071 and possible drafting of Reply Comments.

4. Reports from Task Groups.
5. Further Discussion.
6. Next Meeting Date and Adjournment.

The above meeting is open to broadcast industry representatives and interested members of the general public.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

FEDERAL ENERGY ADMINISTRATION

CASES FILED WITH THE OFFICE OF EXCEPTIONS AND APPEALS

Week of June 24 Through July 1, 1977

Notice is hereby given that during the week of June 24 through July 1, 1977, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Federal Energy Administration's Office of Exceptions and Appeals.

Under the FEA's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the FEA action sought in such cases may file with the FEA written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first.

ERIC J. FYGI,
Acting General Counsel.

JULY 28, 1977.

APPENDIX.—*List of cases received by the Office of Exceptions and Appeals, week of June 24 through July 1, 1977*

Date	Name and location of applicant	Case No.	Type of submission
June 24, 1977	Beacon Oil Co. Hanford, Calif. (If granted: The Beacon Oil Co. would receive an exception to the provisions of sec. 212.83(e)(2)(iii)(E) to permit it to adjust its refinery output during May 1973 for purposes of computing its increased nonproduct costs beginning Jan. 1, 1977.)	FEE-4368	Price exception (sec. 212.-83(e)(2)(iii)(E)).
Do	City of Seattle, Seattle, Wash. (If granted: U.S. refiners would receive an exception from the requirement that the number of barrels of bunker C fuel oil exported to the B. C. Hydro Burrard electrical generating station be excluded from the calculation of their crude oil runs to stills for purposes of the old oil entitlements program.)	FEE-4370	Exception from old oil entitlements program (sec. 211.67(d)(2)).
Do	Dorchester Gas Corp. American Petrofina, Inc., Washington, D.C. (If granted: The Dorchester Gas Corp. would receive various types of administrative relief from the mandatory petroleum allocation and price regulations in connection with its acquisition of the Mount Pleasant refinery from American Petrofina, Inc.)	FEE-4369	Exception to mandatory petroleum allocation and price regulation (pt. 211, pt. 212, and pt. 213).
Do	Ginther Gas Processing, Houston, Tex. (If granted: Ginther Gas Processing would be permitted to increase its prices for natural gas liquid products to reflect nonproduct cost increases in excess of $0.005 gal and would be permitted to retroactively adjust its May 1973 base price for propane.)	FEE-4371	Price exception (sec. 212.-163(a) and sec. 212.-165(iii)).
Do	Powerine Oil Co., Washington, D.C. (If granted: The FEA would increase the entitlement exception relief which was granted to the Powerine Oil Co. in a decision and order issued to the firm on Apr. 11, 1977.)	FEX-0108	Supplemental order.
Do	Sun Co., Inc., Dallas, Tex. (If granted: Sun Co., Inc., would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at the Jameson plant and the Steedman plant.)	FEE-4372	Price exception (sec. 212.165).
Do	Sun Co., Inc., Dallas, Tex. (If granted: Sun Co., Inc., would receive an extension of the exception relief granted in the FEA's Apr. 4, 1977, decision and order to permit the firm to increase its prices for natural gas natural gas liquid products produced at the Carney, Concho, and Tonkawa plants to reflect nonproduct cost increases in excess of $0.005 gal.)	FXE-4376 FXE-4378 FEE-4373	Extension of exception relief granted in *Sun Co., Inc.* case Nos. FXE-3889, FXE-3890, and FXE-3900 through FXE-39-5 (decided Apr. 4, 1977) (unreported decision).
Do	Texaco, Inc., Houston, Tex. (If granted: Texaco, Inc., would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at the Dover Hennessey plant and the Elmwood plant.)	FEE-4374 FEE-4375	Price exception (sec. 212.165).
Do	UCO Oil Co., Whittier, Calif. (If granted: The FEA's May 27, 1977, decision and order would be rescinded and the UCO Oil Co. would be assigned a new, lower priced supplier of motor gasoline to replace its base period suppliers, Tesoro and Macmillan.)	FXA-1372	Appeal of decision and order in *UCO Oil Co.*, 5 FEA par. ——— (May 27, 1977).
June 27, 1977	DeMartin Truck Lines, San Francisco, Calif. (If granted: The FEA's June 10, 1977, remedial order would be rescinded and DeMartin Truck Lines would not be required to refund overcharges made on sales of propane.)	FRA-1373 FRS-1373	Appeal of FEA region IX's remedial order dated June 10, 1977. Stay requested.
Do	Good Hope Industries, Inc., Springfield, Mass. (If granted: Good Hope Industries, Inc., would be granted retroactive relief in the form of refunds for import fees paid for the import of 136,334 bbl of naphtha, imported as unfinished oils on June 15, 1977, under fee-paid license No. FF-50038.)	FPI-0123	Exception from base-fee requirements (sec. 213.35).

Date	Name and location of applicant	Case No.	Type of submission
Do	Independent Oil Producers' Agency, Long Beach, Calif. (If granted: The FEA's June 10, 1977, ancillary remedial order would be partially rescinded to eliminate any requirement that the Independent Oil Producers' Agency refund to Union Oil Co. of California any and all refunds received by IOPA from Berry Holding Co. as directed and provided for in the FEA's June 10, 1977, remedial order issued to Berry.)	FEA-1375	Appeal of FEA region IX's ancillary remedial order issued June 10, 1977.
Do	Louisiana Land & Exploration Co., New Orleans, La. (If granted: The FEA's May 27, 1977, decision and order would be modified and the Louisiana Land & Exploration Co. would be granted additional relief from the provisions of 10 CFR 211.63(b)(1).)	FXA-1376	Appeal of decision and order in *Louisiana Land & Exploration Co.*, 5 FEA par. ——— (May 27, 1977).
Do	Marathon Oil Co./Ingram Corp., Washington, D.C. (If granted: The FEA's May 26, 1977, decision and order would be modified and the FEA would issue an order assigning Ingram as a base period purchaser of unleaded gasoline from Marathon Oil Co.)	FXA-1377	Appeal of decision and order in *Marathon Oil Co./Ingram Corp., Public Oil Co., Inc., Hamilton Oil Co., Mid-Continent Inc.*, 5 FEA par. ——— (May 26, 1977).
Do	Newhall Refining Co., Inc., Newhall, Calif. (If granted: Newhall Refining Co., Inc., would be granted an exception which would permit it to recalculate the passthrough of increased nonproduct costs on a proportional basis for the period Jan. 1, 1975, through Jan. 31, 1976.)	FEE-4379	Exception to sequential nonproduct cost passthrough.
Do	Peters Fuel Corp. Oakland, Md. (If granted: The FEA's Mar. 30, 1977, decision and order would be rescinded and the Peters Fuel Corp. would be permitted to increase its prices for fuel oil above the maximum level permitted under sec. 212.93.)	FXA-1374	Appeal of decision and Order in *Peters Fuel Corp.*, 5 FEA par. 83,081 (Mar. 30, 1977).
Do	Powerine Oil Co., Washington, D.C. (If granted: The Powerine Oil Co. would be granted an exception which would permit it to recalculate the passthrough of increased nonproduct costs on a proportional basis for the period Jan. 1, 1975, through Jan. 31, 1976.)	FEE-4381	Exception to sequential nonproduct cost passthrough.
Do	R. W. Tyson Producing Co., Inc., Jackson, Miss. (If granted: Crude oil produced from properties located in the Ovett field, Jones County, Miss. and in the Glazier field, Perry County, Miss., would be sold as stripper well crude oil.)	FEE-4380	Price exception (sec. 212.74).
June 28, 1977	C. O. Johnson Oil Co., Knoxville, Tenn. (If granted: The C. O. Johnson Oil Co. would not be required to file the following forms with the Federal Energy Administration: form P112-M-1 (No. 2 Heating Oil Supply/Price Monitoring Report); Form P314-M-0 (Monthly Survey of Distillate and Residual Fuel Oil Sales to Ultimate Consumers); Form P339-M-0 (Distillate Import Monitoring Report); and Form P131-S-1.)	FEE-4383	Exception to reporting requirement (sec. 211.127).
Do	William P. Carr, Dallas, Tex. (If granted: Crude oil produced from the Stratmann lease located in Ellsworth County, Kans., would be sold at prices in excess of the ceiling price permitted under sec. 212.73.)	FEE-4384	Price exception (sec. 212.73).
Do	Condor Tank Cleaning Co., Abilene, Tex. (If granted: Crude oil recovered by Condor Tank Cleaning Co. would be sold at price levels in excess of the ceiling price permitted under the mandatory petroleum price regulations.)	FEE-4382	Price exception (sec. 212.74).
Do	Edgington Oil Co. (New Edgington Corp.). (If granted: The FEA would review the entitlements granted to Edgington Oil Co. (New Edgington Corp.) during the period Sept. 25 through Dec. 31, 1976, to determine whether the level of exception relief approved was appropriate.)	FEX-0107	Review of entitlements exception relief (supplemental order).
Do	Gibson Oil & Refining Co., Rodeo, Calif. (If granted: The Gibson Oil & Refining Co. would be permitted to earn small refiner bias entitlements while rebuilding its refinery with respect to crude oil runs to stills attributable to processing agreements for the account of Gibson with other refiners.)	FEE-4387	Exception from the old oil entitlements program (sec. 211.67).
Do	Horne Products, Inc., Americus, Ga. (If granted: Horne Products, Inc., would be assigned a new, lower priced supplier of propane to replace its base period supplier, the Enterprise Products Co.)	FEE-4386	Exception to change base period supplier (sec. 211.9).
Do	Kewanee Oil Co., Tulsa, Okla. (If granted: The Kewanee Oil Co. would receive an extension of the relief granted in the FEA's Feb. 22, 1977, decision and order and crude oil produced and sold from the South Stanley Field located in Osage County, Okla., would be sold at upper tier ceiling prices as specified in 10 CFR, pt 212, subpt. D.)	FXE-4386	Extension of exception relief granted in *Kewanee Oil Co.*, 5 FEA par. 83,070 (Feb. 22, 1977).
Do	Orange Fuel Distributors, Orange, Va. (If granted: The FEA's June 14, 1977, remedial order would be rescinded and Orange Fuel Distributors would not be required to refund overcharges made on sales of No. 2 fuel oil and kerosene.)	FRA-1379	Appeal of FEA region III's remedial order dated June 14, 1977.
Do	Pacific Northern Oil Corp., Seattle, Wash. (If granted: The Pacific Northern Oil Corp. would be permitted to import 1,800,000 bbl of finished product and 180,000 bbl of motor gasoline on a license fee-free basis during the current allocation period.)	FPI-0124	Exception from base-fee requirements (sec. 213.35).
Do	Plateau, Inc., Washington, D.C. (If granted: Plateau, Inc., would be granted an exception to permit it to recalculate on a proportional basis for the period Jan. 1, 1975, through Jan. 31, 1976, the passthrough of increased nonproduct costs.)	FEE-4388	Exception to sequential nonproduct cost passthrough.

Date	Name and location of applicant	Case No.	Type of submission
De.....	Rivkin Associates, Inc., Washington, D.C. (If granted: The FEA's June 15, 1977, information request denial would be modified and Rivkin Associates, Inc., would receive access to additional data concerning the technical proposals submitted to the FEA under RFP 70068-00.)	FFA-1378	Appeal of the FEA's information request denial dated June 15, 1977.
June 30, 1977	Warrior Asphalt Co. of Alabama, Inc., Washington, D.C. (If granted: The Warrior Asphalt Co. of Alabama, Inc., would be granted an exception to permit it to recalculate on a proportional basis for the period Jan. 1, 1975, through Jan. 31, 1976, the passthrough of increased nonproduct costs.)	FEE-4398	Exception to sequential nonproduct cost passthrough.
June 30, 1977	Union Oil Co. of California, Schaumburg, Ill. (If granted: The June 6, 1977, interpretation issued to the Union Oil Co. of California would be rescinded and 6 consignees which sell allocated products under an agreement with Union would not be considered wholesale purchaser-resellers.)	FIA-1381	Appeal of interpretation dated June 6, 1977.
Do.....	USA Petroleum Corp., Los Angeles, Calif. (If granted: The May 28, 1977, interpretation issued to the State of California would be rescinded.)	FIA-1380	Appeal of interpretation dated May 28, 1977.
Do.....	Vickers Energy Corp. (Grand Chenier), Wichita, Kans. (If granted: The Vickers Energy Corp. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at the Grand Chenier plant.)	FEE-4390	Price exception (sec. 212.165).
July 1, 1977	Connecticut Refining Co., West Haven, Conn. (If granted: The Connecticut Refining Co. would be granted additional time in which to respond to the subpena issued to it by FEA region I on June 7, 1977.)	FSG-0050	Request for special redress.

CASES FILED WITH THE OFFICE OF EXCEPTIONS AND APPEALS

Week of July 1 Through July 8, 1977

Notice is hereby given that during the week of July 1 through July 8, 1977, the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Federal Energy Administration's Office of Exceptions and Appeals.

Under the FEA's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the FEA action sought in such cases may file with the FEA written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first.

ERIC J. FYGI,
Acting General Counsel.

JULY 28, 1977.

APPENDIX.—*List of cases received by the Office of Exceptions and Appeals, week of July 1 through July 8, 1977*

Date	Name and location of applicant	Case No.	Type of submission
uly 1, 1977	Consumer Power Co., Jackson, Mich. (If granted: The Consumers Power Co. would be granted an exception from 10 CFR 211.67(a)(3) and would not be required to refund entitlement revenues received for its importation of residual fuel oil during November and December 1974 and January 1975.)	FEE-4392	Allocation exception (sec. 211.67).
Do.....	Husky Oil Co. of Delaware, Washington, D.C. (If granted: The FEA's June 2, 1977, decision and order would be modified and the FEA would adjust Husky's historical profit margin and historical return on invested capital for purposes of evaluating Husky's entitlement exception applications.)	FMR-0113	Modification of decision and order in *Husky Oil Co. of Delaware*, 5 FEA par. ..... (June 2, 1977).
Do.....	Jamar Oil Co., Broken Arrow, Okla. (If granted: The Jamar Oil Co. would receive an extension of the exception relief granted in the FEA's May 6, 1977, decision and order and would be assigned a new, lower priced supplier of motor gasoline to replace its base period supplier, Foremost.)	FXE-4391	Extension of relief granted in *Jamar Oil Co.*, 5 FEA par. 83,145 (May 6, 1977).
Do.....	National Airlines, Inc., Miami, Fla. (If granted: The June 2, 1977, interpretation issued to National Airlines, Inc., would be rescinded and Texaco, Inc., would not be permitted to rely on the interpretation and increase its rental charges for fueling trucks leased to National.)	FIA-1383	Appeal of interpretation issued to National Airlines, Inc., on June 2, 1977.
Do.....	Tesoro Petroleum Corp., San Antonio, Tex. (If granted: The May 28, 1977, interpretation issued to the Husky Oil Co. of Delaware would be rescinded.)	FIA-1382 FES-1382	Appeal of interpretation 1977-15 issued to the Husky Oil Co. of Delaware on May 28, 1977. Stay requested.
July 5, 1977	Blouin Bros., Inc., Enosburg Falls, Vt. (If granted: The FEA's June 16, 1977, remedial order would be rescinded and Blouin Bros., Inc., would not be required to refund overcharges received on its sales of petroleum products.)	FRA-1384 FRS-1384	Appeal of FEA region I's remedial order issued June 16, 1977. Stay requested.

Date	Name and location of applicant	Case No.	Type of submission
Do.....	Cologne Production Co., San Antonio, Tex. (If granted: Crude oil produced from the Cologne Production Co.'s Algoa field located in Galveston County, Tex., would be sold at upper tier ceiling prices.)	FEE-4398	Price exception (sec. 212.73).
Do.....	Hanson Oil Co., Denver, Colo. (If granted: Crude oil produced from wells which Hanson Oil Corp. proposes to drill in Washakie County, Wyo., would be sold at upper tier ceiling prices.)	FEE-4395	Do.
Do.....	Justiss-Mears Oil Co., Inc., Jena, La. (If granted: Crude oil produced from Justiss-Mears Oil Co.'s Saucier No. 1 well located in Avoyelles Parish, La., would be sold at upper tier ceiling prices.)	FEE-4396	Do.
Do.....	Maurice L. Brown Co., Kansas City, Mo. (If granted: The FEA's Nov. 5, 1976, decision and order would be modified and the Maurice L. Brown Co. would be permitted to sell the crude oil produced from well No. 2 of the Option 604 Ltd. lease located in Roosevelt County, N. Mex. at upper tier ceiling prices.)	FXA-1385	Appeal of decision and order in *Maurice L. Brown Co.*, 4 FEA par. 83,181 (Nov. 5, 1976).
Do.....	Monsanto Co., St. Louis, Mo. (If granted: The Monsanto Co. would be granted an exception which would permit the firm to include its purchases of crude oil substitutes in its crude oil runs to stills for purposes of the old oil entitlements program.)	FEE-4397	Exception to old oil entitlements program (sec. 211.67).
Do.....	Newhall Refining Co., Inc., Newhall, Calif. (If granted: Newhall Refining Co., Inc., would be granted an exception from the old oil entitlements program which would relieve the firm of any entitlements purchase obligations for the remainder of its fiscal year ending Aug. 31, 1977, and which would permit the firm to sell additional entitlements so that it would achieve a profit margin of 4.75 pct for the fiscal year.)	FEE-4394	Exception from old oil entitlements program (sec. 211.67).
Do.....	United Independent Oil Co., Salem, Oreg. (If granted: The United Independent Oil Co., would be relieved of its obligations under the old oil entitlements program to purchase entitlements.)	FEE-4393 FES-4393	Exception from old oil entitlements program (sec. 211.67). Stay requested.
July 6, 1977...	Caribou Four Corners, Inc., Afton, Wyo. (If granted: Caribou Four Corners, Inc., would be granted an exception which would permit the firm to include the product purchased from Johnson Oil in its calculations of its crude oil runs to stills for purposes of the old oil entitlements program.)	FEE-4400	Exception from old oil entitlements program (sec. 211.67).
Do...	DeMartin Truck Lines, Inc., San Francisco, Calif. (If granted: The FEA's May 26, 1977, decision and order would be rescinded and DeMartin Truck Lines, Inc., would be permitted to increase its selling prices for liquid petroleum gas to reflect increased nonproduct costs on a retroactive basis.)	FEA-1388	Appeal of FEA region IX's May 26, 1977, decision and order.
Do.....	Keener Oil Co., Tulisa, Okla. (If granted: The FEA's June 10, 1977, remedial order would be rescinded and the Keener Oil Co., would not be required to refund overcharges received on its sales of crude oil produced from its Schenck lease in Harper County, Kans. the Ellen lease in Seminole County, Okla., and the Harjo lease in Seminole County, Okla.)	FRA-1387 FRS-1387	Appeal of FEA region VI's remedial order issued June 10, 1977. Stay requested.
Do.....	Palo Pinto Oil & Gas Co. (Markley gas plant), Wichita Falls, Tex. (If granted: The Palo Pinto Oil & Gas Co. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.005/gal for natural gas liquid products produced at its Markley gas plant.)	FEE-4399	Price exception (sec. 212-165).
Do.....	Texas Oil & Gas Corp., Dallas, Tex. (If granted: Crude oil produced from Texas Oil & Gas Corp.'s Pete Rydolph lease located in Victoria County, Tex., would be sold at upper tier ceiling prices.)	FEE-4401	Price exception (sec. 212.73).
Do.....	Wayne S. Lockhard & Sons, Inc., Indiana, Pa. (If granted: The FEA's June 17, 1977, remedial order would be rescinded and Wayne S. Lockhard & Sons, Inc., would not be required to refund overcharges made on sales of No. 2 heating oil.)	FRA-1386	Appeal of FEA region III's remedial order issued June 17, 1977.
July 7, 1977	A&H Transportation, Inc., Baltimore, Md. (If granted: The FEA's June 24, 1977, remedial order would be rescinded.)	FRA-1385	Appeal of FEA region III's revised remedial order issued June 24, 1977.
Do.....	Maurice L. Brown Co., Kansas City, Mo. (If granted: The Maurice L. Brown Co. would receive an exception to base production control levels established for the Sheridan lease located in Lea County, N. Mex., for a period of 1 mo.)	FEE-4403	Exception to base production control levels (sec. 212.76).
July 8, 1977	Merchants Oil, Inc., Denver, Colo. (If granted: The FEA's May 16, 1977, remedial order would be rescinded.)	FRA-1389	Appeal of FEA region VIII's remedial order dated May 16, 1977.

[FR Doc.77-22233 Filed 8-2-77;8:45 am]

CASES FILED WITH THE OFFICE OF EXCEPTIONS AND APPEALS

Week of July 8 Through July 15, 1977

Notice is hereby given that during the week of July 8 through July 15, 1977 the appeals and applications for exception or other relief listed in the Appendix to this Notice were filed with the Federal Energy Administration's Office of Exceptions and Appeals.

Under the FEA's procedural regulations, 10 CFR, Part 205, any person who will be aggrieved by the FEA action sought in such cases may file with the FEA written comments on the application within ten days of service of notice, as prescribed in the procedural regulations. For purposes of those regulations, the date of service of notice shall be deemed to be the date of publication of this Notice or the date of receipt by an aggrieved person of actual notice, whichever occurs first.

ERIC J. FYGI,
Acting General Counsel.

JULY 28, 1977.

APPENDIX.—*List of cases received by the Office of Exceptions and Appeals, week of July 8 through July 15, 1977*

Date	Name and location of applicant	Case No.	Type of submission
July 8, 1977	Kern County Refinery, Inc., Washington, D.C. (If granted: The FEA's May 25, 1977, decision and order granting Kern County Refinery, Inc., a stay of its entitlement purchase obligations would be vacated.	FEX-4069	Supplemental order in *Kern County Refinery, Inc.*, 5 FEA par. ——— (May 25, 1977).
Do	Maguire Oil Co., Dallas, Tex. (If granted: The remedial order issued by the FEA region VI on June 30, 1977, would be rescinded and Maguire Oil Co. would not be required to refund overcharges received on its sales of crude oil produced from its Chandler lease in Howard County, Tex.	FRA 1-50 FRS-1-50	Appeal of the remedial order issued by FEA region VI on June 30, 1977. Stay requested.
Do	Maguire Oil Co., Dallas, Tex. (If granted: Maguire Oil Co's Chandler lease in Howard County, Tex., would be retroactively classified as a stripper well property.)	FEE 1-50	Price exception [illegible] 212.7[illegible].
Do	Maguire Oil Co., Dallas, Tex. (If granted: The Maguire Oil Co. would be granted a temporary stay of the refund requirements specified in the June 30, 1977, remedial order pending a final determination of the firm's appeal of that order.)	FST 1-50	Request for temporary stay.
Do	Warrior Asphalt Co. of Alabama, Washington, D.C. (If granted: The FEA would review the entitlements exception relief granted to the Warrior Asphalt Co. of Alabama during its 1976 fiscal year in order to determine whether the level of exception relief approved was appropriate.)	FEX 1-50	Entitlements review.
Do	Bunting Oil Co., Lancaster, Pa. (If granted: Bunting Oil Co. would be permitted to retroactively charge prices in excess of those permitted under the mandatory petroleum price regulations, for its sales of No. 2 heating oil.)	FEE 1-50	[illegible] 212.93[illegible]
July 11, 1977	Devon Corp., Oklahoma City, Okla. (If granted: Devon Corp. would be permitted to increase its prices to reflect nonproduct cost increases in excess of $0.06 gal for natural gas liquid products produced at its Dubach natural gas processing plant.)	FEE 4-01	Price exception [illegible] 212.[illegible]
Do	Skelton Operating Co., Inc., Jackson, Miss. (If granted: The Skelton Operating Co. would be permitted to sell crude oil produced from the Lee Beard No. 2 well located in Wayne County, Miss., at exempt prices.)	FEE 1-07	Price exception [illegible] 212.7[illegible].
Do	Texas Pacific Oil Co., Inc., Dallas, Tex. (If granted: Texas Pacific Oil Co.'s Ackers-State (Caddo) unit in Stephens County, Tex., would be classified as a stripper well property.)	FEE 1-10	Price exception [illegible] 212.74.
Do	Williams Energy Co., Tulsa, Okla. (If granted: Williams Energy Co. would be assigned a new, lower priced supplier of propane to replace its base period suppliers, El Paso Natural Gas Co., Enterprise Products Co., and Union Oil Co. of California.)	FEE 1-08	Exception to change suppliers.
July 12, 1977	J&W Refining, Inc., Dallas, Tex. (If granted: The FEA would review the entitlements exception relief granted to J&W Refining, Inc., during its 1976 fiscal year in order to determine whether the level of exception relief approved was appropriate.)	FEX 1-07	Entitlements review
Do	Kern County Refinery, Inc., Corpus, Calif. (If granted: The FEA would review the entitlements exception relief granted to Kern County Refinery, Inc., during its 1976 fiscal year in order to determine whether the level of exception relief approved was appropriate.)	FEX 1-07	Do.
Do	Kingery Drilling Co., Inc., Ardmore, Okla. (If granted: The remedial order issued by FEA region VI on June 27, 1977, would be rescinded and Kingery Drilling Co., Inc., would not be required to refund overcharges receive on its sales of crude oil to [illegible] Oil Co.)	FRA-1-30 FRS-1-30	Appeal of the remedial order issued by FEA region VI on June 27, 1977. Stay requested.
Do	Louisiana Land & Exploration Co., New Orleans, La. (If granted: Louisiana Land & Exploration Co. would receive a stay of the requirements of the FEA's May 27, 1977, decision and order pending a determination on its appeal.)	FES-1-76	Stay of the decision and order in *Louisiana Land & Exploration Co.*, 5 FEA par. 83,165 (May 27, 1977).
Do	Mar-Low Corp. (If granted: Mar-Low Corp. would receive an extension of the relief granted in the FEA's Apr. 4, 1977, decision and order and would be permitted to sell crude oil produced from the Maxie Brousard No. 1-D well at upper tier ceiling prices.)	FXE-1-10	Extension of the relief granted in *Mar-Low Corp.*, 5 FEA par. 80,594 (Apr. 4, 1977).
Do	Peninsula Exploration Co., Corpus Christi, Tex. (If granted: The remedial order issued by FEA region VI on June 13, 1977, would be rescinded and peninsula Exploration Co. would not be required to refund overcharges received on its sales of crude oil)	FRA-1-30	Appeal of the remedial order issued by FEA region VI on June 13, 1977.
Do	Union Oil Co. of California, Los Angeles, Calif. (If granted: Union Oil Co. of California would receive additional entitlements for its imports of residual fuel oil.)	FEE-1-11	Exception to the entitlements program.
July 13, 1977	Berry Holding Co., Fresno, Calif. (If granted: The remedial order issued by FEA region IX on June 10, 1977, would be rescinded and Berry Holding Co. would not be required to refund overcharges received on its sales of crude oil.)	FRA-1-14	Appeal of the remedial order issued by FEA region IX on June 10, 1977.
Do	Ely Crude Oil Co., Ely, Nev. (If granted: The Ely Crude Oil Co. would be permitted to sell crude oil produced from Federal lease No. 012308-B and Federal lease No. 012321-A at upper tier ceiling prices.)	FEE-1-03	Price exception [illegible] 212.73.
Do	Farmers Gas & Oil Co., Ithaca, Mich. (If granted: The remedial order issued by FEA region V on June 28, 1977, would be rescinded and Farmers Gas & Oil Co. would not be required to refund overcharges received on its sales of motor gasoline.)	FRA-1-03	Appeal of the remedial order issued by FEA region V on June 28, 1977.
Do	Louis Kahan, Tulsa, Okla. (If granted: Louis Kahan would be permitted to sell crude oil produced from the Polly B lease located in Seminole County, Okla., at upper tier ceiling prices.)	FEE-1-12	Price exception [illegible] 212.73.
Do	Stephens & Cass, Dallas, Tex. (If granted: The FEA's May 20, 1977, stay decision and order would be vacated.)	FEX-1-07	Supplemental order in *Stephens & Cass*, 5 FEA par. 85,067 (May 20, 1977).
Do	Young Refining Corp., Douglasville, Ga. (If granted: The FEA would review the entitlements exception relief granted to Young Refining Corp. during its 1976 fiscal year in order to determine whether the level of exception relief approved was appropriate.	FEX-1-07	Entitlements review.

Date	Name and location of applicant	Case No.	Type of submission
July 14, 1977	American Petroleum Refiners Association, Inc., Washington, D.C. (If granted: Refiners which sold JP-4 and JP-5 jet fuel to the Defense Fuel Supply Center during 1973 would be permitted to use prices set forth in April 1973 contracts to retroactively establish maximum permissible selling prices for their sales of jet fuel to the DFSC.)	FEE-4414	Class exception.
Do	American Petroleum Refiners Association, Inc., Washington, D.C. (If granted: Refiners which sold JP-4 and JP-5 jet fuel to the Defense Fuel Supply Center during 1973 would be permitted to consider prices established in April 1973 contracts with the DFSC as base prices for purposes of computing maximum permissible selling prices for jet fuel under the mandatory petroleum price regulations.)	FSG-0052	Request for special redress.
Do	Laketon Asphalt Refining Co., Evansville, Ind. (If granted: Laketon Asphalt Refining Co. would receive an extension of the entitlement exception relief granted in the FEA's Feb. 11, 1977, decision and order.)	FXE-4415	Extension of the relief granted in *Laketon Asphalt Refining Co.*, 5 FEA par. 83,064 (Feb. 11, 1977).

ENERGY SUPPLY AND ENVIRONMENTAL COORDINATION ACT

Recission of a Construction Order

In accordance with 10 CFR 303.137(d), the Federal Energy Administration hereby gives notice that on July 13, 1977, the FEA issued an order rescinding the construction order issued on June 30, 1977, to Memphis Mill Unit 5, Kimberly-Clark Corp., Memphis, Tenn. Pursuant to the authority of section 2 of the Energy Supply and Environmental Coordination Act of 1974 (ESECA) (15 U.S.C. 792) the construction order would have required that Unit 5 be designed and constructed so as to be capable of using coal as its primary energy source.

Based on information received from Kimberly-Clark prior to the order issuance which stated that plans to construct Unit 5 had been cancelled by Kimberly-Clark, FEA has determined that Unit 5 is not in the early planning process. Therefore, this combustor is not subject to FEA's authority to issue construction orders and the order issued on June 30, 1977 must be rescinded.

The rescission order has been served on Kimberly-Clark Corp. by registered mail. Copies of the rescission order will be on display for any interested members of the public at the FEA Freedom of Information Reading Room located in Room 2107, 12th Street and Pennsylvania Avenue NW., Washington, D.C. Copies will also be on display in the appropriate FEA regional office.

Any questions regarding this notice should be directed to Mr. G. Randolph Comstock, Office of Coal Utilization, Federal Energy Administration, 12th Street and Pennsylvania Avenue NW., Washington, D.C. 20461, (202–566–9732).

Issued in Washington, D.C., July 28, 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

NATURAL GAS PIPELINE CO. OF AMERICA

Action Taken on Consent Order

Pursuant to 10 CFR 205.197(c), the Federal Energy Administration ("FEA") hereby gives notice of final action taken on a Consent Order.

On February 25, 1977, FEA published a Notice of Consent Order which, on January 11, 1977 was executed between the Natural Gas Pipeline Company of America ("Natural") and FEA 42 FR 11040 (February 25, 1977). With that Notice, and in accordance with 10 CFR 205.197(c), FEA invited interested persons to comment on the Consent Order.

During the period for comment, FEA received no comments regarding the Consent Order. Accordingly, FEA has concluded that the Consent Order as executed between FEA and Natural on January 11, 1977 is an appropriate resolution of the compliance proceedings initiated by the FEA and that the Consent Order is to be issued as proposed. Therefore, pursuant to 10 CFR 205.197 (c), FEA hereby give Notice of this action taken, making this Consent Order final without modification.

Issued in Washington, D.C., July 29, 1977.

ERIC FYGI,
Acting General Counsel.

[FR Doc 77-22329 Filed 8-2-77;8:45 am]

STATE ENERGY CONSERVATION PLANS

Negative Determination of Environmental Impact Re The West Virginia Energy Conservation Plan

Pursuant to 10 CFR 208.4, the Federal Energy Administration hereby gives notice that it has performed an analysis and review of the environmental impacts associated with the provision of Federal financial assistance for the implementation, by the State of West Virginia, of their State Energy Conservation Plan. Federal funding is authorized by Part C of Title III of the Energy Policy and Conservation Act, 42 U.S.C. 6321, et seq.

Based upon assessment of environmental impacts that are expected to result from implementation of these plans, the FEA has determined that Federal financial assistance will not be a "major Federal action significantly affecting the quality of the human environment" within the meaning of section 102(2)(C) of the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C). Therefore, pursuant to 10 CFR 208.4(c), the Federal Energy Administration has determined that an environmental impact statement is not required for this plan.

Single copies of the environmental assessment of the State Plan for West Virginia are available upon request from the FEA National Energy Information Center, Room 1406, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the environmental assessment will also be available for public review in the Federal Energy Administration Information Access Reading Room, Room 2107, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Copies of the State Plan are available for public review in the Office of State Energy Conservation Programs, Room 6437, 12th and Pennsylvania Avenue NW., Washington, D.C. 20461.

Interested persons are invited to submit data, views or arguments with respect to the environmental assessment to Executive Communications, Box OJ, Room 3317, Federal Energy Administration, Washington, D.C. 20461.

Comments should be identified on the outside of the envelope and on documents submitted to FEA Executive Communications with the designation, "Environmental Assessment—West Virginia Energy Conservation Plan." Fifteen copies should be submitted. All comments should be received by FEA by 4:30 p.m. e.d.s.t., August 14, 1977, in order to receive full consideration.

Any information or data considered by the person submitting it to be confidential must be so identified and submitted in one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to that determination.

Issued in Washington, D.C., July 29 1977.

ERIC J. FYGI,
Acting General Counsel,
Federal Energy Administration.

FEDERAL MARITIME COMMISSION

[Independent Ocean Freight Forwarder License No. 92]

COPELAND SHIPPING, INC.

Order of Revocation

By letter dated June 28, 1977, Mr. Nathan Cohen, Vice President, Copeland Shipping, Inc., 24806 Rockaway Boulevard, Jamaica, N.Y. 11422, was advised by the Federal Maritime Commission

that Independent Ocean Freight Forwarder License No. 92 would be automatically revoked or suspended unless a valid surety bond was filed with the Commission on or before July 27, 1977.

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4, further provides that a license will be automatically revoked or suspended for failure of a licensee to maintain a valid bond on file.

Copeland Shipping, Inc., has failed to furnish a valid surety bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised), section 5.01 (c), dated June 30, 1975;

It is ordered, That Independent Ocean Freight Forwarder License No. 92 issued to Copeland Shipping, Inc., be returned to the Commission for cancellation.

It is further ordered, That Independent Ocean Freight Forwarder License No. 92 be and is hereby revoked effective July 27, 1977.

It is further ordered, That a copy of this order be published in the FEDERAL REGISTER and served upon Copeland Shipping, Inc

LEROY F. FULLER,
Director, Bureau of Certification and Licensing.

[FR Doc.77-22282 Filed 8-2-77;8:45 am]

[Docket No. 77-39 FMC Freight Forwarder License No. 1660]

LATINVAN, INC.

Order To Show Cause

By letters dated December 13, 1976, and May 2, 1977, the Commission directed Latinvan, Inc., P.O. Box 440281, Miami, Fla. 33144, FMC Freight Forwarder License No. 1660, to furnish certain factual information. Response was requested on or before January 15, 1977, and extended until June 6, 1977. To date Latinvan, Inc., has not responded to these letters.

Section 510.9(b) of the Commission's General Order 4 provides that a freight forwarder license may be revoked or suspended for failure to respond to any lawful inquiries of the Commision.

Therefore, *it is ordered*, That pursuant to section 44 and section 22 of the Shipping Act, 1916, Latinvan, Inc., FMC License No. 1660, is hereby made a respondent in this proceeding and is directed to show cause why its license as an independent ocean freight forwarder should not be suspended or revoked pursuant to section 510.9(b) because of failure to respond to lawful inquiries of the Commission.

It is further ordered, That this proceeding shall be limited to the submission of affidavits of fact and memorandum of law, replies and oral argument. Should any party feel that an evidentiary hearing be required, that party may accompany such a request for hearing with a statement setting forth in detail the facts to be proven, their relevance to the issues in this proceeding, and why such proof cannot be submitted through affidavit. Request for hearing shall be filed on or before August 29, 1977. Affidavits of facts and memorandum of law shall be filed by respondent and served upon all parties no later than the close of business August 29, 1977. Reply affidavits and memorandum shall be filed by the Commission's Bureau of Hearing Counsel and intervenors, if any, no later than the close of business September 19, 1977. Oral argument will be scheduled at a later date if requested and/or deemed necessary by the Commission.

It is further ordered, That a notice of order be published in the FEDERAL REGISTER and that a copy thereof be served upon respondent.

It is further ordered, That persons other than those already party to this proceeding who desire to become parties to this proceeding and participate therein, shall file a petition to intervene pursuant to Rule 72 of the Commission's Rules of Practice and Procedure (46 CFR 502.72).

It is further ordered, That all documents submitted by any party of record in this proceeding shall be directed to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, in an original and 15 copies as well as being mailed directly to all parties of record.

By the Commission.

JOSEPH C. POLKING,
Acting Secretary.

MED-GULF CONFERENCE

Agreements Filed

Notice is hereby given that the following agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreements at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreements at the Field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., and San Juan, P.R. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before August 23, 1977. Any person desiring a hearing on the proposed agreements shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreements (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

John B. Attanasio, Esquire, Billig, Sher & Jones, P.C., Suite 300, 2033 K Street NW., Washington, D.C. 20006.

Agreement No. 9522-31, among the members of the above-named conference provides for rules concerning secret ballots and for independent action on freight rates.

By order of the Federal Maritime Commission.

Dated: July 29, 1977.

JOSEPH C. POLKING,
Acting Secretary.

[FR Doc.77-22279 Filed 8-2-77;8:45 am]

O'CONNELL DISTRIBUTING CO. INC., DOMTAR, INC., AND CITY OF MILWAUKEE

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street NW., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., San Francisco, Calif., and Old San Juan, P.R. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before August 23, 1977. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forward to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Mr. J. L. Haskell, Deputy Port Director, City of Milwaukee, 500 N. Harbor Drive, Milwaukee, Wis. 53202.

Agreement No. T-2966-1, between O'Connell Distributing Co., Inc. (O'Connell); Domtar, Inc. (Domtar); and City of Milwaukee (City), provides for Domtar's sublease with the City's approval of O'Connell's interest in the following agreements: (1) Agreement No. T-2966, which provides for the lease of a port terminal facility designated as Municipal Bulk Terminal No. 1; (2) Agreement No. T-2966-A, which provides for the lease of Jones Island Dock and property containing approximately 4.004 acres; and (3) Agreement No. T-2966-B, which provides for the lease of 1.13 acres of land located south of East Bay Street. Under the terms of the sublease, Domtar will be subject to the same rental and terms as O'Connell except Domtar is not required to pay any additional rental under terms of paragraph 3(c) of Agreement No. T-2966 nor is he required to deposit a security deposit.

By order of the Federal Maritime Commission

Dated: July 28, 1977.

JOSEPH C. POLKING,
Acting Secretary.

If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreements (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreements filed by:

Mr. J. L. Haskell, Deputy Port Director, City of Milwaukee, 500 N. Harbor Drive, Milwaukee, Wis. 53202.

Agreement No. T-2966-A, between O'Connell Distributing Co., Inc. (O'Connell), and City of Milwaukee (City), provides for the five-year lease of 4.004 acres of land on the South Harbor Tract to be used as a storage and distribution terminal. As compensation, O'Connell will pay $11,500 a year plus wharfage as follows: (1) 10 cents per ton on salt; and (2) rates on all other cargo to be negotiated prior to time of its movement.

Agreement No. T-2966-B, between O'Connell and City, provides for the month-to-month lease of approximately 1.13 acres of land for the temporary storage of salt. As compensation, O'Connell will pay $340 a month. All material on this land will be transported across the docks to the leaseshold adjacent to Municipal Mooring Basin or General Cargo Terminal One and will have been previously assessed a wharfage charge of 10 cents per ton.

Agreements Nos. T-2966-A and T-2966-B are to be subleased to Domtar, Inc., under Agreement No. T-2966-1.

By order of the Federal Maritime Commission.

Dated: July 28, 1977.

JOSEPH C. POLKING,
Acting Secretary.

Acting Secretary.

[FR Doc.77-22283 Filed 8-2-77;8:45 am]

FEDERAL POWER COMMISSION

[Docket No. ER76-556]

BOSTON EDISON CO.

Electric Rates; Order Approving Settlement Agreement

JULY 20, 1977.

On April 20, 1977, Boston Edison Company (Edison) submitted for filing in this docket a proposed Settlement Agreement and a Motion To Certify Settlement Agreement and Record To The Commission. Presiding Administrative Law Judge Thomas L. Howe certified the proposed settlement to the Commission on April 25, 1977.

Notice of the filing of the Settlement Agreement was issued on April 22, 1977, with all protests due on or before May 11, 1977. No protests were received. Staff filed comments in support of the agreement on May 11, 1977.

Edison initially filed a rate schedule in this docket on March 10, 1976, to provide for the non-firm transmission service by Edison to Braintree Electric Light Department (Braintree). Braintree and Cambridge Electric Light Company (Cambridge) filed separate petitions to intervene in the proceeding. The initial filing provided for transmission to Braintree of three capacity purchases (Potter purchases) totalling approximately 28MW, from Northeast Utilities, New England Power Company, and an entitlement owned by Vermont Electric Power Company in the Merrimack 2 Unit of Public Service Company of New Hampshire. The service was to continue from April 1, 1976 until the date that Braintree's Potter 2 generating unit would enter service.

In an order issued May 14, 1976, the Commission accepted the filing, suspended it, made it effective subject to refund, granted intervention of Braintree and Cambridge, and set the matter for hearing. After participating in a pre-hearing conference on July 22, 1976, the parties went to hearing on September 20, 1976. Settlement discussions took place on the date of the hearing and a tentative settlement was reached with regard to the three purchases.

Subsequent to this date, Edison agreed to transmit a fourth capacity purchase to Braintree, from the Vermont Yankee Nuclear Unit[2] and applied the same transmission rate that had been used for the Potter purchases. The transmission service of this fourth capacity purchase will terminate on October 31, 1977.

The Settlement Agreement reduces the rate from $10.84 per kW per year[3] to $9.00 per kW per year for the Potter purchases and provides for a refund, at

[1] Potter 2 entered service on April 1, 1977 and service for the 3 purchases ended on that date.

[2] This capacity constituted part of Vermont Electric Power Company's entitlement in the unit.

[3] As stated in the rate schedule filed March 10, 1976.

an annual interest rate of 9 percent, of the difference between the settlement rate and the amounts actually collected for the transmission of the Potter purchases. As for the Vermont Yankee purchase, the Settlement Agreement provides that Braintree shall continue to pay transmission charges in accordance with the rate schedule initially filed in this proceeding [4] but that the rate will be adjusted retroactively in accordance with the outcome of Boston Edison Company, Docket No. ER77-84. If the adjustments produce a lower rate, Edison shall make refunds to Braintree with interest at an annual rate of 9 percent.

Based on our review of the record in these proceedings, including the Settlement Agreement itself, the Commission finds that the proposed Settlement Agreement itself, the Commission finds that the proposed Settlement Agreement represents a reasonable resolution of all of the issues in this proceeding, and that such settlement is in the public interest. Accordingly, the Settlement Agreement between Braintree and Edison should be approved and Appendix A to that Agreement which sets forth the rate and refund provisions contained in the Settlement Agreement should be accepted for filing and made effective as of April 1, 1976. [5]

The Commission finds: The proposed Settlement Agreement should be approved and made effective as hereinafter ordered and conditioned.

The Commission orders: (A) The Settlement Agreement certified to the Commission in this proceeding on April 25, 1977, is hereby accepted, incorporated herein by reference and approved subject to the following conditions:

(B) Within 30 days from the date of this order, Edison shall refund amounts collected in excess of the settlement rate with interest computed at an annual rate of 9 percent for transmission service for the Potter purchases.

(C) Within 20 days after refunds have been made, Edison shall file with the Commission a compliance report showing monthly billing determinants and revenues under prior, present, and settlement rates. The report shall also show the monthly settlement rate increase, the monthly rate refund, and the monthly interest computation together with a summary of such information for total refund period. A copy of such report shall also be furnished to each State Commission within whose jurisdiction the wholesale customers distribute and sell electric energy at retail.

(D) Consistent with the provisions of the Settlement Agreement approved herein, waiver of Sections 35.3 and 35.-13 of the Regulations is hereby granted and the tendered Supplement No. 2 to Boston Edison Company Rate Schedule FPC No. 110 is hereby accepted for filing to be effective April 1, 1976.

[4] 10.84 per kW per year.

[5] Appendix A Rate Schedule designation: Boston Edison Company Supplement 2 to Rate Schedule FPC No. 110.

(E) This order is without prejudice to any findings or orders which have been made or which will hereafter be made by the Commission, and is without prejudice to any claims or contentions which may be made by the Commission, its Staff, or any party or person affected by this order, in any proceeding now pending or hereafter instituted by or against Edison or any person or party.

(F) The Secretary shall cause prompt publication of this order in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.77-22247 Filed 8-2-77;8:45 am]

[Docket No. CP77-512]

CLAY BASIN STORAGE CO.

Application

JULY 27, 1977.

Take notice that on July 19, 1977, Clay Basin Storage Company (Applicant), 100 Broadway, New York, New York 10005, filed in Docket No. CP77-512 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of natural gas to Arizona Public Service Company (APS), Southern Union Company (Southern Union), Southwest Gas Corporation (Southwest) and Tucson Gas & Electric Company (TG&E), all of whom are El Paso Natural Gas Company's (El Paso) east-of-California (EOC) distributor customers jointly referred to herein as EOC Distributors, for the sale of natural gas from time to time to El Paso, and for the exchange of its gas stored in the Clay Basin Field, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant proposes to sell natural gas to EOC Distributors pursuant to letter agreements dated June 10, 1977, between El Paso and each of EOC Distributors which agreements were ratified and accepted by Applicant on July 6, 1977. Applicant states that the sales of natural gas which it proposes to make to the EOC Distributors and to El Paso, respectively, are integral to the effectuation of the Clay Basin Interim Storage Arrangements for the future protection of Priority 1 and 2 service to El Paso's EOC direct and distributor customefs.

It is indicated that El Paso projects that it would have certain quantities of gas which would be otherwise available for sale and delivery in satisfaction of the Priority 3, 4 and 5 requirements of its interstate system customers through April 30, 1978, and that Clay Basin Interim Storage Arrangements are designed to provide for the storage and subsequent utilization of the gas supplies so stored, to the maximum extent possible, for the protection of future service to the Priority 1 and 2 requirements of El Paso's EOC customers. Applicant indicates that it, together with Northwest Pipeline Corporation (Northwest) and Mountain Fuel Resources, Inc. (Resources) have agreed to assist El Paso in the Clay Basin Interim Storage Arrangements whereby gas can be stored, on an interim basis, commencing as soon as practical and extending through December 31, 1979, in Resources' Clay Basin Storage Field (Clay Basin Field), located in Dagget County, Utah.

Applicant states that it and El Paso have entered into an Interim Storage Agreement dated July 6, 1977, as part of the arrangements necessary for implementation of the Clay Basin Interim Storage Arrangements, wherein Applicant would purchase natural gas from El Paso at certain points of delivery in the San Juan Basin area in Rio Arriba County, New Mexico, and La Plata County, Colorado. It is stated that El Paso would sell such gas to Applicant and physically deliver it to Northwest, for Applicant's account, at existing points of interconnection between the facilities of El Paso and Northwest. Such deliveries are to be made in quantities not to exceed the excess pipeline capacity available in Northwest's transmission facilities, as excess capacity may exist from time to time, on a daily basis, during the period commencing on the date of initial deliveries and extending through April 30, 1978, it is stated. Applicant indicates that it would pay El Paso a rate equivalent to the rate in effect at the time of sale under Rate Schedule G of El Paso's FPC Gas Tariff, Original Volume 1 for each Mcf of natural gas sold by El Paso to Applicant and delivered to Northwest for Applicant's account.

It is indicated that pursuant to the terms and conditions of that certain agreement dated July 6, 1977, between Applicant and El Paso, Applicant has acquired all of El Paso's right, title and interest in and to each of the agreements listed below and has assumed and agreed to pay and perform all of El Paso's obligations under each of said agreements. Such agreements are as follows:

(i) That certain agreement entitled "Gas Transportation and Exchange Agreement" dated March 24, 1977, by and between El Paso and Northwest, pursuant to which Northwest has agreed (a) to receive quantities of gas from El Paso from time to time during the period commencing with initial deliveries through April 30, 1978, at various points in the San Juan Basin area of northwest New Mexico and southwest Colorado and to transport and deliver such gas to Resources for storage for El Paso's account in Resources' Clay Basin Field in Daggett County, Utah, and (b) from time to time during the period November 1, 1977, through December 31, 1979, to deliver to El Paso in the San Juan Basin, quantities of gas equivalent to those quantities so stored by Resources for El Paso's account in the Clay Basin Field; and

(ii) That certain agreement entitled "Intermin Storage Service Rate Schedule S-2" dated March 21, 1977, by and between El Paso, Resources and Northwest, pursuant to which Resources has agreed to accept and store for El Paso's account in the Clay Basin Field commencing with initial deliveries through December 31, 1979, those quantities of gas delivered to Resources by Northwest for El Paso's account under a Gas Transportation and Exchange Agreement dated March 24, 1977.

It is indicated that under these agreements, the gas purchased by Applicant from El Paso would be delivered to Northwest and transported and delivered by Northwest to Resources which would inject and store such delivered quantities in the Clay Basin Field, all for Applicant's account. It is stated that all charges applicable to the services rendered by Northwest and Resources for Applicant and, in addition, all other chargest incurred by Applicant as a result of its participation in the Clay Basin Interim Storage Arrangments, save and except for the cost of gas purchased by Applicant from El Paso, would be billed to El Paso.

Applicant states that under the Clay Basin Interim Storage Arrangements Northwest, by displacement, would from time to time during the period November 1, 1977, through December 31, 1979, deliver to El Paso at an existing delivery point, near Ignacio, Colorado, for Applicant's account, quantities of gas equivalent, on a Btu basis, to the quantities which were previously purchased by Applicant from El Paso and delivered by El Paso to Northwest for Applicant's account. El Paso would thereafter transport through its interstate pipeline system and deliver, for Applicant's account, the quantities of gas so received from Northwest as needed to serve the Priority 1 and 2 requirements of El Paso's EOC system customers during the 1977-78, 1978-79 and through December 31, of the 1979-80 heating seasons, it is indicated.

It is stated that El Paso and the EOC Distributors have by agreements, provided for the purchase of such supplies under certain terms and conditions which permit the timely disposition of such stored quantities. These agreements contemplate that El Paso would deliver such quantities of gas to the EOC Distributors, for Applicant's account, at existing points of delivery to such customers located on El Paso's interstate transmission system, it is stated. It is stated that such sales, by Applicant would be made at a rate equivalent to the rate in effect at the time of delivery for El Paso's own sales of gas to the respective distributor customers at the respective sales point locations.

Applicant states that pursuant to the gas sales agreement dated July 6, 1977, between Applicant and El Paso, El Paso would retain and purchase from Applicant a quantity of gas containing 5 percent of the number of Btu's contained in such quantities of gas, if any, as are redelivered by Northwest to El Paso for Applicant's account, such 5 percent quantity being required for use by El Paso to replace volumes of gas which would be consumed as compressor fuel or which are lost or unaccounted for in El Paso's system in physically transporting Applicant's gas. Applicant further states that El Paso would retain and purchase such 5 percent quantity only in the event that it is required to physically transport Applicant's gas and not otherwise, and shall pay Applicant for such 5 percent quantity at a rate equivalent to Applicant's weighted average cost of gas purchased from El Paso under the Interim Storage Agreement. Additionally, Applicant requests authorization as it may require incident to the effectuation of the exchange of its gas stored in the Clay Basin Field for equivalent quantities to be delivered by Northwest to El Paso for Applicant's account.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 23, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) as the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary

[Docket No. ES77-]

COMMONWEALTH EDISON CO.

Supplemental Application

JULY 27, 1977.

Take notice that by orders issued August 5, 1975 and August 3, 1976, in the above-captioned docket, the Federal Power Commission, pusuant to Section 204 of the Federal Power Act, authorized Commonwealth Edison Company (Applicant), to issue unsecured promissory notes in the aggregate outstanding principal amount of up to a maximum of $400,000,000, to be issued on or before December 31, 1977, with final maturity dates of not later than December 31, 1978.

By supplemental application filed July 20, 1977, the Applicant seeks authorization to extend the latest permissable issue date to December 31, 1978 and to extend the final maturity date to December 31, 1979, on $400 million in unsecured promissory notes previously authorized. All other terms and conditions of the Commission's order are to remain in full force and effect.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure, (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 19, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary

[Docket No. E-8121]

GULF STATES UTILITIES CO.

Electric Rates; Order To Show Cause and To Prescribe Procedures

JULY 26, 1977

On July 11, 1975, the United States Court of Appeals for the District of Columbia Circuit remanded the proceedings in the docket herein to the Commission with instructions to conduct proceedings consistent with its opinion.[1] The Commission finds that a hearing to show cause instituted against Gulf States Utilities Co. concerning the issues raised by the Court would be in the public interest as hereinafter ordered.

In 1950, Mid-South Electric Cooperative Association (Mid-South) entered into a contract with Gulf States for the delivery of electric power. The limitation on Gulf States' maximum commitment to Mid-South was 200 kilowatts, with Mid-South having the right to request a monthly increase of up to 300 kilowatts subject to Gulf States' designation of the delivery points for the additional power. As Mid-South's power needs grew, Gulf States delivered Mid-South's requirements beyond the contracted commitment. According to Mid-South,[2] by 1960, the earliest year for which figures are available, Gulf States was selling to

[1] *Sam Rayburn Dam Electric Cooperative v. FPC*, 515 F. 2d 998 (D.C. Cir. 1975), cert. denied sub nom *Gulf States Utilities Co. v. FPC*, 96 S.Ct. 2229 (1976).

[2] Application for Rehearing filed by Mid-South and Robertson Electric Cooperative, Inc., on August 20, 1973, in this docket.

Mid-South a total of 1,374 kilowatts in the peak month. By 1973, the peak month supply grew to 11,940 kilowatts. Such sales were made according to all the terms and conditions of the contract and at the contract rates.[2]

The proceedings in this docket were initiated on April 10, 1973, when Gulf States tendered for filing revised rate schedules to its wholesale customers, including Mid-South. By order issued on June 14, 1973, the Commission found, inter alia, that certain Gulf States contracts were fixed-rate Sierra-Mobile type[4] contracts with a demand ceiling, and the Commission accepted Gulf States' proposed rates to be effective as initial rates to apply to those deliveries sold above the demand ceiling. According to Mid-South[5] it did not file for Commission review of the June 14 order because it believed that its contract had been amended by the conduct of the parties to remove the demand ceiling, thus making the entire contract a fixed rate contract protected by the *Mobile-Sierra* doctrine, and that the contract would be investigated by the Commission in a section 206 proceeding.

On August 7, 1973, the Commission issued an order denying the applications for rehearing of the June 14, 1973, order filed by certain other customers of Gulf States. From the August 7, 1973, order, it appeared to Mid-South that the Commission may have intended the June 14, 1973, order to affect the rates for power supplied to Mid-South by Gulf States. Therefore, it was not until August 20, 1973, that Mid-South filed with the Commission for review of the June 14, 1973 order.[6] On September 17, 1973, the Commission denied Mid-South's request for rehearing at untimely.[7]

Upon its review, the District of Columbia Circuit held that Mid-South's application for rehearing was timely filed and it assumed jurisdiction over Mid-South's petition for review.[8] The Court adopted Mid-South's position that parties to a contract filed with the Commission may vary its terms by a subsequent course of conduct.[9] The Court also adopted Mid-South's argument that fixed-rate contracts must be recognized whether or not the contracts have been reduced to writing and filed with the Commission.[10]

Therefore, the Court concluded that if, in this case, the parties by their conduct did subsequently modify the 1950 contract, Gulf States is bound by the modified terms whether or not Gulf States met its responsibility of reducing the modifications to writing and filing them with the Commission. The Court remanded the case to this Commission to decide "* * * whether or not the proposed (April 10, 1973 rate) increase conflicted with any existing contractual arrangement between Gulf States and Mid-South".[11]

In accordance with the Court's mandate, we must determine what the "existing contractual arrangement" was between Gulf States and Mid-South. If the contract was a fixed rate contract with a demand ceiling, then Gulf States' proposed rates would be consistent with the contract and could be accepted to apply to those deliveries sold above the demand ceiling.[12] But if the parties' subsequent course of dealing removed the demand ceiling so that the 1950 fixed rates were applicable to all of Gulf States' deliveries to Mid-South, then Gulf States' 1973 proposed rates would be inconsistent with the parties' contractual arrangement and would have to be rejected by the Commission.

We will institute a show cause proceeding to require Gulf States to come forward and present its evidence on the issue of the contract modification as set forth in the Court's remand and whether the Commission may properly accept for filing the rates proposed by Gulf States on April 10, 1973. The parties hereto granted intervention will not be required to file any new petitions to intervene to participate in this show cause proceeding. Interested persons who are not presently parties may seek intervention pursuant to our rules.

The Commission finds: It is necessary and proper and in the public interest and to aid in the enforcement of the Federal Power Act that a hearing be held on the issues described herein.

The Commission orders: (A) Gulf States shall show cause, if any, at the proceedings instituted in paragraph (B) below, why its actions under its contract with Mid-South, as discussed in the Court's remand described herein required the Commission to accept its rate proposals of April 10, 1973.

(B) Pursuant to the authority of the Federal Power Act, particularly sections 307, 308, and 309 thereof, and the Commission's Rules and Regulations issued pursuant thereto, a Presiding Administrative Law Judge (see delegation of authority, 18 CFR 3.5(d)) shall convene a prehearing conference on August 24, 1977, at 10 a.m. in a public hearing room of the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, concerning the issues discussed herein. At said prehearing conference, the Presiding Administrative Law Judge is hereby authorized to establish all procedural dates and to rule upon all motions (except petitions to intervene, motions to consolidate and sever and motions to dismiss), as provided for in the Rules of Practice and Procedure. If the Presiding Administrative Law Judge determines that factual and legal submissions in addition to those already on the record are unnecessary, he may recommend summary disposition to the Commission.

(C) Notices of intervention and petitions to intervene may be filed with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before August 8, 1977, in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.37(f)).

(D) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. CP74-187]

MONTANA POWER CO.

Petition To Amend

JULY 26 1977.

Take notice that on July 15, 1977, Montana Power Co. (Petitioner), 40 East Broadway, Butte, Mont. 59701, filed in Docket No. CP74-187 a petition to amend the Commission's order of March 21, 1975 (53 FPC ------), as amended, issued in the instant docket pursuant to section 3 of the Natural Gas Act so as to authorize the continued importation of natural gas from Canada at an increase import rate of $2.16 (United States) per million Btu's effective September 21, 1977, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Applicant indicates that pursuant to the Commission's order of March 21, 1975, it was granted authorization in the instant docket to import from Canada, natural gas purchased from Canadian-Montana Pipe Line Co., at a price of $1 per Mcf, and that on December 17, 1976, the Commission amended its order of March 21, 1975, so as to authorize Petitioner to import gas from Canada natural gas at the price of $1.94 (Canadian) per million Btu's, effective January 1, 1977. Applicant indicates that on July 7, 1977, the Canadian Government set the price for gas exported from Canada at $2.16 per million Btu's.

Petitioner asserts that it imports from Canada more than 70 percent of the natural gas supply necessary to serve its market and that the ability of Petitioner to meet its customers' requirements and avoid curtailment of service directly depends on continued importation of natural gas under the authorization granted in the subject docket.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before August 15, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22250 Filed 8-2-77;8:45 am]

[Docket No. CP76-389]

NORTHWEST PIPELINE CORP.

Amendment to Application

JULY 27, 1977.

Take notice that on July 18, 1977, Northwest Pipeline Corp. (Applicant), P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP76-389 an amendment to its application filed in said docket pursuant to section 7 of the Natural Gas Act so as to provide for the withdrawal on a firm basis of up to 9,400,000 Mcf of gas seasonally and up to 75,000 Mcf per day and the withdrawal on a best efforts basis of up to an additional 5,000,000 Mcf of gas seasonally and up to an additional 75,000 Mcf per day, all as more fully set forth in the amendment on file with the Commission and open to public inspection.

Applicant indicates that in its application filed on June 10, 1976, in the instant docket it proposed to utilize the Dakota Formation of the Clay Basin Field (Dakota Formation) for the storage of natural gas during off-peak periods for subsequent withdrawals during the winter heating season (November through March). Applicant states that the utilization of the Dakota Formation for natural gas storage is contemplated as a result of an agreement dated June 8, 1976, as amended November 5, 1972, and April 6, 1977 between Applicant and Mountain Fuel Resources, Inc. (Resources), whereby Resources has agreed to develop the Dakota Formation as a natural gas storage reservoir for the storage of natural gas for the account of Applicant. Applicant indicates that on February 10, 1977, it received temporary authorization in the instant docket to deliver to Resources for storage up to 27,000,000 Mcf of gas (including those volumes of natural gas remaining in storage for Applicant's account as of April 1, 1977) of which 9,400,000 Mcf would be working gas and 17,600,000 Mcf would be cushion gas, and to withdraw up to 75,000 Mcf per day and up to 9,400,000 Mcf seasonally.

It is stated that El Paso Natural Gas Co. (El Paso) has requested that Applicant and Resources cooperate with El Paso to the end that El Paso may temporarily store up to approximately 26,000,000 Mcf of natural gas during the period from June 1, 1977, through April 30, 1978. Applicant indicates that it is contemplated that, during the summer of 1978, the volumes of gas to be stored by El Paso would be transferred to a storage field to be developed by El Paso and would be utilized for the protection of El Paso's high-priority East of California customers.

El Paso has informed Resources and Applicant that, commencing June 1, 1977, and continuing through October 31, 1977, it can make available to Resources, for storage by Resources, certain volumes of natural gas on a relatively firm basis and further anticipates that it may have additional volumes available on a day basis during the period November 1977 through April 1978, it is said.

It is indicated that El Paso and Applicant have entered into a gas transportation and exchange agreement dated March 24, 1977, and El Paso, Resources and Applicant have entered into a three party agreement dated March 21, 1977, in order to effectuate the storage for El Paso. It is stated that the agreement dated March 24, 1977, between El Paso and Applicant provides for the best efforts transportation and delivery of El Paso's volumes by Northwest to Resources for storage and for the ultimate redelivery to El Paso of volumes equivalent to the volumes stored by Resources for El Paso's account. The three party agreement provides that Resources would, on a best efforts basis, receive volumes of natural gas from Applicant for storage in the Dakota Formation for the account of El Paso, it is indicated.

It is asserted that Resources and Applicant currently contemplate that the volumes of natural gas to be stored by Resources for Applicant's account during 1977 would be 27,000,000 Mcf. Applicant indicates that Resources has agreed to construct and operate certain additional facilities, permanent and temporary in order to develop further the Dakota Formation, on a one time basis, in order to provide, on a best efforts basis, storage service for El Paso. It is stated that the storage service to be provided by Resources for Applicant would have priority over that storage service to be provided for El Paso in order to assure that Applicant would have up to 9,400,000 Mcf of gas available in Clay Basin storage for withdrawal during the 1977-78 heating season.

Applicant states that the gas transportation and exchange agreement and the three party agreement, contemplate that of the first 27,000,000 Mcf of natural gas injected into the Dakota Formation 9,400,000 Mcf would be available to Applicant, notwithstanding the fact that all or a portion of such gas may have been injected by Resources for the account of El Paso. The subject agreements also provide, that if, as of October 31, 1977, the total gas stored in the Dakota Formation for the account of Applicant and El Paso is in excess of 27,000,000 Mcf, then all or a portion of that excess volume may be withdrawn to protect the Priority 1 and 2 requirements of Applicant's or El Paso's customers, it is indicated. Applicant states that the gas transportation and exchange agreement provides that its requirements have priority over El Paso's requirements should Applicant and El Paso simultaneously require protection gas.

It is stated that in the event volumes of gas are withdrawn from the Dakota Formation during the 1977-78 heating season for the account of El Paso, El Paso would, pursuant to the gas transportation and exchange agreement, reimburse Applicant for all costs attributable to such withdrawal. It is further stated that such costs would be El Paso's pro rata share of the amount payable by Applicant to Resources during the month of withdrawal as provided by Resources' the effective FPC Gas Rate Schedule S-1.

Any person desiring to be heard or to make any protest with reference to said amendment should on or before August 22, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. Any persons who have heretofore filed need not file again.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. CP77-511]

NORTHWEST PIPELINE CORP.

Application

JULY 27, 1977.

Take notice that on July 18, 1977, Northwest Pipeline Corporation (Applicant), 315 East Second South, Salt Lake City, Utah 84111, filed in Docket No. CP77-511 an application pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation,

[2] Id.

[4] *FPC* v. *Sierra Pacific Power Co.*, 350 U.S. 348 (1956); *United Gas Co.* v. *Mobile Gas Corp.*, 350 U.S. 332 (1956).

[7] Section 313(a) or the Federal Power Act (16 U.S.C. 825 l(a)) and § 1.34(a) of the Commission's Rules of Practice and Procedure (18 CFR 1.34(a)) promulgated pursuant thereto, require that a person aggrieved by a Commission order file an application for rehearing within 30 days after issuance of the order.

[8] *Sam Rayburn Dam Electric Cooperative* v. *FPC*, supra, at 1007-1008.

[9] Id. at 1009.

[10] Id. at 1008-1009.

[11] Id at 1009.

[12] After the Court's opinion was issued, the Presiding Administrative Law Judge in this docket issued an Initial Decision on March 25, 1976, finding inter alia, that Gulf States' fixed rates, subject to Section 206 proceedings, were not so low as to adversely affect the public interest and therefore were to be retained at the original level as distinguished from the proposed increased level. The decision further held that Gulf States' proposed rates subject to review under Section 205 of the Federal Power Act were just and reasonable and should be permitted to take effect. This Decision was affirmed by Commission order issued on September 22, 1976.

on a best efforts basis, and the exchange of natural gas for and with El Paso Natural Gas Company (El Paso) for a term commencing June 1, 1977, and extending through December 31, 1979 or until such time as any imbalance in exchange gas has been eliminated and for the sale of natural gas to El Paso for fuel in conjunction with said proposal, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that El Paso has requested that Applicant and Mountain Fuel Resources (Resources) cooperate with El Paso to the end that El Paso may temporarily store up to approximately 26,000,000 Mcf of natural gas during the period from June 1, 1977, through April 30, 1978. It is indicated that during the summer of 1978, the volumes of gas to be stored by El Paso would be transferred to a storage field to be developed by El Paso and would be utilized for the protection of El Paso's high-priority East of California customers. El Paso has informed Resources and Applicant that, commencing August 1, 1977 and continuing through October 31, 1977, it can make available to Resources, for storage by Resources, certain volumes of natural gas on a relatively firm basis, and that it further anticipates that it may have additional volumes available on a day to day basis during the period November 1977 through April 1978, it is said.

It is stated that Resources and Applicant have agreed to allow El Paso also to utilize the Clay Basin facilities during the 1977–78 heating season, and that in order to effectuate the storage for El Paso, Applicant and El Paso have entered into a gas transportation and exchange agreement dated March 24, 1977 and El Paso, Resources and Applicant have entered into a three party agreement dated March 21, 1977.

Applicant states that the three party agreement provides that Resources, in order to inject volumes of natural gas during the summer of 1977 for the account of El Paso, would construct and operate certain temporary and permanent facilities. It is indicated that the temporary facilities would consist of ten 1,000 horsepower compressor units and appurtenant facilities and would be utilized solely for the account of El Paso, and that the permanent facilities consist of 11 injection and withdrawal wells, and the associated gathering, dehydration and measuring facilities. It is further indicated that the 11 injection and withdrawal wells would also be utilized solely for the account of El Paso during the period commencing on the initial in-service date of each well and continuing through April 30, 1978, El Paso's injection period, and that subsequent to April 30, 1978 the additional wells would be utilized by Resources in order for Resources to provide Applicant the level of service contemplated for the 1978–79 heating season. El Paso would pay Resources the total cost of service attributable to the temporary compression, so long as such compression is required for service to El Paso or upon removal, and for the 11 wells through April 30, 1978, it is indicated. It is stated that in addition to the aforementioned costs El Paso would also pay Resources the following:

(a) During the period May 1, 1977 through September 30, 1977 one half (½) of the cost of service of the 20-inch pipeline from Applicant's tap to the Clay Basin Field and 5 percent of the cost of service attributable to all other facilities installed by Resources in the Clay Basin Field for the purpose of rendering service to Applicant and

(b) During the month of October 1977 El Paso shall pay the full cost of service of all facilities installed by Resources in the Clay Basin Field.

It is asserted that the impact on Applicant of items (a) and (b) above is that El Paso will be paying Resources a portion of the cost of service which would otherwise have been the responsibility of Applicant. Applicant estimates that during the period May through October 1977 Applicant's share of Resources cost-of-service will be reduced by approximately $750,000.

It is indicated that the transportation agreement between El Paso and Applicant provides for the best efforts transportation and delivery of El Paso's volumes by Applicant to Resources for storage and for the ultimate redelivery to El Paso of volumes equivalent to the volumes stored by Resources for El Paso's account. The three party agreement provides that Resources would, on a best efforts basis, receive volumes of natural gas from Applicant for storage in the Clay Basin Field for the account of El Paso, it is said.

Applicant states that Resources is presently in the process of developing the Dakota Formation of the Clay Basin Field as an underground gas storage reservoir for the benefit of Applicant and that Resources and Applicant currently contemplate that the volumes of natural gas to be stored by Resources for Applicant's account during 1977 would be 27,000,000 Mcf.

It is stated that Resources with Applicant's agreement has agreed to construct and operate certain additional facilities, permanent and temporary, in order to develop further the Clay Basin Field, on a one line basis, in order to provide, on a best efforts basis, storage service for El Paso, and that the storage service to be provided by Resources for Applicant would have priority over that storage service to be provided El Paso by Resources in order to assure that Applicant has sufficient gas in Clay Basin storage to support the withdrawal schedule proposed by Applicant in Docket No. CP76–389, i.e., 75,000,000 Mcf per day for approximately 125 days.

It is indicated that the March 24, 1977, agreement between Applicant and El Paso contemplates that during the period June 1, 1977 through April 30, 1978 El Paso would deliver volumes of natural gas to Applicant at one or more of three existing points of interconnection between the facilities of Applicant and El Paso in the San Juan Basin. Applicant states that the gas delivered to it by El Paso would be transported by Applicant to the existing interconnection between the facilities of Applicant and Resources in Daggett County, Utah, for delivery to Resources for injection by Resources into the Clay Basin Field for El Paso's account.

It is stated that the two agreements contemplate that title to all gas remaining in Clay Basin Storage for El Paso's account as of April 30, 1978 would ultimately pass to Applicant and Applicant would redeliver equivalent volumes of natural gas on a Btu basis to El Paso in the San Juan Field. Most of the volumes of gas in Clay Basin storage for El Paso's account would be redelivered during the summer of 1978 for transfer to a new storage facility to be developed by El Paso, it is indicated. It is stated that to the extent that all volumes due to El Paso are not fully returned in the summer of 1978 redelivery may be made through December 1979 or until such time as any imbalance in exchange gas has been eliminated.

Applicant states that redelivery to El Paso would be at an existing point of interconnection between the facilities of El Paso and Applicant in La Plata County, Colorado, and that the redelivery point is also one of the aforementioned delivery points where El Paso proposes to deliver gas to Applicant.

It is contemplated that to the extent there are volumes in Clay Basin in excess of the 27,000,000 Mcf which are required for Applicant's account then El Paso or Applicant may withdraw a portion or all of such excess during the 1977–78 heating season if such withdrawal is required for the protection of El Paso's or Applicant's Priority 1 and 2 requirements. Applicant states that no facilities would be required by it to effectuate the proposed service.

Applicant proposes to charge El Paso a transportation charge of 16.03 cents per Mcf of natural gas delivered to Applicant for transportation and delivery to Resouces, which rate represents Applicant's rolled-in transmission cost. It is stated that El Paso would purchase from Applicant the incremental fuel required to transport its volumes to Resources, and that El Paso would also purchase from Applicant the volumes of natural gas which El Paso is required to furnish Resources for the injection of natural gas for El Paso's account, as provided by Resource's S–2 Rate Schedule Applicant proposes to charge El Paso the then effective average cost of purchased gas for all gas sold to El Paso for fuel.

Any person desiring to be heard or to make any protest with reference to said application should on or before August 22, 1977, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) as the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervent is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. CP76-428]

SEA ROBIN PIPELINE CO.

Filing of Original Tariff Sheets

JULY 25, 1977.

Take notice that on July 6, 1977, Sea Robin Pipeline Company (Sea Robin) tendered for filing Original Sheet Nos. 259 through 282 to its FPC Gas Tariff, Original Volume No. 2, being a transportation agreement between Sea Robin and Northern Natural Gas Company dated August 19, 1976. It is proposed that these tariff sheets become effective on the date the facilities to connect East Cameron Block 335 are completed and the transportation service certificated in Docket No. CP76–428 commences.

The company states that copies of these tariff sheets have been mailed to Northern Natural Gas Company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 15, 1977. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. CI77–329, Docket No. CP77–304, Docket No. CP64–97]

TEXACO INC. AND SABINE PIPE LINE CO.

Order Further Conditioning Acceptance of Joint Motion to Resolve all Issues

JULY 26, 1977.

As we stated in our order issued in this proceeding on July 7, 1977, we sought compliance with the requirements of the Natural Gas Act at the earliest practicable time, particularly in our requirement that gas previously diverted from the interstate market be "paid back" at the earliest possible time. We not only sought to achieve a public interest resolution to this matter, but we believed that the interstate market would need, and be benefited by the pay back deliveries this coming heating season. As we later provide, the pay back volumes will be made available to those interstate pipeline companies demonstrating the greatest need in order to maintain adequate service to their customers.

In our order of July 14, 1977, we accepted and approved the "Joint Motion of Texaco Inc. and Sabine Pipe Line Company," filed in this proceeding of July 12, 1977, subject to certain terms and conditions and modification by subsequent order. Paragraph (E) of that order required a submission by Texaco of information concerning its present intrastate sales, its non-offshore Federal Domain reserves, the extent of convertibility of its Port Arthur Refinery to fuels other than natural gas, and other operational details.

Pursuant to Paragraph (F) of the July 14 order, a public conference was held concerning Texaco's submittal on July 20, 1977. The conference was conducted by members of the Commission Staff and was attended by representatives of Texaco Inc. (Texaco) and Sabine Pipe Line Company (Sabine); Associated Gas Distributors (AGD), and intervenor: and the Public Service Commission of the State of New York (PSCNY). PSCNY has recently filed a petition to intervene.

Our July 14 order provided for acceptance by Texaco and Sabine—who have filed such acceptance, and comments to be filed thereon on or before July 22, 1977. Pursuant to this provision comments were filed by AGD, NYPSC, and the Commission staff.

Staff, in its comments, states that after investigation and analysis of information and data received from Texaco pursuant to the July 14, order, and adduced at the public conference mentioned above, and after a field trip to the facilities involved, is of the opinion that Texaco can make available to itself within two years sufficient intrastate gas to operate the Port Arthur Refinery without any offshore Federal domain gas and can also pay back all Federal Domain gas utilized in the past and to be utilized at Port Arthur during the next two years, over a period equal to the period during which Federal gas deliveries to Port Arthur were made. Staff's opinion is based in large part upon Staff's conclusion that Texaco owned or controlled some 8,974.8 Bcf of intrastate gas in the lower 48 states as of January 1, 1977, 6,961.7 Bcf of which was in non-offshore Federal Domain, Southern Louisiana. Staff further concluded that approximately 362.4 MMcf/D of this gas will be released by expiration of intrastate contracts within the next five years, or by December 31, 1982.

Staff's contention is that Texaco created its own dependence on Federal Domain gas at Port Arthur by choosing to use such gas there while selling much of its intrastate gas in its intrastate industrial supply system. Staff also contends that when viewed on an annual basis, the volumes of Offshore Federal Domain gas provided for in the Texaco-Sabine Proposal for use at Port Arthur during the first 18 months is at a rate higher than for any past year. Based on its further conclusions, Staff recommends modification of the Commission's order of July 14, 1977, principally (1) to terminate all Federal Domain deliveries to Port Arthur within 2 years, (2) to require pay back from non-offshore Federal Domain gas delivered to Port Arthur, including during the two-year phase-out period, and (3) to require Texaco to sell uncommitted Federal Domain gas from Lighthouse Point and Tiger Shoal to interstate pipelines in short supply.

PSCNY in its comments states it is willing to accept the Texaco-Sabine Proposal as modified by our July 14 order, subject to possible reservations based on Staff comments, upon the following conditions: (1) that payback sales be made only at the maximum rate as specified in Opinion No. 770–A, as that price may be modified by subsequent Commission action or pursuant to new legislation, (2) that Texaco be required to give precedence in the sale of payback volumes, on a "most favored nation" basis, to pipeline companies on the basis of severity of expected curtailments during the 1977–1978 winter,[1] (3) that volumes of Federal Domain gas to be used as boiler fuel at the Port Arthur refinery during the three year phase-out period for this use be also subject to payback, and (4) that approval of all Federal Domain volumes for use at Port Arthur be conditioned upon the final outcome of pending Commission

[1] New York would permit Texaco to reject all initial offers at less than the nationwide rate. New York also would not require Texaco to bear any additional expense of attaching gas to a particular pipeline purchaser over and above that which it would be required to expend to make the sale to another pipeline. The potential pipeline purchaser would have to decide whether to absorb such costs or to enter into exchange arrangements with other pipelines to achieve this result.

and court proceedings with respect to Opinion Nos. 727, 743 and 789.

AGD in its comments makes the same recommendations as the last two listed above by PSCNY. Additionally, it recommends that 60-day emergency sales (where no reserve dedications are involved) and direct industrial sales pursuant to 16 CFR 279 (Order No. 533) should not be allowed to qualify as payback volumes.

We have considered the parties' comments, being the result of data largely supplied by Texaco pursuant to our July 14 order, and are persuaded that their recommendations should be given due consideration.

Consequently, we are persuaded to modify the July 14 order to require that payback volumes be sold at the applicable national rate, as requested by PSCNY, and Staff. This seems to be a fair requirement because of the very fact that these are payback volumes. We also believe it proper, as well as equitable, to require that in the sale of payback volumes, priority be given to pipelines with the greatest need, as further requested by PSCNY and Staff.

The requests of PSCNY and AGD that approval of the use of Federal Domain gas at Port Arthur be conditioned on the outcome of litigation involving Opinion Nos. 727, 743, and 789 are rejected. By our July 14 order, we intended to resolve promptly all of the issues involved here, thus eliminating the likelihood of protracted litigation on these matters. The imposition of conditions making resolution of this case dependent on the outcome of other litigation and further investigation would thwart the basic purpose of the July 14 order.

We will accept the recommendation of AGD that direct sales to industrial customers under Order No. 533 should not qualify as payback volumes. However, we see no reason why 60-day emergency sales for resale should not qualify, where they take place at or below the applicable national rate, as suggested by New York.

We have adopted Staff's recommendation that Texaco be required to discharge payback obligations within the same time period that they were created. This requires that payback volumes be accounted for in terms of volumes delivered within a certain time period, rather than in terms of dedicated reserves so that Texaco will dedicate non-offshore Federal Domain reservoirs capable of actually delivering 200 billion cubic feet of natural gas to the interstate market.

Staff recommends that gas volumes used for repayment of advance payments advanced to Texaco not be eligible as payback volumes. We agree and will modify the Texaco-Sabine Proposal accordingly. We believe this to be proper because such advance payments volumes are, in a sense, already dedicated to the interstate market. Staff also recommends that applications filed by Texaco covering payback volumes should clearly state this and give the quantity of proven reserves covered by such applications. The value of this provisions is self-evident, and it will be added also.

Staff contends that the question of violations of the Natural Gas Act of Texaco and Sabine should be set for a limited hearing. We disagree. The purpose of our July 14 order and this order is to resolve all issues in the case and this includes the question of past violations. We do not intend to pursue this matter further, assuming of course, Texaco and Sabine accept the conditions of this order.

The Commission orders: (A) Texaco shall payback all volumes of gas required within the same time period that deliveries from Federal Domain reserves occurred.

(B) Payback volumes shall not come from sources which are subject to advance payment agreements with interstate pipeline companies.

(C) In order to qualify as payback volumes pursuant to the Texaco-Sabine Proposal, as conditioned a sale of gas shall be a sale for resale in the interstate market at a rate not exceeding the national rate applicable to such gas or similar gas, as that rate may be lawfully modified by subsequent Commission action or pursuant to new legislation enacted into law.

(D) In the sale of payback volumes Texaco shall give precedence on a "most favored nation" basis to pipeline companies which have indicated to the Commission in the latest Form 16 reports and data filed in the omnibus proceeding in Docket Nos. RP77-65, et al., that they expect to be curtailing service during the 1977-1978 winter season into Priority I (as defined by Section 2.78(a)(1) of the Commission's Statements of General Policy and Interpretations) first under normal weather and then under colder than normal weather conditions and, failing any such willing pipeline purchaser of the gas, to pipelines who have indicated that they would be curtailed over 50 percent of Priority II (as defined in Section 2.78(a)(1)) during the coming winter period, and finally, failing such a willing pipeline purchaser, to pipelines indicating that they would be curtailing into Priority II to a lesser extent during the forthcoming winter period.

(E) Volumes of gas sold to interstate pipeline companies under contracts executed prior to July 7, 1977, or pursuant to certificate applications filed prior to July 7, 1977, shall not be used to reduce Texaco's payback obligations.

(F) Any applications filed by Texaco involving sales of payback volumes shall clearly state that the volumes sold are being used to reduce its payback obligations and give the quantity of proven reserves covered by such application.

(G) Texaco shall file monthly reports identifying and giving the amounts of gas volumes sold to reduce payback obligations.

(H) The petition to intervene filed by the Public Service Commission of the State of New York is hereby granted.

(I) The Texaco-Sabine Proposals for resolution of the issues in this proceeding, approved subject to conditions in our order issued herein July 14, 1977, is hereby made subject to further conditions, as set forth herein.

(J) The Commission's July 7, 1977 order in this proceeding is stayed until August 2, 1977.

(K) The July 14, 1977 order, as modified herein, shall become effective as of August 2, 1977.

(L) Texaco and Sabine, over the signature of a responsible officer of each company, shall file with the Commission on or before August 1, 1977, and original and one copy of their acceptance or rejection of the terms and conditions of this order.

(M) The Secretary shall cause the instant order to be published in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22237 Filed 8-2-77;8:45 am]

[Docket No. RI77-18]

TEXAS ENERGIES, INC.

Order Granting Application for Special Relief and Permitting Intervention

JULY 27, 1977.

On December 9, 1976, Texas Energies, Inc. (Texas) filed an application for special relief pursuant to § 2.76 of the Commission's General Policy and Interpretations (18 CFR § 2.76) for the sale of natural gas to Panhandle Eastern Pipeline Co. (Panhandle) from the Adams 1-5 Lease, Meade County, Kans. Subsequently, Texas filed amended applications for special relief on January 24, 1977 and March 29, 1977.

Texas is an independent small producer which was issued a small producer certificate in Docket No. CS72-428 on February 3, 1972. Holding a 100 percent working interest in the lease, Texas is presently selling natural gas to Panhandle at a rate of 38.9 cents per Mcf at 14.65 psia pursuant to a contract dated September 15, 1967.

Texas requests that the Commission authorize it to collect 64 cents per Mcf for the sale of said gas. This increased rate would enable Applicant to recover its out-of-pocket costs. Texas proposes not to make any additional investment.

In a letter dated November 24, 1976 Panhandle has indicated its consent to the increased rate requested by Texas.

Notice of Texas' application for special relief was issued on January 3, 1977 and was published in the FEDERAL REGISTER. Notices of the amended applications for special relief were issued on February 11, 1977 and April 6, 1977. Panhandle filed a timely petition to intervene on January 25, 1977.

Based on an analysis of data submitted by Texas, Staff estimates that 136,334 Mcf of gas and 842 Bbls of liquids remain to be produced over a 6.99 years period. Staff concludes that the requested special relief is warranted on an out of pocket cost basis.

After reviewing the costs to be incurred and the reserves to be recovered, we determine that Texas' application for special relief is warranted and that it is in the public interest to grant this application.[1]

The Commission finds:

The application for special relief filed by Texas should be granted.

The Commission orders:

(A) As amended, the application for special relief of Texas is hereby granted.

(B) Texas is authorized to collect 64 cents per Mcf at 14.65 psia for natural gas from the Adams 1-5 Lease, Meade County, Kans., effective upon the date of issuance of this order.

(C) This authorization is subject to the following condition: Texas must file, within 30 days of the date of issuance of this order, the appropriate rate change filings in accordance with Section 154.-94 of the Commission's Regulations under the Natural Gas Act (18 CFR § 154.-94), accompanied by an executed copy of the amended contract agreement providing for the rate increase.

(D) Panhandle is permitted to intervene in the above-entitled proceeding, subject to the rules and regulations of the Commission: *Provided*, however, That its participation shall be limited to matters affecting asserted rights and interests specifically set forth in its petition for leave to intervene; and *Proride, further*, that the admission of Panhandle in the manner provided shall not be construed as recognition by the Commission that Panhandle might be aggrieved because of any order or orders entered in this proceeding, and that Panhandle agrees to accept the record as it now stands.

By the Commission.

LOIS D. CASHLL,
Acting Secretary.

[FR Doc 77 22238 Filed 8-2 77.8.45 am]

[Docket No. RI77-16]

TEXAS ENERGIES, INC.

Order Granting Special Relief and Permitting Intervention

JULY 27, 1977.

On December 9, 1976, Texas Energies, Inc. (Texas) filed an application for special relief pursuant to § 2.76 of the Commission's General Policy and Interpretations (18 CFR § 2.76) for the sale of natural gas to Panhandle Eastern Pipeline Co. (Panhandle) from the Holmes No. 1-21 Lease, Meade County, Kans., under its FPC Gas Rate Schedule No. 1, in CI73-672. Subsequently, Texas filed amended applications for special relief on January 24, 1977 and March 29, 1977.

Texas is an independent small producer which was issued a small producer certificate in Docket No. CS72-468 on February 3, 1972. Holding an 100 percent working interest in the lease, Texas is presently selling natural gas to Panhandle at a rate of 39.9 cents per Mcf at 14.65 psia pursuant to a contract dated June 29, 1956.

Texas requests that the Commission authorize it to collect $1.07 per Mcf for the sale of said gas; this increased rate would enable Texas to install compression and artifical lift equipment. Texas states without such compression the well would have to be abandoned.

In a letter dated November 24, 1976 Panhandle has indicated its consent to the increased rate requested by Texas.

Notice of Texas' application for special relief was issued on January 3, 1977 and was published in the FEDERAL REGISTER. Notices of the amended applications for special relief were issued on February 11, 1977 and April 6, 1977. Panhandle filed a timely petition to intervene on January 25, 1977.

Based on an analysis of data submitted by Texas, Staff estimates that 252,756 Mcf of gas and 2,407 Bbls. of liquids remain to be produced over a 5.33 years period. Staff concludes that the requested special relief is warranted based on its cost study.

After reviewing the costs to be incurred and the reserves to be recovered, we determine that Texas' application for special relief is warranted and that it is in the public interest to grant this application.

The Commission finds:

The application for special relief filed by Texas meets the criteria set forth in Section 2.76 of the Commission's General Policy and Interpretations.

The Commission orders:

(A) As amended, the application for special relief of Texas is hereby granted.

(B) Texas is authorized to collect $1.07 per mcf at 14.65 psia for natural gas from the Holmes No. 1-21 Lease, Meade County, Kans., under its Gas Rate Schedule No. 1, effective upon either the date of issuance of this order or the date the remedial work is completed, whichever is later.

(C) This authorization is subject to the following conditions: (1) Texas must file, within 30 days of the date of issuance of this order, the appropriate rate change filings in accordance with § 154.94 of the Commission's regulations under the Natural Gas Act (18 CFR § 154.94), accompanied by an executed copy of the amended contract agreement providing for the rate increase; (2) Within 30 days of the effective date provided in Ordering Paragraph (B) above for the rate authorized herein, Texas must file a statement signed by Panhandle in Docket No. RI77-16 setting forth the date on which the remedial work was completed.

(D) Panhandle is permitted to intervene in the above-entitled proceeding, subject to the Rules and Regulations of the Commission: *Provided, however*, That its participation shall be limited to matters affecting asserted rights and interests specifically set forth in its petition for leave to intervene; and *Provided, further*. That the admission of Panhandle in the manner provided shall not be construed as recognition by the Commission that Panhandle might be aggrieved because of any order or orders entered in this proceeding, and that Panhandle agrees to accept the record as it now stands.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc 77 22239 Filed 8-2-77;8:45 am]

[Docket No. RI77-19]

TEXAS ENERGIES, INC.

Order Granting Special Relief

JULY 27, 1977.

On December 9, 1976, Texas Energies, Inc. (Texas) filed an application for special relief pursuant to § 2.76 of the Commission's General Policy and Interpretations (18 CFR § 2.76) for the sale of natural gas to Transwestern Pipeline Co. (Transwestern) from the Meier Unit Well, Beaver County, Okla. The above acreage is presently covered by the Sun Oil Company FPC Rate Schedule No 122. Texas filed an amendment to its application for special relief on January 24, 1977.

Texas is an independent small producer which was issued a small producer certificate in Docket No. CS72-428 on February 3, 1972. Holding a 100 percent working interest in the lease which was purchased from Sun Oil Co., on August 1, 1976, Texas is currently operating under a gas purchase agreement between Sun Oil as seller and Transwestern Pipeline Co., as buyer dated July 10, 1958. Texas is not currently selling any gas to Transwestern as this well is presently shut-in.

Texas requests that the Commission authorize it to collect $1.30 per Mcf for the sale of said gas; this increased rate would enable Texas to install compression and artificial lift equipment. Texas states that without such equipment the well would have to be abandoned.

In a letter dated September 17, 1976 Transwestern has indicated its consent to the increased rate requested by Texas.

Notice of Texas' application for special relief was issued January 3, 1977 and was published in the FEDERAL REGISTER. Notice of the amendment to the application for special relief was issued on February 11, 1977. There were no interveners in this special relief case.

Based on an analysis of data submitted by Texas, Staff estimates that 167,780 Mcf of gas and 1,598 Bbls of liquids remain to be produced over a 4.8 year period. Staff concludes that the requested special relief is warranted on a cost basis.

After reviewing the cost to be incurred, and the reserves to be recovered we determine that Texas' application for special relief is warranted and that it is in the public interest to grant this application.

The Commission finds:

The application for special relief filed by Texas meets the criteria set forth in Section 2.76 of the Commission's General Policy and Interpretations.

[1] While the petition does not meet the criteria of § 2.76 because there is no additional investment involved, the data presented justifies special relief on an out-of-pocket cost basis.

The Commission orders:

(A) As amended, the application for special relief of Texas is hereby granted.

(B) Texas is authorized to collect $1.30 per Mcf at 14.65 psia for natural gas from the Meier Unit Well, Beaver County, Okla., effective upon either the date of issuance of this order or the date the remedial work is completed, whichever is later.

(C) This authorization is subject to the following conditions: (1) Texas must file, within 30 days of the date of issuance of this order, the appropriate rate change filings in accordance with § 154.94 of the Commission's regulations under the Natural Gas Act (18 CFR § 154.94), accompanied by an executed copy of the amended contract agreement providing for the rate increase; (2) within 30 days of the effective date provided in Ordering Paragraph (B) above for the rate authorized herein, Texas must file a statement signed by Transwestern in Docket No. RI77-19 setting forth the date on which the remedial work was completed.

(D) The acreage described as the Meier Unit Well, Beaver County, Oklahoma is deleted from the Sun Oil Company FPC Rate Schedule No. 122 and Docket No. G-15791.

(E) The provisions of Section 157.40(c) are hereby waived to the extent necessary to permit the subject sale to be made under Texas' small producer certificate at the rate provided herein.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22240 Filed 8-2-11:8 45 am]

[Docket No. RI77-17]

TEXAS ENERGIES, INC.

Order Granting Special Relief and Permitting Intervention

JULY 27, 1977.

On December 9, 1976, Texas Energies, Inc. (Texas) filed an application for special relief pursuant to § 2.76 of the Commission's General Policy and Interpretations (18 CFR 2.76) for the sale of natural gas to Panhandle Eastern Pipeline Company (Panhandle) from the Peters 1-A Lease, Seward County, Kansas. Subsequently, Texas filed an amendment to its application for special relief on January 24, 1977.

Texas is an independent small producer which was issued a small producer certificate in Docket No. CS72-428 on February 3, 1972. Holding a 100 percent working interest in the lease, Texas is presently selling natural gas to Panhandle at a rate of 37.6 cents per Mcf at 14.65 psia pursuant to a contract dated December 19, 1960.

Texas requests that the Commission authorize it to collect $1.15 per Mcf for the sale of said gas; this increased rate would enable Texas to install equipment which would provide continuous compression. Texas states that without such compression the well would have to be abandoned since the line pressure would exceed well head pressure.

In a letter dated November 24, 1976, Panhandle has indicated its consent to the increased rate requested by Texas.

Notice of Texas' application for special relief was issued on January 3, 1977 and was published in the FEDERAL REGISTER. Notice of the amendment of the application for special relief was issued on February 11, 1977. Panhandle filed a timely petition to intervene on January 25, 1977.

Based on an analysis of data submitted by Texas, Staff estimates that 175,666 Mcf of natural gas and 59 BBls of liquids remain to be produced over a 3.5 years period. Staff concludes that the requested special relief is warranted on a cost basis.

After reviewing the costs to be incurred and the reserves to be recovered, we determine that Texas' application for special relief is warranted and that it is in the public interest to grant this application.

The Commission finds: The application for special relief filed by Texas meets the criteria set forth in Section 2.76 of the Commission's General Policy and Interpretations.

The Commission orders: (A) As amended, the application for special relief of Texas is hereby granted.

(B) Texas is authorized to collect $1.15 per Mcf at 14.65 psia for natural gas from the Peters 1-A Lease, Seward County, Kansas, effective upon either date of issuance of this order or the date the remedial work is completed, whichever is later.

(C) This authorization is subject to the following conditions: (1) Texas must file, within 30 days of the date of issuance of this order, the appropriate rate change filings in accordance with § 154.94 of the Commission's Regulations under the Natural Gas Act (18 CFR 154.94), accompanied by an executed copy of the amended contract agreement providing for the rate increase; (2) Within 30 days of the effective date provided in Ordering Paragraph (A) above for the rate authorized herein, Texas must file a statement signed by Panhandle in Docket No. RI77-17 setting forth the date on which the work was completed.

(D) Panhandle is permitted to intervene in the above-entitled proceeding, subject to the Rules and Regulations of the Commission; Provided, however, That its participation shall be limited to matters affecting asserted rights and interest specifically set forth in its petition for leave to intervene, and Provided, further, That the admission of Panhandle in the manner provided shall not be construed as recognition by the Commission that Panhandle might be aggrieved because of any order or orders entered in this proceeding, and that Panhandle agrees to accept the record as it now stands.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

[FR Doc.77-22246 Filed 8-2-77;8:45 am]

[Docket No. ER77-254]

UTAH POWER & LIGHT CO.

Proposed Tariff Changes and Agreements

JULY 27, 1977.

Take notice that Utah Power & Light Company ("The Company") on May 5, 1977, tendered for filing proposed changes in its FPC Electric Service Tariff, together with resale service agreements with each of the following named customers all providing for service under the Company's FPC tariff rate RS-2:

Brigham City, Utah, (dated August 2, 1973); Levan, Utah, (dated March 10, 1976); Murray City, Utah, (dated October 3, 1973); Nephi City, Utah, (dated September 18, 1973); Springville City, Utah, (dated August 6, 1973); and Strawberry Water Users Association, Springville, Utah, (dated March 26, 1975).

The Company states that the customers under the agreements are receiving the bulk of their power and energy supplies from the U.S. Government ("CRSP") and that the customers now require amounts of power and energy which they cannot acquire from that source. The Company indicates that its system is presently interconnected with each of the customer's systems and no facilities have been installed or modified in order to render this resale service. The Company states that the customers are presently unable to receive their requirements for power and energy from CRSP and therefore are receiving service under agreements subject to FPC approval and the Company has therefore requested a waiver of the notice requirements to allow these agreements to go into effect on the dates noted above.

Copies of the filing have been mailed to each of the customers named above and to the Public Service Commission of Utah, according to the Company.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10) on or before August 12, 1977. All such petitions or protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the Proceeding. Any person wishing to become a party must file a Petition to Intervene. Copies of this application are on file with the Commission and are available for public inspection.

LOIS D. CASHELL,
Acting Secretary.

[Docket No. ER76-92]

WESTERN POWER DIVISION, CENTRAL TELEPHONE & UTILITIES CORP.

Order Approving Settlement Agreement

JULY 26, 1977.

On April 20, 1977, Western Power Division, Central Telephone and Utilities Corporation (CTU) filed a motion for an order approving a stipulation and agreement and proposed settlement of proposed increased rates for service to its REA cooperative and municipal wholesale customers.[1]

CTU on August 29, 1975, submitted for filing increased rates for service to its ten full requirements REA cooperatives, 13 full requirements municipals, eight partial requirements municipal customers and one partial requirement cooperative. By letter dated September 24, 1975, the Secretary of the Commission informed CTU that its filing failed to meet the Commission's Requirements as to timeliness of the test period. In response to the Secretary's deficiency notice the Company filed a revised cost of service and related testimony on January 27, 1976. CTU in revising its cost of service exhibits and related testimony included construction work in progress (CWIP) in the rate base.

By Commission Order dated February 20, 1976, the Commission permitted the rate increases to become effective February 23, 1976, subject to refund, but ordered CTU to file revised rate schedules reflecting reduced rates based on the elimination of CWIP from the rate base and to make refunds of the differences between those rates and the rates permitted to become effective February 23, 1976. CTU, by letter dated April 6, 1976, submitted revised rate schedules based upon the elimination of CWIP from the rate base. The proposed revised rate schedule was identified as being deficient by Secretary letter of June 1, 1976. On July 12, 1976, CTU submitted a motion for reconsideration of the June 1st deficiency letter, or in the alternative, for permission to withdraw the proposed rate schedule for service to its partial requirements cooperative customer. On August 17, 1976, the Commission denied the motion for reconsideration, but granted CTU's motion to withdraw whereupon CTU filed a second revised rate schedule and accompanying cost of service, reflecting reduced rates. These latter rates were accepted for filing by letter dated November 12, 1976. In compliance with the Commission Orders of February 20, 1976 and August 17, 1976, CTU made refunds to its wholesale customers.

[1] Ark Valley Electric Cooperative, C&W Rural Electric, CMS Electric Cooperative, NCK Electric Cooperative, Jewell-Mitchell Cooperative, Ninnescah, Norton-Decatur, Smoky Hill, Sumner-Cowley, Victory, Cawker City, Cimarron, Coats, Glasco, Glen Elder, Holyrood, Isabel, Jamestown, Lucas, Luray, Mankato, Montezuma, Tipton, the Interconnected Municipal Utilities of Anthonly, Attica, Beloit, Hoisington, Kingman, Pratt, Russell and Washington; and Central Kansas Electric Cooperative.

Staff on October 27, 1976, filed cost of service Top Sheets. On November 5, 1976, and January 7, 1977, settlement conferences were held; and as a result of the conferences, parties were able to reach settlement on all issues as represented by the stipulation and agreement of settlement filed on April 20, 1977. The proposed settlement would reduce the originally proposed increased rates from $1,301,038 to $455,040. In addition, proposed settlement provides (1) settlement rates to become effective February 23, 1976; (2) the proposed settlement rates will not be changed prior to June 30, 1977; (3) CTU will make refunds for past collections, not already refunded in excess of the settlement rates with interest at 9 percent per annum and (4) service contracts to municipal customers will contain no restrictive language as to ultimate use of purchased energy.

The Presiding Administrative Law Judge certified the proposed settlement agreement and record to the Commission by notice issued April 26, 1977. No comments in opposition have been filed.

Based upon our review of the record in these proceedings including the settlement agreement itself, the filings, documents and pleadings submitted, we conclude that the settlement agreement represents a reasonable resolution of the issues in Docket No. ER76-92 and such settlement is in the public interest. Accordingly the stipulation and agreement of settlement filed in this docket on April 20, 1977, should be approved. The proposed settlement hereinafter approved by this order approves an increase in rates less than the amount indicated as reasonable by Staff (9.09 percent overall rate of return including 12.5 percent return on common equity). The settlement results in a return on common equity of 11.5 percent.

The Commission finds: The stipulation and agreement of settlement filed by Western Power Division, Central Telephone and Utilities Corporation on April 20, 1977, as is applies to electric service to its REA cooperative and municipal wholesale customers should be approved and made effective as hereinafter ordered.

The Commission orders: (A) the negotiated stipulation and agreement of settlement file by Western Power Division, Central Telephone and Utilities Corporation in this docket on April 20, 1977, is hereby approved and made effective as of February 23, 1976.

(B) In accordance with the terms of the stipulation and settlement agreement and consistent with the Commission's Regulations, CTU is hereby directed to refund the difference in revenues collected under the rates made effective February 23, 1976, and the revenues authorized to be collected pursuant to the terms of the stipulation and settlement agreement filed on April 20, 1977, with interest at 9% per annum. The total refund amount due shall be reduced by the amounts previously refunded by CTU to its wholesale customers on April 23, 1976, and December 22, 1976.

(C) CTU is hereby directed pursuant to Section 35.1(a) of the Commission's Regulations to file within 30 days the revised tariff sheets and rate schedules appended to the approved stipulation and agreement of settlement.

(D) CTU is hereby directed to file a compliance report within 15 days after refunds have been made, such report to show the monthly billing determinants and the revenues under prior, present and settlement rates. The report should also show the monthly settlement increase, the monthly revenue refund, and the monthly interest computation together with a summary of such information for the total refund period. A copy of such report shall also be furnished by CTU to each State Commission within whose jurisdiction the wholesale customer distributes and sells all electric energy at retail.

(E) This order is without prejudice to any findings or orders which may have been made or which will hereafter be made by the Commission, and is without prejudice to any claim or contentions which may be made by the Commission, the Staff, or any party or persons affected by the Order against CTU or any person or party.

(F) The Secretary of the Federal Power Commission shall cause prompt publication of this Order in the FEDERAL REGISTER.

By the Commission.

LOIS D. CASHELL,
Acting Secretary.

FEDERAL RESERVE SYSTEM

COMMERCE BANCSHARES, INC

Request for Determination and Opportunity for Hearing

Notice is hereby given that a request has been made to the Board of Governors of the Federal Reserve System, pursuant to the provisions of section 2(g)(3) of the Bank Holding Company Act of 1956 (12 U.S.C. 1841(g)(3)) ("the Act"), by Commerce Bancshares, Inc. ("Commerce"), Kansas City, Mo., for a determination that Commerce, directly or indirectly through its subsidiary, Commerce Bank of Kansas City, N.A., Kansas City, Mo., or through its ability to control any other person, is not and will not be, in fact, capable of controlling the Kemper Investment Co. or Tower Properties Co., both of Kansas City, Mo., corporations to which Commerce transferred certain property in 1971 and 1972, notwithstanding the fact that James M. Kemper, Jr., is an officer and director of Commerce and both transferee corporations.

Section 2(g)(3) of the Act provides that shares transferred after January 1, 1966, by any bank holding company (or any company which, but for such transfer, would be a bank holding company) directly or indirectly to any transferee that is indebted to the transferor or has one or more officers, directors, trustees,

or beneficiaries in common with or subject to control by the transferor, shall be deemed to be indirectly owned or controlled by the transferor unless the Board, after opportunity for hearing, determines that the transferor is not, in fact, capable of controlling the transferee.

Notice is hereby given, that, pursuant to section 2(g)(3) of the Act, an opportunity is provided for filing a request for oral hearing. Any such request or written comments on the application should be submitted in writing (in duplicate) to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received no later than August 25, 1977. If a request for oral hearing is filed, it should contain a statement of the nature of the requesting person's interest in the matter, his reasons for wishing to appear at an oral hearing, and a summary of the matters concerning which such person wishes to give testimony. The Board will subsequently designate a time and place for any hearing it orders, and will give notice of such hearing to Commerce, the transferees, and all persons that have requested an oral hearing. In the absence of a request for an oral hearing, the Board will consider the requested determination on the basis of documentary evidence filed in connection with the application.

Board of Governors of the Federal Reserve System, July 28, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

FIRST CHARTER FINANCIAL CORP.

Retention of Bank Shares

First Charter Financial Corporation, Syracuse, Ind., has applied for the Board's approval under Section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to retain 882 voting shares of State Bank of Syracuse, Syracuse, Ind., representing an increase in its ownership from approximately 48.8 percent to approximately 51.5 percent of the voting shares of that bank. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than August 25, 1977.

Board of Governors of the Federal Reserve System, July 28, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

[FR Doc.77-22264 Filed 8-2-77;8:45 am]

NORTHWEST ILLINOIS BANCORP, INC.

Formation of Bank Holding Company

Northwest Illinois Bancorp., Inc., Freeport, Ill., has applied for the Board's approval under Section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through acquisition of 100 percent of the voting shares, less directors' qualifying shares, of the successor by merger to State Bank of Freeport, Freeport, Ill. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than August 24, 1977.

Board of Governors of the Federal Reserve System, July 27, 1977.

GRIFFITH L. GARWOOD,
Deputy Secretary of the Board.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

NATIONAL ADVISORY COUNCIL ON BLACK HIGHER EDUCATION AND BLACK COLLEGES AND UNIVERSITIES

Meeting

AGENCY: National Advisory Committee on Black Higher Education and Black Colleges and Universities.

ACTION: Notice.

SUMMARY: This notice sets forth the schedule and proposed agenda of the initial meeting of the National Advisory Committee on Black Higher Education and Black Colleges and Universities. It also describes the functions of the Committee. Notice of this meeting is required under Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix 1). This document is intended to notify the general public of their opportunity to attend.

DATES: September 12, 13, and 14, 1977, 9 a.m. to 5 p.m.

ADDRESS: Embassy Row Hotel, 2015 Massachusetts Avenue NW., Washington, D.C. 20036.

FOR FURTHER INFORMATION CONTACT:

Ms. Carol J. Smith, Program Delegate, National Advisory Committee on Black Higher Education and Black Colleges and Universities, Room 4918, ROB-3, 7th and D Streets SW., Washington, D.C. 20202, AC 202-245-2825.

The National Advisory Committee on Black Higher Education and Black Colleges and Universities is governed by the provisions of Part D of the General Education Provisions Act (Pub. L. 90-247 as amended; 20 U.S.C. 1233 et seq.) and the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. Appendix I) which set forth standards for the formation and use of advisory committees.

The committee is directed to advise the Secretary of Health, Education, and Welfare, the Assistant Secretary for Education, and the Commissioner of Education. The Committee shall examine all approaches to higher education of black Americans as well as the needs of historically black colleges and universities and in particular shall advise and make recommendations in these areas:

(1) In the identification of the several courses of action to raise substantially the participation of blacks in all terms of productive postsecondary education;

(2) In the development of alternatives sensitive to the special needs, deprivations, and aspirations of black youths;

(3) In the analysis of and planning for the future role and healthy development of the historically black colleges and their relationship to expanding the numbers of blacks enrolled in higher education nationally and regionally;

(4) In the development of a research base to support the definition of equity, the expansion of existing research, and the commissioning of original empirical research;

(5) In the stimulation and encouragement of more scholarship and research by blacks on questions of public policy relating to the educational needs of blacks and the promotion of these results at the Federal, regional, and State levels;

(6) In the evaluation and monitoring of the impact of Federal, regional, or State efforts in the public and private sectors in improving the status of blacks in higher education;

(7) In the evaluation and monitoring of current and developing Federal, regional, or State policies designed to equalize educational opportunities for blacks and improve access for large numbers of blacks in higher education;

(8) In the development of approaches to the financing of the neediest students and the institutions with the heaviest concentrations of blacks;

(9) In the development of means to increase access, retention, and graduation of blacks from institutions of higher education;

(10) In the development of alternative ways of increasing the numbers of blacks entering and completing graduate and professional degree programs;

(11) In recommending a twenty five year plan for increasing the quality of black higher education and the number of black Americans able to participate more fully in American society because they have successfully completed such education;

(12) In the assessment of the resultant implementation of policy decisions and recommendations.

The meeting on September 12, 13, and 14, 1977 will be open to the public beginning at 9 a.m. and ending at 5 p.m. each day. The meeting will be held at the Embassy Row Hotel, Washington, D.C. 20036.

The proposed agenda includes:

(1) Organization of the Committee.

(2) Discussion of methods of carrying out the above functions.

(3) Determination of program and priorities.

(4) Plans for future action.

Records shall be kept of all Committee proceedings and shall be available for public inspection at the Office of the National Advisory Committee on Black Higher Education and Black Colleges and Universities located at 7th and D Streets SW., Room 4913, ROB-3, Washington, D.C. 20202.

Signed at Washington, D.C., on July 29, 1977.

CAROL J. SMITH,
Delegate, National Advisory Committee on Black Higher Education and Black Colleges and Universities.

[FR Doc.77-22306 Filed 8-2-77;8:45 am]

Health Care Financing Administration

HEALTH INSURANCE PROGRAM

Schedule of Guidelines for Physical Therapy Services Under Health Insurance Program

Notice is hereby given that the updated schedule of guidelines for evaluating the costs of physical therapy services furnished under arrangements in the Medicare program has been established by the Administrator of the Health Care Financing Administration.

Section 1861(v)(5) of the Social Security Act, implemented by Part 405, Chapter III of Title 20 of the Code of Federal Regulations, § 405.432, requires the Medicare program to establish criteria for determining the reasonable cost of services furnished under an arrangement with a provider of services, a clinic, a rehabilitation agency, or a public health agency. The initial guidelines were issued to evaluate the cost of physical therapy services furnished under arrangements inasmuch as physical therapy is the most common therapy service obtained under arrangements.

The previous schedules of guidelines for physical therapy services were based on data from the August 1972 Bureau of Labor Statistics Triennial Industry Wage Survey of Hospitals. These data were updated from the BLS Employment and Earnings Bulletin, Line SIC-806, for hospitals. The initial schedule of guidelines was published in the FEDERAL REGISTER on February 7, 1975 (40 FR 5810), and was effective for provider cost reporting periods beginning on or after April 1, 1975. An updated schedule of guidelines was published in the FEDERAL REGISTER on February 19, 1976 (41 FR 7542), effective for provider cost reporting periods beginning on or after April 1, 1976. A revision in the effective date of this updated schedule was published in the FEDERAL REGISTER on August 30, 1976 (41 FR 36531) specifying that the guidelines would be applied to all physical therapy services performed on or after April 1, 1976, without regard to the beginning dates of providers' cost reporting periods.

A new schedule of guidelines has been prepared, using the same methodology as the original schedule, but based on data from the latest BLS Industry Wage Survey in Hospitals conducted in August 1975 and January 1976. These data have also been updated from the most currently available BLS Employment and Earnings Bulletin, Line SIC-806, for hospitals.

This revised schedule of physical therapy guidelines will be effective for physical therapy services performed on or after October 1, 1977 without regard to the beginning dates of providers' cost reporting periods, and will remain in effect until the effective date of any revised schedule that may be published.

Schedule of guidelines for physical therapy services furnished under arrangements; adjusted hourly salary equivalency amounts and standard travel allowances for qualified physical therapists (full time, regular part time, or home visits) effective for services furnished on or after ------ 1, 1977

[This schedule is not to be used for physical therapy assistants or aides]

National Institutes of Health

NIH CONSENSUS COMMITTEE FOR BREAST CANCER SCREENING (TEMPORARY)

Establishment

The Director, National Institutes of Health, announces the establishment on July 19, 1977, of the advisory committee indicated below by the Acting Director, National Cancer Institute, under the authority of Section 410(a)(3) of the Public Health Service Act (42 U.S.C. 286d). Such advisory committees shall be governed by the provisions of the Federal Advisory Committee Act (Public Law 92-463) setting forth standards governing the establishment and use of advisory committees.

NAME: NIH Consensus Committee for Breast Cancer Screening (Temporary).

PURPOSE: The Committee shall advise the Director, NIH, and the Director, NCI, concerning the use of X-ray mammography for screening women to detect early breast cancer. Authority for this committee will expire on December 31, 1977.

Dated: July 29, 1977.

DONALD S. FREDRICKSON,
Director,
National Institutes of Health.

DEPARTMENT OF THE INTERIOR

Bonneville Power Administration

MARKETING POLICY FORMULATION

Procedure for Public Participation

The Bonneville Power Administration (BPA) seeks the comments and recommendations of the public on the following proposed procedure for involving the public in formulating BPA marketing policy:

1. *Purpose and scope.* The purpose of this procedure is to enable individuals and organizations, public and private, whose interests will be substantially impacted by Bonneville Power Administration (BPA) decisions or actions to participate in development of BPA Marketing Policies, as defined in the following section 2, prior to BPA's determination of Marketing Policies. The procedure shall apply to Marketing Policy formulation, and not implementation.

2. *Definitions*—a. *Administrator.* The BPA Administrator.

b. *Customer.* A person or entity whose interests the Responsible Official determines will be substantially affected by the Proposed Marketing Policy and who currently is purchasing, exchanging, transferring, assigning, or selling electric power and energy, related services, or transmission capability to, with, or from BPA.

c. *Marketing policy.* A policy which allocates electric energy or capacity available on the Federal Columbia River Power System, or a policy the Administrator determines will, over a period of years, significantly affect or alter the manner in which BPA implements its

statutory authority to sell, exchange, otherwise dispose of, or acquire electric power and energy, or provide forced outage reserves, load factoring service, transmission service, or delay of plant reserves.

d. *Proposed marketing policy.* One under consideration for adoption as a Marketing Policy.

e. *Notice.* The method by which Customers and the Public shall be informed of BPA's intention to develop a new or revised Marketing Policy, a Proposed Marketing Policy, a revision of a Proposed Marketing Policy, a Marketing Policy, public comment and information forums, and procedures for adopting a Marketing Policy. Notice shall be by and effective on publication in the FEDERAL REGISTER. The Responsible Official may also direct that Notice be published in a general circulation newspaper in the BPA marketing area and mailed to Customers and the Public identified by the Responsible Official. Notice shall include the name, address, and telephone number of the person to contact if participation or further information is sought. Notices may be combined.

f. *Public.* Any person who, or group or entity which has or could have, a direct and significant interest in the BPA Marketing Policy.

g. *Responsible Official.* The BPA employee designated by the Administrator on initiating this procedure to be responsible for formulating the specified Marketing Policy.

h. *Staff evaluation.* A written evaluation by the BPA staff of the Transcript for a Proposed Marketing Policy. It shall include a review of the studies used in developing a revised Proposed Marketing Policy or Marketing Policy, and shall indicate revisions and reasons for them. The evaluation shall become part of the Transcript.

i. *Transcript.* The transcribed record of any forums provided for in the following sections 5 and 6, to include documents introduced at such forums; all written comments, questions, and answers thereto; all technical, theoretical, and empirical studies used in developing the Marketing Policy, and other information the Responsible Official determines is relevant.

3. *Decision to Formulate a Marketing Policy and Notice of Intent.* When the Administrator decides a new or revised Marketing Policy is needed, BPA shall give Notice of its intent at least 30 days prior to giving Notice of the Proposed Marketing Policy pursuant to the following section 4. BPA shall indicate the extent that any existing policy would be revised in developing a new Marketing Policy. BPA shall solicit written comments and proposals to use in formulating the Proposed Marketing Policy.

4. *Proposed Marketing Policy.* BPA shall give Notice of the Proposed Marketing Policy stating in it: The subject and purpose of and the legal authority for the Proposed Marketing Policy and the major issues it will raise; the text of the Proposed Marketing Policy; the date, time, and location of any scheduled public information and comment forums; and the list of technical, theoretical, and empirical studies used in developing the Proposed Marketing Policy and locations at which BPA would make them available for inspection or copying in accordance with the Freedom of Information Act, 5 U.S.C. 552.

5. *Optional Public Information Forum.* The Responsible Official shall determine whether public information forums will be held to explain the Proposed Marketing Policy and the studies used in its formulation, and answer questions and receive comments. The Responsible Official shall determine the number, if any, and locations of such forums in accordance with interest shown in the Proposed Marketing Policy. Notice to be given in advance of any such forum shall include the purpose, date, time, place, and procedures for any such forum.

The Responsible Official shall act as or appoint a forum chairman. Questions raised at the forum shall be answered by BPA representatives at the forum, a subsequent forum at the same location, or in writing. Forum proceedings shall be transcribed. All documents introduced, and questions and written answers shall be part of the Transcript which shall be available for inspection or copying in accordance with the provisions of the Freedom of Information Act, 5 U.S.C. 552.

6. *Public Comment Forum.* A public comment forum shall be held to permit Customers and the Public to submit written comments and orally present views and proposals regarding the Proposed Marketing Policy. Notice to be given at least 30 days in advance of the forum shall include the purpose, date, time, place, and procedures for the forum, and a statement of what technical, theoretical, and empirical studies used in developing the Proposed Marketing Policy are available and their location.

The Responsible Official shall determine the number and locations of such forums in accordance with interest shown in the Proposed Marketing Policy. The Responsible Official shall act as or appoint a forum chairman. At the start of a forum the chairman shall briefly explain procedures and rules.

Notwithstanding any additional rules or procedures it might develop, BPA shall allow Customers and the Public to make oral statements and comments, introduce relevant documents, and ask questions of BPA representatives at the forum. Persons interested in speaking shall notify BPA at least 3 days before a forum so a witness list can be prepared. The chairman may permit others to speak if time allows. The chairman, BPA representatives and, at the discretion of the chairman, witnesses may question witnesses. Time limits may be set for oral presentations and questioning witnesses. Witnesses may supplement oral presentations by filing written testimony or comments with the chairman.

Questions not answered during a forum shall be answered in writing no later than the effective date of the Notice of either a revised Proposed Marketing Policy as provided in the following section 9 or, if a revised Proposed Marketing Policy is not developed, the Marketing Policy as provided in the following section 10. Forum proceedings shall be transcribed. All documents introduced, and written answers to questions shall be part of the Transcript which shall be available for inspection and copying in accordance with the Freedom of Information Act, 5 U.S.C. 552.

7. *Consultation and Comment Period.* Customers and the Public may file written comments and questions with BPA regarding the Proposed Marketing Policy until at least 15 days after the last public comment forum. Written comments, questions and answers shall be part of the Transcript.

8. *Staff Evaluation.* Following the consultation and comment period, BPA shall prepare a Staff Evaluation of the Transcript.

9. *Revised Proposed Marketing Policy and Review Period for Revised Proposed Marketing Policy.* If appropriate, BPA shall develop a revised Proposed Marketing Policy following the Staff Evaluation of the Transcript and give Notice of the revision and any studies used in developing the revised Proposed Marketing Policy not available at the date of the initial public comment forum. Customers and the Public shall be given at least 30 days from the effective date of Notice of the revised Proposed Marketing Policy to submit written comments to BPA before the Administrator adopts, modifies and adopts, or rejects the revised Proposed Marketing Policy, or submits the Proposed Marketing Policy to the Federal Power Commission (FPC) for confirmation and approval as provided in the following section 10. The comments shall become part of the Transcript.

10. *Final Marketing Policy Issued.* Following the Staff Evaluation of the Transcript, the Administrator shall decide whether to adopt, modify and adopt, or reject the Marketing Policy. Documentation of the decision shall include the purpose of and the legal authority for the Marketing Policy, findings of fact, conclusions, and the primary objections to the Proposed Power Marketing Policy submitted by Customers or the Public with brief explanations for rejecting those objections, which shall, with the Staff Evaluation, be part of the Transcript. BPA shall give Notice of the Marketing Policy adopted. It shall be Notice or at a later date specified by the Administrator.

11. *Emergency Marketing Policy Implementation.* If the Administrator determines prior to initiation or completion of the foregoing procedure that a delay in implementing a Marketing Policy will adversely affect BPA, its Customers, or the Public, the Administrator may implement the Marketing Policy on an interim basis until this procedure is completed.

For further information, contact Harvard P. Spigal, Bonneville Power Administration, Department of the Interior, P.O. Box 3621, Portland, Oregon 97208 (503-234-3361 Ext. 5155). Submit written comments and recommendations to Harvard P. Spigal at the above address no later than October 3, 1977. BPA will publish a final procedure in the FEDERAL REGISTER on or about October 17, 1977.

Dated: July 28, 1977.

DONALD PAUL HODEL,
Administrator.

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 26, 1977.

1. The Bureau of Reclamation, U.S. Department of the Interior, filed application Serial No. S 2745 on July 8, 1969, for a withdrawal in relation to the following described lands:

MOUNT DIABLO MERIDIAN, CALIFORNIA

T. 37 N., R. 7 E.,
Sec. 4, SW¼SE¼;
Sec. 10, NW¼SW¼ and S½SW¼;
Sec. 11, NW¼NW¼.
T. 38 N., R. 7 E.,
Sec. 4, Lots 2, 3, and 4.
T. 39 N., R. 7 E.,
Sec. 3, NW¼SW¼ and S½SW¼;
Sec. 10, NE¼, E½NW¼, NE¼SW¼, E½SE¼, and NW¼SE¼;
Sec. 11, NW¼ and W½SW¼;
Sec. 24, E½NE¼ and NE¼SE¼;
Sec. 33, E½NE¼, SW¼NE¼, and SE¼;
Sec. 34, NE¼SW¼.
T. 40 N., R. 7 E.,
Sec. 1, Lots 3 and 4, SE¼NW¼, E½SW¼, and SW¼SW¼;
Sec. 2, Lots 1, 2, and 4, SW¼NE¼, SW¼NW¼, N½NW¼SW¼, and E½SE¼SW¼;
Sec. 3, Lots 1 and 2, S½NE¼, and SE¼;
Sec. 26, N½NW¼.
T. 41 N., R. 7 E.,
Sec. 24, SE¼;
Sec. 25, NE¼NE¼, W½NE¼, NW¼, W½SW¼, SE¼SW¼, and S½SE¼;
Sec. 26, Lots 3 and 4, SW¼, and NW¼SE¼;
Sec. 27, SW¼SW¼ and E½E½SE¼;
Sec. 34, N½NE¼, SE¼NE¼, W½, and NE¼SE¼;
Sec. 35, Lot 2, SW¼NE¼, NW¼NW¼, and SE¼.
T. 37 N., R. 8 E.,
Sec. 5, SE¼NW¼ and E½SW¼;
Sec. 8, NE¼NW¼.
T. 38 N., R. 8 E.,
Sec. 32, E½SW¼.
T. 39 N., R. 8 E.,
Sec. 8, E½SW¼;
Sec. 19, Lot 3 and NE¼SW¼;
Sec. 25, SW¼SE¼.
T. 41 N., R. 8 E.,
Sec. 1, Lots 1, 2, and 3, S½NE¼, SE¼NW¼, S½SW¼, and N½SE¼;
Sec. 2, Lots 1, 2, 3, and 4, S½NE¼, S½NW¼, and S½;
Sec. 10, E½SE¼;
Sec. 11, E½ and SW¼;
Sec. 12, N½;
Sec. 14, NW¼;
Sec. 15, All;
Sec. 16, SE¼;
Sec. 19, Lots 3 and 4, E½SW¼, and NE¼SE¼;
Sec. 20, E½SW¼;
Sec. 21, NE¼, N½SW¼, SW¼SW¼, and N½SE¼;
Sec. 22, NE¼, NE¼NW¼, W½SW¼, E½SE¼, and NW¼SE¼;
Sec. 26, N½NE¼ and N½N½NW¼;
Sec. 27, SW¼NE¼, SE¼NW¼, S½SW¼, and SE¼;
Sec 28, W½NW¼ and SE¼NW¼;
Sec. 29, NE¼, E½NW¼, NW¼NW¼, and S½SW¼;
Sec. 30, Lots 1, 2, and 4, NE¼NW¼, SE¼SW¼, and SE¼;
Sec. 31, Lots 1 and 2, NE¼, and E½NW¼;
Sec. 32, N½ and SE¼;
Sec. 33, All;
Sec. 34, W½;
Sec. 35, SW¼NW¼ and S½SE¼NW¼;
Sec. 36, S½SW¼.
T. 42 N., R. 8 E.,
Sec. 35, E½SE¼;
Sec. 36, SW¼.
T. 39 N., R. 9 E.,
Sec. 19, NW¼NE¼.
T. 41 N., R. 9 E.,
Sec. 6, Lot 6 and E½SW¼;
Sec. 7, Lots 2, 3, and 4, N½NE¼, SE¼NE¼, E½SW¼, and NE¼SE¼;
Sec. 8, N½SW¼, N½SW¼SW¼, and N½SE¼;
Sec. 9, W½SE¼ and SE¼SE¼;
Sec. 16, E½NE¼ and SW¼NW¼;
Sec. 17, NE¼, S½NW¼, and SW¼;
Sec. 18, Lots 1 and 2, W½NE¼, SE¼NE¼, and E½NW¼.

The above described areas aggregate approximately 13,546 acres of Federal land, of which approximately 11,474 acres (in Tps. 40, 41, and 42 N., Rs. 7, 8, and 9 E.) are in the Modoc National Forests.

2. The applicant desires the withdrawal of the following described lands from location and entry under the mining laws, but not the mineral leasing laws, as these lands are patented, having been patented under the Stockraising Homestead Act of December 29, 1916 (39 Stat. 862), as amended, with a reservation of all minerals to the United States.

MOUNT DIABLO MERIDIAN, CALIFORNIA

T. 39 N., R. 7 E.,
Sec. 2, Lot 4 and SW¼NW¼;
Sec. 3, Lots 1, 2, and 3, S½NE¼, SE¼NW¼, NE¼SW¼, and SE¼;
Sec. 10, W½NW¼, W½SW¼, SE¼SW¼, and SW¼SE¼;
Sec. 15, W½SE¼.
T. 40 N., R. 7 E.,
Sec. 11, S½NW¼ and SW¼.
T. 38 N., R. 8 E.,
Sec. 20, S½SE¼;
Sec. 29, SE¼SW¼;
Sec. 32, NE¼NW¼ and S½NW¼.
T. 39 N., R. 8 E.,
Sec. 6, E½SE¼;
Sec. 8, NW¼SW¼;
Sec. 15, SW¼ and N½SE¼.
T. 40 N., R. 8 E.,
Sec. 31, Lots 1 and 2, NE¼, NE¼NW¼, and N½SE¼.
T. 39 N., R. 9 E.,
Sec. 19, NE¼NE¼.
T. 41 N., R. 9 E.,
Sec. 3, SE¼.

The above described lands aggregate approximately 2,236 acres.

The applicant desires all of the aforedescribed lands for the facilities of the multi-purpose Allen Camp Unit Project, Pit River Division, Central Valley Project.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on September 5, 1969, pages 14083 and 14084, F.R. Doc. 69-10587.

Pursuant to Sec. 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing to the State Director, Bureau of Land Management, E-2841 Federal Office Building, 2800 Cottage way, Sacramento, California 95825, on or before September 5, 1977. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before September 5, 1977.

The lands described in paragraph 1 are temporarily segregated from the operation of the public land laws, including the mining laws (30 U.S.C., Ch. 2); the lands described in paragraph 2 are temporarily segregated from the mining laws (30 U.S.C., Ch. 2) to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the undersigned, Bureau of Land Management, Department of the Interior, Room E-2841 Federal Office Building, 2800 Cottage Way, Sacramento, California 95825.

JOAN B. RUSSELL,
Chief, Lands Section Branch of Lands and Minerals Operations.

[SAC 072929]

CALIFORNIA

Opportunity for Public Hearing and Republication of Notice of Proposed Withdrawal

JULY 20, 1977.

The Bureau of Reclamation, U.S. Department of the Interior, filed application Serial No. SAC 072929 on Septem-

ber 6, 1962, for a withdrawal in relation to the following described lands:

MOUNT DIABLO MERIDIAN, CALIF.

T. 32 N., R. 6 W.,
Sec. 27, Lots 77, 78, 79, 80, 81, 82, 83, 84, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 117, 118, 119, 120, 121, 122, 123, and 124.

The area described aggregates 72.45 acres in Shasta County, Calif.

The applicant desires that the land be reserved for the conduit route of the Clear Creek South Unit, Trinity River Division, Central Valley Project.

A notice of the proposed withdrawal was published in the FEDERAL REGISTER on November 30, 1962, pages 11821 and 11822, FR Doc. 62–11819.

Pursuant to Sec. 204(h) of the Federal Land Policy and Management Act of 1976, 90 Stat. 2754, notice is hereby given that an opportunity for a public hearing is afforded in connection with the pending withdrawal application. All interested persons who desire to be heard on the proposed withdrawal must file a written request for a hearing to the State Director, Bureau of Land Management, E–2841 Federal Office Building, 2800 Cottage Way, Sacramento, Calif. 95825, on or before August 29, 1977. All previous comments submitted in connection with the withdrawal application have been included in the record and will be considered in making a final determination on the application.

In lieu of or in addition to attendance at a scheduled public hearing, written comments or objections to the pending withdrawal application may be filed with the undersigned authorized officer of the Bureau of Land Management on or before August 29, 1977.

The above described lands are temporarily segregated from the operation of the public land laws, including the mining laws (30 U.S.C., Ch. 2), to the extent that the withdrawal applied for, if and when effected, would prevent any form of disposal or appropriation under such laws. Current administrative jurisdiction over the segregated lands will not be affected by the temporary segregation. In accordance with Section 204(g) of the Federal Land Policy and Management Act of 1976, the segregative effect of the pending withdrawal application will terminate on October 20, 1991, unless sooner terminated by action of the Secretary of the Interior.

All communications (except for public hearing requests) in connection with the pending withdrawal application should be addressed to the undersigned, Bureau of Land Management, Department of the Interior, Room E–2841 Federal Office Building, 2800 Cottage Way, Sacramento, Calif. 95825.

JOAN B. RUSSELL,
Chief, Lands Section Branch of Lands and Minerals Operations.

[NM 31035]

NEW MEXICO

Application

JULY 26, 1977.

Notice is hereby given that, pursuant to Section 28 of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (87 Stat. 576), El Paso Natural Gas Co. has applied for one 4½-inch natural gas pipeline right-of-way across the following land:

NEW MEXICO PRINCIPAL MERIDIAN, NEW MEXICO

T. 30 N., R. 14 W.,
Sec. 12, lot 4, SW¼NW¼ and NW¼SW¼.

This pipeline will convey natural gas across 0.495 of a mile of public land in San Juan County, N. Mex.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views should promptly send their name and address to the District Manager, Bureau of Land Management, P.O. Box 6770, Albuquerque, N. Mex. 87107.

FRED E. PADILLA,
Chief Branch of Lands and Minerals Operations.

[FR Doc.77–22294 Filed 8–2–77;8:45 am]

[Wyoming 60185]

WYOMING

Application

JULY 27, 1977.

Notice is hereby given that pursuant to section 28 of the Minerals Leasing Act of 1920, as amended (30 U.S.C. 185), Stauffer Chemical Co. of Wyoming, Green River, Wyo., filed an application for a 4-inch lateral pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYOMING

T. 21 N., R. 99 W.,
Sec. 26, W½NW¼.

The pipeline will transport natural gas from an existing well in the SW¼ of sec. 23, T. 21 N., R. 99 W. to a point on an existing pipeline in sec. 27, T. 21 N., R. 99 W., Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, P.O. Box 1869, Highway 187 North, Rock Springs, Wyo. 82901.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Operations.

[FR Doc.77–22313 Filed 8–2–77;8:45 am]

[Wyoming 60186]

WYOMING

Application

JULY 27, 1977.

Notice is hereby given that pursuant to section 28 of the Minerals Leasing Act of 1920, as amended (30 U.S.C. 185), the Colorado Interstate Gas Co. of Colorado Springs, Colo., filed an application for 4-inch pipeline for the purpose of transporting natural gas across the following described public lands:

SIXTH PRINCIPAL MERIDIAN, WYO.

T. 21 N., R. 94 W.,
Sec. 32, S½SW¼.

The pipeline will transport natural gas from an existing well into Colorado Interstate's natural gas gathering system located in Sweetwater County, Wyo. The proposed 4-inch O.D. natural gas pipeline would extend from an existing well in sec. 31, T. 21 N., R. 94 W. to the point of connection with an existing line in sec. 32, T. 21 N., R. 94 W., Sweetwater County, Wyo.

The purpose of this notice is to inform the public that the Bureau will be proceeding with consideration of whether the application should be approved and, if so, under what terms and conditions.

Interested persons desiring to express their views should do so promptly. Persons submitting comments should include their name and address and send them to the District Manager, Bureau of Land Management, P.O. Box 670, 1300 Third Street, Rawlins, Wyo. 82301.

HAROLD G. STINCHCOMB,
Chief, Branch of Lands and Minerals Operations.

[Serial No. I–7370]

IDAHO

Termination of Proposed Withdrawal and Reservation of Lands

Notice of an application, serial number I–7370, for withdrawal and reservation of lands was published as FEDERAL REGISTER Document No. 73–26298 on page 34215 of the issue for December 12, 1973. The applicant agency has canceled its application insofar as it involved the lands described below. Therefore, pursuant to the regulations contained in 43 CFR Subpart 2091, such lands will be at 10:00 a.m. on August 29, 1977 relieved of the segregative effect of the above-mentioned application.

The lands involved in this notice of termination are:

BOISE MERIDIAN, ST. JOE NATIONAL FOREST, FORTY-NINE MEADOWS ROAD NO. 760

T. 43 N., R. 4 E.,
Sec. 1: SE¼SE¼.

A strip of land 100 feet in width, being 50 feet in width on both sides of the centerline over and across the above-cited subdivision.

The area described aggregates 0.08 acres, more or less, in Shoshone County.

DONALLY RIDGE ROAD NO. 1999

T. 45 N., R. 4 E.
Sec. 28: NE¼NE¼.

A strip of land 66 feet in width, being 33 feet in width on both sides of the centerline over and across the above-cited subdivision.

The area described aggregates 3.03 acres, more of less, in Shoshone County.

VINCENT S. STROBEL,
Chief, Branch of L&M Operations.

[FR Doc.77–22218 Filed 8–2–77;8:45 am]

TEXAS

Application

Notice is hereby given that under Section 28 of the Mineral Leasing Act of 1920 (41 Stat. 449; 30 U.S.C. 185), as amended Pub. L. 93–153 (87 Stat. 576) on November 16, 1973, Dow Chemical Co., a Delaware corporation, has applied for relocation of a portion of an existing 8" Nominal Diameter Natural Gas Pipeline right-of-way that will cross a part of the San Bernard National Wildlife Refuge situated along the shoreline of the Gulf of Mexico in Calvin Sumrall, A–368 and Joseph H. Gamble, A–194 Surveys and south of Cedar Lakes, Brazoria County, Tex.

The relocated pipeline will carry natural gas across 1.14 miles of the San Bernard National Wildlife Refuge.

The purpose of this notice is to inform the public that the United States Fish and Wildlife Service will be proceeding with consideration of whether the application should be approved, and if so, under what terms and conditions.

Interested persons desiring to express their views, should do so within thirty (30) days and send their name and address to the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, N. Mex. 87103.

JERRY L. STEGMAN,
Deputy Regional Director, U.S. Fish and Wildlife Service.

JULY 25, 1977.

DEPARTMENT OF JUSTICE

Antitrust Division

UNITED STATES v. CARROLS DEVELOPMENT CORP., ET AL.

Proposed Consent Judgment and Competitive Impact Statement

Notice is hereby given pursuant to the *Antitrust Procedures and Penalties Act*, 15 U.S.C. 16(b) through (h), that a proposed consent judgment and a competitive statement as set out below have been filed with the United States District Court for the Northern District of New York in *United States of America* v. *Carrols Development Corporation and Triple Schuyler Rome Corporation* Civil No. 76 CV 170. The complaint in the case alleges that the acquisition by Carrols Development Corporation (Carrols) of the motion picture theatres in Syracuse and Utica, New York, operated by Kallet Realty Inc. and its subsidiaries (Kallet), and the acquisition by Carrols of the motion picture theatres in Utica, New York, operated by Hallmark Releasing Corp. (Hallmark), substantially lessened competition in the purchase of licenses to exhibit feature motion pictures in the Greater Syracuse and Greater Utica Areas. The proposed judgment requires Carrols to divest the theatres which it acquired from Kallet and Hallmark. It also enjoins Carrols, for ten years, from acquiring any operating motion picture theatre in the Greater Syracuse or Greater Utica Areas without the approval of the Government.

Public comment is invited on or before September 30, 1977. Such comments and responses thereto will be published in the FEDERAL REGISTER and filed with the Court. Comments should be directed to Bernard Wehrmann, Chief, New York Office, Antitrust Division, Department of Justice, 26 Federal Plaza, New York, New York 10007.

Dated: July 25, 1977.

JOHN H. SHENEFIELD,
Acting Assistant Attorney General, Antitrust Division.

UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF NEW YORK

United States of America, Plaintiff, v. *Carrols Development Corporation; and Triple Schuyler Rome Corporation*, Defendants.

[76–CV–170]

Filed: July 25, 1977.

STIPULATION

It is stipulated by and between the undersigned parties, by their respective attorneys, that:

1. A Final Judgment in the form hereto attached may be filed and entered by the Court, upon the motion of any party or upon the Court's own motion, at any time after compliance with the requirements of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16), and without further notice to any party or other proceedings, provided that plaintiff has not withdrawn its consent, which it may do at any time before the entry of the proposed Final Judgment by serving notice thereof on defendants and by filing that notice with the Court.

2. In the event plaintiff withdraws its consent or if the proposed Final Judgment is not entered pursuant to this stipulation, this stipulation shall be of no effect whatever and the making of this stipulation shall be without prejudice to plaintiff and defendants in this and any other proceeding.

Dated July 25, 1977.

For Plaintiff: John H. Shenefield, *Acting Assistant Attorney General*; Erwin L. Atkins, William E. Swope, Charles W. Brooks, Charles F. B. McAleer, Bernard Wehrmann, *Attorneys, Department of Justice.*

For Defendants: Farber & Cohen, *Attorneys for Carrols Development Corporation and Triple Schuyler Rome Corporation.*

By: Frank R. Cohen, *Partner, A Member of the Firm.*

UNITED STATES DISTRICT COURT, NORTHERN DISTRICT OF NEW YORK

[76–CV–170]

United States of America, Plaintiff, v. *Carrols Development Corp.*; and *Triple Schuyler Rome Corp., Defendants.*

FINAL JUDGMENT

Filed: July 25, 1977.

Plaintiff, United States of America, having filed its complaint herein on April 23, 1976, and the defendants Carrols Development Corp. and Triple Schuyler Rome Corp., having appeared and filed their answer to the complaint denying the material allegations thereof, and the plaintiff and the defendants, by their respective attorneys, having consented to the entry of this Final Judgment without trial or adjudication of any issue of fact or law herein and without this Final Judgment constituting any evidence or admission by any party with respect to any such issue;

Now, therefore, before the taking of any testimony and without trial or adjudication of any issue of fact or law herein and without this Final Judgment constituting any evidence or admission by any party with respect to any such issue and upon the consent of the parties, it is hereby

Ordered, adjudged and decreed as follows:

I

This Court has jurisdiction of the subject matter of this action and of the parties hereto. The complaint states a claim upon which relief may be granted against the defendants under section 7 of the Act of Congress of October 15, 1914 (15 U.S.C. § 18), commonly known as the Clayton Act, as amended.

II

As used in this Final Judgment:

(A) "CDC" shall mean defendants Carrols Development Corp. and Triple Schuyler Rome Corp., and each of their subsidiaries and affiliates.

(B) "Eligible Purchaser" shall mean any person or persons, proposing to acquire any theatre for theatre purposes, to which the plaintiff, after notice, does not object, or if the plaintiff does object, of which the Court approves.

(C) "Person" shall mean any individual, partnership, corporation or other business or legal entity other than CDC.

(D) "Greater Syracuse Area" shall mean the area within a radius of approximately 12 miles from the center of the City of Syracuse, including Syracuse and all or part of the following towns in the State of New York: Salina, DeWitt, Geddes, Cicero, Manlius, Pompey, Lafayette, Onondaga, Marcellus, Camillus, Van Buren, Lysander, and Clay.

(E) "Greater Utica Area" shall mean the area within a radius of approximately 10 miles from the center of the City of Utica, including Utica and all or part of the following towns in the State of New York: Schuyler, Newport, Frankfort, Litchfield, Paris, New Hartford, Kirkland, Whitestown, Westmoreland, Floyd, Marcy, Trenton, and Deerfield.

III

The provisions of this Final Judgement shall apply to CDC, its successors and assigns, to each of their respective officers, directors, agents and employees, and to all other persons in active concert or participation with any of them who receive actual notice of this Final Judgment by personal service or otherwise. Any Eligible Purchaser who acquires any assets by means of a divestiture pursuant to

this Final Judgment shall not be considered a successor or assign of CDC.

IV

(A) CDC is ordered and directed to divest to Eligible Purchasers, within 24 months from the date of entry of this Final Judgment, each of the theatres listed in Appendix A to this Final Judgment.

(B) Divestiture of the theatres listed in Appendix A shall be accomplished by assignment or sublease.

(C) With respect to any theatre which is divested by sublease, such sublease shall be for the entire remaining present term of the master lease less one day (such period is hereinafter referred to as the "Sublease Term").

(D) CDC shall make known the availability of the theatres listed in Appendix A by customary and usual means, including appropriate advertising. CDC shall furnish, on an equal and nondiscriminatory basis, to all bona fide prospective purchasers who so request, all necessary information regarding said theatres and shall permit them to make such inspection of the facilities and operations of the theatres as is reasonably necessary for a prospective purchaser to advise itself properly.

(E) Ninety day after the date of entry of this Final Judgment and every 90 days thereafter until CDC has divested each of the theatres listed in Appendix A, CDC shall submit written report to the plaintiff, describing the steps which have been taken to comply with this section IV. Each report shall include the name and address of each person who, during the preceding 90 days, had made an offer, expressed a desire, or entered into negotiations to acquire any theatre, together with full details of same. Each report shall also include the name and address of each person who, during the preceding 90 days, CDC has sought to interest in the acquisition of any theatre, together with full details of same.

(F) At least 60 days before the consummation, pursuant to this Section IV, of a divestiture to a proposed Eligible Purchaser of any theatre listed in Appendix A, CDC shall furnish in writing to the plaintiff the name and address of the proposed Eligible Purchaser, together with the terms and conditions of the proposed divestiture. At the same time, CDC shall list the name and address of each person not previously reported who offered or expressed a desire to acquire such theatre, together with full details of same. Within 20 days of the receipt of this information, the plaintiff may request in writing additional information concerning the transaction and parties thereto. If no request is made for additional information, the plaintiff shall advise CDC in writing no later than 20 days prior to the scheduled consummation date whether it has any objections to the proposed divestiture. If a request for additional information is made, the plaintiff shall advise CDC in writing within 30 days after receipt of all such information or within 30 days after receipt of a statement in writing from CDC that it does not have the requested information, whether it has any objections to the proposed divestiture. If the plaintiff does not object within the periods specified, then the divestiture may be consummated. If the plaintiff does so object, the proposed divestiture shall not be consummated unless CDC obtains approval from the Court or the plaintiff's objection is withdrawn.

V

If CDC does not divest itself, in accordance with the provisions of this Final Judgment, of each of the theatres listed in Appendix A within 24 months from the date of entry of this Final Judgment, the Court shall on application of the plaintiff appoint a trustee for the purpose of divesting the remaining theatres in accordance with the provisions of this Final Judgment. The trustee shall have full power and authority to dispose of each of the remaining theatres by assignment or sublease at whatever price and terms are obtainable by him subject to prior approval of the Court after the parties have had an opportunity to be heard with respect to each such proposed divestiture and the price and terms thereof. Any such sublease shall be for the applicable Sublease Term. The trustee shall use his best efforts to dispose of each of the theatres within 12 months of his appointment. Each divestiture by the trustee shall be in accordance with the provisions of this Final Judgment. The trustee shall serve, at the cost and expense of CDC, on such terms and conditions as the Court sees fit and shall account for all revenues derived from the disposal of the theatres and all expenses so incurred. After approval by the Court of the trustee's account, including fees for his services, all remaining monies shall be paid to CDC, or if there are remaining unsatisfied claims CDC shall pay them, and the trust created hereunder shall be terminated.

VI

If any theatre listed in Appendix A is not divested in accordance with the provisions of this Final Judgment within 12 months of the appointment of a trustee pursuant to section V herein, CDC shall, within 60 days thereafter, terminate its operation of such theatre unless it has obtained the written consent of the plaintiff to continue operating such theatre for the exhibition of feature motion pictures.

Any assignment or sublease to an Eligible Purchaser of a theatre listed in Appendix A shall requpire the Eligible Purchaser to file with this Court its representation that it proposes to operate the theatre for the exhibition of feature motion pictures.

VIII

(A) Subject to the provisions of section VI of this Final Judgment and subparagraph (2) of this section VIII(C), CDC shall continue to operate each threatre listed in Appendix A for the exhibition of feature motion pictures until such theatre is divested in accordance with the provisions of this Final Judgment; provided, however, that nothing contained herein shall require CDC to continue the operation of the 258 Cinema City I, II, and III prior to divestiture.

(B) CDC shall not participate in any way, directly or indirectly, in the management, operation or control of any theatre listed in Appendix A after it has been divested pursuant to this Final Judgment, nor shall CDC book or buy feature motion pictures for any such theatre after it has been divested. Where a theatre has been divested by sublease, these prohibitions shall be expressly set forth in the sublease.

(C) Notwithstanding the provisions of paragraph (B) of this section VIII:

(1) CDC may enforce the terms and conditions of any sublease in accordance with its provisions or as provided by law, and may exercise the rights of a sublessor in the event of a default.

(2) In the event of reacquisition or repossession by CDC prior to the expiration of the Sublease Term of a subleased theatre devested hereunder, CDC shall promptly notify the plaintiff in writing and shall divest such theatre by assignment or sublease to an Eligible Purchaser within 12 months of reacquisition or repossession in accordance with the provisions of this Final Judgment. The minimum duration of any such subsequent sublease shall be the applicable Sublease Term less the period of time such theatre was operated by an Eligible Purchaser prior to reacquisition or repossession by CDC. If CDC is unable to divest any such theatre to an Eligible Purchaser within 12 months of reacquisition or repossession, CDC shall, within 60 days thereafter, terminate its operation of such theatre unless it has obtained the written consent of the plaintiff to continue operating such theatre for the exhibition of feature motion pictures.

IX

CED is enjoined and restrained for a period of 10 years from the date of entry of this Final Judgment from acquiring, without the prior written consent of the plaintiff, any part of the assets or stock of any operating motion picture theatre in the Greater Syracuse or Greater Utica Areas.

X

(A) For the purpose of determining or securing compliance with this Final Judgment, any duly authorized representative of the Department of Justice shall, on written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, and on reasonable notice to CDC made to its principal office, be permitted, subject to any legally recognized privilege:

(1) Access during the office hours of CDC, to inspect and copy all books, ledgers, accounts, correspondence, memoranda, and other records and documents in the possession or under the control of CDC, who may have counsel present, relating to any matters contained in this Final Judgment; and

(2) Subject to the reasonable convenience of CDC and without restraint or interference from it, to interview officers, directors, agents, partners or employees of CDC, any of whom may have counsel present, regarding any such matters.

(B) CDC, upon the written request of the Attorney General or the Assistant Attorney General in charge of the Antitrust Division, shall submit such reports in writing with respect to any of the matters contained in this Final Judgment, as may from time to time be requested.

No information obtained by the means provided in this Section shall be divulged by any representative of the Department of Justice to any person other than a duly authorized representative of the Executive Branch of the United States, except in the course of legal proceedings to which the United States is a party, or for the purpose of securing compliance with this Final Judgment, or as otherwise required by law.

If at any time information or documents are furnished by CDC to plaintiff pursuant to this section and CDC represents that the material, or any portion thereof, in any such information or documents is of a type described in Rule 26(c)(7) of the Federal Rules of Civil Procedure, and CDC identifies such material in writing and marks each pertinent page thereof, "Subject to claim of protection under Rule 26(c)(7)" of the Federal Rules of Civil Procedure," then plaintiff shall give CDC 10 days notice prior to divulging such material in any legal proceeding (other than a Grand Jury proceeding) to which CDC is not a party.

XI

Jurisdiction of this action is retained by this Court for the purpose of enabling any of the parties to this Final Judgment to apply to this Court at any time for such further orders or directions as may be necessary or appropriate for the construction or carrying out of this Final Judgment, for the modification of any of the provisions thereof, and for the enforcement of compliance therewith and punishment of violations thereof.

XII

Entry of this Final Judgment is in the public interest.

Dated:----------

----------,
United States District Judge.

UNITED STATES DISTRICT COURT, NORTH DISTRICT OF NEW YORK

[76-CV-170]

UNITED STATES OF AMERICA, PLAINTIFF, v. CARROLS DEVELOPMENT CORP.; AND TRIPLE SCHUYLER ROME CORP., DEFENDANTS.

COMPETITIVE IMPACT STATEMENT RELATING TO PROPOSED CONSENT JUDGMENT

Filed: July 25, 1977.

This Competitive Impact Statement is filed by the Government pursuant to the requirements of section 2 of the Act of Congress of December 21, 1974 (15 U.S.C. § 16), commonly known as the Antitrust Procedures and Penalties Act. It relates to the proposed consent judgment shubmitted for entry against the defendants in this civil antitrust suit.

NATURE AND PURPOSE OF THE PROCEEDING

On April 23, 1976, the Government filed a civil antitrust suit charging that the acquisition by Carrols Development Corp. of the motion picture theatres in Syracuse and Utica, New York, operated by Kallet Realty, Inc., and its subsidiaries (Kallet) in February 1974, and the acquisition by Carrols Development Corp. and its wholly owned subsidiary Triple Schuyler Rome Corp. (both are referred to collectively herein as CDC), of the motion picture theatres in Utica, New York, operated by Hallmark Releasing Corp. (Hallmark), in March 1974, substantially lessened competition in the purchase of licenses to exhibit feature motion pictures in the Greater Syracuse and Greater Utica areas, in violation of section 7 of the Clayton Act.

In its complaint, the Government asked the Court to declare the acquisitions to be violative of section 7 of the Clayton Act and to order CDC to divest itself of all of the assets acquired from Kallet and Hallmark in the Greater Syracuse and Greater Utica areas.

EVENTS GIVING RISE TO THE ALLEGED VIOLATION

This suit concerns the purchase of licenses to exhibit feature motion pictures. Such licenses are purchased from distributors by exhibitors or operaters of motion picture theatres, in competition with other exhibitors in the same area.

At the time of the Kallet acquisition, CDC was the largest exhibitor in the Greater Syracuse Area with ten theatres which accounted for approximately 55.7 percent of the theatres and 59 percent of the gross box office receipts in that area.[1] Kallet, the second largest exhibitor with three theatres, accounted for about 16.8 percent of all motion picture theatres in the Greater Syracuse Area at that time and 27 percent of the gross box office receipts. Kallet was also the second largest theatre operator in the Greater Utica Area with four theatres or approximately 33 percent of all theatres in that area and 44 percent of gross box office receipts.[2] CDC did not operate any motion picture theatres in the Greater Utica Area at that time.

At the time of the Hallmark acquisition, Hallmark was the largest exhibitor in the Greater Utica Area with six theatres, which accounted for 50 percent of the theatres in that area and approximately 36 percent of gross box office receipts.

The Government alleges that the acquisition of the Kallet theatres eliminated actual competition for film licenses between Kallet and CDC in the Greater Syracuse Area, and potential competition between them in the Greater Utica Area. Although CDC did not operate any theatres in the Greater Utica Area prior to the acquisition, it had entered into an agreement for the construction of a multi-screen theatre in Utica and was, therefore, at that time the most likely entrant into the operation of motion picture theatres in that area. In addition, the Government claims that the acquisition of Kallet's theatres in the Greater Syracuse Area has significantly enhanced CDC's bargaining power with distributors to the detriment of independent exhibitors in the area.

The Government further alleges that the acquisition of the Hallmark theatres has resulted in the elimination of actual competition for film licenses between Hallmark and CDC in the Greater Utica Area. The Government also claims that CDC's bargaining power with distributors has been significantly enhanced to the detriment of independent exhibitors in the area.

THE PROPOSED CONSENT JUDGMENT AND ITS ANTICIPATED EFFECTS ON COMPETITION

Under the proposed consent judgment CDC must divest the twelve designated theatres located in the Greater Syracuse and Greater Utica Areas. Together with one former Kallet theatre already voluntarily divested by CDC during the pendency of this suit this will represent a total divestiture of all of the former Kallet and Hallmark theatres which CDC acquired in the Greater Syracuse and Greater Utica Areas. The proposed judgment will, thus, eliminate the additional bargaining power which CDC obtained as a result of the acquisitions. The divestitures will also increase competition in these areas.

The proposed judgment requires CDC to divest each of the designated theatres by sublease or assignment to persons and under terms and conditions approved by the Government or the Court. All of the theatres must be divested for theatre purposes. The proposed judgment protects against CDC reacquiring operating control of any of the theatres which it divests.

Under the proposed judgment CDC would be obliged to make reports to the Government every 90 days setting forth the steps taken to accomplish the divestitures. In order to assure to the extent possible that the designated threatres will be successfully divested, the proposed judgment provides for the appointment of a trustee by the Court if CDC has not divested all of the theatres within twenty-four months. The trustee would be appointed to divest the remaining theatres and would serve at the cost and expense of CDC.

The proposed judgment prohibits CDC, for ten years, from acquiring any operating theatre in the Greater Syracuse or Greater Utica Areas except with the approval of the Government. This provision protects against acquisitions by CDC in these areas which would be detrimental to competition. In addition, the Government would have visitation rights to inspect documents and interview officers and employees of CDC in order to determine and secure compliance with the judgment.

ALTERNATIVES TO THE PROPOSED JUDGMENT CONSIDERED BY THE GOVERNMENT

The proposed consent judgment provides substantially all of the relief prayed for in the complaint. No alternative to the judgment has been considered by the Department of Justice.

REMEDIES AVAILABLE TO POTENTIAL PRIVATE PLAINTIFFS

Any potential private plaintiffs who might have been damaged by the alleged violation will retain the same right to sue for monetary damages and any other legal and equitable remedies that they would have had were the proposed consent judgment not entered. However, pursuant to section 5(a) of the Clayton Act (15 U.S.C. § 16(a)), as amended, this judgment may not be used as prima facie evidence in private litigation.

PROCEDURES AVAILABLE FOR MODIFICATION OF THE PROPOSED CONSENT JUDGMENT

The proposed consent judgment is subject to a stipulation between the Government and CDC which provides that the Government may withdraw its consent to the proposed judgment any time before the Court has found that entry of the proposed judgment is in the public interest. By its terms, the proposed judgment provides for the Court's retention of jurisdiction of this action in order, among other reasons, to permit any of the parties to apply to the Court for such orders as may be necessary or appropriate for the modification of the final judgment.

As provided by section 2 of the Antitrust Procedures and Penalties Act (15 U.S.C. § 16), any person wishing to comment upon the proposed judgment may, for a sixty-day period prior to the effective date, submit written comments to the United States Department of Justice, Attention Bernard Wehrmann, Chief, New York Office, Antitrust Division, 26 Federal Plaza, New York, New York 10007. Such commente and the Government's response to them will be filed with the Court and published in the FEDERAL REGISTER. The Government will evaluate all such comments to determine whether there is any reason for withdrawal of its consent to the proposed judgment.

[1] The Greater Syracuse Area encompasses the area within a radius of approximately twelve miles from the center of the City of Syracuse, including Syracuse and all or part of the towns of Salina, DeWitt, Geddes, Cicero, Manlius, Pompey, Lafayette, Onondaga, Marcellus, Camillus, Van Buren, Lysander, and Clay.

[2] The Greater Utica Area encompasses the area within a radius of approximately ten miles from the center of the City of Utica, including Utica and all or part of the towns of Schuyler, Newport, Frankfort, Litchfield, Paris, New Hartford, Kirkland, Whitestown, Westmoreland, Floyd, Marcy, Trenton, and Deerfield.

DETERMINATIVE DOCUMENTS

There are no materials or documents which the Government considered determinative in formulating the proposed consent judgment. Therefore, none is being filed with this competitive impact statement.

Dated: July 25, 1977.

ERWIN L. ATKINS,
Attorney, Department of Justice.

NATIONAL FOUNDATION FOR THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

RESEARCH GRANTS PANEL

Meeting

JULY 21, 1977.

Pursuant to the provisions of the Federal Advisory Committee Act (Public Law 92-463) notice is hereby given that a meeting of the Research Grants Panel will be held at 806 15th Street NW., Washington, D.C. 20506, in room 1130, from 9 a.m. to 5:30 p.m. on August 23, 1977.

The purpose of the meeting is to review General Research applications in the field of State, Local and Regional History submitted to the National Endowment for the Humanities for projects beginning after April 1, 1978.

Because the proposed meeting will consider financial information and personnel and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, pursuant to authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings, dated April 28, 1977, I have determined that the meeting would fall within exemptions (4) and (6) of 5 U.S.C. 552b(c) and that it is essential to close the meeting to protect the free exchange of internal views and to avoid interference with operation of the Committee.

It is suggested that those desiring more specific information contact the Advisory Committee Management Officer, Mr. John W. Jordan, 806 15th Street, NW., Washington, D.C. 20506, or call area code 202-724-0256.

JOHN W. JORDAN,
Advisory Committee Management Officer.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on July 28, 1977 (44 USC 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes the title of each request received; the name of the agency sponsoring the proposed collection of information; the agency form number(s), if applicable; the frequency with which the information is proposed to be collected; the name of the reviewer or reviewing division with OMB, and an indication of who will be the respondents to the proposed collection.

Requests for extension which appear to raise no significant issues are to be approved after brief notice through this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503 (202-395-4529), or from the reviewer listed.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

WORKING GROUP ON BASIC RESEARCH IN THE DEPARTMENT OF DEFENSE

Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the Office of Science and Technology Policy announces the following meeting:

NAME: Working Group on Basic Research in the Department of Defense.

DATE: August 24 and 25, 1977.

TIME: 9 a.m. to 4 p.m.

PLACE: Room 3104, New Executive Office Building, 17th and Pennsylvania Avenue NW., Washington, D.C. 20500.

TYPE OF MEETING: Open.

CONTACT PERSON:

Dr. William P. Raney, Executive Office of the President, Office of Science and Technology Policy, Washington, D.C. 20500, telephone 202-395-4692.

SUMMARY MINUTES: May be obtained from the Office of Science and Technology Policy, Washington, D.C. 20500.

PURPOSE OF ADVISORY COMMITTEE: The Office of Science and Technology Policy is conducting a study which will lead to the formulation of policy governing the performance of basic research by or for the mission agencies. Under the guidance of the Steering Committee on Basic Research in Mission Agencies, the Working Group on Basic Research in the DOD is to examine the policies and procedures and research programs of that agency for adequacy and balance between near-term and long-term technical objectives.

AGENDA: 9 a.m. to 4 p.m. Planning meeting to discuss detailed objectives of the study, methods of approach, and work schedule and assignments.

WILLIAM MONTGOMERY,
Executive Officer.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 13714; SR-TAD-77-1]

TAD DEPOSITORY CORP.

Order Approving Rule Change

JULY 1, 1977.

On May 4, 1977, TAD Depository Corporation ("TAD") 2 Broadway, New York, New York 10004, submitted, pursuant to Rule 19b-4 under the Securities Exchange Act of 1934 (the "Act"), a proposed rule change. The rule change relates to TAD becoming a participant at The Depository Trust Co.

In accordance with Section 19(b) of the Act and Rule 19b-4 thereunder, notice of the proposed rule change was published in the FEDERAL REGISTER (42 FR 27361, May 27, 1977), and the public was invited to comment thereon. Notice of the filing and an invitation for comments also appeared in Securities Exchange Act Release No. 13553, May 19, 1977. No letters of comment were received.

The Commission has reviewed the proposed rule change and finds that it is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered clearing agencies.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change contained in File No. SR-TAD-77-1 be, and hereby is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

DEPARTMENT OF STATE

[Public Notice CM-7/95]

ADVISORY COMMITTEE TO UNITED STATES NATIONAL SECTION OF THE INTER-AMERICAN TROPICAL TUNA COMMISSION

Meeting

Notice is hereby given, pursuant to the provisions of Pub. L. 92-463, that a meeting of the Advisory Committee to the United States National Section of the Inter-American Tropical Tuna Commission will be held on August 30, 1977, in the auditorium of the Southwest Fisheries Center of the National Marine Fisheries Service at 8604 La Jolla Shores Drive, La Jolla, Calif., at 9:00 a.m.

The morning portion of the meeting from 9:00 a.m. to 12 noon will be open to the public and the public may participate in the discussions subject to the instructions of the Committee Chairman. Subjects to be discussed include an evaluation of the 1977 fishery experience, a preliminary outlook for the 1978 fishery and U.S. views on the overall quota and other aspects of the management program including allocations.

The afternoon session of the meeting, beginning at 1:30 p.m., will be closed as the discussions will involve matters exempt from public disclosure under 5 U.S.C. 552b(c)(1) and which the public interest requires be withheld from public disclosure. Documents classified in accordance with Executive Order 11652 will be circulated and discussed in the closed session. Requests for further information on the meeting should be directed to Douglas Marshall, OES/OFA, Room 3214, Department of State. He may be reached by telephone on (202) 632-2798.

Dated: July 21, 1977.

JOHN D. NEGROPONTE,
Deputy Assistant Secretary for Oceans and Fisheries Affairs.

Agency for International Development

[Redelegation of Authority No. 99.1.88]

PRINCIPAL AID OFFICER, INDIA, ET AL.

Redelegation of Authority Regarding Grant Functions

Pursuant to the authority delegated to me as Director, Office of Contract Management, under Redelegation of Authority No. 99.1 (38 FR 12836) from the Assistant Administrator for Program and Management Services of the Agency for International Development, I hereby redelegate to the principal AID Officer in India, Indonesia, Korea, Nepal, Pakistan, Philippines, Sri Lanka, and Thailand, authority to execute Operational Program Grants (OPG's) as defined in Appendix 7A, Chapter 7, of Handbook 3, Project Assistance, on the following basis:

1. OPG's up to the present level of grant authority held by the principal AID Officer under current redelegation from the Director, Office of Contract Management.

2. OPG's up to $500,000, where the services of an Area Contracting Officer or a contracting officer on TDY from AID, Washington are utilized.

3. OPG's up to $500,000, where the services of an Area Legal Advisor are utilized.

This authority shall be exercised in accordance with the procedures of Chapter 4 of Handbook 13, Grants, and with other regulations, procedures, and policies now or hereafter established, modified, and promulgated within AID.

The authority herein redelegated may be exercised by the principal AID Officer's chief deputy, or by duly authorized persons performing the functions of the principal AID Officer in an acting capacity. The authority may not be further redelegated.

Redelegation of Authority 99.1.76 (41 FR 12239) dated March 24, 1976 is hereby revoked and ad hoc Redelegation of Authority 99.1.77.44 to USAID Indonesia is hereby cancelled.

This Redelegation of Authority is effective upon signature.

Dated: July 22, 1977.

HUGH L. DWELLEY,
Director, Office of Contract Management.

RAYMOND J. POTOCKI

Delegation of Contracting Officer Authority

Pursuant to the authority delegated to me as Director, Office of Contract Management, under Redelegation of Authority No. 99.1 (38 FR 12836) from the Assistant Administrator for Program and Management Services, I hereby redelegate to Mr. Raymond J. Potocki the authority to sign the following instruments, up to an amount of $500,000 (or local currency equivalent) per transaction:

(1) U.S. Government contracts (including contracts with individuals for services of the individual alone);

(2) U.S. Government grants, other than grants to foreign governments or agencies thereof;

(3) Inter-agency service agreements (IASAs) between AID and other U.S. Government agencies; and

(4) Modifications to the instruments specified above.

The authority delegated herein is to be exercised in accordance with AID regulations, procedures and policies in effect at the time the authority is exercised and is not in derogation of the authority of the Director, Office of Contract Management, to exercise any of the functions herein redelegated.

Redelegation of Authority 99.1.84 (42 F.R. 8036) dated January 27, 1977, is hereby revoked.

Any official actions taken prior to the effective date hereof by officers duly authorized pursuant to delegations revoked hereunder are hereby continued in effect, according to their terms until modified, revoked, or superseded by action of the officer to whom I have delegated relevant authority in this delegation.

Actions within the scope of this delegation heretofore taken by the official designated in such delegation are hereby ratified and confirmed.

This redelegation of authority shall be effective on the date of signature.

Dated: July 25, 1977.

HUGH L. DWELLEY,
Director, Office of Contract Management.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

[FHWA Docket No. 77-10]

CONTROL OF WETLAND DRAINAGE INTO FEDERAL-AID HIGHWAY RIGHTS-OF-WAY

Public Meeting

AGENCY: Federal Highway Administration, DOT.

SUMMARY: The public meeting will explore possible actions FHWA may take to control the artificial drainage of wetlands into Federal-aid highway rights-of-way. All interested parties are invited to present a brief statement of their views on the subject and are urged to participate in subsequent discussions.

DATES: The public meeting is scheduled for August 31, 1977, at 9:30 a.m. in Room 3200, Department of Transportation, 400 Seventh Street SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Fred Bank, Environmental Quality Branch, Office of Environmental Policy (202-426-9173); or Gary Daves, Office of the Chief Counsel (202-426-0800), Federal Highway Administration 400 Seventh Street SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m., Monday through Friday.

ADDRESS: Data and comments may be submitted in triplicate to FHWA Docket No. 77-10, Room 4230, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Copies of all comments will be available for examination during normal business hours, 7:45 a.m. to 4:15 p.m. ET, at the foregoing address.

BACKGROUND AND SUPPLEMENTARY INFORMATION: The intentional drainage of wetlands into Federal-aid highways rights-of-way has been of longstanding concern to Federal, State and private conservation organizations and agencies. Data from Fish and Wildlife Service field offices suggest that in some sections of the country intentional drainage into highway ditches has contributed significantly to the continual decline in wetland acreage.

The Federal Highway Administration (FHWA) responsibilities with regard to wetlands are included in the Department of Transportation (DOT) Order 5660.1, dated May 21, 1975, entitled "Preservation of the Nation's Wetlands."[1] Under the order FHWA has the responsibility to preserve and enhance wetlands to the extent practicable. Additional agency obligation toward wetland protection is directed by the recent Executive Order 11990 of May 24, 1977, (42 FR 26961), entitled "Protection of Wetlands." However, the public meeting deals only with the single issue of wetland drainage and is not intended to be a substitute for any future agency actions that may be necessary in accordance with Executive Order 11990.

In light of the clear Federal policy with regard to wetlands preservation, FHWA desires to entertain public comment on the drainage issue and initiate appropriate corrective measures as necessary. Among the measures to be considered will be the desirability of control by FHWA of non-highway drainage structures in the right-of-way of Federal-aid highways. Such structures are sometimes used to drain water from wetlands onto the rights-of-way.

QUESTIONS

Comment is specifically invited on the following issues:

1. How serious is the threat to the nation's wetlands posed by the natural and artificial drainage of wetlands into Federal-aid highway rights-of-way?

2. What problems are posed by Federal or State laws and policies regarding the development of an FHWA policy relative to this problem?

3. Under what criteria and to what degree should artificial drainage of wetlands into Federal-aid highway rights-of-way be authorized? Consider factors such as, increased demand for agricultural products, maintenance of farm incomes, and government policies that stress the development and preservation of tillable acreage.

Issued on July 29, 1977.

WILLIAM M. COX,
Federal Highway Administrator.

DEPARTMENT OF THE TREASURY

Office of the Secretary

ANIMAL GLUE AND INEDIBLE GELATIN FROM WEST GERMANY

Antidumping; Withholding of Appraisement Notice and Determination of Sales at Less than Fair Value

AGENCY: U.S. Treasury Department.

ACTION: Withholding of Appraisement and Determination of Sales at Less Than Fair Value.

SUMMARY: This notice is to advise the public that an antidumping investigation has been completed and that it has been determined that animal glue and inedible gelatin from West Germany are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally occur when the prices of the merchandise sold for exportation to the United States are less than the prices in the home market. This case is being referred to the United States International Trade Commission for it to determine whether an industry in the United States is being injured. Simultaneously, appraisements of entries of this merchandise will be withheld for 3 months, pending an injury determination by the International Trade Commission.

EFFECTIVE DATE: August 3, 1977.

FOR FURTHER INFORMATION CONTACT:

David P. Mueller, Duty Assessment Division, United States Customs Service, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone (202-566-5492).

SUPPLEMENTARY INFORMATION: Information was received in proper form on December 23, 1976, from counsel acting on behalf of Darling & Company, Milligan & Higgins Corporation and the Peter Cooper Corporation, alleging that animal glue and inedible geltain from West Germany were being sold at less than fair value, thereby causing injury to, or the likelihood of injury to, or the prevention of establishment of an industry in the United States, within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). On the basis of this information and subsequent preliminary investigation by the Customs Service, an "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER on January 26, 1977 (42 FR 4920).

DETERMINATION OF SALES AT LESS THAN FAIR VALUE

I hereby determine that, for the reasons stated below, animal glue and inedible gelatin from West Germany are being, or are likely to be, sold at less than fair value within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)).

STATEMENT OF REASONS ON WHICH THIS DETERMINATION IS BASED

The reasons and basis for the above determination are as follows:

a. *Scope of the investigation.* The predominance of imports of the subject merchandise from West Germany during the period of investigation were manufactured by the following firms: Electro Chemische Fabrik Kempen Gmbh. ("Kempen"); Chemische Dungerfabrik Rendsburg Gmbh. ("Rendsburg"); Fritz Hacker & Sohn Gmbh. ("Hacker"); G. Conradt & Sohn ("Conradt"); Johannes Martens KG ("Martens"); and Animal Produkten KG ("Produkten"). Therefore, the investigation was limited to these manufacturers.

b. *Basis of comparison.* For the purposes of considering whether the merchandise in question is being, or is likely to be, sold at less than fair value within the meaning of the Act, the proper basis of comparison is between the purchase price and the home market price of such or similar merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162), was used since all exports sales to the United States were made to non-related customers. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise was sold in the home market in sufficient quantities to provide a basis for fair value.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)) pricing information was obtained concerning imports and home market sales during the period August 1, 1976 through January 31, 1977.

c. *Purchase Price.* For the purposes of this determination of sales at less than fair value, since all merchandise was purchased or agreed to be purchased prior to the time of exportation, by the persons by whom or for whose account it was imported, within the meaning of section 203 of the Act, the purchase price has been calculated on the basis of the c.i.f. or f.o.b. price to unrelated United States purchasers with deductions for inland freight and insurance, and ocean freight and insurance, costs, as appropriate. Whenever actual data was unavailable such information as was available to the U.S. Customs Service has been utilized.

d. *Home market price.* For the purposes of this determination of sales at less than fair value, the home market price has been calculated on the basis of the delivered prices to unrelated West German purchasers, with reference to sales by Kempen. Adjustments have been made for inland freight and for differences in packing costs, as appropriate.

In the case of the above-named manufacturers other than Kempen, home market price was determined utilizing the best information available. Whenever actual home market prices were not available, such alternative information with respect to such prices as was available to the U.S. Customs Service has been utilized.

With respect to sales by Kempen, that level of trade has been selected in the home market which is comparable to the level of trade to which sales to the United States have been made, pursuant to § 153.15, Customs Regulations (19 CFR 153.15).

e. *Results of fair value comparisons.* Using the above criteria, comparisons were made on the predominance of all sales of the subject merchandise to the United States during the representative period. Those comparisons indicated that the purchase price of animal glue and inedible gelatin, other than that produced and sold by Kempen, was less than the home market price of such or similar merchandise. Weighted average margins were found on 100 percent of sales compared on each of the following companies investigated: Rendsburg, 158 percent; Hacker, 28 pecent; Conradt, 67 percent; Martens, 50 percent; and Animal Produkten, 100 percent.

The Secretary has provided an opportunity to known interested persons to present written and oral views pursuant to § 153.40, Customs Regulations (19 CFR 153.40).

Further, and based on the reasons noted above, Customs officers are being directed to withhold ap raisement of animal glue and inedible gelatin from West Germany other than that produced and sold by Kempen, in accordance with § 153.48, Customs Regulations (19 CFR 153.48).

This withholding of appraisement notice is published pursuant to § 153.35 (a), Customs Regulations (19 CFR 153.35(a)), and shall become effective August 3, 1977. It shall cease to be effective on November 3, 1977, unless previously revoked.

The United States International Trade Commission is being advised of this determination.

This determination is being published pursuant to section 201(d) of the Act (19 U.S.C. 160(d)).

HENRY C. STOCKWELL, JR.,
Acting General Counsel

JULY 26, 1977.

ANIMAL GLUE AND INEDIBLE GELATIN FROM YUGOSLAVIA

Antidumping; Withholding of Appraisement Notice and Determination of Sales at Less Than Fair Value

AGENCY: U.S. Treasury Department.

ACTION: Withholding of Appraisement and Determination of Sales at Less Than Fair Value.

SUMMARY: This notice is to advise the public that an antidumping investigation has been completed and that it has been determined that animal glue and inedible gelatin from Yugoslavia are being, or are likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally occur when the prices of the merchandise sold for exportation to the United States are less than the prices in the home market. This case is being referred to the United States International Trade Commission for it to determine whether an industry in the United States is being injured. Simultaneously, appraisements of entries of this merchandise will be withheld for 3 months, pending an injury determination by the International Trade Commission.

EFFECTIVE DATE: August 3, 1977.

FOR FURTHER INFORMATION CONTACT:

William T. Trujillo, Operations Officer, U.S. Customs Service, Office of Operations, Duty Assessment Division, Technical Branch, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone (202-566-5492).

SUPPLEMENTARY INFORMATION: Information was received in proper form on December 23, 1976, from counsel acting on behalf of Darling and Company, Milligan and Higgins Corporation and the Peter Cooper Corporation, alleging that animal glue and inedible gelatin from Yugoslavia were being sold at less than fair value, thereby causing injury to, or the likelihood of injury to, or the prevention of establishment of an industry in the United States, within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). On the basis of this information and subsequent preliminary investigation by the Customs Service, an "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER of January 26, 1977 (42 FR 4921).

DETERMINATION OF SALES AT LESS THAN FAIR VALUE

I hereby determine that, for the reason stated below, animal glue and inedible gelatin from Yugoslavia are being, or are likely to be, sold at less than fair value within the meaning of section 201 (a) of the Act (19 U.S.C. 160(a)).

STATEMENT OF REASONS ON WHICH THIS DETERMINATION IS BASED

The reason and bases for the above determination are as follows:

a. *Scope of the investigation.* All imports of the subject merchandise from Yugoslavia were manufactured by Kemin, a subsidiary of H. P. Kolinska, Ljublijana, Yugoslavia. Therefore, the investigation was limited to this manufacturer.

b. *Basis of comparison.* For the purposes of considering whether the merchandise in question is being, or is likely to be, sold at less than fair value within the meaning of the Act, the proper basis of comparison is between the purchase price and the home market price of such or similar merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162), was used since all export sales to the United States were made to non-related customers. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise was sold in the home market in sufficient quantities to provide a basis for fair value. It has been determined that the economy of Yugoslavia is not state-controlled to an extent that sales or offers of sales of such or similar merchandise in Yugoslavia do not permit a determination of foreign market value under section 205(a) of the Act (19 U.S.C. 164(a)).

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning imports and home market sales during the period August 1, 1976 through January 31, 1977.

c. *Purchase price.* For the purposes of this determination of sales at less than fair value, since all merchandise was purchased or agreed to be purchased prior to the time of exportation, by the persons by whom or for whose account it was imported, within the meaning of section 203 of the Act, the purchase price has been calculated on the basis of the f.o.b. Yugoslav port, and/or C&F Boston prices, with deductions for inland and ocean freight, insurance and handling expenses.

d. *Home market price.* For the purposes of this determination of sales at less than fair value, the home market price has been calculated on the basis of the f.o.b. plant price to unrelated purchasers in Yugoslavia. In the case of two types of technical gelatin appropriate adjustments were made for differences in merchandise between similar merchandise sold in the home market and to the United States in accordance with § 153.-11, Customs Regulations (19 CFR 153.11).

e. *Results of fair value comparison.* Using the above criteria, comparisons were made on all sales of the subject merchandise to the United States by KEMIN during the period of the investigation. Those comparisons indicated that the purchase price of animal glue and inedible gelatin was less than the home market price of such or similar merchandise. Margins were found, ranging from approximately 1.7 percent to approximately 31 percent, on about 92 percent of the sales of the subject merchandise to the United States during the period of investigation. The weighted average margin on all sales was 9.7 percent.

The Secretary has provided an opportunity to known interested persons to present written and oral views pursuant to § 153.40, Customs Regulations (19 CFR 153.40).

Further, and based on the reasons noted above, Customs officers are being directed to withhold appraisement of animal glue and inedible gelatin from Yugoslavia in accordance with § 153.48, Customs Regulations (19 CFR 153.48).

This withholding of appraisement notice is published pursuant to § 153.35(a), Customs Regulations (19 CFR 153.35 (a)), and shall become effective on August 3, 1977. It shall cease to be effective on November 3, 1977, unless previously revoked.

The United States International Trade Commission is being advised of this determination.

This determination is being published pursuant to section 201(d) of the Act (19 U.S.C. 160(d)).

HENRY C. STOCKWELL, JR.,
Acting General Counsel.

ANIMAL GLUE AND INEDIBLE GELATIN FROM SWEDEN

Antidumping; Withholding of Appraisement Notice and Determination of Sales at Less Than Fair Value

AGENCY: U.S. Treasury Department.

ACTION: Withholding of appraisement and determination of sales at less than fair value.

SUMMARY: This notice is to advise the public that an antidumping investigation has been completed and that it has been determined that animal glue and inedible gelatin from Sweden is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally occur when the prices of the merchandise sold for exportation to the United States are less than the prices in the home market. This case is being referred to the United States International Trade Commission for it to determine whether an industry in the United States is being injured. Simultaneously, appraisements of entries of this merchandise will be withheld for three months, pending an injury determination by the International Trade Commission.

EFFECTIVE DATE: This notice will be effective on August 3, 1977.

FOR FURTHER INFORMATION CONTACT:

William T. Trujillo, U.S. Customs Service, Operations Officer, Office of Operations, Duty Assessment Division, Technical Branch, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: Information was received in proper form on December 23, 1976, from Stewart and Ikenson, Attorneys at Law on behalf of Darling & Co., Milligan & Higgins Corp., and the Peter Cooper Corp. alleging that animal glue and inedible gelatin from Sweden is being sold at less than fair value, thereby causing injury to or the prevention of the establishment of an industry in the United States, within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). On the basis of this information and subsequent preliminary investigation by the Customs Service an "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER of January 26, 1977 (42 FR 4921-22).

DETERMINATION OF SALES AT LESS THAN FAIR VALUE

I hereby determine that, for the reasons stated below, animal glue and inedible gelatin from Sweden is being, or is likely to be, sold at less than fair value within the meaning of section 201 (a) of the Act (19 U.S.C. 160(a)).

STATEMENT OF REASONS ON WHICH THIS DETERMINATION IS BASED

The reasons and bases for the above determination are as follows:

(a) *Scope of the investigation.* All of the imports of the subject merchandise from Sweden are manufactured by Extraco A.B., Klippan, Sweden. Therefore, the investigation was limited to that manufacturer.

(b) *Basis of comparison.* For the purposes of considering whether the merchandise in question is being, or is likely to be, sold at less than fair value within the meaning of the Act, the proper basis of comparison is between the purchase price and the home market price of such or similar merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162), was used since all export sales to the United States were made to non-related customers. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2) was used since such or similar merchandise was sold in the home market in sufficient quantities to provide a basis for fair value.

In accordance with § 153.31(b), Customs Regulations (19 CFR 153.31(b)), pricing information was obtained concerning imports and home market sales during the period August 1, 1976, through January 31, 1977.

(c) *Purchase price.* For the purposes of this determination of sales at less than fair value, since all merchandise was purchased or agreed to be purchased prior to the time of exportation, by the persons by whom or for whose account it was imported, within the meaning of section 203 of the Act, the purchase price has been calculated on the basis of the c.i.f. Boston, Mass., price to unrelated purchasers with deductions for ocean freight and other charges which were included in the price and incurred in bringing the merchandise from the point of shipment to the point of delivery in accordance with section 203 of the Act.

(d) *Home market price.* For the purposes of this determination of sales at less than fair value, the home market price has been calculated on the basis of the f.o.b. plant price to an unrelated purchaser in Sweden.

A level of trade adjustment was requested in this case. Sufficient home market sales were found at a comparable level of trade and the claim for adjustment was denied.

(e) *Results of fair value comparisons.* Using the above criteria, comparisons were made on approximately 68 percent of the animal glue and inedible gelatin which were sold to the United States from Sweden during the representative period. Those comparisons indicated that the purchase price was less than the home market price of such or similar merchandise. Margins were found ranging from approximately 70 to 126 percent on 100 percent of the sales compared. The weighted-average margin of those sales on which comparisons were made amounted to 92.72 percent.

The Secretary has provided an opportunity to known interested persons to present written and oral views pursuant to § 153.40, Customs Regulations (19 CFR 153.40).

Further, and based on the reasons noted above, Customs officers are being directed to withhold appraisement of animal glue and inedible gelatin from Sweden in accordance with § 153.48, Customs Regulations (19 CFR 153.48).

This withholding of appraisement notice is published pursuant to § 153.35(a), Customs Regulations (19 CFR 153.35 (a)), and shall become effective August 3, 1977. Such action shall cease to be effective on November 3, 1977, unless previously revoked.

The United States International Trade Commission is being advised of this determination.

This determination is being published pursuant to section 201(d) of the Act (19 U.S.C. 160(d)).

HENRY C. STOCKWELL, JR.,
Acting General Counsel.

ANIMAL GLUE AND INEDIBLE GELATIN FROM THE NETHERLANDS

Antidumping; Withholding of Appraisement Notice and Determination of Sales at Less Than Fair Value

AGENCY: U.S. Treasury Department.

ACTION: Withholding of appraisement and determination of sales at less than fair value.

SUMMARY: This notice is to advise the public that an antidumping investigation has been completed and that it has been determined that inedible gelatin and animal glue from the Netherlands is being, or is likely to be, sold at less than fair value within the meaning of the Antidumping Act, 1921, as amended. Sales at less than fair value generally occur when the prices of the merchandise sold for exportation to the United States are less than the prices in the home market or to third countries. This case is being referred to the International Trade Commission for it to determine whether a United States industry is being injured. Simultaneously, appraisement of entries of this merchandise will be withheld for three months, pending an injury determination by the International Trade Commission.

EFFECTIVE DATE: August 3, 1977.

FOR FURTHER INFORMATION CONTACT:

John R. Kugelman, Operations Officer, U.S. Customs Service, Office of Operations, Duty Assessment Division, Technical Branch, 1301 Constitution Avenue NW., Washington, D.C. 20229, telephone 202-566-5492.

SUPPLEMENTARY INFORMATION: Information was received in proper form on December 23, 1976, from counsel acting on behalf of the National Association of Glue Manufacturers, Inc., New York, N.Y., alleging that inedible gelatin and animal glue from the Netherlands was being sold at less than fair value, thereby causing injury to, or the likelihood of injury to, or the prevention of the establishment of an industry in the United States, within the meaning of the Antidumping Act, 1921, as amended (19 U.S.C. 160 et seq.) (referred to in this notice as "the Act"). On the basis of this information and subsequent preliminary investigation by the Customs Service, an "Antidumping Proceeding Notice" was published in the FEDERAL REGISTER of January 26, 1977 (42 FR 4921).

DETERMINATION OF SALES AT LESS THAN FAIR VALUE

I hereby determine that, for the reasons stated below, inedible gelatin and animal glue from the Netherlands is being, or is likely to be, sold at less than fair value within the meaning of section 201(a) of the Act (19 U.S.C. 160(a)).

STATEMENT OF REASONS ON WHICH THIS DETERMINATION IS BASED

The reasons and bases for the above determination are as follows:

(a) *Scope of the investigation.* Of the imports of the subject merchandise from the Netherlands, 100 percent was manufactured by Wed. P. Smits en Zoon B.V. and Lijmfabriek C. Trommelen. Therefore, the investigation was limited to these two manufacturers.

(b) *Basis of comparison.* For the purposes of considering whether the merchandise in question is being, or is likely to be, sold at less than fair value within the meaning of the Act, the proper basis of comparison is between the purchase price and the home market price of such or similar merchandise. Purchase price, as defined in section 203 of the Act (19 U.S.C. 162), was used since all export sales to the United States appear to be made to an unrelated customer. Home market price, as defined in § 153.2, Customs Regulations (19 CFR 153.2), was used since such or similar merchandise was sold by both manufacturers in the home market in sufficient quantities to provide a basis for fair value..

In the case of Trommelen, a claim was made that home market price should be calculated by utilizing sales to a distributor based in the Netherlands, who resold the merchandise principally for use within neighboring countries of the European Community (EC) and who was at the same commercial level of trade as the sole U.S. importer. Because the goods were made to a company located in the Netherlands who took title to the goods and who in turn was free to resell the goods to whatever destinations the distributor chose, it has been determined that those sales are sales for home consumption in accordance with § 153.2, Customs Regulations (19 CFR 153.2).

(c) *Purchase price.* For the purposes of this determination of sales at less than fair value, since all merchandise was purchased or agreed to be purchased prior to the time of exportation, by the persons by whom or for whose account it was imported, within the meaning of section 203 of the Act, the purchase price has been calculated on the basis of the f.o.b. foreign port of the C&F U.S. port price to the unrelated United States purchaser, with deductions for ocean freight, trucking, loading, inland freight and handling charges, as appropriate.

(d) *Home market price.* For the purposes of this determination of sales at less than fair value, the home market price has been calculated on the basis of the ex-factory price for such or similar merchandise to unrelated Dutch purchasers in the case of Smits, and on the basis of delivered prices to, in the case of Trommelen, unrelated purchaser, have been made for inland freight discounts to a distributor, technical services and for a difference in the cost of packing.

The latter three adjustments were made pursuant to § 153.10, Customs Regulations (19 CFR 153.10). Each of the foregoing costs was directly related to the sales under consideration.

Claims were made for certain adjustments by one or both manufacturers which were disallowed. These claims involved differences in quantities and/or level of trade, differences in merchandise, and unanticipated fluctuations in the rate of currency exchange.

The claim for differences in quantities and/or level of trade was not allowed in the case of Smits en Zoon since it was based on sales to third countries and not on sales for home consumption, when in fact it was determined that a viable home market existed.

The claim for differences in merchandise was not material since the merchandise in question was not employed for comparison purposes. Comparisons were not made on this particular merchandise inasmuch as it was determined from pricing practices that substantial cost differences existed, which were not sufficiently quantified.

The claim for an adjustment due to unanticipated differences in the rate of currency exchange, which had an adverse effect on one of the manufacturer's prices, was not allowed because it was determined that price comparisons were properly made, in accordance with § 153.52, Customs Regulations (19 CFR 153.52).

(e) *Result of fair value comparisons.* Using the above criteria, comparisons were made on approximately 65 percent of the sales of the subject merchandise to the United States by Smits and Trommelen during the representative period and those comparisons indicated that the purchase price was less than the home market price of such or similar merchandise. Margins were found ranging from 0.8 to 21.5 percent on 100 percent of the sales to the United States. The weighted-average margin when weighted over 100 percent of the sales compared amounted to 7.5 percent.

The Secretary has provided an opportunity to known interested persons to present written and oral views pursuant to § 153.40, Customs Regulations (19 CFR 153.40).

Further, and based on the reasons noted above, Customs Officers are being directed to withhold appraisement of inedible gelatin and animal glue from the Netherlands in accordance with § 153.48, Customs Regulations (19 CFR 153.48).

This withholding of appraisement notice is published pursuant to § 153.35(a), Customs Regulations (19 CFR 153.35(a)), and shall become effective on August 3, 1977. Such action shall cease to be effective on November 3, 1977, unless previously revoked.

The United States International Trade Commission is being advised of this determination.

This determination is being published pursuant to section 201(d) of the Act (19 U.S.C. 160(d)).

HENRY C. STOCKWELL, Jr.,
Acting General Counsel.

ASSIGNMENT OF HEARINGS

JULY 29, 1977.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 11977 Sub 336, Ligon Specialized Hauler, Inc. now being assigned October 13, 1977 (2 days) at Dallas, Texas and will be held in Room 5A15–17, Federal Building, 1100 Commerce Street.

AB 19 Sub No. 27 Baltimore and Ohio Railroad Company Abandonment between Flora and Sangamon Junction, in Clay, Effingham, Fayett, Shelby, Christian and Sangamon Counties, Illinois, now assigned August 16, 1977 is postponed to August 23, 1977 at Interstate Commerce Commission in Washington, D.C.

MC 41098 Sub No. 42 Global Van Lines, Inc., now being assigned November 1, 1977 (14 days) for hearing in Los Angeles, CA, in a hearing room to be later designated.

FFC 70, Imperial Air Service, Inc. Investigation of Operations now being assigned September 21, 1977 (1 day) at New York, New York in a hearing room to be later designated.

MC 4405 (Sub-No. 542), Dealers Transit, Inc., now being assigned September 27, 1977, at St. Louis, Mo., Court Room 3, 5th Floor, U.S. Court and Customhouse, 1114 Market Street (1 day).

MC 142059 (Sub-No. 4), Cardinal Transport, Inc., now being assigned September 28, 1977 (1 day), St. Louis, Mo., Court Room 3, 5th Floor, U.S. Court and Customhouse, 1114 Market St.

MC 78400 (Sub-No. 49), Beaufort Transfer Company and MC 138741 (Sub-No. 32), American Central Transport, Inc., now being assigned September 29, 1977 (2 days), at St. Louis, Mo., Court Room 3, 5th Floor, U.S. Court and Customhouse, 1114 Market Street.

MC-C-9702, *Global Van Lines, Inc.* v. *United Van Lines, Inc.*, now being assigned October 3, 1977 (1 day), at St. Louis, Mo., Court Room 3, 5th Floor, U.S. Court and Customhouse, 1114 Market Street.

MC 4405 (Sub-No. 543), Dealers Transit, Inc., now being assigned October 4, 1977 (1 day), at St. Louis, Mo. Court Room 3, 5th Floor U.S. Court and Customhouse, 1114 Market Street.

MC 135684 (Sub-No. 35), Bass Transportation Co., Inc., now being assigned October 5, 1977 (1 day), at St. Louis, Mo. Court Room 3, 5th Floor, U.S. Court and Customhouse, 1114 Market Street.

MC 113325 (Sub-No. 145), Slay Transportation Co., Inc., now being assigned for continued hearing on October 6, 1977 (2 days), at St. Louis, Mo., Court Room 3, 5th Floor. U.S. Court and Customhouse, 1114 Market Street.

H. G. HOMME, Jr.,
Acting Secretary.

[FR Doc.77-22327 Filed 8-2-77;8:45 am]

[Ex Parte No. 241, Rule 19, Amendment No. 3 to Revised Exemption No. 121]

BALTIMORE & OHIO RAILROAD CO., ET AL.

Exemption

Exemption under provision of rule 19 of the Mandatory Car Service rules ordered in ex parte No. 241.

To: The Baltimore and Ohio Railroad Company, The Chesapeake and Ohio Railway Company, Norfolk and Western Railway Company, Western Maryland Railway Company.

Upon further consideration of Revised Exemption No. 121 issued April 23, 1976.

It is ordered, That, under the authority vested in my by Car Service Rule 19, Exemption No. 121 to the Mandatory Car Service Rules ordered in Ex Parte No. 241, be, and it is hereby amended to *expire September 30, 1977.*

This amendment shall become effective July 31, 1977.

Issued at Washington, D.C., July 22, 1977.

INTERSTATE COMMERCE COMMISSION,
JOEL E. BURNS,
Agent.

[FR Doc.77-22320 Filed 8-2-77;8:45 am]

[Ex Parte No. 241, Rule 19, Amendment No. 5 to Exemption No. 127]

BESSEMER & LAKE ERIE RAILROAD CO., ET AL.

Exemption

Exemption under provision of Rule 19 of the Mandatory Car Service Rules Ordered in Ex Parte No. 241

To: Bessemer and Lake Erie Railroad Company, The Baltimore and Ohio Railroad Company, The Chesapeake and Ohio Railway Company, Western Maryland Railway Company.

Upon further consideration of Exemption No. 127 issued June 29, 1976.

It is ordered, That, under authority vested in me by Car Service Rule 19, Exemption No. 127 to the Mandatory Car Service Rules ordered in Ex Parte No. 241 be, and it is hereby, amended to *expire September 30, 1977.*

This amendment shall become effective July 31, 1977.

Issued at Washington, D.C., July 22, 1977.

INTERSTATE COMMERCE COMMISSION,
JOEL E. BURNS,
Agent.

[FR Doc.77-22324 Filed 8-2-77;8:45 am]

[Ex Parte No. 241, Rule 19, Amendment No. 6 to Exemption No. 122]

BALTIMORE & OHIO RAILROAD CO., ET AL.

Exemption

JULY, 29, 1977.

Exemption under provision of rule 19 of the Mandatory Car Service rules ordered in Ex Parte No. 241.

To: The Baltimore and Ohio Railroad Company, The Chesapeake and Ohio Railway Company, Consolidated Rail Corporation, Western Maryland Railway Company.

Upon further consideration of Exemption No. 122 issued April 2, 1976.

It is ordered, That, under the authority vested in me by Car Service Rule 19, Exemption No. 122 to the Mandatory Car Service Rules ordered in Ex Parte No. 241, be, and it is hereby amended to *expire August 31, 1977.*

This amendment shall become effective July 31, 1977.

[Ex Parte No. 241, Rule 19, Tenth Revised Exemption No. 129]

CHICAGO, WEST PULLMAN & SOUTHERN RAILROAD CO., ET AL.

Exemption

JULY 29, 1977.

Exemption under Provision of Rule 19 of the Mandatory Car Service Rules Ordered in Ex Parte No. 241.

It appearing, That the railroads named herein own numerous 40-ft. plain boxcars; that under present conditions, there is virtually no demand for these cars on the lines of the car owners; that return of these cars to the car owners would result in their being stored idle on these lines; that such cars can be used by other carriers for transporting traffic offered for shipments to points remote from the car owners; and that compliance with Car Service Rules 1 and 2 prevents such use of plain boxcars owned by the railroads listed herein, resulting in unnecessary loss of utilization of such cars.

It is ordered, That, pursuant to the authority vested in me by Car Service Rule 19, plain boxcars described in the Official Railway Equipment Register, I.C.C.-R.E.R. No. 404 issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "XM", with inside length 44-ft. 6-in. or less, regardless of door width and bearing reporting marks assigned to the railroads named below, shall be exempt from the provisions of Car Service Rules 1(a), 2(a), and 2(b).

Chicago, West Pullman & Southern Railroad Company. Reporting Marks: CWP
Chicago, Rock Island and Pacific Railroad Company. Reporting Marks: RI-ROCK
Detroit and Mackinac Railway Company. Reporting Marks: D&M-DM
Illinois Terminal Railroad Company. Reporting Marks: ITC
Louisville, New Albany & Corydon Railroad Company. Reporting Marks: LNAC
Missouri-Kansas-Texas Railroad Company. Reporting Marks: MKT
Missouri Pacific Railroad Company. Reporting Marks: CEI-MI-MP-TP
New Hope and Ivyland Railroad Company. Reporting Marks: NHIR
Richmond, Fredericksburg and Potomac Railroad Company. Reporting Marks: RFP
Southern Railway Company.
Reporting Marks: CG-NS-SA-SOU

Effective 12:01 a.m., August 1, 1977, and continuing in effect until further order of this Commission.

Issued at Washington, D.C., July 22, 1977.

INTERSTATE COMMERCE COMMISSION,
JOEL E. BURNS,
Agent.

[FR Doc 77 22319 Filed 8-2-77;8:45 am]

FOURTH SECTION APPLICATION FOR RELIEF

JULY 29, 1977.

An application, as summarized below, has been filed requesting relief from the requirements of section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 43407—*Petroleum and Petroleum Products from Gilsonite, Colorado.* Filed by Western Trunk Line Committee, Agent, (No. A-2740), for interested rail carriers. Rates on petroleum, petroleum products, asphalt, petroleum road oil, and petroleum wax tailings, in tank-car loads, as described in the application, from Gilsonite, Colorado, to points in western trunk-line territory, Illinois, Indiana, and Kentucky.

Grounds for relief—Market competition; modified short-line distance formula and grouping.

Tariff—Supplement 153 to Western Trunk Line Committee, Agent, tariff 473, I.C.C. No. A-4572. Rates are published to become effective on August 27, 1977.

By the Commission.

H. G. HOMME, Jr.,
Acting Secretary.

[MA–19 amending M–38]

JULY 28, 1977.

Correction of listing of item 4.

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10 a.m., August 2, 1977.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT: 4. Docket 30635, Petition for reconsideration and motion to consolidate *Arizona Service Investigation* (Memo. No. 6907–B, BLJ, OGC).

STATUS: Open.

PERSON TO CONTACT:

Phyllis T. Kaylor, the Secretary, (202–673–5068).

SUPPLEMENTARY INFORMATION: Inadvertently an incorrect bureau designation was listed. Item 4 should have read as listed above.

[S–1032–77 Filed 8–1–77;9:28 am]

2

COMMODITY FUTURES TRADING COMMISSION.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: August 4, 1977, 10 a.m.

CHANGES IN THE MEETING: Delete the discussion on the Chicago Board of Trade application for designation as a contract market in long term U.S. Treasury bonds.

[S–1024–77 Filed 8–1–77;9:27 am]

3

COMMODITY FUTURES TRADING COMMISSION.

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETING: August 2, 1977, 10 a.m.

CHANGES IN THE MEETING: Add the following subject—Chicago Board of Trade application for designation as a contract market in long term U.S. Treasury bonds.

[S–1025–77 Filed 8–1–77;9:27 am]

4

CONSUMER PRODUCT SAFETY COMMISSION.

DATE AND TIME: July 29, 1977, 2 p.m.

LOCATION: 3rd Floor Hearing Room, 1111 18th Street, NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE DISCUSSED: At the request of the National Safety Council (NSC), the Commission met with NSC President Vincent L. Tofany to discuss strategies to assist voluntary safety efforts, strategies for CPSC/NSC working relationships, CPSC's voluntary standards policy, and interagency efforts concerning chronic chemical hazards.

CONTACT PERSON FOR ADDITIONAL INFORMATION:

Richard A. Danca, Office of the Secretary, Suite 300, 1111 18th Street NW., Washington, D.C., telephone 202–634–7700.

[S–1026–77 Filed 8–1–77;9:27 am]

5

CONSUMER PRODUCT SAFETY COMMISSION.

DATE AND TIME: These meetings will be held on the dates listed below; all meetings will begin at 9:30 a.m.

LOCATION: All these meetings will be held in the 3rd Floor Hearing Room, 1111 18th Street NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: At these meetings, the Commission will consider either its fiscal year 1978 operating plan or its fiscal year 1979 budget, as stated below:

August 2—Fiscal year 1978 operating plan.
August 3—Fiscal year 1978 operating plan (if needed).
August 4—Fiscal year 1979 budget levels.
August 5—Fiscal year 1979 budget proposal.
August 8—Fiscal year 1979 budget proposal (if needed).

CONTACT PERSON FOR ADDITIONAL INFORMATION:

Richard A. Danca, Office of the Secretary, Suite 300, 1111 18th Street NW., Washington, D.C. 20207, telephone 202–634–7790.

[S–1027–77 Filed 8–1–77;9:28 am]

6

FEDERAL ELECTION COMMISSION.

DATE AND TIME: Monday, August 8, 1977, at 10 a.m.

PLACE: 1325 K Street NW., Washington, D.C.

STATUS: Portions of this meeting will be open to the public and portions will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public:

I. Future meetings.
II. Correction and approval of minutes—July 21, 1977.
III. Advisory opinion 1977–31 (Commission memorandum No. 1405).
IV. Appropriations and budget task force report on fiscal year 1978 budget.
V. Pending legislation.
VI. Liaison with other Federal agencies.
VII. Report on pending litigation.
VIII. Promotion procedures/agency position descriptions.
IX. Communication from OMB re log of contacts.
X. Routine administrative matters.

Portions closed to the public (executive session):

Compliance; F.O.I.A. appeals; personnel.

PERSON TO CONTACT FOR INFORMATION:

David Fiske, Press Officer, Telephone 202–523–4065.

[S–1033–77 Filed 8–1–77;10:36 am]

7

[USITC SE–77–47]

INTERNATIONAL TRADE COMMISSION.

TIME AND DATE: 9:30 a.m., August 11, 1977.

PLACE: Room 117, 701 E Street NW., Washington, D.C. 20436.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

Portions open to the public:

1. Reorganization; 2. Agenda; 3. Minutes; 4. Petitions and complaints (if necessary); 5. Any items left over from previous agenda.

Portions closed to the public:

1. Reorganization (portions regarding the selection of personnel).

CONTACT PERSON FOR MORE INFORMATION:

Kenneth R. Mason, Secretary (202–523–0161).

[S–1028–77 Filed 8–1–77;9:28 am]

8

JULY 29, 1977.

INTERSTATE COMMERCE COMISSION.

TIME AND DATE: 1 p.m., Monday, August 1, 1977.

PLACE: Room 5124, Interstate Commerce Commission Building, 12th and Constitution Avenue NW., Washington, D.C.

STATUS: Short notice of open conference. Division 3, Chairman Brown, Commissioners MacFarland and Christian have unanimously voted to call this meeting on short notice to consider the following agenda.

MATTERS TO BE CONSIDERED: Finance Docket No. 28322—Chicago South Shore and South Bend Railroad, discontinuance of all passenger train service. Docket No. AB–136—Chicago South Shore and South Bend Railroad; abandonment of line over The Illinois Central Gulf Railroad between Randolph Street and 115th Street (Kensington) in Cook County, Ill.

CONTACT PERSON FOR MORE INFORMATION:

Hildred S. Hersman, Confidential Assistant, Telephone 202–275–7535.

[S–1030–77 Filed 8–1–77;9:28 am]

9

JULY 29, 1977.

INTERSTATE COMMERCE COMMISSION, DIVISION 3.

TIME AND DATE: 10 a.m., Friday, August 5, 1977.

PLACE: Room 5124, Interstate Commerce Commission Building, 12th and Constitution Avenue NW., Washington, D.C.

STATUS: Open special conference.

MATTERS TO BE CONSIDERED:

1. No. MC–FC–76614—Remy Transportation Corp., Walpole, Mass., Transferee, and J. F. Fiore Co., Inc., South Boston, Mass., Transferor, and
2. No. MC–FC–77068—Robert J. Corduck and Jeanne L. Corduck, doing business as East Coast Movers, Woburn, Mass., Transferee, and Remy Moving & Storage Corp., Walpole, Mass., Transferor. (Discussion and possible voting.)

CONTACT PERSON FOR MORE INFORMATION:

Office of Commissioner Brown, Hildred Hersman, Confidential Assistant, Telephone 202–275–7535.

[S–1031–77 Filed 8–1–77;9:28 am]

10

NATIONAL MEDIATION BOARD.

TIME AND DATE: 2 p.m., Wednesday, August 3, 1977.

PLACE: Board Hearing Room, 8th Floor, 1425 K Street NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED:

(1) Ratification of Board actions taken by notation voting during the month of July 1977.
(2) Air conference request for amendment to section 310 of the Mediator's Manual — Representation Procedures pertaining to the distribution of employee addresses furnished by carriers for the purpose of conducting mail ballot elections.
(3) Request of United Airlines, Inc., that the Board reverse its findings upon investigation in NMB Case No. R–4550.
(4) Proposed findings upon investigation in NMB Case No. R–4582, Frontier Airlines, Inc.
(5) Request of United Airlines, Inc., that the Board dismiss the June 28, 1977, application for investigation of a representation dispute among the carrier's fleet service employees.

CONTACT PERSON FOR MORE INFORMATION:

Mr. Rowland K. Quinn, Jr., Executive Secretary; Telephone 202–523–5920.

SUPPLEMENTARY INFORMATION: Chairman Ives and Board Members Stowe and McMurray have determined by recorded vote that agency business requires a meeting on this date and that no earlier announcement of such meeting was practicable.

Date of notice: July 29, 1977.

[S–1029–77 Filed 8–1–77;9:28 am]

11

OCCUPATIONAL SAFETY AND HEALTH REVIEW COMMISSION.

TIME AND DATE: 10 a.m., August 3, 1977.

PLACE: Room 1101, 1825 K Street NW., Washington, D.C.

STATUS: This meeting is subject to being closed by a vote of the Commissioners taken at the beginning of the meeting.

MATTERS TO BE CONSIDERED: Discussion of specific cases in the Commission adjudication process.

CONTACT PERSONS FOR MORE INFORMATION:

Mrs. Nori Heuberger or Ms. Lottie Richardson (202–634–7970).

Dated: July 29, 1977.

WEDNESDAY, AUGUST 3, 1977

PART II

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

■

EXPLOSIVE MATERIALS REGULATIONS

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

[27 CFR Part 181]

[Notice No. 309]

EXPLOSIVE MATERIALS REGULATIONS

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to (1) substantially amend the regulations, particularly with respect to the record-keeping and storage requirements for explosive materials, (2) add new terms and revise existing language to conform more to current industry terminology, and (3) make numerous miscellaneous, clarifying, and editorial changes. This would enable the Bureau to adopt the standards of safety and security now recognized by the explosives industry.

DATE: Comments must be received on or before October 3, 1977.

ADDRESS: Before adopting these proposed regulations, we will consider any written data, comments, or suggestions which are submitted, in duplicate, to the Director, Bureau of Alcohol, Tobacco and Firearms, Washington, D.C. 20226, attention: Regulations and Procedures Division.

FOR FURTHER INFORMATION CONTACT:

Dorene F. Erhard, Research and Regulations Branch, 202-566-7626.

SUPPLEMENTARY INFORMATION: Written data, comments, or suggestions which are not exempt from disclosure by the Bureau of Alcohol, Tobacco and Firearms, may be inspected by any person upon compliance with 27 CFR 71.22(d)(7). The provisions of 27 CFR 71.31(b) shall apply with respect to exempting portions of data, comments, or suggestions from disclosure. Any interested person who desires an opportunity to comment orally at a public hearing should submit a written request to the Director within the 60-day period.

NEW SUBPART JJ—STORAGE

A new Subpart JJ is proposed which would include the provisions now found in Subpart J and all the changes affecting the storage of explosive materials proposed in this notice. The requirements in current Subpart J would apply with respect to storage for two years after the date these regulations are issued as a Treasury decision in the FEDERAL REGISTER. The provisions in Subpart JJ could be used optionally in lieu of those in Subpart J, but would become mandatory two years after the final regulations are issued.

Bullet-resistant construction of magazines.—A review of the explosives regulations implementing Title XI of the Organized Crime Control Act of 1970 was undertaken by the Bureau to improve and clarify Part 181, especially with respect to the storage of explosive materials. At the same time, the Institute of Makers of Explosives (IME) was planning to conduct tests on the bullet-resistance of storage magazines constructed under the provisions of our existing regulations. The rifles and ammunition available on the market today have become considerably more powerful in recent years and it had been quite some time since magazine construction was tested for resistance to bullet penetration. The IME also wished to evaluate the degree of ballistic protection offered by certain untested materials and combinations of materials.

Conclusions drawn from the IME tests resulted in the following proposed changes to the regulations:

(1) The testing determined that other materials and combinations of materials would also meet the minimum specifications for bullet-resistance. In August 1976, the Bureau issued ATF Ruling 76-18 (1976, ATF C. B., 106), which listed these bullet-resistant materials and ruled that they are suitable alternatives to the existing standards for the construction of explosives magazines in Subpart J. We are now proposing to incorporate this same list into new Subpart JJ as the minimum standards for the construction of explosives magazines.

(Subpart JJ —§ 181.207.)

(2) Regulations require that magazines for the storage of high explosives be bullet-resistant. The current provision that doors on bullet-resistant magazines be constructed of ¼-inch plate steel and lined with 2 inches of hardwood was discovered to be inadequate for bullet protection. Consequently, for reasons of safety and security, we are proposing that all doors be constructed of ¼-inch plate steel and lined with 3 inches of hardwood.

(Subpart JJ—§§ 181.207 and 181.208.)

Other changes affecting magazine construction and storage.—The proposed regulations further liberalize and clarify the provisions governing the construction of explosives magazines and the storage of explosive materials by making the following amendments:

(1) To conform more to the language in the statute, we intend to stress that the standards of construction in Part 181 are standards of "safety and security."

(Subpart JJ—§ 181.201.)

(2) The descriptions for "high explosives," "low explosives," and "blasting agents," the three classes of explosive materials regulated under this part, would be expanded and additional specific examples of "low explosives" and "blasting agents" are proposed.

(Subpart JJ—§ 181.202.)

(3) The restrictions on the classes of explosive materials to be stored in types 4 and 5 magazines are proposed to be liberalized. The regulations would be relaxed to (a) allow electric blasting caps that will not mass detonate to be stored in type 4 magazines, and (b) allow water gels (slurries), which can be proven to be neither bullet- nor cap-sensitive, to be stored in type 5 magazines.

(Subpart JJ—§ 181.203.)

(4) The provision that storage magazines be opened and inspected every 3 days would be clarified by explaining that an inspection of this kind need not be an inventory, but must be sufficient to determine whether there has been unauthorized entry or attempted entry into the magazines or unauthorized removal of their contents.

(Subpart JJ—§ 181.204.)

(5) We propose to amend the section covering the location of magazines so that it refers to the new table of distances for the storage of explosive materials in § 181.218. We also intend to further clarify the requirement that magazines in which blasting agents are stored shall be located no closer to inhabited buildings, passenger railways, and public highways than the distances set down in the table of distances for explosive materials found in § 181.218.

(Subpart JJ—§ 181.206.)

(6) Numerous amendments are proposed to provide more flexibility in the construction of types 1, 2, 3, 4, and 5 magazines, both indoor and outdoor models. In particular, the requirements with respect to floors, foundations, roofs, walls, ceilings, doors, locks, ventilation, exposed metal, and outside construction are liberalized to allow for substitute materials and methods which offer essentially the same protection.

(Subpart JJ—§§ 181.207, 181.208, 181.209, 181.210, and 181.211.)

(7) We are proposing to amend the requirements for the type 5 indoor magazine. Present regulations permit the maximum quantity of explosive materials to be stored in type 5 indoor magazines without having to meet the same safety requirements prescribed for large quantities stored in outdoor magazines. We would require that amounts greater than 50 lbs. stored in indoor magazines be subject to the minimum separation distances found in the tables of distances which govern the storage of explosive materials in outdoor magazines. This requirement would still permit the storage of large amounts of explosive materials in type 5 indoor magazines, while at the same time reduce the risk to nearby persons and property.

(Subpart JJ—§ 181.211.)

(8) The provisions regulating the manner in which explosive materials are placed in magazines would be amended to make it clear that nonsparking lattice work or other nonsparking material may be used to prevent stored explosive materials from coming in direct contact with interior walls. Also, the requirement that explosive materials be stored in such a way that grade, brand, and Class marks are easily visible upon inspection, is further clarified by explaining that the term "Class" refers to the Department of Transportation shipping classification on the container.

(Subpart JJ—§ 181.214.)

(9) A new provision is proposed to allow the use of electrical lighting when explosion-proof fixtures and wiring in rigid conduit are employed inside the magazine and all electric switches are located outside the magazine.

(Subpart JJ—§ 181.217.)

Housekeeping.—The following proposed amendments are made concerning maintenance in and around storage magazines:

(1) Present regulations prohibit trees to be located less than 25 feet from magazines. We have now found that live trees more than 10 feet tall are not a hazard and, in fact, act as a barricade. We are, therefore, proposing to make an exception allowing live trees over 10 feet tall in the 25-foot area surrounding magazines.

(Subpart JJ—§ 181.215.)

(2) Deteriorated explosives that are in a dangerous condition or leaking a liquid must be destroyed. For safety reasons, we propose to further define "deteriorated explosives" to include explosives in an unstable condition and explosives leaking any material, not only a liquid.

(Subpart JJ—§ 181.215.)

Table of distances for the storage of explosive materials.—A new table of distances for the storage of explosive materials is being proposed, in lieu of the current American Table of Distances found in § 181.218, which we adopted when the regulations in Part 181 went into effect in February 1971. The current American Table of Distances was published by the IME in June 1964, and until November 1971, was recommended for use by the IME and the National Fire Protection Association (NFPA).

In November 1971, the IME revised their table to increase the distances between explosives magazines and public highways, with a traffic volume exceeding 3,000 vehicles per day, and public railways. Distances governing certain unbarricaded magazines were more realistically calculated. Previously, the required distances for unbarricaded magazines were arrived at by merely doubling the required distances for barricaded magazines.

Since our explosives regulations were not updated during this time, the table in § 181.218 conflicts with the standard IME table of safe distances now recommended for use by many Federal, State, and local regulatory agencies, the NFPA, and the explosives industry. In an effort toward uniformity with recognized safety standards, we wish to include the newer IME recommended table in Subpart JJ.

(Subpart JJ—§ 181.218.)

RECORDKEEPING

Record retention.—Presently, licensees and permittees are required to keep records of the acquisition and disposition of explosive materials for no more than 5 years. ATF has had limited or no success tracing explosive materials older than 5 years through the distribution chain to the last known purchaser. Recent unsuccessful traces have included attempts to trace several tons of explosive materials hidden by a paramilitary organization near Los Angeles; dynamite found on the office window sill of an Illinois company whose employees were on strike; a bomb, which consisted of 95 sticks of dynamite, discovered in the basement of a South Carolina county courthouse; and an explosive device placed at the uncompleted residence of a New Mexico sheriff. This problem may become even more serious in the future, resulting in a higher number of unsuccessful ATF cases.

To insure that explosives records over 5 years old are available for ATF investigative purposes, we are proposing the following alternatives:

(1) At the time of renewal of a license or permit each year, all explosive materials records relating to transactions which occurred more than 5 years before the renewal date of the license of permit, shall be forwarded to the Bureau of Alcohol, Tobacco and Firearms, Explosives Technology Branch, Washington, D.C. 20226; or

(2) Instead of the procedure in (1), upon approval by the Director of a written request, licensees and permittees may retain the records required under Part 181 on their business premises and available for inspection by ATF officers for not less than 10 years from the date a transaction occurs.

(§ 181.121 amended.)

Acquisition and disposition records.—We are proposing to revise the format for recording the acquisition and disposition of explosive materials. A more detailed description of the explosive materials is proposed to (a) provide ATF with sufficient data to aid in the tracing of stolen materials and explosives used in bombs, and (b) insure that a licensee or permittee has the necessary information in his records to properly report thefts and losses of explosive materials from his stock.

(§§ 181.122, 181.123, 181.124, and 181.125 amended.)

Daily summaries.—Instead of requiring daily magazine transaction summaries to be kept at each magazine, we would permit these records to be kept at one central location on the licensed premises, as long as separate records of daily transactions are maintained for each magazine.

(§ 181.127 amended.)

OTHER AMENDMENTS TO THE REGULATIONS

Definitions.—Numerous definition changes and additions are proposed that further clarify magazine construction requirements, are essential to the understanding and application of the tables of distances, and make miscellaneous administrative and simplifying amendments.

(§ 181.11 amended.)

Theft or loss of explosive materials.—We propose to amend the procedure for reporting a theft or loss of explosive materials to (1) require more specific information when reporting a theft or loss to provide ATF with enough data to begin an investigation as soon as possible, and (2) require a theft or loss of explosive materials in transit to be reported by the carrier of the explosive materials to insure that all thefts or losses are reported.

(§ 181.30 amended.)

Special explosive devices.—A new section is proposed to provide that certain special explosive devices, explosive actuated tools, or similar devices which do not constitute a public safety hazard, may be exempted from requirements under this part, upon special determination by the Director.

(§ 181.32 added.)

Refund of license or permit fee.—We proposed to extend the provisions for refunding the fee submitted with an application for a license or permit to also include refunding the fee if the application is withdrawn or abandoned, or if a license is cancelled after having been issued through administrative error.

(§ 181.44 amended.)

Changes of location and changes in construction.—We are proposing to clarify and separate the regulations covering changes of address of a licensee's or permittee's business premises and changes in location and construction of explosives storage magazines.

(§ 181.54 revised and § 181.63 added.)

Licenses, permits, and applications.—We are proposing that the license or permit application returned by the regional regulatory administrator with the approved license or permit be kept available for inspection with the license or permit on the business premises. However, in lieu of requiring that a copy of the license or permit and the application be kept at each approved magazine, we would permit them to be kept at one central location on the business premises.

(§ 181.101 amended.)

Manufacturer's marks of identification.—We are proposing that the Director now determine whether any explosive materials (except blasting caps) are small enough in size to be exempt from the requirement that manufacturer's marks of identification be placed on the individual item.

(§ 181.109 amended.)

Exempted fireworks.—In the list of exemptions from the regulations in this part, we propose to specifically refer to the types of common fireworks exempted as Class C fireworks and certain other Class C explosives described under Department of Transportation regulations.

(§ 181.141 amended.)

DRAFTING INFORMATION

The principal author of this regulation is Dorene F. Erhard of the Research and Regulations Branch, Bureau of Alcohol, Tobacco and Firearms. However, personnel from other offices in the Bureau and from the Treasury Department participated in developing the regulation, both on matters of substance and style.

SPECIFIC CHANGES TO THE REGULATIONS

In consideration of the foregoing, 27 CFR 181 is proposed to be amended as follows:

1. By amending § 181.2 to read as follows:

§ 181.2 Relation to other provisions of law.

The provisions in this part are in addition to, and are not in lieu of, any other provision of law, or regulations, respecting commerce in explosive materials. For regulations applicable to commerce in firearms and ammunition, see Part 178 of this chapter. For regulations applicable to traffic in machine guns, destructive devices, and certain other firearms, see Part 179 of this chapter. For statutes applicable to the registration and licensing of persons engaged in the business of manufacturing, importing or exporting arms, ammunition, or implements of war, see section 38 of the Arms Export Control Act (22 U.S.C. 2778), and regulations in Part 47 of this chapter and in Parts 121–128 of Title 22, Code of Federal Regulations. For statutes applicable to nonmailable materials, see 18 U.S.C. 1716 and implementing regulations. For statutes applicable to water quality standards, see 33 U.S.C. 1171(b).

2. By amending § 181.11 to read as follows:

§ 181.11 Meaning of terms.

When used in this part, terms are defined as follows in this section. Words in the plural form include the singular, and vice versa, and words indicating the masculine gender include the feminine. The terms "includes" and "including" do not exclude other things not named which are in the same general class or are otherwise within the scope of the term defined.

Act.—Chapter 40 of Title 18 of the United States Code.

Ammunition.—Small arms ammunition or cartridge cases, primers, bullets, or smokeless propellants designed for use in small arms, and includes percussion caps and $\frac{1}{4}$-inch pyrotechnic safety fuses. The term does not include black powder.

Approved storage facility.—A place where explosive materials are stored, consisting of one or more approved magazines, conforming to the requirements of Subpart J or Subpart JJ of this part and covered by a license or permit issued under this part.

Army-type structure.—A structure approved by the Department of Defense for the storage of explosive materials.

Artificial barricade.—An artificial mound or revetted wall of earth of a minimum thickness of three feet.

ATF officer.—An officer of the Bureau of Alcohol, Tobacco and Firearms (ATF) authorized to perform any function relating to the administration or enforcement of this part.

Barricaded.—A magazine containing explosives which is effectively screened from another magazine, a building, a railway, or a highway, either by a natural barricade or by an artificial barricade, of such a height that a straight line from the top of any sidewall of the magazine containing explosives to the eave line of any other magazine, or building, or to a point twelve feet above the center of a railway or highway, will pass through the natural or artificial barricade.

Blasting agent.—Any material or mixture, consisting of fuel and oxidizer, that is intended for blasting and not otherwise defined as an explosive; if the finished product, as mixed for use of shipment, is not bullet-sensitive and cannot be detonated by means of a number 8 test blasting cap when unconfined. A number 8 test blasting cap is one containing 2 grams of a mixture of 80 percent mercury fulminate and 20 percent potassium chlorate, or a blasting cap of equivalent strength. An equivalent strength cap comprises 0.32±0.02 grams (5 grains) of PETN base charge pressed in an aluminum shell with bottom thickness not to exceed 0.03 of an inch to a specific gravity of not less than 1.4 g/cc., and primed with standard weights of primer depending on the manufacturer.

Bullet-resistant.—Resistant to penetration of a bullet of 150 grain M2 ball ammunition having a nominal muzzle velocity of 2700 feet per second fired from a .30 caliber rifle from a distance of 100 feet perpendicular to the wall or door.

Bullet-sensitive explosive materials.—Explosive materials that can be detonated by 150 grain M2 ball ammunition having a nominal muzzle velocity of 2700 feet per second when the bullet is fired from a .30 caliber rifle at a distance of 100 feet. (Based on test explosive materials having a temperature of 70 to 75 degrees F., placed against a backing material of $\frac{1}{2}$-inch steel plate and arranged in the same manner in which it will be stored.)

Bureau.—The Bureau of Alcohol, Tobacco and Firearms, the Department of the Treasury, Washington, D.C. 20226.

Business premises.—When used with respect to a manufacturer, importer, or dealer, the property on which explosive materials are manufactured, imported, stored, or distributed. The premises includes the property where the records of a manufacturer, importer, or dealer are kept if different than the premises where explosive materials are manufactured, imported, stored or distributed. When used with respect to a user of explosive materials, the property on which the explosive materials are received or stored. The premises includes the property where the records of the user are kept if different than the premises where explosive materials are received or stored.

Crime punishable by imprisonment for a term exceeding 1 year.—Any offense for which the maximum penalty, whether or not imposed, is capital punishment or imprisonment in excess of 1 year. The term does not include (a) any Federal or State offenses pertaining to antitrust violations, unfair trade practices, restraints of trade, or other similar offenses relating to the regulation of business practices, or (b) any State offense (other than one involving a firearm or explosive) classified by the laws of the State as a misdemeanor and punishable by a term of imprisonment of 2 years or less.

Customs officer.—Any officer of the Customs Service or any commissioned, warrant, or petty officer of the Coast Guard, or any agent or other person authorized to perform any duties of an officer of the Customs Service.

Dealer.—Any person engaged in the business of distributing explosive materials at wholesale or retail.

Detonator.—Any device containing a detonating charge that is used for initiating detonation in an explosive; the term includes electric blasting caps of instantaneous and delay types, blasting caps for use with safety fuses, and detonating-cord delay connectors.

Director.—The Director, Bureau of Alcohol, Tobacco and Firearms, the Department of the Treasury, Washington, D.C. 20226.

Distribute.—To sell, issue, give, transfer, or otherwise dispose of. The term does not include a mere change of possession from a person to his agent or employee in connection with the agency or employment.

District Director.—A District Director of Internal Revenue.

Executed under penalties of perjury.—Signed with the required declaration under the penalties of perjury as provided on or with respect to the return, form, or other document or, where no form of declaration is required, with the declaration:

I declare under the penalties of perjury that this—(insert type of document, such as, statement, application, request, certificate), including the documents submitted in support thereof, has been examined by me and, to the best of my knowledge and belief, is true, correct, and complete.

Explosive actuated device.—Any tool or special mechanized device which is actuated by explosives, but not a propellant actuated device.

Explosive materials.—Explosives, blasting agents, water gels (slurries), and detonators. Explosive materials include, but are not limited to, all items in the List of Explosive Materials provided for in § 181.23.

Explosives.—Any chemical compound, mixture, or device, the primary or common purpose of which is to function by explosion; the term includes, but is not limited to, dynamite and other high explosives, black powder, pellet powder, initiating explosives, detonators, safety fuses, squibs, detonating cord, igniter cord, and igniters.

Fugitive from justice.—Any person who has fled from the jurisdiction of any court of record to avoid prosecution for any crime or to avoid giving testimony in any criminal proceeding. The term also includes any person who has been convicted of any crime and has fled to avoid imprisonment.

Hardwood. Red Oak, White Oak, Hard Maple, Ash, Hickory, or other equally bullet-resistant hard wood, free from loose knots and voids, or similar defects, having an ambient moisture content less than 15 percent under normal conditions.

Highway.—Any public street, alley, or road.

Importer.—Any person engaged in the business of importing or bringing explosive materials into the United States for purposes of sale or distribution.

Indictment.—Includes an indictment or information in any court under which a crime punishable by imprisonment for a term exceeding 1 year may be prosecuted.

Inhabited building.—Any building regularly occupied in whole or in part as a habitation for human beings, or any church, schoolhouse, railroad station, store, or other structure where people are accustomed to assemble, except any building occupied in connection with the manufacture, transportation, storage, or use of explosive materials.

Internal revenue district.—An internal revenue district under the jurisdiction of a District Director of Internal Revenue.

Interstate or foreign commerce.—Commerce between any place in a State and any place outside of that State, or within any possession of the United States (not including the Canal Zone) or the District of Columbia, and commerce between places within the same State but through any place outside of that State.

Licensed dealer.—A dealer licensed under this part.

Licensed importer.—An importer licensed under this part.

Licensed manufacturer.—A manufacturer licensed under this part to engage in the business of manufacturing of explosive materials for purposes of sale or distribution or for his own use.

Licensed manufacturer - limited.—A manufacturer licensed under this part to engage in the business of manufacturing explosive materials for his own use and not for sale or distribution.

Licensee.—Any importer, manufacturer, or dealer licensed under this part.

Magazine.—Any building or structure, other than an explosives manufacturing building, used for storage of explosives.

Manufacturer.—Any person engaged in the business of manufacturing explosive materials for purposes of sale or distribution or for his own use.

Manufacturer-limited.—Any person engaged in the business of manufacturing explosive materials for his own use and not for sale or distribution.

Mass detonation (mass explosion).—Explosive materials mass detonate (mass explode) when a unit or any part of a larger quantity of explosive material explodes and causes all or a substantial part of the remaining material to detonate or explode.

Natural barricade.—Natural features of the ground, such as hills, or timber of sufficient density that the surrounding exposures which require protection cannot be seen from the magazine when the trees are bare of leaves.

Permittee.—Any user of explosives for lawful purpose, who has obtained a user permit under this part.

Person.—Any individual, corporation, company, association, firm, partnership, society, or joint stock company.

Plywood.—Exterior, construction grade (laminated wood) plywood.

Propellant actuated device.—Any tool or special mechanized device or gas generator system which is actuated by a smokeless propellant or which releases and directs work through a smokeless propellant charge.

Railway.—Any steam, electric, or other railroad or railway which carries passengers for hire on the particular line or branch in the vicinity of where explosives are stored or where explosives manufacturing buildings are located.

Region.—A geographical region of the Bureau of Alcohol, Tobacco and Firearms.

Regional regulatory administrator.—The principal regional official responsible for administering regulations in this part.

Service Center Director.—A director of an internal revenue service center.

Softwood.—Douglas Fir or equally bullet-resistant soft wood, free from loose knots, voids, or similar defects, having an ambient moisture content less than 15 percent under normal conditions.

State.—A State of the United States. The term includes the District of Columbia, the Commonwealth of Puerto Rico, and the possessions of the United States (not including the Canal Zone).

State of residence.—The State in which an individual regularly resides or maintains his home. Temporary stay in a State does not make the State of temporary stay the State of residence.

U.S.C.—The United States Code.

User-limited permit.—A user permit valid only for a single purchase transaction, a new permit being required for a subsequent purchase transaction.

User permit.—A permit issued to a person authorizing him (a) to acquire for his own use explosive materials from a licensee in a State other than the State in which he resides or from a foreign country, and (b) to transport explosive materials in interstate or foreign commerce.

Water gels (Slurries).—A wide variety of explosive materials used for blasting. As manufactured, they have varying degrees of sensitivity to initiation. They usually contain substantial proportions of water and ammonium nitrate, some of which are in solution in the water. Some are sensitized by an explosive material, while others contain no explosive ingredient but may be sensitized with metals such as aluminum or with other fuels.

3. By amending § 181.23 to read as follows:

§ 181.23 List of Explosive Materials.

The Director shall compile and publish in the FEDERAL REGISTER a List of Explosive Materials. This list shall be published and revised at least annually.

4. By amending § 181.26(b) to read as follows:

§ 181.26 Prohibited shipment, transportation, or receipt of explosive materials.

• • • • •

(b) No person may ship or transport any explosive material in interstate or foreign commerce or receive any explosive materials which have been shipped or transported in interstate or foreign commerce who (1) is under indictment for, or who has been convicted in any court of, a crime punishable by imprisonment for a term exceeding 1 year, (2) is a fugitive from justice, (3) is an unlawful user of or addicted to marihuana, or any depressant or stimulant drug, or narcotic drug (as these terms are defined in the Controlled Substances Act; 21 U.S.C. 802), or (4) has been adjudicated as a mental defective or has been committed to a mental institution.

5. By revising § 181.30 to read as follows:

§ 181.30 Reporting theft or loss of explosive materials.

(a) Any licensee or permittee who has knowledge of the theft or loss of any explosive materials from his stock shall, within 24 hours of discovery, report the theft or loss by telephone to the nearest ATF office and on Form 4712 in accordance with the instructions on the form. Theft or loss of any explosive materials shall also be reported to appropriate local authorities.

(b) Any other person, including a carrier of explosive materials, who has knowledge of the theft or loss of any explosive materials from his stock shall, within 24 hours of discovery, report the theft or loss by telephone and in writing to the nearest ATF office. Theft or loss shall also be reported to appropriate local authorities.

(c) Reports of theft or loss of explosive materials must include:

(1) The manufacturer or brand name.

(2) The manufacturer's marks of identification (date and shift code).

(3) Quantity (pounds of explosives, number of caps).

(4) Description (dynamite, blasting agents, detonators, etc.).

(5) Size (length and diameter).

6. By adding new § 181.32 to read as follows:

§ 181.32 Special explosive devices.

The Director may exempt certain explosive actuated devices, explosive actuated tools, or similar devices from the requirements of this part. A person who desires to obtain an exemption under

this section for any special explosive device, which as designed does not constitute a public safety or security hazard, shall submit a written request, in triplicate, to the Director. Each request shall be executed under the penalties of perjury and contain a complete and accurate description of the device, the name and address of the manufacturer or importer, the purpose of and use for which it is intended, and any photographs, diagrams, or drawings as may be necessary to enable the Director to make his determination. The Director may require that a sample of the device be submitted to him for examination and evaluation. If it is not possible to submit the device, the person requesting the exemption shall so advise the Director of this and designate the place where the device will be available for examination and evaluation.

7. By amending § 181.44 to read as follows:

§ 181.44 License or permit fee not refundable.

No refund of any part of the amount paid as a license or permit fee shall be made where the operations of the licensee or permittee are, for any reason, discontinued during the period of an issued license or permit. However, the license or permit fee submitted with an application for a license or permit shall be refunded if that application is denied, withdrawn, or abandoned, or if a license is cancelled subsequent to having been issued through administrative error.

8. By revising § 181.54 to read as follows:

§ 181.54 Change of address.

During the term of a license or permit, a licensee or permittee may move his business or operations to a new address at which he intends to regularly carry on his business or operations, without obtaining a new license or permit. However, in every case, the licensee or permittee shall—

(a) Give notification of the new location of the business or operations to the regional regulatory administrator for the region from which or within which the move is made, and the regional regulatory administrator for the region to which the move is to be made, at least 10 days before the move; and

(b) Submit his license or permit, and any copies of the license or permit, to the regional regulatory administrator for the region to which or within which the move is to be made. The regional regulatory administrator will approve the license or permit, and any copies, to show the new location and the new license or permit number (if any). The approved license or permit, and any copies, will then be returned to the licensee or permittee.

9. By adding new § 181.63 to read as follows:

§ 181.63 Changes in approved magazines.

(a) *Change in location of magazines.*—During the term of a license or permit, a licensee or permittee who intends to change the location of an approved magazine described in his license or permit application (other than a change in location of a portable approved magazine), shall submit a letter application, in triplicate, to the regional regulatory administrator who issued the license or permit. The letter application shall identify the magazine, including location, type of construction, and class of explosive materials stored within as prescribed in § 181.202; and describe the new location. Explosive materials may not be stored at the new location before receipt of a copy of the letter application stamped "Approved."

(b) *Modifications to or changes in construction of magazines.*—During the term of a license or permit, a licensee or permittee who intends to make modifications to or changes in construction of approved magazines described in his license or permit application, shall submit a letter application, in triplicate, to the regional regulatory administrator describing the proposed modifications or changes. Modifications to or changes in construction of approved magazines may not be made before receipt of a copy of the letter application stamped "Approved."

(c) *Additional magazines.*—During the term of a license or permit, a licensee or permittee who intends to construct or acquire additional magazines (including portable magazines which are owned, leased, or rented) not described in his license or permit application, shall submit a letter application, in triplicate, to the regional regulatory administrator describing the proposed additional magazines. These magazines may not be used before receipt of a copy of the letter application stamped "Approved."

(d) *Retention of approved applications.*—A licensee or permittee shall retain, as part of his records available for examination by ATF officers, any letter application approved under this section.

10. By revising § 181.101 to read as follows:

§ 181.101 Posting of license or permit.

A license or permit issued under this part or any copy of a license or permit, and the copy of the application accompanying the approved license or permit returned by the regional regulatory administrator, shall be kept available for inspection on the business premises at each place where explosive materials are manufactured, imported, or distributed, and in each magazine of an approved storage facility. However, in lieu of keeping them at each approved magazine, they may be kept at one central location on the business premises. The license or permit shall be prominently posted.

11. By amending § 181.106(c) to read as follows:

§ 181.106 Certain prohibited distributions.

* * * * *

(c) A licensed importer, licensed manufacturer, licensed manufacturer-limited, or licensed dealer may not distribute any explosive materials to any person knowing or having reason to believe that the person (1) is, except as provided under § 181.142 (d) and (e), under indictment for, or was convicted in any court of, a crime punishable by imprisonment for a term exceeding 1 year, (2) is a fugitive from justice, (3) is an unlawful user of marijuana, or any depressant or stimulant drug, or narcotic drug (as these terms are defined in the Controlled Substances Act; 21 U.S.C. 802), or (4) was adjudicated as a mental defective or was committed to a mental institution.

12. By revising § 181.109 to read as follows:

§ 181.109 Identification of explosive materials.

(a) Each licensed manufacturer of explosive materials shall legibly identify, by marking, all explosive materials he manufactures for sale or distribution. The marks required by this section shall identify the manufacturer and the location, date, and shift of manufacture. The licensed manufacturer shall place on each cartridge, bag, or other immediate container of explosive materials manufactured for sale or distribution the required mark which shall also be placed on the outside container, if any, used for their packaging.

(b) *Exceptions.*—(1) Licensed manufacturers of blasting caps are only required to place the identification marks prescribed in paragraph (a) of this section on the containers used for the packaging of blasting caps.

(2) The Director may authorize other explosive materials to be marked by placing the identification prescribed in paragraph (a) of this section only on the containers used for packaging the explosive materials after he has determined that they are too small for suitable marking on the individual item.

13. By revising § 181.121(a) to read as follows:

§ 181.121 General.

(a) The records pertaining to explosive materials required by this part shall be kept in permanent form in the manner required by this subpart and shall be retained on the business premises for not less than 5 years from the date a transaction occurs or until discontinuance of business or operations by the licensee or permittee. (See also § 181.128 for discontinuance of business or operations.) Every year at the time of renewal of a license or permit, all explosive materials records pertaining to transactions occurring more than 5 years prior to the date of renewal of the license or permit, shall be submitted to the Bureau of Alcohol, Tobacco and Firearms, Explosives Technology Branch, Washington, D.C. 20226. (For example, if the expiration date for a license or permit is September 1, 1977, at the time of the renewal, all explosive materials records for the yearly period from September 1, 1971 to August 31, 1972, shall be submitted to ATF. At the time of the September 1, 1978 expiration date, records for the yearly period from September 1, 1972 to August 31, 1973, shall be submitted to

ATF. And so on.) In lieu of submitting the records to the Bureau, licensees or permittees shall, upon approval by the Director of a written request, keep the records required by this part on their business premises and available for inspection by ATF officers for not less than 10 years from the date a transaction occurs.

* * * * *

14. By amending § 181.122 to revise paragraphs (b) and (c) to read as follows:

§ 181.122 Records maintained by importers.

* * * * *

(b) Each licensed importer shall, not later than the close of the next business day following the date of importation or other acquisition of explosive materials, enter the following information in a separate record:

(1) Date of importation or other acquisition.

(2) Name or brand name of manufacturer and country of manufacture.

(3) Manufacturer's marks of identification.

(4) Quantity (pounds of explosives, number of caps).

(5) Description (dynamite, blasting agents, detonators, etc.) and size (length and diameter).

(c) Each licensed importer shall, not later than the close of the next business day following the date of distribution of any explosive materials to another licensee or a permittee, enter in a separate record the information required in § 181.103 (b), (c), and (d) and the following information:

(1) Date of transaction.

(2) Name or brand name of manufacturer and country of manufacture.

(3) Manufacturer's marks of identification.

(4) Quantity (pounds of explosives, number of caps).

(5) Description (dynamite, blasting agents, detonators, etc.) and size (length and diameter).

(6) License or permit number of licensee or permittee to whom the explosive materials are distributed.

* * * * *

15. By amending § 181.123 to revise paragraphs (b) and (c) to read as follows:

§ 181.123 Records maintained by licensed manufacturers.

* * * * *

(b) Each licensed manufacturer shall, not later than the close of the next business day following the date of manufacture or other acquisition of explosive materials, enter the following information in a separate record:

(1) Date of manufacture or other acquisition.

(2) Name or brand name of product.

(3) Manufacturer's marks of identification.

(4) Quantity (pounds of explosives, number of caps).

(5) Description (dynamite, blasting agents, detonators, etc.) and size (length and diameter).

(c) (1) Each licensed manufacturer shall, not later than the close of the next business day following the date of distribution of any explosive materials to another licensee or a permittee, enter in a separate record the information required in § 181.103 (b), (c), and (d) and the following information:

(i) Date of transaction.

(ii) Name or brand name of manufacturer or name of importer, as applicable, if acquired other than by his own manufacture.

(iii) Manufacturer's marks of identification.

(iv) Quantity (pounds of explosives, number of caps).

(v) Description (dynamite blasting agents, detonators, etc.) and size (length and diameter).

(vi) License or permit number of licensee or permittee to whom the explosive materials are distributed.

(2) Each licensed manufacturer who manufactures explosive materials for his own use shall, not later than the close of the next business day following the date of use, enter in a separate record the following information:

(i) Date of use.

(ii) Quantity (pounds of explosives, number of caps).

(iii) Description (dynamite, blasting agents, detonators, etc.) and size (length and diameter).

* * * * *

16. By revising § 181.124 (b), (c), and (d) to read as follows:

§ 181.124 Records maintained by dealers.

* * * * *

(b) Each licensed dealer shall, not later than the close of the next business day following the date of purchase or other acquisition of explosive materials (except as provided in paragraph (d) of this section), enter the following information in a separate record:

(1) Date of receipt.

(2) Name or brand name of manufacturer and name of importer (if any).

(3) Manufacturer's marks of identification.

(4) Quantity (pounds of explosives, number of caps).

(5) Description (dynamite, blasting agents, detonators, etc.) and size (length and diameter).

(6) Name, address, and license or permit number of the person from whom the explosive materials are received.

(c) Each licensed dealer shall, not later than the close of the next business day following the date of distribution of any explosive materials to another licensee or a permittee (except as provided in paragraph (d) of this section), enter in a separate record the information required in § 181.103 (b), (c), and (d) and the following information:

(1) Date of transaction.

(2) Name or brand name of manufacturer and name of importer (if any).

(3) Manufacturer's marks of identification.

(4) Quantity (pounds of explosives, number of caps).

(5) Description (dynamite, blasting agents, detonators, etc.) and size (length and diameter).

(6) License or permit number of licensee or permittee to whom the explosive materials are distributed.

(d) When a commercial record is kept by a licensed dealer showing the purchase or other acquisition information required for the permanent record prescribed by paragraph (b) of this section, or showing the distribution information required for the permanent record prescribed by paragraph (c) of this section, the licensed dealer acquiring or distributing the explosive materials may, for a period not exceeding 7 days following the date of acquisition or distribution of the explosive materials, delay making the required entry into the permanent record of acquisition or distribution. However, until the required entry of acquisition or disposition is made in the permanent record, the commercial record must be (1) kept by the licensed dealer separate from other commercial documents kept by the licensee, and (2) readily available for inspection on the licensed premises.

* * * * *

17. By amending § 181.125(c) to read as follows:

§ 181.125 Records maintained by licensed manufacturers-limited and permittees.

* * * * *

(c) (1) Each permittee shall, not later than the close of the next business day following the date of acquisition of explosive materials, enter the following information in a separate record:

(i) Date of acquisition.

(ii) Name or brand name of manufacturer.

(iii) Manufacturer's marks of identification.

(iv) Quantity (pounds of explosives, number of caps).

(v) Description (dynamite, blasting agents, detonators, etc.) and size (length and diameter).

(vi) Name, address, and license number of the person from whom the explosive materials are received.

(2) Each permittee shall, not later than the close of the next business day following the date of disposition of surplus explosive materials to another permittee or a licensee, enter in a separate record the information prescribed in § 181.124(c). * * *

* * * * *

18. By amending § 181.127 to read as follows:

§ 181.127 Daily summary of magazine transactions.

In taking the inventory required by §§ 181.122, 181.123, 181.124, and 181.125, the licensee or permittee shall enter the inventory in a record of daily transactions to be maintained at each magazine of an approved storage facility; however,

these records may be kept at one central location on the licensed or permit premises if separate records of daily transactions are maintained for each magazine. At the close of business of each day each licensee and permittee shall record by manufacturer's name or brand name, the total quantity received in and removed from each magazine during the day and the total remaining on hand at the end of the day. Any discrepancy which might indicate a theft or loss of explosive materials shall be reported in accordance with the provisions of § 181.30.

19. By amending § 181.129 to read as follows:

§ 181.129 Exportation.

Explosive materials shall be exported in accordance with the applicable provisions of section 38 of the Arms Export Control Act (22 U.S.C. 2778) and implementing regulations. However, licensed manufacturers, licensed importers, and licensed dealers exporting explosive materials shall maintain records showing the manufacture or acquisition of explosive materials as required by this part and records showing the quantity, the manufacturer's name or brand name of explosive materials, the name and address of the foreign consignee of the explosive materials, and the date the explosive materials were exported.

20. By revising § 181.141(a)(7) to read as follows:

§ 181.141 Exemptions.

(a) * * *

(7) The importation and distribution of Class C fireworks, generally know as "Common Fireworks" as decribed by U.S. Department of Transportation regulations in 49 CFR 173.100(r), and those Class C explosives described in 49 CFR 173.100 (p), (t), (u), and (x).

* * * * *

21. By adding an explanatory note following the heading for Subpart J to read as follows:

Subpart J—Storage

NOTE.—The provisions in this subpart shall apply until August 3, 1979. The provisions in Subpart JJ may be used in lieu of the provisions in this subpart, but shall be mandatory after August 3, 1979.

22. By adding new Subpart JJ, immediately following Subpart J, to read as follows:

Subpart JJ—Storage

Sec.

181.201 General.
181.202 Classes of explosive materials.
181.203 Types of magazines.
181.204 Inspection of magazines.
181.205 Movement of explosive materials.
181.206 Location of magazines.
181.207 Construction of type 1 magazines.
181.208 Construction of type 2 magazines.
181.209 Construction of type 3 magazines.
181.210 Construction of type 4 magazines.
181.211 Construction of type 5 magazines.
181.212 Smoking and open flames.
181.213 Quantity and storage restrictions.
181.214 Storage within types 1,2,3, and 4 magazines.
181.215 Housekeeping.
181.216 Repair of magazines.
181.217 Lighting.
181.218 Table of distances for storage of explosive materials.
181.219 Table of distances for storage of low explosives.
181.220 Table of recommended separation distances of ammonium nitrate and blasting agents from explosives or other blasting agents.

§ 181.201 General.

(a) No person shall store any explosive materials in a manner not in conformity with this subpart (see § 181.29). Section 842(j) of the Act requires that the storage of explosive materials by any person must be in a manner conforming with the regulations contained in this subpart. The storage standards prescribed by this subpart confer no rights or privileges to store explosive materials in a manner contrary to State or other law.

(b) The Director may authorize alternate construction for explosives storage magazines when it is shown that the alternate magazine construction is substantially equivalent to the standards of safety and security contained in this subpart. Any person intending to use alternate magazine construction shall submit a letter application, in triplicate, to the regional regulatory administrator for transmittal to the Director, specifically describing the proposed magazine. Explosive materials may not be stored in alternate magazines before receipt of a copy of the letter application stamped "Approved."

(c) A licensee or permittee who intends to make modifications to or changes in his approved magazines, or who intends to construct or acquire additional magazines, shall comply with § 181.63.

§ 181.202 Classes of explosive materials.

For purposes of this part, there are three classes of explosive materials. These classes, together with the description of explosive materials comprising each class, are as follows:

High explosives.—Explosive materials which are bullet-sensitive or which can be caused to detonate by means of a blasting cap when unconfined. (For example, dynamite.)

Low explosives.—Explosive materials which are not bullet-sensitive, but which can be caused to deflagrate when confined. (For example, black powder; safety fuses; igniters; igniter cords; fuse lighters; and "special fireworks", defined as Class B explosives by U.S. Department of Transportation regulations in 49 CFR 173.88(d).)

Blasting agents.—(For example, ammonium nitrate-fuel oil and certain water-gels.)

§ 181.203 Types of magazines.

For purposes of this part, there are five types of magazines. These types, together with the classes of explosive materials, as defined in § 181.202, which shall be stored in them, are as follows:

(a) *Type 1 Magazines.*—Permanent magazines for the storage of high explosives, subject to the limitations prescribed by §§ 181.206 and 181.213. Other classes may also be stored in type 1 magazines.

(b) *Type 2 magazines.*—Mobile indoor and outdoor magazines for the storage of high explosives, subject to the limitations prescribed by §§ 181.206, 181.208(b), and 181.213. Other classes may also be stored in type 2 magazines.

(c) *Type 3 magazines.*—Portable outdoor magazines for the temporary storage of high explosives while attended (for example, a "day-box"), subject to the limitations prescribed by §§ 181.206 and 181.213. Other classes may also be stored in type 3 magazines.

(d) *Type 4 magazines.*—Magazines for the storage of low explosives, subject to the limitations prescribed by §§ 181.206(b), 181.210(b), and 181.213. Blasting agents or electric blasting caps that will not mass detonate may also be stored in type 4 magazines, subject to the limitations prescribed by §§ 181.206(c) (1) and (2).

(e) *Type 5 magazines.*—Magazines for the storage of blasting agents and watergels (slurries), which can be demonstrated to be neither bullet- nor cap-sensitive, subject to the limitations prescribed by §§ 181.206 (a) and (c), 181.211(b), and 181.213.

§ 181.204 Inspection of magazines.

Any person storing explosive materials shall open and inspect his magazines at least every 3 days. This inspection need not be an inventory, but must be sufficient to determine whether there has been unauthorized entry or attempted entry into the magazines or unauthorized removal of their contents.

§ 181.205 Movement of explosive materials.

All explosive materials must be kept in locked magazines meeting the standards prescribed by this subpart unless they are:

(a) In the process of manufacture;

(b) Being physically handled in the operating process of a licensee or user;

(c) Being used; or

(d) Being transported to a place of storage or use by a permittee or by a person who has lawfully acquired explosive materials under § 181.126

§ 181.206 Location of magazines.

(a) Outdoor magazines in which high explosives are stored shall be located no closer to inhabited buildings, passenger railways, public highways, or other magazines in which high explosives are stored, than the minimum distances specified in the table of distances for storage of explosives in § 181.218.

(b) Outdoor magazines in which low explosives are stored shall be located no closer to inhabited buildings, passenger railways, public highways, or other magazines in which explosive materials are stored, than the minimum distances specified in the table of distances for storage of low explosives in § 181.219. The distances shown in § 181.219 shall not be reduced by the presence of barricades.

(c) (1) Outdoor magazines in which blasting agents are stored and indoor magazines in which blasting agents in quantities of more than 50 pounds are stored shall be located no closer to inhabited buildings, passenger railways, or public highways than the minimum distances specified in the table of distances for storage of explosives in § 181.218.

(2) Ammonium nitrate and magazines in which blasting agents are stored shall be located no closer to magazines in which high explosives or other blasting agents are stored than the minimum distances specified in the table of distances for the separation of ammonium nitrate and blasting agents in § 181.220. However, the minimum distances for magazines in which explosives and blasting agents are stored from inhabited buildings, etc., may not be less than the distances specified in the table of distances for storage of explosives in § 181.218.

§ 181.207 Construction of type 1 magazines.

A type 1 magazine shall be a permanent structure: a building, an igloo or Army-type structure, a tunnel, or a dugout. It shall be bullet-resistant, fire-resistant, weather-resistant, theft-resistant, and ventilated.

(a) *Buildings.*—All building type magazines shall be constructed of masonry, wood, metal, or a combination of these materials as specified in this section, and shall have no openings except for entrances and ventilation. Ground around building magazines shall slope away for drainage.

(1) *Wall construction.*—Magazine walls shall be constructed according to any of the following minimum specifications (All steel and wool dimensions are actual thicknesses. All concrete block and brick dimensions are nominal thicknesses.):

(i) Exterior of 5/8-inch steel.

(ii) Exterior of 1/2-inch steel, lined with an interior of not less than 3/8-inch plywood.

(iii) Exterior of 3/8-inch steel, lined with an interior of two inches of hardwood.

(iv) Exterior of 3/8-inch steel, lined with an interior of three inches of softwood or 2¼ inches of plywood.

(v) Exterior of ¼-inch steel, lined with an interior of three inches of hardwood.

(vi) Exterior of ¼-inch steel, lined with an interior of five inches of softwood or 5¼ inches of plywood.

(vii) Exterior of ¼-inch steel, lined with an intermediate layer of two inches of hardwood, and an interior lining of 1½ inches of plywood.

(viii) Exterior of 3/16-inch steel, lined with an interior of four inches of hardwood.

(ix) Exterior of 1/4-inch steel, lined with an interior of seven inches of softwood or 6¾ inches of plywood.

(x) Exterior of 1/4-inch steel, lined with an intermediate layer of three inches of hardwood, and an interior lining of ¾-inch plywood.

(xi) Exterior of ⅛-inch steel, lined with an interior of five inches of hardwood.

(xii) Exterior of ⅛-inch steel, lined with interior of nine inches of softwood.

(xiii) Exterior of ⅛-inch steel, lined with an intermediate layer of four inches of hardwood, and an interior lining of ¾-inch plywood.

(xiv) Exterior of any type fire-resistant material which is structurally sound (for example, ¾-inch plywood covered with 26-guage metal), lined with an intermediate layer of four inches solid concrete block or four inches solid brick or four inches of solid concrete, and an interior lining of ½-inch plywood placed securely against the masonry lining.

(xv) Standard eight-inch concrete block with voids filled with well-tamped sand/concrete mixture.

(xvi) Standard eight-inch solid brick.

(xvii) Exterior of any type fire-resistant material which is structurally sound (for example, ¾-inch plywood covered with 26-gauge metal), lined with a six-inch space filled with well-tamped, dry sand or well-tamped, sand/cement mixture.

(xviii) Exterior of ⅛-inch steel, lined with a first intermediate layer of ¾-inch plywood, a second intermediate layer of 3 5/8 inches well-tamped, dry sand or sand cement mixture, and an interior lining of ¾-inch plywood.

(xix) Exterior of any type fire-resistant material, lined with a first intermediate layer of ¾-inch plywood, a second intermediate layer of 3 5/8 inches well-tamped, dry and or sand/cement mixture, a third intermediate layer of ¾-inch plywood, a fourth intermediate layer of two inches of hardwood or 14-gauge steel, and an interior lining of ¾-inch plywood.

(xx) Eight-inch solid concrete.

(2) *Interior walls.*—Interior walls shall be constructed of, or covered with, a nonsparking material.

(3) *Floors.*—Floors shall be constructed of, or covered with, any suitable nonsparking material and shall be strong enough to bear the weight of the maximum quantity to be stored.

(4) *Foundations.*—Foundations shall be constructed of brick, concrete, cement block, stone, or metal or wood posts. If piers or posts are used, in lieu of a continuous foundation, the spaces under the buildings shall be enclosed with fire-resistant material.

(5) *Roofs and ceilings*—Outer roofs shall be constructed of fabricated metal, tile, asbestos, concrete, or other fire-retardant material. Where it is possible for a bullet to be fired directly through the roof and into the magazine at such an angle that the bullet would strike the explosives stored within, the magazine shall be protected by one of the following methods:

(i) A sand tray lined with a layer of building paper, plastic, or other nonporous material, and filled with not less than four inches of coarse, dry sand shall be located at the tops of inner walls covering the entire ceiling area, except that portion necessary for ventilation.

(ii) A fabricated metal roof shall be constructed of 5/16-inch plate steel lined with four inches of hardwood. (For each additional 1/16-inch of plate steel, the hardwood lining may be decreased one inch.)

(6) *Doors.* Doors shall be constructed of ¼-inch plate steel and lined with three inches of hardwood.

(7) *Hinges and hasps.*—Hinges and hasps shall be attached to the doors by welding, riveting, or bolting (nuts on inside of door). The hinges and hasps shall be installed in such a manner that they cannot be removed when the doors are closed and locked.

(8) *Locks.*—Each door shall be equipped with (i) two mortise locks; (ii) two padlocks fastened in separate hasps and staples; (iii) a combination of a mortise lock and a padlock; (iv) a mortise lock that requires two keys to open; or (v) a three-point lock.

Padlocks shall have at least five tumblers and a case-hardened shackle of at least 3/8-inch diameter.

Padlocks shall be protected with ¼-inch steel hoods constructed so as to prevent sawing or lever action on the locks or hasps. These requirements shall not apply to magazine doors that are adequately secured on the inside by means of a bolt, lock, or bar which cannot be actuated from the outside.

(9) *Ventilation.*—Magazines shall be ventilated to prevent dampness or heating of stored explosive materials. Except at doorways, a two-inch air space shall be left around ceilings and the perimeter of floors. Vents in the foundation, roof, or gables shall be offset and screened to prevent the entrance of sparks.

(10) *Exposed metal.*—No sparking material shall be exposed to contact with stored explosive materials. All ferrous metal nails in the floor and side walls which might be exposed to contact with explosive materials shall be blind nailed, or countersunk, or the floor and side walls covered with a nonsparking lattice work or other nonsparking material.

(b) *Igloos, Army-type structures, tunnels, and dugouts.*—Igloo, Army-type, tunnel, and dugout magazines shall be constructed of reinforced concrete, masonry, metal, or a combination of these materials. They shall have an earth-mound covering of not less than 24 inches on the top, sides, and rear. Magazines of this type shall also be constructed in conformity with paragraphs (a) (2), (3), (6), (7), (8), (9), and (10) of this section.

§ 181.208 Construction of type 2 magazines.

A type 2 magazine shall be a box, trailer, semi-trailer, or other mobile facility.

(a) *Outdoor magazines.* (1) *General.*—Outdoor magazines shall be bullet-resistant, fire-resistant, weather-resistant, theft-resistant, and ventilated. They shall be supported in such a manner so as to prevent direct contact with the ground and, if less than one cubic yard in size, shall be securely fastened to a fixed object. The ground around outdoor magazines shall slope away for drainage. When unattended, vehicular magazines shall have wheels removed or shall otherwise be effectively immobilized by kingpin locking devices or other methods approved by the Director.

(2) *Exterior construction.*—The exterior and covers or doors shall be constructed of ¼-inch steel and shall be lined with three inches of hardwood. Magazines with top openings shall have lids with water-resistant seals or which overlap the sides by at least one inch when in a closed position.

(3) *Hinges and hasps.*—Hinges and hasps shall be attached to the covers or doors by welding, riveting, or bolting (nuts on inside of door). Hinges and hasps shall be installed in such a manner that they cannot be removed when the doors are closed and locked.

(4) *Locks.*—Each door shall be equipped with (i) two mortise locks; (ii) two padlocks fastened in separate hasps and staples; (iii) a combination of a mortise lock and a padlock; (iv) a mortise lock that requires two keys to open; or (v) a three-point lock.

Padlocks shall have at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter. Padlocks shall be protected with ¼-inch steel hoods constructed so as to prevent sawing or level action on the locks or hasps. Trailers, semitrailers, and similar vehicular magazines may, for each door or opening, be locked with one steel padlock (which need not be protected by a steel hood) having at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter, if the lock hinges and hasps are securely fastened to the magazine and to the door frame. These requirements do not apply to magazine doors that are adequately secured on the inside by means of a bolt, lock, or bar which cannot be actuated from the outside.

(b) *Indoor magazines.* (1) *General.*—Indoor magazines shall be fire-resistant and theft-resistant. They need not be bullet-resistant and weather-resistant if the buildings in which they are stored provide protection from the weather and from bullet penetration. No indoor magazine shall contain a quantity of high explosives in excess of 50 pounds or more than 5,000 blasting caps.

(2) *Location.*—No indoor magazine shall be located in a residence or dwelling. An indoor magazine shall be provided with substantial wheels or casters to facilitate removal from its location. No more than one indoor magazine shall be kept in any one building, except that two magazines may be kept in the same building when one is used for the storage of blasting caps, squibs, or similar items and the other magazine is used for the storage of other high explosives. Two indoor magazines within the same building shall be separated by a distance of not less than 10 feet. Each indoor magazine shall be located on the floor nearest the ground level and within 10 feet of an outside exit.

(3) *Exterior construction.*—Indoor magazines shall be constructed of wood or metal according to one of the following specifications:

(i) Wood indoor magazines shall have sides, bottoms, and covers or doors constructed of two inches of hardwood and shall be well braced at corners. They shall be covered with sheet metal of not less than number 20-gauge. Nails exposed to the interior of magazines shall be countersunk.

(ii) Metal indoor magazines shall have sides, bottoms, and covers or doors constructed of number 12-gauge metal and shall be lined inside with a nonsparking material. Edges of metal covers shall overlap sides at least one inch.

(4) *Hinges and hasps.*—Hinges and hasps shall be attached to the covers or doors by welding, riveting, or bolting (nuts on inside of door). Hinges and hasps shall be installed in such a manner that they cannot be removed when the doors are closed and locked.

(5) *Locks.*—Each door shall be equipped with (i) two mortise locks; (ii) two padlocks fastened in separate hasps and staples; (iii) a combination of a mortise lock and a padlock; (iv) a mortise lock that requires two keys to open; or (v) a three-point lock.

Padlocks shall have at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter.

Padlocks shall be protected with ¼-inch steel hoods constructed so as to prevent sawing or lever action on the locks or hasps. Indoor magazines located in rooms which are locked as provided in this paragraph may, for each door or opening, be locked with one steel padlock (which need not be protected by a steel hood) having at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter, if the lock hinges and hasps are securely fastened to the magazine and to the door frame. These requirements do not apply to magazine doors that are adequately secured on the inside by means of a bolt, lock, or bar which cannot be actuated from the outside.

(c) *Cap boxes.*—Magazines for blasting caps in quantities of 100 or less shall have sides, bottoms, and covers or doors constructed of number 12-gauge metal and lined with a nonsparking material. Hinges and hasps shall be attached by welding. A single lock having at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter shall be sufficient for locking purposes.

§ 181.209 Construction of type 3 magazines.

A type 3 magazine shall be a "day-box" or other portable magazine. It shall be bullet-resistant, fire-resistant, and theft-resistant. A type 3 magazine shall be constructed in the same manner prescribed for type 2 outdoor magazines in § 181.208 (a), except that it need not be securely fastened to a fixed object. Hinges, hasps, locks, and lock protection shall be in conformity with the requirements of § 181.207(a) (7) and (8). The ground around magazines shall slope away for drainage. Explosive materials shall not be left unattended in type 3 magazines, but must be removed to types 1 or 2 magazines for unattended storage.

§ 181.210 Construction of type 4 magazines.

A type 4 magazine shall be a building, igloo or Army-type structure, tunnel, dug-out, box, trailer, or a semitrailer or other mobile magazine.

(a) *Outdoor magazines.* (1) *General.*—Outdoor magazines shall be fire-resistant, weather-resistant, and theft-resistant. The ground around outdoor magazines shall slope away for drainage. When unattended, vehicular magazines shall have wheels removed or shall otherwise be effectively immobilized by kingpin locking devices or other methods approved by the Director.

(2) *Construction.*—Outdoor magazines shall be constructed of masonry, metal-covered wood, fabricated metal, or a combination of these materials. Foundations shall be constructed of brick, concrete, cement block, stone, or metal or wood posts. If piers or posts are used, in lieu of a continuous foundation, the spaces under the buildings shall be enclosed with fire-resistant material. The walls and floors shall be constructed of, or covered with, a nonsparking material or lattice work. The doors or covers shall be metal of solid wood covered with metal.

(3) *Hinges and hasps.*—Hinges and hasps shall be attached to the covers or doors by welding, riveting, or bolting (nuts on inside of door). Hinges and hasps shall be installed in such a manner that they cannot be removed when the doors are closed and locked.

(4) *Locks.* Each door shall be equipped with (i) two mortise locks; (ii) two padlocks fastened in separate hasps and staples; (iii) a combination of a mortise lock and a padlock; (iv) a mortise lock that requires two keys to open; or (v) a three-point lock.

Padlocks shall have at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter.

Padlocks shall be protected with ¼-inch steel hoods constructed so as to prevent sawing or lever action on the locks or hasps. Trailers, semitrailers, and similar vehicular magazines may, for each door or opening, be locked with one steel padlock (which need not be protected by a steel hood) having at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter, if the lock hinges and hasps are securely fastened to the magazine and to the door frame. These requirements do not apply to magazine doors that are adequately secured on the inside by means of a bolt, lock, or bar which cannot be actuated from the outside.

(b) *Indoor magazines.* (1) *General.*—Indoor magazines shall be fire-resistant and theft-resistant. They need not be

weather-resistant if the buildings in which they are stored provide protection from the weather. No indoor magazine shall contain a quantity of low explosives in excess of 50 pounds.

(2) *Location.*—No indoor magazine shall be located in a residence or dwelling. An indoor magazine shall be provided with substantial wheels or casters to facilitate removal from its location. No more than one indoor magazine shall be kept in any one building, except that two magazines may be kept in the same building when one is used for the storage of blasting caps, squibs, or similar items and the other magazine is used for the storage of low explosives. Two indoor magazines within the same building shall be separated by a distance of not less than 10 feet. Each indoor magazine shall be located on the floor nearest the ground level and within 10 feet of an outside exit.

(3) *Construction.*—Indoor magazines shall be constructed of masonry, metal-covered wood, fabricated metal, or a combination of these materials. The walls and floors shall be constructed of, or covered with, a nonsparking material. The doors or covers shall be metal or solid wood covered with metal.

(4) *Hinges and hasps.*—Hinges and hasps shall be attached to the covers or doors by welding, riveting, or bolting (nuts on inside of doors). Hinges and hasps shall be installed in such a manner that they cannot be removed when the doors are closed and locked.

(5) *Locks.*—Each door shall be equipped with (i) two mortise locks; (ii) two padlocks fastened in separate hasps and staples; (iii) a combination of a mortise lock and a padlock; (iv) a mortise lock that requires two keys to open; or (v) a three-point lock.

Padlocks shall have at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter.

Padlocks shall be protected with ¼-inch steel hoods constructed so as to prevent sawing or lever action on the locks or hasps. Indoor magazines located in rooms which are locked as provided in this paragraph, may, for each door or opening, be locked with one steel padlock (which need not be protected by a steel hood) having at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter, if the lock hinges and hasps are securely fastened to the magazine and to the door frame. These requirements do not apply to magazine doors that are adequately secured on the inside by means of a bolt, lock, or bar which cannot be actuated from the outside.

(c) *Cap boxes.*—Magazines for blasting caps in quantities of 100 or less shall have sides, bottoms, and covers or doors constructed of number 12-gauge metal and lined with a nonsparking material. Hinges and hasps shall be attached by welding. A single lock having at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter shall be sufficient for locking purposes.

§ 181.211 Construction of type 5 magazines.

A type 5 magazine shall be a building, igloo or Army-type structure, tunnel, dugout, bin, box, trailer, or a semitrailer or other mobile facility.

(a) *Outdoor magazines.* (1) *General.*—Outdoor magazines shall be weather-resistant and theft-resistant. The ground around magazines shall slope away for drainage. When unattended, vehicular magazines shall have wheels removed or shall otherwise be effectively immobilized by kingpin locking devices or other methods approved by the Director.

(2) *Construction.*—The doors or covers shall be constructed of solid wood or metal.

(3) *Hinges and hasps.*—Hinges and hasps shall be attached to the covers or doors by welding, riveting, or bolting (nuts on inside of door). Hinges and hasps shall be installed in such a manner that they cannot be removed when the doors are closed and locked.

(4) *Locks.*—Each door shall be equipped with (i) two mortise locks; (ii) two padlocks fastened in separate hasps and staples; (iii) a combination of a mortise lock and a padlock; (iv) a mortise lock that requires two keys to open; or (v) a three-point lock.

Padlocks shall have at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter.

Padlocks shall be protected with ¼-inch steel hoods constructed so as to prevent sawing or lever action on the locks or hasps. Trailers, semitrailers, and similar vehicular magazines may, for each door or opening, be locked with one steel padlock (which need not be protected by a steel hood) having at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter, if the lock hinges and hasps are securely fastened to the magazine and to the door frame. These requirements do not apply to magazine doors that are adequately secured on the inside by means of a bolt, lock, or bar which cannot be actuated from the outside.

(b) *Indoor magazines.* (1) *General.*—Indoor magazines shall be theft-resistant. They need not be weather-resistant if the buildings in which they are stored provide protection from the weather. No indoor magazine shall be located in a residence or dwelling. Indoor magazines containing quantities of blasting agents in excess of 50 pounds shall be subject to the tables of distances in §§ 181.218 and 181.220 of this subpart.

(2) *Construction.*—The doors or covers shall be constructed of wood or metal.

(3) *Hinges and hasps.*—Hinges and hasps shall be attached to the covers or doors by welding, riveting, or bolting (nuts on inside of door). Hinges and hasps shall be installed in such a manner that they cannot be removed when the doors are closed and locked.

(4) *Locks.*—Each door shall be equipped with (i) two mortise locks; (ii) two padlocks fastened in separate hasps and staples; (iii) a combination of a mortise lock and a padlock; (iv) a mortise lock that requires two keys to open; or (v) a three-point lock.

Padlocks shall have at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter.

Padlocks shall be protected with ¼-inch steel hoods constructed so as to prevent sawing or lever action on the locks or hasps. Indoor magazines located in rooms which are locked as provided in this paragraph, may, for each door or opening, be locked with one steel padlock (which need not be protected by a steel hood) having at least five tumblers and a case-hardened shackle of at least ⅜-inch diameter, if the lock hinges and hasps are securely fastened to the magazine and to the door frame. These requirements do not apply to magazine doors that are adequately secured on the inside by means of a bolt, lock, or bar which cannot be actuated from the outside.

§ 181.212 Smoking and open flames.

Smoking, matches, open flames, and similar spark producing devices shall not be permitted—

(a) In any magazine;

(b) Within 50 feet of any outdoor magazine; or

(c) Within a 50-foot line of sight of any indoor magazine.

§ 181.213 Quantity and storage restrictions.

Explosive materials in excess of 300,000 pounds or blasting caps in excess of 20 million shall not be stored in one magazine. Blasting caps shall not be stored with other explosive materials in the same magazine, unless it can be established to the satisfaction of the Director that sufficient security exists and that the storage does not constitute an unsafe practice.

§ 181.214 Storage within types 1, 2, 3, and 4 magazines.

(a) Explosive materials within a magazine shall not be placed directly against interior walls and shall be stored so as not to interfere with ventilation. To prevent contact of stored explosive materials with walls, a nonsparking lattice work or other nonsparking material may be used.

(b) Containers of explosive materials shall be stored by being laid flat with top sides up. Corresponding Classes (as defined in Department of Transportation (DOT) regulations (49 CFR, Part 173)), grades, and brands shall be stored together within a magazine in such a manner that grade, brand, and DOT Class marks are easily visible upon inspection. Stocks of explosive materials shall be stored so as to be easily counted and checked.

(c) Except with respect to fiberboard or other nonmetal containers, containers of explosive materials shall not be unpacked or repacked inside a magazine or within 50 feet of a magazine, and shall not be unpacked or repacked near other explosive materials. Containers of explosive materials shall be securely closed while being stored.

(d) Tools used for opening or closing containers of explosive materials shall be of nonsparking materials, except that metal slitters may be used for opening fiberboard containers. A wood wedge and a fiber, rubber, or wooden mallet shall be used for opening or closing wood containers of explosive materials. Metal tools other than nonsparking transfer conveyors shall not be stored in any magazine containing high explosives.

§ 181.215 Housekeeping.

Magazines shall be kept clean, dry, and free of grit, paper, empty packages and containers, and rubbish. Floors shall be regularly swept. Brooms and other

utensils used in the cleaning and maintenance of magazines shall have no spark-producing metal parts, and may be kept in magazines. Floors stained by leakage from explosive materials shall be cleaned according to instructions of the explosives manufacturer. When any explosive material has deteriorated to the extent that it is in a dangerous condition, or if a liquid or other material is leaking from any explosive material, it shall be destroyed in accordance with the instructions of its manufacturer. The area surrounding magazines shall be kept clear of rubbish, brush, dry grass, or trees (except live trees more than 10 feet tall), for not less than 25 feet in all directions. Any other combustible materials shall be kept a distance of not less than 50 feet from outdoor magazines.

§ 181.216 Repair of magazines.

Before repairing the interior of magazines, all explosive materials shall be removed and the interior shall be cleaned. Before repairing the exterior of magazines, all explosive materials shall be removed if there exists any possibility that repairs may produce sparks or flame. Explosive materials removed from magazines under repair shall be (a) placed in other magazines appropriate for the storage of those explosive materials under this subpart, or (b) placed a safe distance from the magazines under repair where they shall be properly guarded and protected until the repairs have been completed.

§ 181.217 Lighting.

No lighting shall be placed or used in a type 1, 2, 3, or 4 magazines except battery-activated safety lights or battery-activated safety lanterns. However, electrical illumination may be used when explosion-proof fixtures and wiring in rigid conduit are used inside and all electric switches are loacted outside the magazine.

§ 181.218 Table of distances for storage of explosive materials.

Quantity of explosives		Distance (in feet)							
		Inhabited buildings		Public highways with traffic volume of less than 3,000 vehicles/day		Passenger railways—Public highways with traffic volume of more than 3,000 vehicles/day		Separation of magazines	
Pounds over	Pounds not over	Barricaded	Unbarricaded	Barricaded	Unbarricaded	Barricaded	Unbarricaded	Barricaded	Unbarricaded

NOTE.—(1) When two or more storage magazines are located on the same property, each magazine must comply with the minimum distances specified from inhabited buildings, railways, and highways and, in addition, they shall be separated from each other by not less than the distances shown for "Separation of Magazines." However, the quantity of explosives contained in cap magazines shall govern in the spacing of cap magazines from magazines containing other explosives. If any two or more magazines are separated from each other by less than the specified "Separation of Magazines" distances, then the two or more magazines, as a group, must be considered as one magazine. The total quantity of explosives stored in that group must then be treated as if stored in a single magazine located on the site of any magazine of the group, and must comply with the minimum distances from other magazines, inhabited buildings, railways or highways.

(2) All types of blasting caps in strengths through No. 8 cap shall be rated at 1¼ lb of explosives per 1,000 caps. For strengths higher than No. 8 caps, consult the manufacturer.

(3) For quantity and distance purposes, detonating cord of 50 to 60 gr/ft shall be calculated as equivalent to 9 lb of high explosives per 1,000 ft. Heavier or lighter core loads shall be rated proportionately.

§ 181.219 Table of distances for storage of low explosives.

Pounds (over)	Pounds (not over)	Distance (in feet)		
		From inhabited building	From public railroad and highway	From above-ground magazine
(1)	(2)	(3)	(4)	(5)
0	1,000	75	75	50
1,000	5,000	115	115	75
5,000	10,000	150	150	100
10,000	20,000	190	190	125
20,000	30,000	215	215	145
30,000	40,000	235	235	155

12,000	16,000	15	54	25
16,000	20,000	16	58	25
20,000	25,000	18	65	25
25,000	30,000	19	68	30
30,000	35,000	20	72	30
35,000	40,000	21	76	30
40,000	45,000	22	79	35
45,000	50,000	23	83	35
50,000	55,000	24	86	35
55,000	60,000	25	90	35
60,000	70,000	26	94	40
70,000	80,000	28	101	40
80,000	90,000	30	108	40
90,000	100,000	32	115	40
100,000	120,000	34	122	50
120,000	140,000	37	133	50
140,000	160,000	40	144	50
160,000	180,000	44	158	50
180,000	200,000	48	173	50
200,000	220,000	52	187	60
220,000	250,000	56	202	60
250,000	275,000	60	216	60
275,000	300,000	64	230	60

NOTE. (1) This Table recommends separation distances to prevent explosion of ammonium nitrate and ammonium nitrate-based blasting agents by propagation from nearby stores of high explosives or blasting agents referred to in the Table as the "donor." Ammonium nitrate, by itself, is not considered to be a donor when applying this table. Ammonium nitrate, ammonium nitrate-fuel oil, or combinations of the two are acceptors. If stores of ammonium nitrate are located within the sympathetic detonation distance of explosives or blasting agents, one-half the mass of the ammonium nitrate shall be included in the mass of the donor when calculating separation distances.

(2) When the ammonium nitrate and/or blasting agent is not barricaded, the distances shown in the table shall be multiplied by 6. These distances allow for the possibility of high velocity metal fragments from mixers, hoppers, truck bodies, sheet metal structures, metal containers, and the like which may enclose the "donor." Where storage is in bullet-resistant magazines recommended for explosives or where the storage is protected by a bullet-resistant wall, distances and barricade thicknesses in excess of those prescribed in Sec. 181.218 are not required.

(3) The distances in the table apply to ammonium nitrate that passes the insensitivity test prescribed in the definition of ammonium nitrate fertilizer tested by the Fertilizer Institute. Ammonium nitrate failing to pass this test shall be stored at separation distances in accordance with the table in Sec. 181.218.

(4) These distances apply to nitro-carbo-nitrates and blasting agents which pass the insensitivity test prescribed in the U.S. Department of Transportation (DOT) regulations.

(5) Earth dikes, sand dikes, or enclosures filled with the required minimum thickness of earth or sand are acceptable artificial barricades. Natural barricades, such as hills or timber of sufficient density that the surrounding exposures which require protection cannot be seen from the "donor" when the trees are bare of leaves are also acceptable.

(6) For determining the distances to be kept from inhabitated buildings, passenger railways, and public highways, use the table in Sec. 181.218. Ammonium nitrate, when stored with blasting agents or explosives, may be counted at one-half its actual weight because its blast effort is lower.

(The proposed regulations are to be issued under the authority contained in 18 U.S.C. 847 (84 Stat. 959).)

Signed: June 29, 1977.

REX D. DAVIS,
Director.

Approved: July 25, 1977.

BETTE B. ANDERSON,
Under Secretary of the Treasury.

MEAT AND POULTRY INSPECTION

Recommended Changes; Solicitation of Views

DEPARTMENT OF AGRICULTURE

Food Safety and Quality Service

RECOMMENDED CHANGES IN MEAT AND POULTRY INSPECTION

Solicitation of Views

AGENCY: Food Safety and Quality Service, United States Department of Agriculture.

ACTION: Solicitation of Views.

SUMMARY: The consulting firm of Booz, Allen, and Hamilton, Inc. was hired by USDA to study the meat and poultry inspection programs conducted under the Federal Meat Inspection Act (21 U.S.C. 601 et seq.) and the Poultry Products Inspection Act (21 U.S.C. 451 et seq.), for the purpose of finding possible ways to lessen the cost of inspection and remove any unnecessary regulatory burden placed on industry while assuring no loss of consumer protection. The firm has finished its study and prepared a detailed report which is summarized below. The report contains recommendations, some of which, if accepted by the Department, would cause significant changes in the way inspection is carried out. In order to conform with USDA's commitment to encourage citizen participation and to assist the Department in deciding what actions should be taken concerning these recommendations, the Department hereby announces three briefing meetings to familiarize interested parties with the content of the recommendations, announces a public hearing to discuss the recommendations, and further solicits written views of all interested parties.

DATES AND ADDRESSES: Comments must be received by October 31, 1977.

Send comments to: Hearing Clerk, U.S. Department of Agriculture, Washington, D.C. 20250.

Briefing meetings will be held, beginning at 10 a.m.:

August 17, 1977—Interdepartmental Auditorium, Conference Room B, 1301 Constitution Avenue NW., Washington, D.C.

August 23, 1977—University of Illinois, Circle Campus, Room 605, Chicago Circle Center, 750 South Halstead Street, Chicago, Ill.

August 26, 1977—U.S. Custom Building, Room 503, 555 Battery Street, San Francisco, Calif.

A Public Hearing will be held, beginning at 10 a.m.:

September 26–27, 1977—Jefferson Auditorium, South Agriculture Building, 14th and Independence Avenue SW., Washington, D.C.

For information on making reservations to speak at public hearing, see supplementary information.

FOR FURTHER INFORMATION CONTACT:

Dr. Arnold Giesemann, Acting Assistant to the Deputy Administrator, Meat and Poultry Inspection, Food Safety and Quality Service, USDA, Room 4863, South Building, Washington, D.C. 20250 (202–447–4565).

SUPPLEMENTARY INFORMATION: The entire report (approximately 700 pages) is available free, one copy to a request, by contacting Mr. Robert Norton, Acting Director, Information Division, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–3977.

To make a reservation to speak at the public hearing, contact Dr. W. J. Minor, Chief Staff Officer, Issuance Coordination Staff, Meat and Poultry Inspection Program, Food Safety and Quality Service, U.S. Department of Agriculture, Washington, D.C. 20250, 202–447–6189. A time period will be set aside at the public hearing for coments on speeches, to present rebuttals, etc. No reservation is required to speak during this time.

The three briefings will be held for the purpose of further acquainting the public with the details of the recommendations.

USDA has a commitment to encourage citizens participation, and, in keeping with that commitment, the public's views on these recommendations are solicited.

Done at Washington, D.C., on July 28, 1977.

ROBERT ANGELOTTI,
Administrator, Food Safety and Quality Services.

SUMMARY

A STUDY OF FEDERAL MEAT AND POULTRY INSPECTION SYSTEM BY BOOZ, ALLEN & HAMILTON, INC., JUNE 1977

Recommendations for substantial improvements in the Federal Meat and Poultry Inspection Program are contained in a three volume report submitted to the U.S. Department of Agriculture (USDA) by a management consulting firm in mid-June. The recommended program changes could save USDA $210 million (in 1976 dollars) by 1985, with no loss in consumer protection, according to the study conducted by Booz, Allen and Hamilton, Inc.

The study of the inspection system was initiated last year when USDA officials became increasingly concerned over the cost and efficiency of the program. The $371,848 contract was awarded to Booz, Allen in September 1976.

During the course of the 9-month study, the Booz, Allen team made extensive field visits to interview Federal and State inspection officials, industry leaders, consumer groups, officials of employee organizations, and Congressional leaders. Members of the team spent time in every region of the country and visited a variety of meat and poultry slaughtering and processing plants representative of all parts of the industry.

Volume I of the report is an indepth description of the Meat and Poultry Inspection Program (MPI), including:

The legislative history and goals of the Program; Current inspection activities; Organization of the Program; and Current Federal costs and projected costs to 1985.

LEGISLATION MANDATED INTENSIVE INSPECTION

The report traces the history of the inspection program back to the Meat Inspection Act of 1890. Aimed at promoting exports of U.S. meat products to other countries, the Act contained very limited provisions for meat inspection to protect consumers in the United States.

The Meat Inspection Act of 1906 remained the major piece of legislation regulating meat inspection for more than 60 years. The foundation of modern meat inspection, the 1906 Act, required mandatory inspection of all meat and meat products moving in interstate commerce, provided for inspection of the product at numerous points in the manufacturing process and required label inspection.

Poultry inspection, however, was a voluntary program until the passage of the Federal Poultry Products Inspection Act of 1957. That Act required ante-mortem inspection of poultry for slaughter to the degree determined necessary by the Secretary, and post-mortem inspection of all slaughtered poultry moving in interstate commerce, as well as inplant checks, review of labeling and inspection of imported products.

The 1960's brought the major legislation guiding the inspection program today. The Wholesome Meat Act of 1967 was passed to close gaps in existing legislation and to coordinate the provisions of previous meat inspection acts. It was aimed at assuring uniformity in regulation of goods shipped in interstate, intrastate, and foreign commerce.

The 1967 Act provided the backbone for Federal/State cooperation, giving explicit instructions on cooperative arrangements. State programs deemed "equal to" the Federal inspection program could continue to inspect products, but those products could be shipped only within the State. Federally inspected products were permitted to travel interstate, however. The Federal program was given the authority to take over a State program, or "designate" the State, if its inspection program was not on a par with the Federal program.

Other provisions of the Act made ante-mortem inspection of all animals mandatory instead of permissive, required more extensive review of foreign products, provided stronger enforcement tools for USDA, and gave the Department new regulatory authority over allied industries, such as transporters and other food handlers.

The Wholesome Poultry Products Act of 1968 is similar to the 1967 meat act in both its basic intent and provisions. The poultry act, however, went further in its attempts to ease the burden on small businessmen by providing certain exemptions from inspection for low volume processors.

Cooperative efforts between Federal and State inspection authorities were encouraged through the Talmadge-Aiken Act of 1962. The Act, which was a general bill dealing with cooperative agreements for the marketing of agricultural products, was applied to meat and poultry inspection after the significant acts of 1967 and 1968. State inspected plants saw the Talmadge-Aiken option as a means of obtaining Federal inspection under an existing State program, thus enabling the plant to ship interstate.

MEAT AND POULTRY INSPECTION PROGRAMS SEPARATE UNTIL 1968

The report outlined the development of the meat and poultry inspection programs, which remained two distinct systems within the Agriculture Department until the late 1960's.

The meat inspection program began as a veterinary-directed group within USDA and was not connected with marketing groups. The poultry inspection program, on the other hand, began as part of an agency within USDA with markeing as well as inspection functions.

Both programs became part of the Consumer and Marketing Service, formed in 1964, while still remaining organizationally separate except for certain staff activities. Feeling the pressures created by the new meat and poultry legislation, the Department fully merged the inspection systems in 1968 into the Meat and Poultry Inspection Program (MPI), a system with a field structure made up of eight regions containing 118 circuits.

In 1972, the meat and poultry inspection programs were marged with certain animal health programs to form a new agency, the Animal and Plant Health Inspection Service (APHIS). Under APHIS, the field structure was reorganized into five regions, 35 areas, and 222 circuits.

With the reorganization of 1977, MPI was split from the other parts of APHIS and combined with other food inspection, standardization and grading services to form the Food Safety and Quality Service.

INSPECTION COSTS ROSE OVER 40 PERCENT IN PAST 5 YEARS

The recognized trend toward spiraling costs for meat and poultry inspection was confirmed in findings of the consulting firm, as presented in Volume I of the report. Federal expenditures for meat and poultry inspection increased 43 percent over the last 5 years to $202.8 million in fiscal year 1976. Inflation alone was estimated to account for over half of this increase.

The major portion of the expenditure —$173.7 million—supported Federal inspection. The remainder supported State inspection programs deemed "equal to" the Federal system, for which the Federal Government pays 50 percent of the costs.

While the Federal Government may "designate" an unsatisfactory State program, a State may also request that MPI take over its inspection system. When a State does this all costs for inspection are then paid by the Federal Government. In recent years many States have voluntarily given up their inspection programs as a means of conserving State funds without also cutting out a vital service to consumers.

Twenty-four States currently have designated poultry inspection programs and 17 have designated meat inspection programs. Almost one-third of the total meat and poultry program designations have occurred since 1975, and all have been voluntary.

The growing number of State designations has had an impact on MPI greater than a simple increase in Federal expenditures. Along with State programs came many very small, lower volume plants. Since State inspected plants may ship only intra- and not intrastate, State systems are made up largely of smaller plants.

The past 5 years have seen a 53 percent increase in the number of federally inspected plants, with only an 8 percent increase in the volume of production. This 28 percent decrease in the average volume per federally inspected plant reflects the influx of smaller plants into the Federal system.

This trend is also apparent in comparing the growth of the inspection force to the huge increase in the number of federally inspected plants. Between 1972 and 1976, the number of inplant inspectors had increased by only 16.6 percent, covering the more than 50 percent increase in plants. As small plants entered the system, less inspection time per plant was required.

The smaller increase in manpower requirements is also related to steps taken by MPI in this direction. The program developed new work standards for inspectors, made greater use of existing manpower on an overtime basis, and increased usage of veterinarians and food inspectors on a patrol basis to cover several plants in a geographic area. This use of patrol inspectors, who cover more than one plant requiring less than 1 full man-year of inspection, is expected to continue. In fiscal year 1976, patrol inspectors accounted for 55 percent of total Federal inspection.

The changes brought about by State designations had a greater impact on the red meat industry than the poultry industry. There was a 49 percent increase in the number of red meat plants changing from State to Federal inspection since 1972, but less than a 1 percent increase in the number of federally inspected poultry plants. Combination plants in which both meat and poultry products are manufactured were affected the most, showing a 114 percent increase in the number of plants coming under Federal inspection.

FEDERAL SHARE OF INSPECTION COSTS INCREASED

The costs for inspection of meat and poultry are shared by the Federal Government, State governments, and the industry. Total collective expenditures for inspection have increased 37 percent over the last 5 years to $257.7 million in fiscal year 1976.

As more States have eased their own budgetary pressures through voluntary designation, the Federal costs for inspection have correspondingly increased. In fiscal year 1976, the Federal share amounted to nearly 80 percent, a proportion that has increased almost 4 percent since 1972.

Undesignated States spent $29.1 million to maintain inspection programs "equal to" the Federal system in fiscal year 1976—an increase of 8 percent in actual expenditures over 1972. Viewed as a proportion of total inspection costs, however, State expenditures have decreased almost 3 percent since 1972 to 11.3 percent of the total in fiscal year 1976, reflecting the State designations during this time.

Industry pays part of the inspection budget by reimbursing MPI for any inspection overtime required and for voluntary inspection activities. Such reimbursements cost industry $25.8 million in fiscal year 1976, an increase of 25 percent over fiscal year 1972. During the 5 years studied, however, industry expenditures as a proportion of total costs have remained relatively stable at about 10 percent.

FEDERAL INSPECTION FOUND LABOR INTENSIVE

Meat and poultry inspection was found highly labor intensive with almost 90 percent of the total expenditures during 1976, excluding grants to States, allocated to salaries and benefits. This is the result of the many activities mandated by the inspection program's enabling acts. The cost of providing inspectors in meat and poultry plants accounted for nearly 70 percent of total Federal inspection expenditures during fiscal year 1976, a percentage of the total which has remained relatively constant since 1972. This percentage rises when grants to States are considered, since part of the grants includes funding for inplant inspection. Federal grants to States totaled $29.1 million in fiscal year 1976.

The report related the rapid rise in inspection costs over the past 5 years to two major factors—State designations and inflation.

As noted, smaller plants entering the system through State designations have resulted in a lower average volume of inspected product by each inspector. Coupled with this is spiraling inflation, estimated to account for over half of the increased dollar expenditures over the past 5 years.

As projected by Booz, Allen, by 1980 Federal inspection costs will leap to at least $211.8 million (in 1976 dollars) and $219.2 million by 1985. The projections were based on expected future trends in population, meat and poultry production and consumption, designation of State programs, and costs of inspection activities. The figures represent a projected increase of 5 percent by 1980 and 8 percent by 1985.

SEVEN AREAS CHOSEN FOR FURTHER STUDY

After its extensive study of the meat and poultry inspection system, the Booz, Allen study team drew four major conclusions about the program's operations and structure. These are discussed in Volume III.

First, the consulting firm found that meat and poultry inspection activities are consistent with legislative mandates. The operations of program personnel are conducted to detect major forms of adulteration and misbranding, as re-

quired by the agency's enabling legislation.

The second finding of the researchers related to the growth of the inspection program. The report noted that growth over the last 5 years has been significant and predicted continued growth through 1985, as more States give up their inspection programs.

The need for improvements in management structures and activities is cited as the third finding. Work loads in the field are not distributed uniformly. In addition, Program execution is not well integrated with planning and budgeting in MPI, nor supported by adequate information about the Program. Program expenditures are not analyzed in enough detail to aid managers in overall control.

Finally, the firm found that several key aspects of MPI operations and management offer opportunities to improve cost effectiveness. Seven areas of MPI operations and management, accounting for 92 percent of the Program's operating costs in FY 76, were chosen for the study.

Volume II provided a detailed discussion of these alternatives. Each area was evaluated in terms of its advantages and disadvantages, its potential for cost avoidance, potential reactions of interest groups, and ultimately, its viability.

Volume III contained Booz, Allen's recommendations to the Department of Agriculture and detailed strategies for implementation. The final volume also served as an executive summary of the first two volumes, building upon the earlier reported findings and conclusions.

In making its evaluations, Booz, Allen assumed that inspection will continue to be required in all but so-called custom exempt plants in which the law currently permits custom slaughter of a consumer's own meat animal with only periodic surveillance. The introduction to Volume II noted that the tremendous influx of smaller plants into the Federal system over the past 5 years has greatly reduced the efficiency of the Federal program on a cost-per-pound-inspection basis. In some cases, providing inspection to very small plants is perhaps as much as 1900 percent less efficient than to very large plants. This, in essence, amounts to a subsidy to small industry, the report stated.

However, any recommendation related to smaller plants, which some have suggested should be excluded from inspection, was deemed to be outside the scope of the study. The findings relate to the current scope of MPI activities—including the inspection of small plants with their own unique considerations.

The seven aspects of MPI operations and management chosen for further study accounted for 90 percent of its operating costs in FY 1976. They were:

Processing inspection
Post-mortem poultry inspection
Ante-mortem red meat inspection
Post-mortem red meat inspection
Management activities
Management structures
Cross utilization of Federal and State inspection personnel

A summary of the findings and conclusions regarding each alternative follows. An extensive discussion of each can be found in Volume II with an abbreviated analysis in Volume III.

PROCESSING INSPECTION—A MONITORING APPROACH

A monitoring approach to processing inspection in which an inspector makes use of a firm's quality control records, accompanied by frequent verification samples and a progressive economic penalty system, was considered to be the alternative offering the greatest potential benefit to the inspection program and to the consumer.

The system places the burden of proof of compliance with Federal regulations on the shoulders of industry. It is their responsibility to provide USDA with acceptable evidence of compliance, which is to be monitored and verified by the inspection program.

Since the only means of providing this evidence under existing technology is through quality control (q.c.) records kept by the industry, the proposed system, in essence, mandates quality control programs throughout the industry. The system is designed to end the practice of using USDA inspectors as a firm's quality control manager.

The report asserted that a voluntary approach to q.c. is not practical. A mandatory program would place all of the industry on an equal footing and would enable MPI to make accurate predictions of inspection workload.

The report does not recommend that "total" quality control systems be required. Much of the industry would not be able to implement such programs within the 1985 time frame considered by the consulting firm.

Instead, a comprehensive system was recommended, embracing all areas of product flow. Every firm would be required to maintain q.c. systems for microbiological monitoring, processing temperatures, net weight, and fat and added water. Other systems may be required in specific plants, such as a mandatory q.c. system accompanying use of nutrition labeling or a system where restricted ingredients are in use.

The proposed system moves MPI somewhat closer to the approach taken by the Food and Drug Administration (FDA), Department of Health, Education, and Welfare, which regulates all foods other than meat and poultry. The FDA system, in accordance with that Agency's legislative charges, checks food establishments at infrequent intervals, depending upon the risk associated with the specific commodity present. An FDA inspector may inspect a "very high risk" establishment, such as a manufacturer of milk products, twice a year, while visiting a "low risk" establishment, such as a soft drink bottler, only once every few years.

FDA depends heavily on the industry to police itself, but it has a wide range of enforcement tools available when necessary. Legislation pending in Congress would add substantially to the FDA's arsenal, giving it the authority to, among other things, demand access to a firm's processing records and require companies to have "adequate" q.c. systems.

The differences in the kind and degree of risk between meat and nonmeat items precluded the use of an FDA-type system for meat and poultry inspection, the consulting firm concluded. The greater potential risk of human disease caused by foods of animal origin is reflected in the legislation which governs the regulations of the differing commodities, with MPI required to conduct much more intensive inspection than FDA.

However, Booz, Allen indicated that the FDA approach, which more fully uses industry's quality control records, could be adapted for use by MPI. The program proposed for USDA must be accompanied by a broad array of new enforcement tools. It was recommended that MPI devise a plant rating system tied to a progressive enforcement system that includes economic penalties, such as a charge back for extra inspection time spent in problem plants.

The program would require intensive monitoring of the q.c. programs by MPI. Inspection efforts could be concentrated on three major areas: monitoring of procedures and data; spot checking (verification inspection) of the product; and conventional inspection of the plant for requirements not included within the q.c. program.

MPI would benefit from greater staffing flexibility and gain the ability to focus better on problems. In addition, the inspection program would be better able to stay within Administration's personnel ceiling while meeting its legislative mandates.

Benefits would also accrue to industry and the consumer. Mandating quality control programs would result in a more consistent product entering food channels, with less throwaway at the plant. The inspection force would utilize more objective standards—relying to a greater extent on written documentation and sample analysis. The system would also provide for a greater separation of the inspector and the plant.

Booz, Allen predicted that the proposed system could result in an average 32 percent reduction in MPI manpower per plant. When implementation costs are added in, for needs such as special training for inspectors and increased sample analysis, a cumulative cost avoidance of nearly $116.5 million (in 1976 dollars) is estimated through 1985, assuming implementation by 1980.

The report acknowledged major difficulties in implementation of such a program by small operators and suggested special arrangements, such as personnel sharing or the use of part-time personnel from the academic community. Booz, Allen proposed a delayed phase-in of mandated programs to allow additional time for smaller operators to develop the required capabilities.

The recommended changes have implications for MPI staffing requirements.

Inspectors will need a fundamental knowledge of quality control programs.

New hires for processing inspection should have completed at least 2 years of college with course work in food technology, statistics and biological sciences, the report stated. Slaughter inspectors would be eligible to cross over into processing inspection only if those requirements are met. Greater opportunities for advancement should also be available in order to attract college graduates. Management positions should be reevaluated to eliminate requirements, where appropriate, for veterinary medical expertise.

The proposed system would require consultation with Congress since such a program was not discussed with Congress during passage of MPI authorizing legislation.

POULTRY POST-MORTEM INSPECTION—A BI-LEVEL SYSTEM

A bi-level approach to poultry inspection—utilizing a specially adapted "continuous sampling plan" (actually, sampling from a continuous production line)—was recommended for intensive field study by the Booz, Allen team.

The system is feasible, the report concluded, because of the nature of poultry condemnations, particularly of young chickens. Poultry raising and marketing practices result in rather homogenous lots in which disease incidence is either quite low or fairly high—allowing a differentiation between "good" and "bad" lots. In addition, with the current state of knowledge and detection capabilities, it appears likely that most causes of condemnation have little human health significance.

Under the concept developed by the Booz, Allen team, inspection would focus on "bad" lots of poultry—while all birds would continue to be inspected by either MPI inspectors or an industry inspection crew. Under certain conditions, a plant screening crew would prescreen the birds to be examined by MPI—offering a double check. However, "good" lots would be examined by MPI officials on a continuous sampling basis, with the rest of the birds in the lot checked by trained plant employees—in effect, another form of 100 percent inspection.

Under the specifics of the system, there are three inspection modes:

Mode A: All birds are inspected by trained plant inspectors and MPI inspectors who reinspect a specified fraction of the birds to verify. (Greater than 100 percent inspection.)

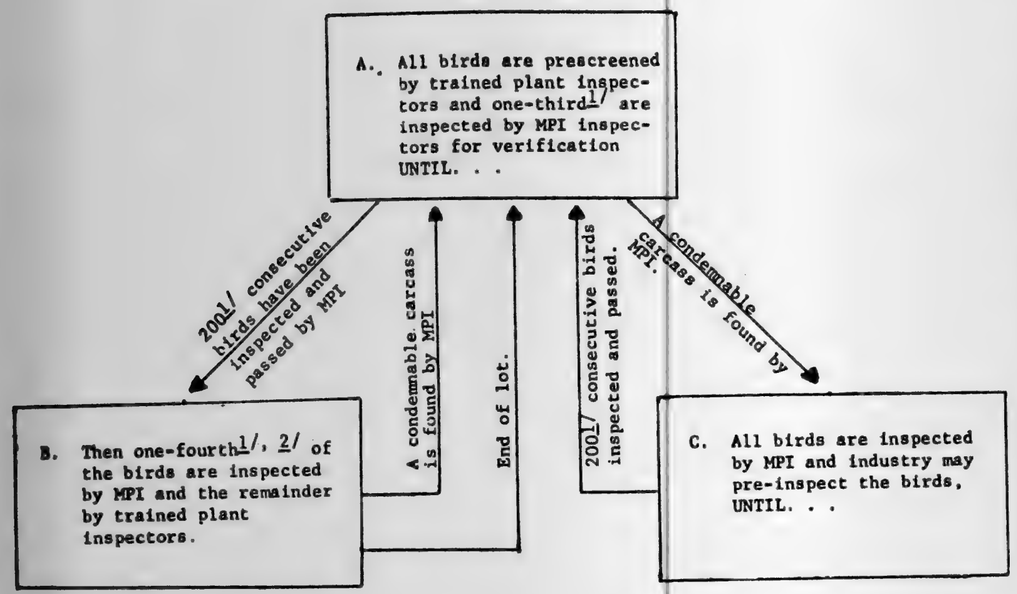
Mode B: A fraction of the birds are inspected by MPI inspectors. The rest are inspected by industry inspectors. (100 percent inspection.)

Mode C: All birds are inspected by MPI inspectors. The plant may preinspect some or all of the birds. (At least 100 percent inspection.)

Every new lot, made up of a homogenous flock, begins in Mode A, unless the more stringent Mode C has been in effect in the plant.

The plant may switch to Mode B from Mode A after a predetermined number of consecutive birds have been inspected and passed, indicating that the lot is relatively free of condemnable disease conditions. If the MPI inspector finds a condemnable carcass while the plant is in Mode A, then MPI inspectors begin looking at every bird (the system switches to Mode C).

While the system is operating in Mode B, with 100 percent inspection performed by a combination of MPI and plant inspectors, if an MPI inspector condemns a carcass, the system returns to Mode A where some double checking takes place. At that time, all birds that had passed the inspection station since the last bird was inspected and passed are set aside for reinspection by MPI inspectors.



While the system is in Mode C, or 100 percent MPI inspection, if a predetermined number of consecutive birds are passed by MPI inspectors, the system may return to Mode A.

Exhibit 1 illustrates the workings of the proposed system.

The system incorporate incentives to the plant that are beneficial to the consumer. Mode C is initiated when ineffective plant inspection is detected by MPI personnel. Since line speeds slow down considerably in this mode, there is incentive for effective plant inspection. Since productivity can be highest under Mode B, there is incentive to provide healthy animals for slaughter to enable the plant to qualify for that mode.

EXHIBIT 1

Bi-Level Poultry Postmortem Inspection

1/ Numbers are for expository purposes. Actual numbers may be quite different.

2/ Fraction of birds inspected by MPI in Modes A and B may be the same.

Plants may provide their own inspectors to maximize productivity. Line speeds currently are constrained by the number of MPI inspectors. But under Modes A and B, the plant can increase its line speeds by adding plant inspectors. The plant, however, could not use more than eight of its inspectors to one MPI inspector to assure adequate verification sampling.

The Booz, Allen report predicted that the proposed system would prove to be more effective than the current system because it provides for some duplicate inspection. The study noted that no system is 100 percent effective—past estimates have suggested an error rate of perhaps 1.0 to 1.5 percent for the current system. Under the proposed system, there is actually double screening at some points and 100 percent inspection is always in effect in some manner, even when an MPI inspector is only sampling. Thus, the new concept potentially offers improved effectiveness.

This system, similar to that proposed for processing inspection, transfers some costs and responsibilities from MPI to the industry. It would require training of plant employees to function as effective inspectors. Some physical changes in line layout may also be required.

According to the report, a substantial reduction in MPI costs for poultry inspection could result from implementation of the bi-level approach. Currently, poultry inspection absorbs a sizeable share of the MPI budget—about $32 million in fiscal year 1976, or 15 percent of the total expenditures. It was estimated that the costs for poultry inspection could be cut by 25 percent, with a projected 40 percent reduction in on-line inspection. If the system is adopted by 1980, this would result in a projected savings of nearly $50 million (in 1976 dollars) by 1985.

Any change from 100 percent MPI inspection would require an amendment to the Wholesome Poultry Products Act of 1968. In view of the legislative action required and the administrative adjustments needed by both MPI and industry, the report recommended gradual implementation preceded by extensive field testing.

ANTE-MORTEM INSPECTION OF RED MEAT—A MONITORING SYSTEM

A more flexible anti-mortem inspection system that permits MPI to focus most of its inspection on questionable animals was recommended ni the Booz, Allen report.

Formerly discretionary, anti-mortem inspection was made mandatory by the Wholesome Meat Act of 1967. As presently conducted, however, such inspection appears to have little measureable impact on total inspection results. Little flexibility is permitted under the law to improve the efficiency of the process, and the inspection effort invested appears relatively high in terms of the number of defects found.

Condemnation data listed in the study indicated that only a small faction of the red meat animals offered for slaughter, which are not already dead or dying, are condemned during anti-mortem inspection—only one animal per 20,000. The cost of ante-mortem inspection was estimated to be nearly $2 million—resulting in a cost of $5.24 to locate each defective animal. With very limited exceptions, those animals condemned on ante-mortem inspection would also be removed from the food chain on post-mortem inspection.

The consulting firm concluded that ante-mortem inspection has value and should not be eliminated. In the absence of any other responsible group in the United States, MPI must continue to meet the responsibility for disease detection. However, there is a need for more flexibility in the legislation to enable changes in procedures that will retain the intent while allowing for more efficient use of scarce resources.

Booz, Allen recommended that the program be modified to allow MPI to concentrate inspection time on classification and disposition of defective animals—the most difficult of inspection activities and the one of most significance to consumers. The proposed system would require the packer to separate the questionable animals, but MPI officials would no longer be required to examine every animal. MPI would reserve the right to inspect any animal, however, and would inspect all abnormal animals, as well as monitor closely the screening process.

Although industry efforts would increase under the system, the industry would benefit from the proposed elimination of reimbursable overtime—overtime charged to the industry—for ante-mortem inspection. Any overtime needed for this activity would be administrative under the proposed system.

The major benefit of this change would be the flexibility it provides to MPI. The marginal potential cost avoidance which would result—$3.7 million through 1985—should not be a factor in a decision to adopt this recommendation, the study stated.

The modification of the current system would require revision of the Federal Meat Inspection Act. Time for gradual changeover to the new system should be provided, the consulting firm suggested, after legislative changes are enacted.

POST-MORTEM INSPECTION OF RED MEAT—IMPROVED PROCEDURES

Determing that the relatively pervasive disease incidence of red meat animals precluded the use of a sampling system for post-mortem red meat inspection, the Booz, Allen team recommended revised procedures, as developed by an MPI task force, which would result in a projected cost avoidance of over $22 million by 1985.

A sampling procedure was not considered appropriate for red meat animals because they are raised in a variety of environments and cannot be sorted into "good" or "bad" lots. Disease rates are relatively high and the defects include several high risk conditions. Since post-mortem inspection of red meat animals accounts for 23 percent of total MPI costs, other means of improving the system were explored.

In March 1977, MPI convened a Technical Study Group to develop recommendations in the area of post-mortem inspection for the Booz, Allen study. The recommendations, incorporated into the consulting firm's report (appearing in full as Appendix D to Volume II), outlined a set of pared down basic procedures for past-mortem inspection of each species. Along with these are lists of expanded procedures for specific conditions which may be added as needed. Since each expanded procedure is separate and defined, MPI can calculate the effort—and cost—involved in implementing expansion steps.

Only those steps deemed appropriate to the type of animal and area of origin would actually be performed under the new system. In some instances, only a basic procedure need be performed. In others, such as inspection for tuberculosis, an expanded procedure is always recommended.

The Study Group report also made note of the fact that "contamination" has become a leading defect reported at post-mortem inspection. This is actually a condition produced during slaughter rather than an abnormality present in the animal before slaughter and should be a plant responsibility.

The report recommended that major MPI emphasis be placed on solving the issue of how inspection effort should be devoted to preventing dressing defects leading to contamination. After field investigation, the program should place primary regulatory emphasis on correction of defective processes rather than after-the-fact detection of damage. MPI should also make sure that the criteria for "contamination" are realistic in terms of consumer protection.

The changes in procedure would create a need for improved systems for compiling, analyzing and distributing information to assist in keying post-mortem procedures to changing situations. The improved information systems should include cost studies of post-mortem procedures since this would help in deciding among alternative procedures.

As a result of changing industry technology and the increasing opportunity for assignment as the sole inspector at a plant, the post-mortem inspector should have additional educational background. Minimum entry requirements of a high school degree, including courses in physical and biological sciences, would be a step in this direction. The report recommended that some educational background be permitted to substitute for the now-required 3 years of experience in the industry.

Some of the recommendations will require field study. Since the revised procedures require no legislative change, however, Booz, Allen estimated implementation could be achieved by 1978. A cost avoidance of $22 million (in 1976 dollars) through 1985 was projected, resulting from the reduction in inspection time required for each animal.

MANAGEMENT ACTIVITIES—AN INTEGRATED MANAGEMENT SYSTEM

The Booz, Allen team found some long-standing problems with MPI management and information systems that need to be corrected before the firm's technical proposals can be implemented fully. MPI has already begun efforts to deal with some of the problems, as it is in the process of updating its work standards and improving its data systems. The consultant's review of management activities within the Program was taken to support and complement the internal effort.

A basic problem, according to the study, is that accurate updated information generated by the Program does not always filter back to the proper levels of management in a usable form so that informed decisions can be made. Data from the lowest point in the organization, the plant, should flow up to headquarters and then back down to the area level, the firm recommended. Thus, the Program could know exactly how monies are being spent, relating expenditures to factors such as pounds of animals inspected, type of animal, type of plant, etc. The data should be provided to management at all field levels, since field managers currently make resource decisions with little feedback on the impact of their actions.

In addition, to better coordinate all aspects of decisionmaking, the report suggested that MPI develop a set of formal procedures to guide the basic management functions of planning, program development, budget formulation, and program execution. This integrated management system should express the essential linkages among these activities, involve the active and expanded participation of key field managers, and be supported by the new information system now being developed.

Regional Directors should play a major role in development of policy for the entire inspection program, the study concluded, recommending that they report directly to the Deputy Administrator. In support of increased integration of related MPI field activities, it was also recommended that the Regional Directors be given the responsibility for monitoring compliance of allied industries. Information obtained through both inspection and monitoring of different points of the food distribution chain must be coordinated and available to the Regional Directors for effective corrective and enforcement actions.

The report also recommended that area managers become major participants in planning and budgeting activities for the Program. Areas will need to receive all key statistical and financial reports on their operations. Additional training and technical assistance from the headquarters staff will be required to better equip field managers to assume their increased responsibiilties.

It is expected that the improvements in management and information systems can be made for the most part with existing departmental resources. Although

there is great potential for cost avoidance through the implementation of the changes, the consulting firm found it difficult to realistically quantify the savings at this stage of development.

The qualitative benefits are significant. The recommendations would greatly help MPI officials manage the Program's operations, providing management with the ability to respond to and plan for changing needs, allocate resources, and take concerted action with the knowledge of its effects on the entire Program.

MANAGEMENT STRUCTURES—REALIGNMENT OF FIELD MANAGEMENT

Another problem identified by the Booz, Allen team is the wide variation in workloads which exists among various field management levels. For example, the 34 MPI Areas range from one to four States and territories, include 3 to 21 Circuits, and cover 31 to 827 Federal plants. Similarly, the five Regional Offices include five to nine Areas, ranging from 833 plants to 2,550 plants.

The report urged that a clear set of guidelines be developed to realign field structures in order to equalize workloads. In addition, it recommended the elimination of the positions of Regional Moisture Controller. The study team found the positions amounted to little more than duplication of work already performed by Circuit Supervisors and in-plant inspection staff in poultry inspection.

These changes could result in a cost avoidance, in 1976 dollars, of nearly $18 million through 1985—assuming realignment by 1978. The potential improvement in organizational control and effectiveness, however, is of primary consideration in recommending the changes. The changes should result in greater inspection uniformity and improved communications in the field.

CROSS-UTILIZATION—EXPANSION WHERE POSSIBLE

Cross-utilization of Federal and State personnel was the one area in which the Booz, Allen report concluded that a national program is not viable. The firm recommended, however, that where conditions permit, cross-utilization should be encouraged as a less costly means of staffing plants.

Cross-utilization in the past, despite some existing opportunities, has been minimal. The major obstacle has been the relationship between State and Federal inspection systems created by the enabling legislation of the late 1960's. States are required to conduct programs that are "equal to" the Federal program, yet State inspected product cannot move out of that State. During fiscal year 1976, cross-utilization involved only 3 percent of the total Federal man-years of inspection, or 320 man-year equivalents, almost all of which was through Talmadge-Aiken agreements.

It was estimated that opportunities to expand cross-utilization might represent as much as 15 man-years per State. With the Federal Government receiving about three-quarters of the savings, MPI could save over $1.4 million under maximum conditions. This would result in a cost avoidance of less than 1 percent of MPI expenditures for inplant inspection.

Numerous constraints to cross-utilization more than balance off the small benefits which might be derived. The problems include Civil Service policies, resistance of employee organizations, supervisory concerns, and differences in Federal and State inspection programs.

The consulting firm recommended, however, that cross-utilization should be encouraged where conditions permit. It also called on the Department to analyze existing policies related to State programs. The policy issue involving State cooperative inspection systems revolves around whether the Department wishes to "encourage" such systems or "allow" such systems to exist. Existing legislation and regulations "allow" for such systems.

If the Department wishes to "encourage" these systems, however, the legislation must be changed to permit interstate sale of State inspected product. In addition, changes in Talmadge-Aiken legislation should be made to provide economic incentives for States. The Department should consider raising Talmadge-Aiken funding from 50 percent to 80 percent Federal monies and to permit States to make the final decision on whether to allow a plant to ship interstate. These changes require Congressional approval.

Exhibit 2 summarizes the benefits which can be derived from each of the recommended changes.

PROGRAM CHANGE AFFECTED BY SEVERAL FACTORS

In Volume III, the consulting firm outlined several factors which have contributed to MPI's current problems and which must be considered in future attempts to make program changes.

A major factor playing a repeated role in the study findings is uncontrolled growth due to continuing State designations. This results in increased workloads, with the Program at the same time facing pressures to hold down Federal expenditures.

The second factor is the lack of appropriate, accessible and detailed information on the current system that can be integrated into the budgeting, resource allocation and other management processes to support management decisionmaking. Development of improved management and information systems will have an impact on MPI's ability to implement the technical proposals recommended in the report.

EXHIBIT 2.—*Summary of benefits to consumers, industry, MPI by recommended areas of change, recommended areas of change*

	Interest group		
	Consumers	Industry	MPI
A monitoring system of processing inspection.	Improved product consistency without an anticipated increase in purchase price through improved industry quality assurance and greater enforcement capabilities through a progressive penalty system. More efficient use of Federal tax dollars.	Improved product control and greater flexibility to expand production in plants with consistently good compliance records. Some potential decrease in overtime costs.	Improved information and control mechanisms to more objectively monitor industry compliance and greater enforcement capabilities to take the economic gain out of noncompliance. Potential cost avoidance of $117,000,000 through 1985 (in 1976 dollars).
Bi-level postmortem poultry inspection.	Improved quality assurance through more effective inspection. Potential increased poultry supply without an increase in purchase price. More efficient use of Federal tax dollars.	Increased flexibility to increase line speeds where good lots are received and industry inspection is effective. Some potential decrease in overtime costs.	More efficient utilization of inspection personnel with potential cost avoidance of $50,000,000 through 1985 (in 1976 dollars).
A monitoring system of antemortem red meat inspection.	More efficient use of Federal tax dollars with an equivalent assurance of protection from health risk and economic fraud.	Elimination of overtime costs.	More efficient utilization of inspection personnel with potential cost avoidance of $3,700,000 through 1985 (in 1976 dollars).
Revised postmortem red meat inspection.	....do....	Less time-consuming inspection per animal with improved potential for increased line speeds. Some potential decrease in costs for reimbursable overtime.	More efficient utilization of inspection personnel with potential cost avoidance of $22,000,000 (in 1976 dollars) assuming many instances will occur whereby inspectors can be removed from existing assignments to be used elsewhere.
Revised management and information system.	More efficient use of Federal tax dollars.	Improved inspection uniformity and access to decisions lower in the organization.	Improved data base from which to conduct planning, budgeting, and evaluation. Improve resource allocation system with long-run cost avoidance: more participative management and improved supervisory system.
Revised management structures.	....do....	....do....	Better equalization of workloads with improved communications and uniformity of policy interpretation. Potential cost avoidance of $18,000,000 through 1985 (in 1976 dollars).
Cross-utilization of Federal and State inspection personnel.	....do....	Greater uniformity in Federal and State regulatory interpretations. Some potential decrease in overtime costs.	More efficient utilization of Federal and State resources with some resultant cost avoidance. Greater harmony between Federal and State inspection programs.

A third constraint relates to Federal legislation which hampers MPI's ability to adapt inspection to changing technologies. Program changes by the Department in the past have been confined to less significant areas because of the need for legislative approval of major changes. Greater discretionary authority must be added to meat and poultry inspection legislation, the report urged.

Any solution to MPI's problems must be balanced by the concerns of the many groups affected by the program. The Department must clearly understand the interests of consumers, industry, employee unions and Congress before changes are made.

The report documented the concerns of the various interest groups and recommended that representatives from every sector play a large role in efforts to implement the study recommendations.

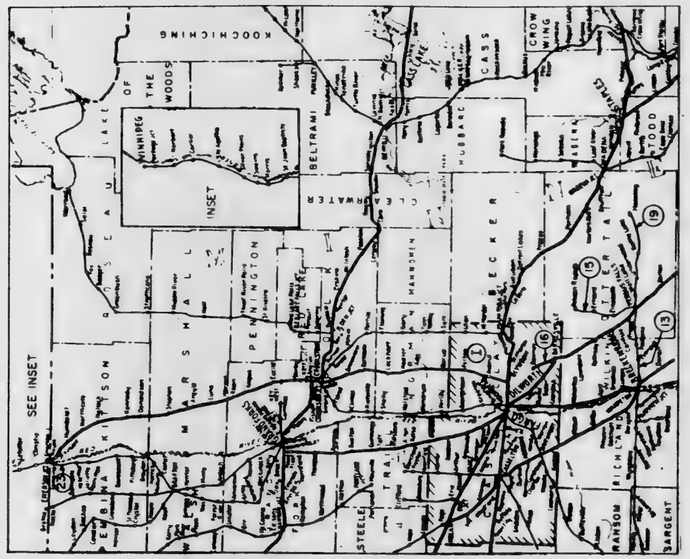
ABANDONMENT OF RAILROAD SERVICES

System Diagram Maps of Various Railroad Companies

INTERSTATE COMMERCE COMMISSION

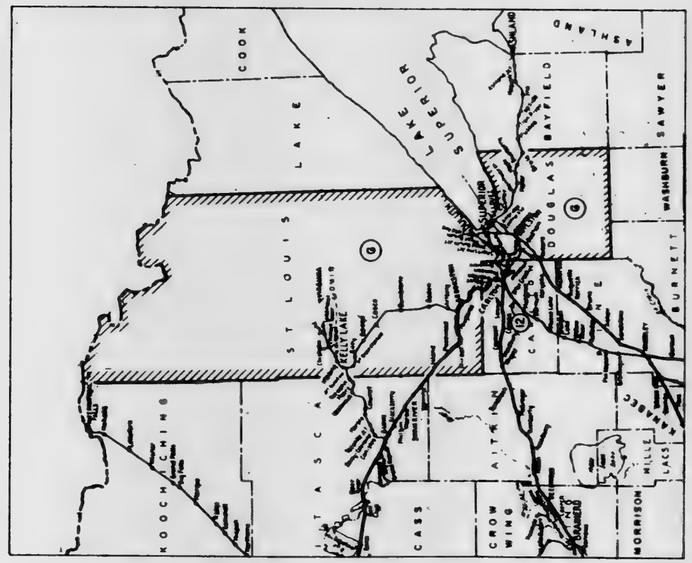
[AB 6 (SDM)]

BURLINGTON NORTHERN INC.



System Diagram Map

Notice is hereby given that, pursuant to the requirements contained in Title 49 of the Code of Federal Regulations, Part 1121.22, that the Burlington Northern Inc., has filed with the Commission its color-coded system diagram map in docket No. AB 6 (SDM). The maps reproduced here in black and white are reasonable reproductions of that system diagram map and the Commission on July 21, 1977, received a certificate of publication as required by said regulation which is considered the effective date on which the system diagram map was filed.



Color-coded copies of the map have been served on the Governor of each state in which the railroad operates and the Public Service Commission or similar agency and the State designated agency. Copies of the map may also be requested from the railroad at a nominal charge. The maps also may be examined at the office of the Commission, Section of Dockets, by requesting docket No. AB 6 (SDM).

H. G. Homme, Jr.,
Acting Secretary.

Category 1

BN MAP NO. 1

Line Segment No. 12—Moose Lake (MP 109.00) to Carlton (MP 129.49), Carlton County, Minn.—Stations: Barnum—112.5; Mahtowa—118.5; Otter Creek—124.2.

BN MAP NO. 2

Line Segment No. 13—French (MP 56.5) to Breckenridge (MP 74.0), Ottertail and Wilkin Counties, Minn.—Stations: Foxhome—61.27; Everdell—66.0.

Line Segment No. 15—Fergus Falls W. Jct. (MP 0.50) to Pelican Rapids (MP 21.37), Ottertail County, Minn.—Stations: Erhard—15.4; Pelican Rapids—21.37.

Line Segment No. 16—Barnesville (MP 5.0) to Downer (MP 9.09), Clay County, Minn.—Stations: Downer—9.09.

Line Segment No. 19—Battle Lake (MP 31.42) to Henning (MP 15.89), Ottertail County, Minn.—Station: Vining—22.2; Clitheral—28.8; Henning—16.09.

Line Segment No. 23—Joliette (MP 179.13) to Pembina (MP 191.71), Pembina County, N.Dak.—Stations: McArthur—82.5; Pembina—189.49.

BN MAP NO. 3 (20, 22, 24, 64)

Line Segment No. 20—Jamestown (MP 39.67) to Klose (MP 33.75), Stutsman County, N. Dak.—Station: None.

Line Segment No. 22—York (MP 0.00) to Dunseith (MP 41.8), Benson, Pierce, and Rolette Counties, N. Dak.—Station: Wolford—14.01; Rolette—27.76; Thorne—33.80; Dunseith—41.80.

Line Segment No. 24—Crete (MP 142.00) to Oakes (MP 149.50), Sargent and Dickey Ccunties, N. Dak.—Stations: None.

BN MAP NOS. 4 AND 5

All lines—Category 5.

BN MAP NO. 6

Line Segment No. 28 (also shown BN MP 26)—Silesia (MP 9.65) to Red Lodge (MP 44.17), Carbon County, Mont.—Stations: Rockvale—12.08; Montague—14.30; Joliet—17.70; Boyd—23.03; Roberts—31.62; Fox—37.55; Carbon Mine Spur—43.60; Red Lodge—44.24.

Line Segment No. 29—Moccasin (MP 0.00) to Lewistown (MP 30.68), Judith Basin and Fergus Counties, Mont.—Stations: Kolin—7.32; Rossfork—14.1; Kingston—20.19; Spring Creek Jct.—21.38; Hanover—70.2; Lewistown Jct.—62.2; Lewistown—61.9.

Line Segment No. 31—Saco (MP 0.10) to Hogeland (MP 77.40), Phillips and Blaine Counties, Mont.—Stations: Hogeland Jct.—0.10; Cole—6.87; Tattnall—13.41; Whitewater—24.01; Loring—36.95; Chapman—52.26; Turner—65.27; Hogeland—77.40.

BN MAP NO. 7

Line Segment No. 66 is a Category 3 line pending before the Commission.

BN MAP NO. 8

Line Segment No. 30—Haugan (MP 19.57) Mineral County, Mont., to Wallace (MP 58.61), Shoshone County, Idaho—Stations: Haugan—19.15; Saltese—24.40; Borax—33.35; Sohon—36.90; Lookout—38.42; State Line—38.45; Dorsey—42.1; Carbonite—43.50; Lucky Friday—49.5; Mullan—50.19; Morning—51.15; Golconda—54.3; Wallace—58.61.

BN MAP NO. 9

Line Segment No. 48—Palouse (MP 76.00) to Grinnell (MP 70.81), Whitman County, Wash.—Stations: Grinnell—70.81.

Line Segment No. 49—Spokane (MP 69.80) to Fairfield (MP 131.21), Spokane County, Wash.—Stations: Dishman and Spear.

Line Segment No. 51—Adrian (MP 126.24) to Odair (MP 106.70), Grant County, Wash.—Stations: Adco—125.7; Bacon—116.25.

Line Segment No. 52—Mt. Hope (MP 25.17) to Spring Valley (MP 39.96), Spokane County, Wash.,—Stations: West Fairfield—31.0; Waverly—34.1; Jefferson—36.55; Spring Valley—39.96.

Line Segment No. 53—Rosalia (MP 46.10) to Manning (MP 71.20), Whitman County, Wash.—Stations: Balder—50.6; Thornton—55.44; Cashup—59.65; Steptoe—64.65; Manning—71.12.

Line Segment No. 54—Spring Valley (MP 40.30) to Seabury (MP 47.75), Spokane and Whitman Counties, Wash.—Stations: Fairbanks—45.55; Seabury—47.75.

Line Segment No. 55—Palouse (MP 76.00), Whitman County, Wash., to Viola (MP 87.00), Latah County, Idaho—Stations: State Line—3.9; Viola—87.00.

BN MAP NO. 10

Line Segments Nos. 68 and 69 are Category 3 lines.

Line Segment Nos. 48, 53, and 55 are described with Map No. 9.

BN MAP NO. 11

Line Segment No. 50—Enumclaw (MP 9.69) to Cascade Junction (MP 17.02), King and Pierce Counties, Wash.—Stations: Buckley—12.8; Fitzer Bros. Spur—14.1.

Line Segment No. 56—Aloha (MP 96.36) to Moclips (MP 100.70), Grays Harbor County, Wash.—Stations: Moclips—100.4.

Line Segment No. 57—Clear Lake (MP 85.79) to Sedro Woolley (MP 83.05), Skagit County, Wash.—Stations: Clear Lake—83.3.

BN MAP NO. 12

Line Segment No. 58—Spokane, Portland & Seattle Railway Company, Camp Clatsop (MP 108.59) to Seaside (MP 119.09), Clatsop County, Oreg.—Stations: Bayview Transit—116.1; Seaside—118.95.

Line Segment No. 59—Oregon Electric Railway Company within Forest Grove (MP 10.27) to end of branch (MP 10.86) and within Hillsboro, Oreg., between MP 2.83 and 4.56, all in Washington County, Oreg.—Stations: None.

BN MAP NO. 13

All lines—Category 5.

BN MAP NO. 14

Line Segment No. 14—Elk River (MP 2.50) to Princeton (MP 18.78), Sherburne and Mille Lacs Counties, Minn.—Stations: Zimmerman—9.5; Princeton—18.8.

Line Segment No. 17—Starbuck (MP 67.50) to Villard (MP 51.61), Pope County, Minn.—Stations: Villard—52.0; Glenwood—58.91.

Line Segment No. 18—White Bear Lake (MP 0.00) to Duluth Jct. (MP 6.37), Ramsey and Washington Counties, Minn.—Stations: Mahtomedi—3.54.

BN MAP NO. 15

Line Segment No. 17—Starbuck to Villard—also shown on BN Map No. 14.

Line Segment No. 21—Oakes (MP 149.5) to Forbes (MP 63.0), Dickey County, N. Dak.—Stations: Guelph—34.66; Ellendale—49.17; Forbes—62.51.

Line Segment No. 26—Sioux Falls (MP 2.8) to Hayti (MP 85.26), Minnehaha, Lake, Brookings, Kingsbury, and Hamlin Counties, S. Dak.—Stations: Crooks—9.15; Lyons—14.8; Colton—20.61; Chester—28.19; Wentworth—35.80; Rutland—42.1; Nunda—47.79; Sinai—53.80; Arlington—63.47; Badger—73.03; Lake Norden—79.67; Hayti—85.26.

Line Segment No. 27—Sioux Falls (MP 150.-68) to Yankton (MP 208.80), Minnehaha, Lincoln, Turner, and Yankton Counties, S. Dak.—Stations: Tea—156.55; Lennox—163.32; Davis—171.95, Viborg—179.35; Irene—186.74; Volin—196.95; Mission Hill—201.7; Yankton—208.80.

BN MAP NO. 16

All lines—Category 5.

BN MAP NO. 17

Line Segment No. 1—Lass (MP 55.60) to Garden Plain (MP 59.63), Whiteside County, Ill.—Stations: Garden Plain—59.63.

Line Segment No. 2—Aledo (MP 38.40) to Joy (MP 45.18), Mercer County, Ill.—Stations: Joy—44.54.

Line Segment No. 3—Bushnell (MP 161.10) to Roseville (MP 176.97), McDonough and Warren Counties, Ill.—Stations: Walnut Grove—165.9; Swan Creek—172.1; Roseville—176.85.

Line Segment No. 5—Bradford (MP 10.00) to Buda (MP 0.32), Stark and Bureau Counties, Ill.—Stations: Lombardville—7.1; Burnett—3.2; Buda—0.00.

Line Segment No. 7—Earlville (MP 7.21) to Baker (MP 13.72), La Salle County, Ill.—Stations: Baker—13.72.

Line Segment No. 10—Alpha (MP 18.62) to Woodhull (MP 14.36), Henry County, Ill.—Stations: Woodhull—14.62.

Line Segment Nos. 60, 61, and 62 are Category 3 lines.

BN MAP NO. 18

Line Segment No. 4—Vermont (MP 94.34) to Rushville (MP 109.69), Schuyler and Fulton Counties, Ill.—Stations: Rushville—109.48.

Line Segment No. 6—Vermont (MP 140.13) to Astoria (MP 133.02), Fulton County, Ill.—Stations: Astoria Branch Jct.—140.13; Amax Coal Co. Sun Spot Mine—139.5; Astoria—133.4.

Line Segment No. 11—E. Alton (MP 26.63) to Whitehall (MP 72.70), Greene, Macoupin, Madison, and Jersey Counties, Ill.—Stations: Wrights—65.45; Greenfield—60.64; Rockbridge—55.53; Medora—47.95; Plasa—43.6; Brighton—38.49; Alton Hospital—28.28.

Line Segment No. 45—Old Monroe (MP 51.60) to Mexico (MP 114.60), Lincoln, Warren, Montgomery, and Audrain Counties, Mo.—Stations: Ethlyn—56.25; Moscow—61.3; South Troy—65.5; Hawk Point—72.9; Bellflower—85.25; Buell—90.6; Wellsville—98.2; Haig—109.6; Francis—114.6, Mexico via Trackage Rights.

BN MAP NO. 19

Line Segment No. 2—Aledo to Joy—see BN Map No. 17.

Line Segment No. 8—East Quincy (MP 267.28) to Hulls (MP 279.90), Adams and Pike Counties, Ill.—Stations: Marblehead—269.44; East Hannibal—280.00; Hulls via Trackage Rights—7.0.

Line Segment No. 9—Quincy (MP 70.30) to Mendon (MP 55.77), Adams County, Ill.—Stations: Rock Creek—64.1; Ursa—61.2. Mendon—56.1.

Line Segment No. 40—Mediapolis (MP 15.51) to Washington (MP 52.64), Des Moines, Henry, Louisa, and Washington Counties, Iowa—Stations: Roscoe—20.55; Yarmouth—24.93; Mt. Union—28.35; Winfield—33.97; Wyman—36.6; Crawfordsville—42.43; Washington—52.50.

Line Segment No. 43—St. Joseph (MP 143.56) to Humeston (MP 16.92), including Giles to Mt. Lamoni, in Buchanan, Andrew, DeKalb, and Harrison Counties, Mo., and Decatur and Wayne Counties, Iowa—Stations: End of line—143.56; Helena—125.7; Union Star—119.66; King City—112.68; Darlington—99.16; Albany Junction—96.88; Albany—94.88; New Hampton—86.75; Bethany—77.85; Ridgeway—67.5; Blythedale—60.6; State line—52.5; Giles—49.31; Davis City—44.48; Leon—36.97; Garden Grove—23.68; Humeston—16.92; Lamoni—approximately 2 miles west of Giles.

Line Segment No. 44—West Quincy (MP 1.90) to Kirksville (MP 69.30), Marion, Lewis, Knox, and Adair Counties, Mo.—Stations: Taylor—6.55; Maywood—10.8; Ewing—18.12; Lewistown—26.05; LaBelle—31.8; Knox—37.2; Edina—46.6; Hurdland—53.4; Brashear—57.55; Kirksville Ag. Center—67.7; Kirksville—69.3.

Line Segment No. 45—Alexandria (MP 5.20), Clark, Scotland, and Schuyler Counties, Mo., to Centerville (MP 89.60), Appanoose County, Iowa—Stations: Wayland—12.4; Kahoka—20.0; Medill—23.3; Granger—34.2; Arbela—36.6; Memphis—45.1; Downing—56.35; Lancaster—65.75; Glenwood Jct.—69.0; State line—74.85; Centerville—89.6.

Line Segment No. 46—Old Monroe to Mexico—see BN Map No. 18.

Line Segment No. 47—Laclede (MP 181.73) to Unionville (MP 128.30), Linn, Sullivan, and Putnam Counties, Mo.—Stations: Linneus—174.6; Purdin—169.25; Browning—162.43; Milan—149.95; Unionville—128.3.

BN MAP NO. 20

Line Segment No. 33—Cooper Spur (MP 26.5) to Shubert (MP 11.23), Nemaha and Richardson Counties, Nebr.—Stations: Nemaha—28.45; Shubert—11.49.

Line Segment No. 34—Ashland (MP 19.00) to Prague (MP 31.42), Saunders County, Nebr.—Stations: Memphis—6.04; Ithaca—13.14; Wahoo—18.91; Malmo—25.58; Prague—31.40.

Line Segment No. 35—Pappio (MP 4.00) to Gilmore Jct. (MP 8.41), Sarpy County, Nebr.—Stations: Fort Crook—6.53.

Line Segment No. 36—Villisca (MP 52.82) to Clarinda (MP 67.80), Page and Montgomery Counties, Iowa—Stations: Hepburn—60.45; Clarinda—52.82.

Line Segment No. 37—Creston (MP 0.00), Adams, Union, and Taylor Counties, Iowa, to Maryville (MP 59.50), Nodaway County, Mo.—Stations: Kent—9.33; Lenox—17.27; Merle—24.78; Conway—27.63; Bedford—35.20; Hopkins—45.05; Pickering—52.17; Maryville—59.50.

Line Segment No. 38—Hastings (MP 0.00) to Randolph (11.50), Mills and Fremont Counties, Iowa—Stations: Clark—5.83; Randolph—11.45.

Line Segment No. 39—Merle (MP 196.13) to Clearfield (MP 189.42), Taylor County, Iowa—Stations: Clearfield—189.70.

Line Segment No. 41—Albany Jct. (MP 65.75) to Grant City (MP 45.66), Gentry and Worth Counties, Mo.—Stations: Gentry—57.45; Worth—52.2; Grant City—45.65.

Line Segment No. 42—Birmingham (MP 216.20) to Kearney (MP 199.07), Clay County, Mo.—Stations: Liberty—210.5; Kearney—200.3.

Line Segment No. 43—St. Joseph to Humeston—see BN Map No. 19.

Line Segment No. 67 is a Category 3 line.

would you like to know

if any changes have been made in certain titles of the CODE OF FEDERAL REGULATIONS without reading the Federal Register every day? If so, you may wish to subscribe to the "Cumulative List of CFR Sections Affected," the "Federal Register Index," or both.

Cumulative List of CFR Sections Affected
$10.00
per year

The "Cumulative List of CFR Sections Affected" is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register, and is issued monthly in cumulative form. Entries indicate the nature of the changes.

Federal Register Index $8.00
per year

Indexes covering the contents of the daily Federal Register are issued monthly, quarterly, and annually. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

Note to FR Subscribers: FR Indexes and the "Cumulative List of CFR Sections Affected" will continue to be mailed free of charge to regular FR subscribers.

Mail order form to:
Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402

There is enclosed $_____ for _____ subscription(s) to the publications checked below:

..... **CUMULATIVE LIST OF CFR SECTIONS AFFECTED ($10.00 a year domestic; $12.50 foreign)**

..... **FEDERAL REGISTER INDEX ($8.00 a year domestic; $10.00 foreign)**

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR
	HEW/ADAMHA			HEW/ADAMHA
	HEW/CDC			HEW/CDC
	HEW/FDA			HEW/FDA
	HEW/HRA			HEW/HRA
	HEW/HSA			HEW/HSA
	HEW/NIH			HEW/NIH
	HEW/PHS			HEW/PHS

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: For questions, corrections, or requests for information please see the list of telephone numbers appearing on opposite page.

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Valencia Orange Reg. 567]

PART 908—VALENCIA ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of California-Arizona Valencia oranges that may be shipped to fresh market during the weekly regulation period August 5–11, 1977. This regulation is needed to provide for orderly marketing of fresh Valencia oranges for the regulation period because of the production and marketing situation confronting the orange industry.

EFFECTIVE DATE: August 5, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–3545.

SUPPLEMENTARY INFORMATION: (a) *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and designated part of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of the recommendations and information submitted by the Valencia Orange Administrative Committee, established under the amended marketing agreement and order, and upon other available information, it is found that the limitation of handling of Valencia oranges, as provided in this regulation will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantities of Valencia oranges that may be marketed from District 1, District 2, or District 3 during the specified week stems from the production and marketing situation confronting the Valencia orange industry.

(i) The committee has submitted its recommendation for the quantities of Valencia oranges that should be marketed during the specified week. The recommendation, designed to provide equity of marketing opportunity to handlers in all districts, resulted from consideration of the factors covered in the order. The committee further reports the fresh market demand for Valencia oranges continues strong at somewhat easier prices.

Average f.o.b. price was $4.32 per carton on 562 cars for the week ended July 28, as compared with $4.15 per carton on 661 cars the previous week.

Track and rolling supplies at 419 cars were up 4 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantities of Valencia oranges which may be handled should be established as provided in this regulation.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this regulation until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information becomes available upon which this regulation is based and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient. A reasonable time is permitted for preparation for such effective time; and good cause exists for making the regulation effective as specified. The committee held an open meeting during the current week, after giving due notice, to consider supply and market conditions for Valencia oranges and the need for regulation. Interested persons were afforded an opportunity to submit information and views at this meeting. The recommendation and supporting information for regulation during the period specified were promptly submitted to the Secretary after the meeting was held, and information concerning such provisions and effective time has been provided to handlers of Valencia oranges. It is necessary, to effectuate the declared policy of the act, to make this regulation effective during the period specified. The committee meeting was held on August 2, 1977.

§ 908.867 Valencia Orange Regulation 567.

(b) Order. (1) The quantities of Valencia oranges grown in Arizona and designated part of California which may be handled during the period August 5, 1977, through August 11, 1977, are hereby fixed as follows:

(i) District 1: 260,000 cartons;

(ii) District 2: 390,000 cartons;

(iii) District 3: Unlimited.

(2) As used in this section, "handled", "District 1", "District 2", "District 3", and "carton" have the same meaning as when used in the amended marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: August 3, 1977.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-22704 Filed 8-3-77;12:52 pm]

[Lemon Reg. 102, Amdt. 2]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to Final Rule.

SUMMARY: This amendment increases the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period July 24–30, 1977. The amendment recognizes that demand for lemons has improved, since the regulation was issued. This action will increase the supply of lemons available to consumers.

DATES: Weekly regulation period July 24–30, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250; 202–447–3545.

SUPPLEMENTARY INFORMATION: (a) *Findings.* (1) Pursuant to the amended marketing agreement and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and upon the basis of recommendations and information submitted by the Lemon Administrative Committee, established under the marketing agreement and order, and other available information, it is found that the limitation of handling of lemons, as provided in this amendment will tend to effectuate the declared policy of the act.

(2) Demand in the lemon markets has improved since the regulation was issued. Amendment of the regulation is necessary to permit lemon handlers to ship a larger quantity of lemons to market to supply the increased demand. The amendment will increase the quantity

permitted to be shipped by 25,000 cartons, in the interest of producers and consumers.

(3) It is further found that it is impracticable and is contrary to the public interest to give preliminary notice, engage in public rulemaking procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, and this amendment relieves restrictions on the handling of lemons.

(b) *Order, as amended.* Paragraph (b) (1) of § 910.402 Lemon Regulation 102 (42 FR 37533; 39085) is amended to read as follows: "The quantity of lemons grown in California and Arizona which may be handled during the period July 24, 1977, through July 30, 1977, is established at 390,000 cartons."

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: July 29. 1977.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

PART 948—IRISH POTATOES GROWN IN COLORADO—AREA NO. 2

Expenses and Rate of Assessment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final Rule.

SUMMARY: This regulation authorizes expenses of $20,500 and establishes a rate of assessment of $.00328 per hundredweight of potatoes for the functioning of the Colorado Area No. 2 Potato Committee. This regulation enables the committee to collect assessments from first handlers on all assessable potatoes handled and use the resulting funds for its expenses.

EFFECTIVE DATE: July 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone: (202) 447–3545.

SUPPLEMENTARY INFORMATION: Marketing Agreement No. 97 and Order No. 948, both as amended, regulate the handling of potatoes grown in designated counties of Colorado. It is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Area No. 2 Committee, established under the order, is responsible for its local administration in Area No. 2, consisting of certain counties in Southern Colorado.

Notice was published in the July 13 FEDERAL REGISTER (42 FR 35987) inviting written comments by July 28, 1977. None was filed.

Findings. After consideration of all relevant matters, including the proposals in the notice, it is found that the following expenses and rate of assessment should be approved.

It is further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) because this part requires that the rate of assessment for a particular fiscal period shall apply to all assessable potatoes from the beginning of such period.

The regulation is as follows:

§ 948.278 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period ending June 30, 1978, by the Area No. 2 committee for its maintenance and functioning, and for such purposes as the Secretary determines to be appropriate will amount to $20,500.

(b) The rate of assessment to be paid by each handler in accordance with this part shall be $0.00328 per hundredweight or equivalent quantity of assessable potatoes handled by him as the first handler during the fiscal period.

(c) Unexpended income in excess of expenses for the fiscal period may be carried over as a reserve to the extent authorized in § 948.78.

(d) Terms used in this section have the same meaning as when used in the marketing agreement and this part.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: July 29, 1977.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-22373 Filed 8-3-77;8:45 am]

PART 958—ONIONS GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

Expenses and Rate of Assessment

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation authorizes expenses of $269,531 and establishes a rate of assessment of five and one-quarter cents per hundredweight of assessable onions for the functioning of the Idaho-Eastern Oregon Onion Committee for the 1977–78 fiscal period. The regulation enables the committee to collect assessments from first handlers on all assessable onions and to use the resulting funds for its expenses.

EFFECTIVE DATE: July 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone: (202) 447–3545.

SUPPLEMENTARY INFORMATION: Marketing Agreement No. 130 and Order No. 958, both as amended, regulate the handling of onions grown in certain designated counties in Idaho and Malheur County, Oregon. It is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Idaho-Eastern Oregon Onion Committee, established under the order, is responsible for its local administration.

Notice was published in the July 13 FEDERAL REGISTER (42 F.R. 35978) regarding the proposals. It afforded interested persons an opportunity to file written comments not later than July 28, 1977. None was filed.

After consideration of all relevant matters, including the proposals in the notice, it is found that the following expenses and rate of assessment should be approved.

It is further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) because this part requires that the rate of assessment for a particular fiscal period shall apply to all assessable onions from the beginning of such period.

The regulation is as follows:

§ 958.221 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period ending June 30, 1978, by the Idaho-Eastern Oregon Onion Committee for its maintenance and functioning, and for such purposes as the Secretary determines to be appropriate will amount to $269,531.

(b) The rate of assessment to be paid by each handler in accordance with this part shall be $0.0525 per hundredweight or equivalent quantity of assessable onions handled by him as the first handler during the fiscal period.

(c) Unexpended income in excess of expenses for the fiscal period may be carried over as a reserve to the extent authorized in § 958.44.

(d) Terms used in this section have the same meaning as when used in the marketing agreement and this part.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.)

Dated: July 29, 1977.

FLOYD F. HEDLUND,
Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-22372 Filed 8-3-77;8:45 am]

PART 967—CELERY GROWN IN FLORIDA

Handling Regulation

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This handling regulation establishes the quantity of Florida celery to be marketed fresh during the 1977–78 season, with the objective of assuring adequate supplies and orderly marketing.

EFFECTIVE DATE: August 5, 1977.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250, telephone 202–447–3545.

SUPPLEMENTARY INFORMATION: Marketing Agreement No. 149 and Order No. 967, both as amended (7 CFR Part 967) regulate the handling of celery grown in Florida. It is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Florida Celery Committee, established under the order, is responsible for local administration.

Notice was published in the July 11 FEDERAL REGISTER (42 FR 35656) inviting written comment by July 26, 1977. None was received.

This regulation is based upon the unanimous recommendations made by the committee at its public meeting in Orlando on June 15.

The committee recommended a Marketable Quantity of 8,082,572 crates of fresh celery for the 1977–78 season. This recommendation is based on the appraisal of the expected supply and prospective market demand for the 1977–78 season.

During the past decade, planted acreage in Florida has ranged between 12,200 and 13,000 acres per season. Yield is variable, mainly in response to weather, although unfavorable market conditions may sometimes reduce average output per acre. The 3.8 million hundredweight produced in 1976–77 was 4 percent below the previous season and the 1968–69–72–73 average. The relatively small crop reflected the late January freeze which damaged the outer parts of plants and reduced yield per acre.

The recommended 8.1 million crate Marketable Quantity is one-third more than the under 6 million crates expected to be marketed during the current season ending July 31, 1977. Each producer registered pursuant to § 967.37(f) would have an allotment equal to 100 percent of his historical marketings. This recommendation provides the industry an opportunity to (1) produce to its fullest capacity for the benefit of the consumer, and (2) determine its actual or potential maximum production capacity.

With no valid applicants for new or increased Base Quantities, no reserve is recommended for additional Base Quantities under § 967.37(d)(1).

Findings. On the basis of all considerations it is believed that this regulation will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) notice was given of the handling regulation set forth in this section through publicity in the production area and by publication in the July 11 FEDERAL REGISTER, (2) as provided in the marketing agreement and order, this regulation applies to celery marketed during the 1977–78 season, (3) compliance with this section will not require any special preparation by handlers which cannot be completed prior to the time actual handling of harvested celery begins, approximately the latter part of October, (4) prompt issuance of this regulation will be beneficial to all interested persons because it should afford producers and handlers maximum time to plan their operations accordingly, and (5) no useful purpose will be served by postponing such issuance.

The regulation is as follows:

§ 967.313 Handling regulation; Marketable Quantity; and Uniform Percentage for the 1977–78 Season Ending July 31, 1978.

(a) The Marketable Quantity is established under § 967.36(a) as 8,082,572 crates of celery.

(b) As provided in § 967.38(a), the Uniform Percentage shall be 100 percent.

(c) Pursuant to § 967.36(b), no handler shall handle any harvested celery unless it is within the Marketable Allotment of a producer who has a Base Quantity and such producer authorizes the first handler thereof to handle it.

(d) No reserve for Base Quantities is established for the 1977–78 season.

(e) Terms used herein shall have the same meaning as when used in the said marketing agreement and order.

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674).)

Dated August 1, 1977, to become effective August 5, 1977.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.77-22478 Filed 8-3-77;8:45 am]

CHAPTER XVIII—FARMERS HOME ADMINISTRATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS AND GRANTS PRIMARILY FOR REAL ESTATE PURPOSES

[FmHA Instruction 444.5]

PART 1822—RURAL HOUSING LOANS AND GRANTS

Subpart D—Rural Rental Housing Loan Policies, Procedures, and Authorizations

OBLIGATIONS INCURRED BEFORE LOAN CLOSING

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: This change is made to include additional circumstances under which obligations incurred prior to loan closing may be paid from loan funds. The intended effect is to allow RRH projects under these circumstances to obtain temporary financing from nonprofit organizations or public agencies.

EFFECTIVE DATE: August 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Mr. Paul R. Conn, 202–447–7207.

SUPPLEMENTARY INFORMATION: Paragraph (c)(1) of § 1822.86, Subpart D, Part 1822 of Title 7, Code of Federal Regulations (40 FR 4278; 41 FR 13932) is amended to allow payments of obligations incurred prior to the date the applicant filed a written application for a loan with FmHA as part of a predevelopment loan specifically intended as temporary financing from a public agency or nonprofit organization, and when prior concurrence of the National Office is obtained. It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. This amendment, however, is not published for proposed rulemaking since the purpose of the change is to allow greater latitude in the payment of obligations incurred prior to loan closing, and any delay could be contrary to the public interest.

As amended, § 1822.86(c)(1) reads as follows:

§ 1822.86 Limitations.

* * * * *

(c) *Obligations incurred before loan closing.* * * *

(1) The debts were incurred: After the applicant filed a written application for a loan with FmHA; or after the submission of a preliminary proposal to the Department of Housing and Urban Development (HUD) in the case of a project involving Section 8 Housing Assistance Payment Program with a loan made in compliance with this subpart; or prior to the date of application as part of a predevelopment loan specifically intended as temporary financing from a public agency or nonprofit organization and prior concurrence of the National Office is obtained.

* * * * *

(42 U.S.C. 1480; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A-107.

Dated: July 28, 1977.

GORDON CAVANAUGH,
Administrator, Farmers Home Administration.

[FR Doc.77-22479 Filed 8-3-77;8:45 am]

[FmHA Instruction 444.5]

PART 1822—RURAL HOUSING LOANS AND GRANTS

Subpart D—Rural Rental Housing Loan Policies, Procedures and Authorizations

MISCELLANEOUS REVISIONS

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration is revising several provisions in its regulations to clarify and provide uniformity, in deferred loan principal payments, and in the date and frequency of accrued interest payments. The amendment requires that compliance with Title VI of the Civil Rights Act of 1964 be extended for as long as the property continues to be used for the same purpose for which the loan was made or for so long as the purchaser owns it, whichever is longer. The rule also requires that regular amortized payments of interest and principal be scheduled for monthly payments for all Section 515 loans, with exceptions in cases of deferred principal payments during construction periods. These revisions are intended to alleviate inconsistencies.

DATE: Effective date: These revisions are effective on August 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Paul R. Conn, Director; George Daellenbach, Multiple Housing Loan Officer, 202–447–7207.

SUPPLEMENTARY INFORMATION: The Farmers Home Administration is revising §§ 1822.88(b), 1822.95 (b)(1) and (c) of Subpart D of Part 1822, Chapter XVIII, Title 7, Code of Federal Regulations (40 FR 4278, 42 FR 4407–4408; 42 FR 21268). It is the policy of this Department that rules relating to public property, loans, grants, benefits, or contracts shall be published for comment notwithstanding the exemption in 5 U.S.C. 553 with respect to such rules. These revisions are not published for proposed rulemaking since the changes in payment regulations are not substantial, but are intended to provide clarity and uniformity for all Section 515 loans; and the revision concerning Civil Rights compliance is necessary to extend this compliance, and any delay would be contrary to public interest.

Accordingly, as revised §§ 1822.88(b) and 1822.95 (b)(1) and (c) read as follows:

§ 1822.88 Special conditions.

* * * * *

(b) *Deferred principal payments.* (1) When necessary and advisable, principal payments may be deferred for the first full year or the first full two years after loan closing. Payments for accured interest cannot be deferred.

(i) When interim financing is used, it should not be necessary to defer principal payments.

(ii) When multiple advances are used, principal payments should not be deferred beyond the first annual anniversary date of the note following the anticipated date of construction completion since payments are deferred only to permit the project to be completed.

(2) Monthly payments of accrued interest should be implemented beginning the month construction is completed. However, if the project is not completed by the date of the interest only payment(s) as shown on the note, the note date(s) will determine the time of the interest only payment. (See Forms Manual Insert (FMI) for Form FmHA 440–16 for payment schedule.)

§ 1822.95 Loan closing.

* * * * *

(b) *Mortgage.* * * *

(1) The mortgage or other instrument will contain the following covenant:

> The property described herein was obtained or improved through Federal financial assistance. This property is subject to the provisions of Title VI of the Civil Rights Act of 1964 and the regulations issued pursuant thereto for so long as the property continues to be used for the same or similar purpose for which financial assistance was extended or for so long as the purchaser owns it, whichever is longer.

* * * * *

(c) *Promissory note.* (1) Form FmHA 440–16, "Promissory Note," will be used. Regular amortized payments for principal and interest will be scheduled on a monthly basis. Instructions for preparation in the FMI for the note will be followed.

(2) The amount to be shown in the note will be the same as shown on Form FmHA 440–1. The note will be dated the date of loan closing except as authorized in § 1807.2(f)(8) of this chapter.

(3) Payments on RRH loans will be scheduled on the note in accordance with the FMI. As provided in § 1822.88(b), the principal installments during the first and second years after loan closing may be deferred.

(42 U.S.C. 1480; delegation of authority by the Sec. of Agri., 7 CFR 2.23; delegation of authority by the Asst. Sec. for Rural Development, 7 CFR 2.70.)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: July 22, 1977.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

[FR Doc.77–22480 Filed 8–3–77;8:45 am]

SUBCHAPTER N—OTHER LOAN PROGRAMS

[FmHA Instruction 1980–E]

PART 1980—GUARANTEED LOAN PROGRAMS

Subpart E—Business and Industrial Loan Program

MISCELLANEOUS AMENDMENTS

AGENCY: Farmers Home Administration, USDA.

ACTION: Final rule.

SUMMARY: The Farmers Home Administration amends its regulations concerning some Administrative Provisions of the B&I program. These changes are required by changes in internal processing and are intended to expedite loan handling.

EFFECTIVE DATE: August 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Darryl H. Evans, Loan Specialist, telephone 202–447–4150.

SUPPLEMENTAL INFORMATION: Various sections of Subpart E of Part 1980, Chapter XVIII, Title 7, Code of Federal Regulations (42 FR 12145) are amended. Section 1980.424 is amended to add a new administrative section which provides examples to clarify procedures for lenders structuring a financial package under the multi-note option to sell the guaranteed loan in the secondary market.

Paragraphs (b) and (c) of § 1980.451 are revised to incorporate new cross references for memorandums of understanding between FmHA and Farm Credit Administration and Small Business Administration. Paragraph D.5. under the heading "Administrative" in § 1980.452 is revised to conform the FmHA procedure for obligating funds for loans to the procedure outlined on the forms.

Section 1980.454 is revised to add a new subsection (c) which will allow the FmHA State Director to issue a Loan Note Guarantee to a lender when specialized machinery, etc., needs to be ordered in advance for future delivery. Paragraph B under the heading "Administrative" in § 1980.470 is deleted. This procedure for purchasing guaranteed portions of a loan in event of default was added to Subpart A of Part 1980. It is the policy of this Department that rules relating to public property, loans, grants benefits, or contracts shall be published for comment notwithstanding the exemption of 5 U.S.C. 553 with respect to such rules. This amendment, however, is not published for proposed rulemaking since the changes are basically procedural and do not impose any additional burden on the applicants and lenders.

Accordingly, Subpart E of Part 1980 is amended as follows:

1. A new administrative section is added following paragraph (c) of § 1980.424 to read as follows:

§ 1980.424 Terms of loan repayment.

* * * * *

ADMINISTRATIVE

It is permissible for lenders to structure the borrower's financial proposal under the multi-note option as provided for in paragraph III A.2. of Form FmHA 449–35, "Lender's Agreement" in the following ways:

A. To treat the entire financial package of the borrower as one loan (i.e. loan purposes may include one or any combination of working capital, machinery and equipment, or real estate): *Provided:*

1. The loan is amortized to provide repayment of the working capital portion within 7 years, the machinery and equipment portion within useful life or 15 years, whichever is less, and real estate portion within 30 years.

2. One note represents the unguaranteed portion of the loan. It is permissible to issue as many as 10 notes on the guaranteed portion of the loan.

3. A Form FmHA 449–34, "Loan Note Guarantee" is attached to all notes including the unguaranteed note.

4. One interest rate (either variable or fixed) is used for the entire loan or one interest rate is used on the guaranteed portion and a different interest rate is used on the unguaranteed portion, subject to the requirements and conditions found in § 1980.423.

5. Only one Form FmHA 449–14, 440–1, "Request for Obligation of Funds," 449–35, and 449–19 is used.

B. To treat the financial package of the borrower as separate loans that are processed as a single application: *Provided:*

1. A separate loan is made for each purpose (i.e. working capital, machinery and equipment or real estate. As an example, a working capital loan could be structured as follows:

One note for $XXXX at X% interest due in 7 years representing the unguaranteed portion of the loan, and

Up to 10 notes for $XXXX at X% interest due in 7 years representing the guaranteed portion of the loan.

2. A Form FmHA 449–34 is attached to all notes, including the unguaranteed note.

3. A different interest rate may be used on the guaranteed and unguaranteed portions of the loan, subject to the requirements and conditions found in § 1980.423.

4. Separate Forms FmHA 449–14, 440–1, 449–35, and 449–19, are required for each loan. If you had two loans, one for working capital and another for real estate, then a set of these forms will be required for each loan.

C. Form FmHA 449–36, "Assignment Guarantee Agreement" will never be used when the multi-note option is utilized.

2. In § 1980.425 the last sentence at the end of paragraph (b) is revised to read as follows:

§ 1980.425 Availability of credit from other sources.

* * * * *

(b) * * * The applicant's inability to obtain such credit elsewhere will be determined in accordance with Subpart A of Part 1933 of this chapter.

* * * * *

3. In § 1980.451 a new sentence is added at the end of paragraph (b) and the last sentence of paragraph (c) is revised to read as follows:

§ 1980.451 Filing and processing applications.

* * * * *

(b) *Applications from cooperatives.* * * * (See FmHA Instruction 2000–Q, available in any FmHA office, for memorandum of understanding between FmHA and Farm Credit Administration.)

(c) *Applicants eligible for Small Business Administration (SBA) assistance.* * * * (See FmHA Instruction 2000–P, available in any FmHA office, for memorandum of understanding between SBA and FmHA.)

* * * * *

4. In § 1980.452, paragraph D.5, under "Administrative" is revised to read as follows:

§ 1980.452 FmHA Evaluation of application.

* * * * *

ADMINISTRATIVE

* * * * *

D. * * *

* * * * *

5. The State Director will obligate funds or authority for the project by preparing Form FmHA 440–1, in an original and three copies for each loan to be obligated. The State Director will sign the original and one copy and conform two copies. The first copy will be forwarded to the Finance Office and the other copies will be held pending notification from the Finance Office that guarantee or insurance authority is available. The Finance Office will reserve funds or authority for the project and notify the State Director of such reservation by forwarding the original and one copy of Form FmHA 440–57, "Acknowledgement of Obligated Funds/Check Request." Unless the State Director notifies the Finance Office to cancel the reservation or to complete obligation at an earlier date, the Finance Office will complete the obligation on the 15th working day following the date of Form FmHA 440–57. The State Director will time his report to the National Office as required by FmHA Instruction 2015–C in order that notification required by that Instruction will be accomplished and the applicant (for an insured loan) or the lender (for a guaranteed loan) can be informed of a loan approval not later than the date of obligation. Notice of approval to the applicant or lender will be accomplished by providing the applicant or lender with the signed copy of Form FmHA 440–1 and a copy of Form FmHA 449–14, unless the National Office has given prior written authorization to forward Form FmHA 449–14 to the applicant or lender in advance of issuance of Form FmHA 440–1. The State Director or his designee will record the actual date of applicant or lender notification on the original Form FmHA 440–1 which will become a permanent part of the county office loan file. The State Director may retain the remaining copy of Form FmHA 440–1.

* * * * *

5. In § 1980.454 a new paragraph (c) is added and paragraph 2 under "Administrative" is revised and reads as follows:

§ 1980.454 Conditions precedent to issuance of the Loan Note Guarantee.

* * * * *

(c) *Ordering specialized items.* An exception to the provisions of § 1980.60(a)(2) may be made by the State Director when machinery, equipment, or other specialized items need to be ordered in advance for future delivery. It would be permissible for the lender to finance these purchases with a separate loan for which FmHA would issue a Loan Note Guarantee when the purchase order is placed by the lender: *Provided,* The lender can properly secure such loan(s). Lenders will notify the State Director in writing of such request with details at the time the application is filed with FmHA.

ADMINISTRATIVE

1. * * *

2. Plans for inspection made on construction projects. These should be coordinated with the lender and borrower. (See Appendix B of FmHA Instruction 1933–A). Form FmHA 424–12, "Inspection Report" may be used by the County Supervisor who will make the majority of the inspections. However, the District Director, Engineer, or B&I Chief may also make inspections as designated by the State Director. Copies are to be furnished the County Supervisor. Any other special servicing requirements should be added to the Lender's Loan Agreement.

* * * * *

§ 1980.470 [Amended]

6. In §1980.470, paragraph A. under "Administrative" is amended to delete the designation "A." at the beginning of the paragraph and paragraph B is deleted in its entirety including Subparagraphs B. 1., 2., 3. and 4.

§ 1980.471 [Amended]

7. In § 1980.471, paragraph B. under "Administrative" the first sentence is amended by inserting the words "is not likely to" for "likely not" between the words "plan" and "result", paragraph D, the first sentence is amended by inserting the words "Loan Note Guarantee Report of Loss" between "449–30" and "in" and the second sentence is amended to read "The State Director will submit to the Finance Office for payment any loss claims of the lender on Form FmHA 449–30." * * *.

* * * * *

(7 U.S.C. 1989; order of Secretary of Agriculture, 7 CFR 2.23; order of Assistant Secretary of Agriculture for Rural Development, 7 CFR 2.70.)

NOTE.—The Farmers Home Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821 and OMB Circular A–107.

Dated: July 26, 1977.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

Title 10—Energy

CHAPTER I—NUCLEAR REGULATORY COMMISSION

PART 71—PACKAGING OF RADIOACTIVE MATERIAL FOR TRANSPORT AND TRANSPORTATION OF RADIOACTIVE MATERIAL UNDER CERTAIN CONDITIONS

Quality Assurance Requirements for Transport Packages

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Final rule.

SUMMARY: The Nuclear Regulatory Commission is amending its regulations for packaging of radioactive material for transportation and transportation of radioactive material. The amendments would upgrade requirements for quality assurance in the design, fabrication, assembly, testing, use, and maintenance of packagings for shipping and transporting licensed radioactive material. The amendments would also revoke, subject to a timely application for reapproval, the present authority for licensees to use certain shipping casks for solid irradiated nuclear fuel which had been approved under criteria used before the current standards in these regulations were adopted.

EFFECTIVE DATE: October 18, 1977.

NOTE.—The Nuclear Regulatory Commission has submitted this rule to the Comptroller General for such review as may be appropriate under the Federal Reports Act, as amended, 44 U.S.C. 3512. The date on which the reporting requirement of this rule becomes effective, unless advised to the contrary, accordingly reflects inclusion of the 45-day period which that statute allows for such review (44 U.S.C. 3512(c)(2)).

FOR FURTHER INFORMATION CONTACT:

Mr. Donald R. Hopkins, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555; phone 301-443-6910.

SUPPLEMENTARY INFORMATION: On December 28, 1973, the Atomic Energy Commission published in the FEDERAL REGISTER (38 FR 35490) proposed amendments to 10 CFR Part 71 of its regulations. Interested persons were invited to submit written comments and suggestions. Further action on the proposed rule was delayed almost three years while developing acceptable methods of implementation.

COMMENTS RECEIVED

COMMENTS ON PROPOSED RULE

Comments were received from ten persons who manufacture or use the shipping packages which were the subject of the proposed amendments, and from one state regulatory agency. Most of the comments urged clarification, modification, or deletion of specific provisions of the proposed rule.

COMMENTS ON PROPOSED SPECIFIC TESTS

More than half the comments were concerned with the proposed provisions of § 71.53, "Initial determinations and tests." The comments were varied and concerned the clarity and appropriateness of the proposed requirements and their applicability to certain types of packages. The Commission recognizes the validity of those comments and has not adopted those requirements in the amendments which follow. Further consideration will be given to such requirements after experience is gained in their application as license conditions in appropriate cases.

A number of comments were submitted with respect to the proposed addition of specific tests in § 71.54, "Routine determinations." Many of these are reflected in the amendments adopted. Some comments noted that certain tests, and in particular those relating to pressure relief devices, should be tailored to the package design. The wording of § 71.54(h) and of "quality assurance program bases" in section 2 of Appendix E permit the tests and determinations to be fashioned around the package design and the safety function which the design features provide.

COMMENTS ON IDENTIFYING RESPONSIBLE INDIVIDUAL

Some comments questioned the need to submit the title and qualifications of the individual in the applicant's organization who is responsible for assuring that packages have been prepared in accordance with all applicable requirements, as would have been required by proposed § 71.24(b). Since it is recognized that a licensee's entire management is responsible for licensed activities, the requirement has been deleted.

COMMENTS ON "GRANDFATHER CLAUSE" IN § 71.41

A number of commenters misunderstood the proposed amendment of § 71.41 and judged it to retroactively impose quality assurance requirements, including records, on the construction of irradiated fuel casks fabricated during the 1961-1967 period. This is not the purpose of the amendment. Present § 71.41 has provided a "grandfather clause" authority for the use of irradiated solid nuclear fuel casks which were constructed prior to 1967 before the current packaging standards became effective. The proposed changes to § 71.41 would phase out this "grandfather clause" authority. The proposed changes deal with the design characteristics of these old casks and the extent to which those characteristics satisfy the present packaging standards. The proposed changes are unrelated to the proposed quality assurance provisions in the notice of proposed rule making.

COMMENTS ON RESPONSIBILITY FOR QUALITY ASSURANCE

A number of commenters suggested that clarification be provided as to whether the package manufacturer or the licensee is responsible for providing information to the Commission on specific aspects of quality assurance, and as to who is responsible for carrying out those specific aspects of quality assurance in the manufacture and use of the package.

The licensee who is the applicant for the package approval provides the descriptions of quality assurance programs governing the manufacture and use of the package. If the package is approved by the Nuclear Regulatory Commission for use in the transportation of radioactive material, a package approval is issued which incorporates the package description and identification, its safety evaluation, and a description of the applicant's specific quality assurance provisions for design, fabrication, assembly, testing, use, and maintenance of the package. In the absence of reasons to the contrary, the package approval will be issued for use by any licensee who possesses the applicable documents incorporated by reference into the package approval, who has had his general quality assurance program approved by the Commission, and who will adhere to the conditions of the package approval. The authority for any licensee to use the package once it is approved is contained in the general license in 10 CFR Part 71, § 71.12, "General License for Shipment in DOT specification containers, in packages approved for use by another person, and in packages approved by a foreign national competent authority." The general license requires that each licensee who uses the general license register his name and certain other information with the Commission prior to the first use of the package and have a quality assurance program approved by the Commission.

A licensee who uses a package under the authority of the general license in § 71.12 must comply with the provisions of the general license. One provision of the general license, as clarified by the amendments which follow, is that the licensee use approved packages only in accordance with a quality assurance program which has been approved by the Commission. Another provision of the general license is that the package be used in accordance with the terms and conditions of the package approval. Quality assurance requirements specific to the particular package design would be specified in the package approval. A licensee's quality assurance program for the use of packages in transportation would then consist of the following:

1. The general provisions which satisfy to the extent necessary each of the applicable criteria of Appendix E of Part 71. These general provisions would apply to the use, testing, and maintenance of any package (and its design and fabrication if applicable), and such general provisions would have to be approved by the Commission; and

2. The specific provisions specified or referenced in the package approval which are applicable to the particular package design.

A licensee who delivers licensed material to a carrier for transport under the authority of § 71.12 must be assured that the package is as described in the package approval, and that it is used, tested, and maintained in accordance with both the general and specific portions of the approved quality assurance program. While information may be submitted by any interested person to the

Commission in support of an application for package approval, it is the licensee who delivers a package of radioactive material to a carrier who must assure himself and the Commission that the quality assurance program, on which approval of the package design is based, has been followed.

COMMENTS ON GENERAL PROVISIONS IN APPENDIX E

A number of commenters suggested changes in the provisions of proposed Appendix E to Part 71, which contains the general provisions relative to all package quality assurance programs. It was observed that proposed Appendix E was patterned closely after Appendix B of 10 CFR Part 50, "Licensing of Production and Utilization Facilities." Comments were offered that transportation packages differ in many ways from nuclear facilities, and that the same quality assurance provisions should not be applied to both. However, the quality assurance provisions of proposed Appendix E are general in nature and with minor modifications are applicable to a wide variety of types of quality assurance programs. Flexibility in applying the provisions of Appendix E, section 2, "Quality Assurance Program" has been emphasized by the second paragraph of that section dealing with the importance, complexity, and other characteristics of the package or component to be controlled. While some suggested clarifications of Appendix E have been adopted, the general requirements of that Appendix, parallel to the general requirements of Appendix B of Part 50, have been retained. (Under § 71.51(d), a licensee may use a Commission approved quality assurance program, based on Appendix B of 10 CFR Part 50, which is established, maintained and executed with regard to transport packages.) As with the Part 50 requirements, more specific package quality assurance guidelines will be developed and published in the form of Regulatory Guides, beginning in FY 78. The comments which have been offered with respect to Appendix E will be further considered in connection with these guidelines.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and sections 552 and 553 of Title 5 of the United States Code, the following amendments to Title 10, Chapter I, Code of Federal Regulations, Part 71, are published as a document subject to codification. The Commission invites all interested persons who desire to submit written comments or suggestions in connection with the amendments to send them to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, by October 18, 1977. Consideration will be given such submissions with the view to possible further amendments. Copies of comments may be examined in the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

1. The introductory language to § 71.12 is amended to read as follows:

§ 71.12 General license for shipment in DOT specification containers, in packages approved for use by another person, and in packages approved by a foreign national competent authority.

A general license is hereby issued to persons holding a general or specific license issued pursuant to this chapter, to deliver licensed material to a carrier for transport, provided the licensee has a quality assurance program, whose description has been submitted to and approved by the Commission as satisfying the provisions of § 71.51.

* * * * *

2. Paragraph (c) of § 71.21 is amended to read as follows:

§ 71.21 Contents of application.

* * * * *

(c) An identification of the proposed program of quality assurance as required by § 71.24;

3. Section 71.24 is amended to read as follows:

§ 71.24 Quality assurance.

(a) The applicant shall identify his approved quality assurance program to be applied to the design, fabrication, assembly, testing, maintenance, repair, modification, and use of the proposed packaging.

(b) The applicant shall identify any established codes and standards proposed for use in package design, fabrication, assembly, testing, maintenance, and use. In the absence of such codes and standards, the applicant shall describe the basis and rationale used to formulate the package quality assurance program.

(c) The applicant shall identify any specific provisions to be contained in his quality assurance program which are applicable to the particular package design under consideration.

4. Section 71.41 is amended to read as follows:

§ 71.41 Previously constructed packages for irradiated solid nuclear fuel.

(a) Notwithstanding any other provisions of this subpart, a package, the use of which has been authorized by the Atomic Energy Commission for the transport of irradiated solid nuclear fuel on or after September 23, 1961, and which has been completely constructed prior to January 1, 1967, shall be deemed to comply with the package standards of this subpart for that purpose, except as otherwise provided in paragraph (b).

(b) The holder (licensee) of the specific approval providing the authority specified in paragraph (a) shall, within 6 months after October 18, 1977, file a consolidated application for a superseding approval for the use of such packages, demonstrating that the packages satisfy the package standards of this subpart. If the licensee fails to submit such an application, the provisions of paragraph (a) and the authority granted by the approval to deliver the material to a carrier for transport in such packages shall expire at the end of that 6 month period. The Commission may issue a new approval superseding the existing approval, may confirm the existing approval with or without modification, or may deny the application in whole or in part and terminate the existing approval in whole or in part. If modification of the design of a package being used under the authority of this section in effect prior to October 18, 1977, is proposed by a licensee in his application for a superseding approval in accordance with this paragraph, the licensee shall designate in his application the time period needed to modify the package(s) after approval by the Commission.

5. Section 71.51 is amended to read as follows:

§ 71.51 Establishment and maintenance of a quality assurance program.

(a) The licensee shall establish, maintain and execute a quality assurance program satisfying each of the applicable criteria specified in Appendix E, "Quality Assurance Criteria for Shipping Packages for Radioactive Material," and satisfying any specific provisions which are applicable to the licensee's activities including procurement of packaging. The description of the quality assurance program shall include a discussion of which requirements of Appendix E are applicable and how they will be satisfied.[1] A description of that program shall be filed, in accordance with this section, by July 1, 1978, with the Director, Office of Nuclear Material Safety and Safeguards, Nuclear Regulatory Commission, Washington, D.C. 20555. If a person has filed such a description, the continued use of his existing quality assurance program is authorized until the acceptability of the program has been finally determined by the Commission.

(b) The provisions of this paragraph deal with packages which have been approved for use in accordance with this part prior to July 1, 1978, and which have been designed in accordance with the provisions of this part in effect at the time of package approval. Notwithstanding the provisions of paragraph (a) of this section, such packages shall be deemed to have been designed in accordance with a quality assurance program which satisfies the provisions of paragraph (a) of this section.

(c) The provisions of this paragraph deal with packages which have been approved for use in accordance with this part prior to July 1, 1978, have been at least partially fabricated prior to that date, and which have been fabricated in accordance with the provisions of this part in effect at the time of package approval. Notwithstanding the provisions of paragraph (a) of this section, such packages shall be deemed to have been fabricated and assembled in accordance

[1] The pertinent requirements of Appendix E should be applied in a graded approach, i.e., applied to an extent consistent with their importance to safety as described in section 2 of Appendix E.

with a quality assurance program which satisfies the provisions of paragraph (a) of this section.

(d) A Commission-approved quality assurance program which satisfies the applicable criteria of Appendix B of Part 50, of this chapter and which is established, maintained, and executed with regard to transport packages shall be deemed to satisfy the requirements of paragraph (a) of this section.

6. New paragraphs (g), (h), and (i) are added to § 71.54 to read as follows:

§ 71.54 Routine determinations.

Prior to each use of a package for shipment of licensed material, the licensee shall ascertain that the package with its contents satisfies the applicable requirements of Subpart C and of the license, including determinations that:

* * * * *

(g) Space provided for contained expansion of liquid coolant or a liquid shielding medium is adequate, and the systems for the liquid coolant and the liquid shielding medium are leaktight.

(h) The pressure relief valve or valves are operable, and set in accordance with written procedures.

(i) The package has been loaded and closed in accordance with written procedures.

7. In § 71.62 a new paragraph (c) is added and paragraph (a)(10) is amended to read as follows:

§ 71.62 Records.

(a) The licensee shall maintain for a period of 2 years after its generation a record of each shipment of fissile material and of each shipment of more than a type A quantity of radioactive material, as defined in § 71.4(q), in a single package, showing, where applicable:

* * * * *

(10) Results of the determinations required by § 71.54.

* * * * *

(c) The licensee shall maintain, during the life of the packaging to which they pertain, sufficient quality assurance records to furnish documentary evidence of the quality of packaging components which have safety significance, and of services affecting such quality, including records of the results of the determinations required by § 71.53, and of monitoring, inspection and auditing of work performance during the design, fabrication, assembly, testing, modification, maintenance, and repair of the packaging.

8. A new paragraph (c) is added to § 71.63 to read as follows:

§ 71.63 Inspections and tests.

* * * * *

(c) The licensee shall notify the Director of Inspection and Enforcement, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, at least 45 days prior to fabrication of a package to be used for the shipment, in that single package, of radioactive material having a decay heat load in excess of 5 kW or with an operating pressure in excess of 15 psig.

9. A new Appendix E is added to read as follows:

APPENDIX E—QUALITY ASSURANCE CRITERIA FOR SHIPPING PACKAGES FOR RADIOACTIVE MATERIAL

Introduction.—In accordance with § 71.24, every applicant for an approval for use of a shipping package is required to describe his quality assurance program, and every licensee is required by § 71.51 to establish and maintain a quality assurance program for the design, fabrication, assembly, testing, use, and maintenance of each packaging, as defined in § 71.4(1).

This appendix establishes quality assurance requirements which apply to all activities affecting the components of the packaging which are significant to safety. These activities include designing, purchasing, fabricating, handling, shipping, storing, cleaning, assembling, inspecting, testing, operating, maintaining, repairing, and modifying.

As used in this appendix, "quality assurance" comprises all those planned and systematic actions necessary to provide adequate confidence that a system or component will perform satisfactorily in service. Quality assurance includes quality control, which comprises those quality assurance actions related to control of the physical characteristics and quality of the material or component to predetermined requirements.

1. ORGANIZATION

The licensee[1] shall be responsible for the establishment and execution of the quality assurance program. The licensee may delegate to others, such as contractors, agents, or consultants, the work of establishing and executing the quality assurance program, or any part thereof, but shall retain responsibility therefor. The authority and duties of persons and organizations performing activities affecting the safety-related functions of structures, systems, and components shall be clearly established and delineated in writing. These activities include both the performing functions of attaining quality objectives and the quality assurance functions. The quality assurance functions are those of (a) assuring that an appropriate quality assurance program is established and effectively executed and (b) verifying, such as by checking, auditing, and inspection, that activities affecting the safety-related functions have been correctly performed. The persons and organizations performing quality assurance functions shall have sufficient authority and organizational freedom to identify quality problems; to initiate, recommend or provide solutions; and to verify implementation of solutions. Such persons and organizations performing quality assurance functions shall report to a management level such that this required authority and organizational freedom, including sufficient independence from cost and schedule when opposed to safety considerations, are provided. Because of the many variables involved, such as the number of personnel, the type of activity being performed, and the location or locations where activities are performed, the organizational structure for executing the quality assurance program may take various forms provided that the persons and organizations assigned the quality assurance functions have the required authority and organizational freedom. Irrespective of the organizational structure, the individual(s) assigned the responsibility for assuring effective execution of any portion of the quality assurance program at any location where activities subject to this Appendix are being performed shall have direct access to such levels of management as may be necessary to perform this function.

2. QUALITY ASSURANCE PROGRAM

The licensee shall establish at the earliest practicable time, consistent with the schedule for accomplishing the activities, a quality assurance program which complies with the requirements of this appendix. The quality assurance program shall be documented by written procedures or instructions, and shall be carried out in accordance with those procedures throughout the period during which packaging is used. The licensee shall identify the material and components to be covered by the quality assurance program and the major organizations participating in the program, together with the designated function of these organizations. The quality assurance program shall provide control over activities affecting the quality of the identified materials and components to an extent consistent with their importance to safety, and as necessary to assure conformance to the approved design of each individual package used for the shipment of radioactive material. Activities affecting quality shall be accomplished under suitably controlled conditions. Controlled conditions include the use of appropriate equipment; suitable environmental conditions for accomplishing the activity, such as adequate cleanness; and assurance that all prerequisites for the given activity have been satisfied. The program shall take into account the need for special controls, processes, test equipment, tools and skills to attain the required quality, and the need for verification of quality by inspection and test.

The licensee shall base the requirements and procedures of his quality assurance program on the following considerations concerning the complexity and proposed use of the package and its components:

(1) The importance of malfunction or failure of the item to safety;

(2) The design and fabrication complexity or uniqueness of the item;

(3) The need for special controls and surveillance over processes and equipment;

(4) The degree to which functional compliance can be demonstrated by inspection or test; and

(5) The quality history and degree of standardization of the item.

The program shall provide for indoctrination and training of personnel performing activities affecting quality as necessary to assure that suitable proficiency is achieved and maintained. The licensee shall review the status and adequacy of the quality assurance program at established intervals. Management of other organizations participating in the quality assurance program shall regularly review the status and adequacy of that part of the quality assurance program which they are executing.

3. DESIGN CONTROL

Measures shall be established to assure that applicable regulatory requirements and the package design, as specified in the license, for those materials and components to which this appendix applies, are correctly translated into specifications, drawings, procedures and instructions. These measures shall include provisions to assure that appropriate quality standards are specified and included in design documents and that deviations from such standards are controlled. Measures shall be established for the selection and review for suitability of application of materials, parts, equipment, and processes that are essential to the safety-related functions of the materials, parts, and components of the packaging.

Measures shall be established for the identification and control of design interfaces and for coordination among participating design organizations. These measures shall include the establishment of written procedures among participating design organizations for the review, approval, release, distribution, and revision of documents involving design interfaces. The design control measures shall provide for verifying or checking the adequacy of design, such as by the performance of design reviews, by the use of alternate or simplified calculational methods, or by the performance of a suitable testing program. The verifying or checking process shall be performed by individuals or groups other than those who performed the original design, but who may be from the same organization. Where a test program is used to verify the adequacy of a specific design feature in lieu of other verifying or checking processes, it shall include suitable qualification testing of a prototype or sample unit under the most adverse design conditions. Design control measures shall be applied to items such as the following: criticality physics, radiation shielding, stress, thermal, hydraulic, and accident analyses; compatibility of materials; accessibility for inservice inspection, maintenance and repair; features to facilitate decontamination; and delineation of acceptance criteria for inspections and tests.

Design changes, including field changes, shall be subject to design control measures commensurate with those applied to the original design. Changes in the conditions specified in the package approval require Commission approval.

4. PROCUREMENT DOCUMENT CONTROL

Measures shall be established to assure that applicable requirements of this part which are necessary to assure adequate quality are suitably included or referenced in the documents for procurement of material, equipment, and services, whether purchased by the licensee or by his contractors or subcontractors. To the extent necessary, the licensee shall require contractors or subcontractors to provide a quality assurance program consistent with the pertinent provisions of this part.

5. INSTRUCTIONS, PROCEDURES AND DRAWINGS

Activities affecting quality shall be prescribed by documented instructions, procedures, or drawings of a type appropriate to the circumstances and shall be accomplished in accordance with these instructions, procedures, or drawings. These shall include appropriate quantitative or qualitative acceptance criteria for determining that important activities have been satisfactorily accomplished.

6. DOCUMENT CONTROL

Measures shall be established to control the issuance of documents, such as instructions, procedures, and drawings, including changes thereto, which prescribe all activities affecting quality. These measures shall assure that documents, including changes, are reviewed for adequacy and approved for release by authorized personnel and are distributed and used at the location where the prescribed activity is performed. Changes to documents shall be reviewed and approved by the same organizations that performed the original review and approval unless the applicant designates another organization.

7. CONTROL OF PURCHASED MATERIAL, EQUIPMENT, AND SERVICES

Measures shall be established to assure that purchased material, equipment, and services, whether purchased directly or through contractors and subcontractors, conform to the procurement documents. These measures shall include provisions, as appropriate, for source evaluation and selection, objective evidence of quality furnished by the contractor or subcontractor, inspection at the contractor or subcontractor source, and examination of products upon delivery. Documentary evidence that material and equipment conform to the procurement specifications shall be available prior to installation or use of such material and equipment. This documentary evidence shall be retained by or be available to the licensee and shall be sufficient to identify the specific requirements met by the purchased material and equipment. The effectiveness of the control of quality by contractors and subcontractors shall be assessed by the licensee or designee at intervals consistent with the importance, complexity and quantity of the product or services.

8. IDENTIFICATION AND CONTROL OF MATERIALS, PARTS AND COMPONENTS

Measures shall be established for the identification and control of materials, parts, and components. These measures shall assure that identification of the item is maintained by heat number, part number, or other appropriate means, either on the item or on records traceable to the item, as required throughout fabrication, installation, and use of the item. These identification and control measures shall be designed to prevent the use of incorrect or defective materials, parts and components.

9. CONTROL OF SPECIAL PROCESSES

Measures shall be established to assure that special processes, including welding, heat treating, and nondestructive testing, are controlled and accomplished by qualified personnel using qualified procedures in accordance with applicable codes, standards, specifications, criteria, and other special requirements.

10. INSPECTION

A program for inspection of activities affecting quality shall be established and executed by or for the organization performing the activity to verify conformance with the documented instructions, procedures, and drawings for accomplishing the activity. Such inspection shall be performed by individuals other than those who performed the activity being inspected. Examination, measurements, or tests of material or products processed shall be performed for each work operation where necessary to assure quality. If inspection of processed material or products is impossible or disadvantageous, indirect control by monitoring processing methods, equipment, and personnel shall be provided. Both inspection and process monitoring shall be provided when quality control is inadequate without both. If mandatory inspection hold points, which require witnessing or inspecting by the licensee's designated representative and beyond which work shall not proceed without the consent of its designated representative, are required, the specific hold points shall be indicated in appropriate documents.

11. TEST CONTROL

A test program shall be established to assure that all testing required to demonstrate that the packaging components will perform satisfactorily in service is identified and performed in accordance with written test procedures which incorporate the requirements of this part and the requirements and acceptance limits contained in the package approval. The procedures shall include provisions for assuring that all prerequisites for the given test have been met, that adequate test instrumentation is available and used, and that the test is performed under suitable environmental conditions. Test results shall be documented and evaluated to assure that test requirements have been satisfied.

12. CONTROL OF MEASURING AND TEST EQUIPMENT

Measures shall be established to assure that tools, gages, instruments, and other measuring and testing devices used in activities affecting quality are properly controlled, calibrated, and adjusted at specified times to maintain accuracy within necessary limits.

13. HANDLING, STORAGE AND SHIPPING

Measures shall be established to control the handling, storage, shipping, cleaning and preservation of materials and equipment to be used in packaging in accordance with instructions to prevent damage or deterioration. When necessary for particular products, special protective environments, such as inert gas atmosphere, specific moisture content levels and temperature levels shall be specified and provided.

14. INSPECTION, TEST AND OPERATING STATUS

Measures shall be established to indicate, by the use of markings such as stamps, tags, labels, routing cards, or other suitable means, the status of inspections and tests performed upon individual items of the packaging. These measures shall provide for the identification of items which have satisfactorily passed required inspections and tests, where necessary to preclude inadvertent by-passing of such inspections and tests.

Measures shall also be established for indicating the operating status of components of the packaging, such as tagging valves and switches, to prevent inadvertent operation.

15. NONCONFORMING MATERIALS, PARTS, OR COMPONENTS

Measures shall be established to control materials, parts, or components which do not conform to requirements in order to prevent their inadvertent use or installation. These measures shall include, as appropriate, procedures for identification, documentation, segregation, disposition, and notification to affected organizations. Nonconforming items shall be reviewed and accepted, rejected, repaired or reworked in accordance with documented procedures.

16. CORRECTIVE ACTION

Measures shall be established to assure that conditions adverse to quality, such as deficiencies, deviations, defective material and equipment, and nonconformances, are promptly identified and corrected. In the case of a significant condition adverse to quality, the measures shall assure that the cause of the condition is determined and corrective action taken to preclude repetition. The identification of the significant condition adverse to quality, the cause of the condition, and the corrective action taken shall be documented and reported to appropriate levels of management.

17. QUALITY ASSURANCE RECORDS

Sufficient written records shall be maintained to furnish evidence of activities af-

[1] While the term "licensee" is used in this appendix, the quality assurance requirements are applicable to whatever design, fabrication, assembly and testing of the package is accomplished with respect to a package prior to the time a package approval is issued.

fecting quality. The records shall include the following: design records, records of use and the results of reviews, inspections, tests, audits, monitoring of work performance, and materials analyses. The records shall also include closely-related data such as qualifications of personnel procedures, and equipment. Inspection and test records shall, as a minimum, identify the inspector or data recorder, the type of observation, the results, the acceptability, and the action taken in connection with any deficiencies noted. Records shall be identifiable and retrievable. Consistent with applicable regulatory requirements, the licensee shall establish requirements concerning record retention, such as duration, location, and assigned responsibility.

18. AUDITS

A comprehensive system of planned and periodic audits shall be carried out to verify compliance with all aspects of the quality assurance program and to determine the effectiveness of the program. The audits shall be performed in accordance with the written procedures or check lists by appropriately trained personnel not having direct responsibilities in the areas being audited. Audit results shall be documented and reviewed by management having responsibility in the area audited. Followup action, including reaudit of deficient areas, shall be taken where indicated.

Title 12—Banks and Banking

CHAPTER II—FEDERAL RESERVE SYSTEM

SUBCHAPTER A—BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

[Reg. B—Docket No. R-0107]

PART 202—EQUAL CREDIT OPPORTUNITY

Correction

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Correction.

SUMMARY: This document corrects a previous Federal Register document.

EFFECTIVE DATE: July 28, 1977.

FOR FURTHER INFORMATION CONTACT:

Anne Geary, Chief, Equal Credit Opportunity Section, Division of Consumer Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202/452-3946).

In F.R. document 77-20481 appearing at page 36810 of the issue for Monday, July 18, 1977, the states referred to should have been Alabama and Nebraska. The first word in the third line of the summary, the last word in the twelfth line of the text of § 202.1103(a) and the fourth word in the second line of § 202.1103(d) should be corrected to read Nebraska.

Board of Governors of the Federal Reserve System, July 28, 1977.

THEODORE E. ALLISON,
Secretary of the Board.

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER A—GENERAL REGULATIONS OF THE FEDERAL HOME LOAN BANK BOARD

[No. 77-489]

PART 505—AVAILABILITY AND CHARACTER OF RECORDS

Price List for Public Copies of Listed Data

JULY 29, 1977.

AGENCY: Federal Home Loan Bank Board.

ACTION: Final amendment.

SUMMARY: This amendment establishes a price list for copies of certain financial data of FSLIC-insured savings and loan institutions. Such data, available to the public under the Freedom of Information Act, are priced according to the Board's estimated costs of reproduction, including equipment and manpower expenses. The amendment is needed because pricing of such copies is not specifically covered by existing regulations.

EFFECTIVE DATE: August 1, 1977.

ADDRESS: Office of the Secretary, Federal Home Loan Bank Board, 320 First Street N.W., Washington, D.C. 20552.

FOR FURTHER INFORMATION CONTACT:

Harry W. Quillian, Associate General Counsel. Telephone number: 202-376-3556.

SUPPLEMENTARY INFORMATION: The Federal Home Loan Bank Board, by Resolution No. 77-423 of July 6, 1977, proposed to amend § 505.4 of its General Regulations (12 CFR Part 505) to establish a price list for computer print-outs and magnetic tape copies of certain financial data of FSLIC-insured institutions available to the public under the Freedom of Information Act. The Board requested comments on the proposal on or before July 29, 1977, limited to the reasonableness of the proposed prices. Four public comments were received through July 29, 1977, all from FSLIC-insured institutions.

One commenter suggested that the proposed prices seemed high in view of the cost of paper, copying, and postage. Another suggested that the prices seemed too low and "wouldn't pay for the paper the information would be printed on." Because the Board is satisfied that the proposed prices are "reasonable standard charges for document search and duplication and provide for recovery of only the direct costs of such search and duplication" as permitted by the statute (5 U.S.C. 552(4)(A)), it is adopting them as proposed.

One commenter suggested a slight modification of the pricing method for purposes of simplification and another opposed the proposal as involving sharing by insured institution of operating data with their competition. The Board has retained the proposed pricing method because it believes that such method best accords with the statutory limitations on pricing mentioned above. The Board notes that the comment opposing the proposal is outside the scope of the invitation for comments and, in any event, irrelevant because the Freedom of Information Act requires that the data covered by the proposal be available to the public.

Having considered all comments received on the proposed amendment received through July 29, 1977, the Board considers it desirable to adopt the amendment without change, except for inclusion of a parenthetical note under the item "Previous Reports" in § 505.4(e)(3)(a)(ii) to clarify that the per-institution charges there specified apply regardless of the number of pages in the report.

Because the Board will begin making data covered by these amendments available on August 1, 1977, and a final price list is necessary for prompt and proper billing for this service, the Board finds that publication of the amendment for the 30-day period specified in 12 CFR 508.14 and 5 U.S.C. 553(d) prior to effective date is impracticable and contrary to the public interest.

Accordingly, the Board hereby amends § 505.4(e) by re-numbering present subparagraph (3) as subparagraph (4), and adding new subparagrah (3) to read, effective August 1, 1977, as follows:

§ 505.4 Access to records.

* * * * *

(e) *Fees for providing copies of records.* * * *

(3) The following charges, descriptions and procedures apply to requests for printed copy and magnetic tapes of insured institutions' financial data, as listed.

(i) *Description and Charges—(a) Balance Sheets, and Income and Expense Statements* (June 30 and December 31, or other semiannual fiscal period). These data cover the preceding six-month period and are available approximately three months after the period covered. Data are available for individual institutions in printed copy (3 pp. per institution), or for all insured institutions on magnetic tape. Printed copy may be requested for an individual institution, or for each individual institution in a county or state.

PRINTED COPY

CURRENT

$6.00—1-5 institutions.
$2.00 per institution for each additional institution up to 25.
$.25 per institution thereafter.

PREVIOUS

$9.00—1-5 institutions.
$2.00 per institution for each additional institution up to 25.
$.25 per institution thereafter.

MAGNETIC TAPES

$50.00—Format No. 1 (Board's internal format containing 4,046 characters per record, one record per block, 800 BPI, even parity, 7 track, no label or tape mark; data recorded in Six-bit imbedded Comp.).
$150.00—Format No. 2 (Universal EBCDIC containing 4,046 characters per record, 3 records per block, 800 BPI, odd parity, 9 track, no label or tape mark; data recorded in EBCDIC).

(b) *Total Deposit Balances per Office* (September 30 or March 31). These data, reported to the Board each March 31 and September 30, are available approximately three months after the period covered. Data for a specified period are available for individual offices in printed copy or for all insured institutions on magnetic tape. Information may be requested for all offices of an individual institution or all offices of all insured institutions in a specified county or state.

PRINTED COPY

MOST RECENT REPORT

$3.00—1-5 pages.
$1.00—per page (6-25 pp.).
$.10—per page (over 25 pp.).

PREVIOUS REPORTS (REGARDLESS OF NUMBER OF PAGES)

$4.00—1-5 institutions.
$2.00—per institution up to 25 institutions.
$.25—per institution thereafter.

MAGNETIC TAPES

$50.00—Format No. 1 (Board's internal format, containing 217 characters per record, one record per block, 800 BPI, even parity, 7 track, no label or tape mark at beginning of file; data recorded in ASCII).
$150.00—Format No. 2 (Universal EBCDIC, containing 217 characters per record, three records per block, 800 BPI, odd parity, 9 track, no label or tape mark; data recorded in EBCDIC).

(ii) *Procedure.* Address all requests to: Federal Home Loan Bank Board, Industry Data Division, Information Disclosure Section, 320 First Street NW., Washington, D.C. 20552. Include requester's name, address, and telephone number. If requesting data on an individual institution, provide accurate and complete institution name and home office address and dates of data requested. For geographical requests, specify county and/or state in which the institutions or offices are located. Requesters will be billed for copies. No advance payment will be accepted.

CHAPTER VII—NATIONAL CREDIT UNION ADMINISTRATION

PART 701—ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS

Lending in Federal Credit Unions

AGENCY: National Credit Union Administration.

ACTION: Final rule.

SUMMARY: These rules implement the provisions of the April 19, 1977, amendments to the Federal Credit Union Act (Pub. L. 95-22, 91 Stat. 49) pertaining to Federal credit union lending policies, lines of credit to members, loans to officials, loans endorsed by officials, and insured or guaranteed loans. In addition, these rules contain certain clarifications of existing rules pertaining to the amortization of loans to members and insured or guaranteed loans.

EFFECTIVE DATE: These regulations are to be effective August 4, 1977.

ADDRESSES: National Credit Union Administration, 2025 M Street, NW., Washington, D.C. 20456.

FOR FURTHER INFORMATION CONTACT:

Joseph Bellenghi, Assistant Administrator for Examination and Insurance, at the above address 202-254-8760.

SUPPLEMENTARY INFORMATION: On May 27, 1977, the Administration published a proposed rule (42 F.R. 27251) to implement the provisions of the Federal Credit Union Act (12 U.S.C.A. 1751, *et seq.*, hereafter "the Act"), as amended by Public Law 95-22, pertaining to loans and lines of credit to members of Federal credit unions, including home improvement loans with maturities up to 15 years. These rules do not apply to real estate loans with maturities in excess of 12 years, mobile home loans with maturities in excess of 12 years, or to participation loans. Nor do they apply to loans and lines of credit to nonmember borrowers, nonmember credit unions, or credit union organizations. Rules implementing these provisions of the amended Act regarding such loans will be proposed at a later date. With a few exceptions almost all of the 43 comment letters received in response to the proposed rules were favorable. Several commenters, while agreeing with a majority of the provisions of the proposal, raised questions concerning certain provisions of the proposal and made suggestions that convinced the Administration that a number of changes from the proposed rule are warranted.

DISCUSSION OF MAJOR COMMENTS

Lending Policies: Loans and Lines of Credit to Members 701.21-1

RATES OF INTEREST AND LOAN

Several commenters raised various issues regarding application of the provisions of subsection (c) as they apply to establishing various classifications of loans or credit plans and establishing various rates of interest applicable to these programs.

Three commenters indicated a need for rates to vary according to the terms or method of repayment. Another commenter indicated that classifications established by the proposal as mandatory should be recognized as the normal classifications, but that others certainly could be established provided equitable treatment was afforded all borrowers within a given classification.

After considering these comments the Administration has retained the mandatory restrictions on the classifications of loans which may be established by a board of directors. The initial intent of the "uniform rate" provisions of the proposed regulation was to allow maximum discretion to each individual Federal credit union's board of directors, while at the same time, ensuring achievement of the Congressional intent that all members qualifying for a particular class of loan be afforded the same rate of interest. The Administration believes the classifications required are sufficiently liberal to allow the board of directors of each Federal credit union to establish equitable variations in interest rates.

Amortization of Loans to Members: 701.21-2

MONTHLY REPAYMENT OF LOANS ADVANCED UNDER A LINE OF CREDIT

Eight commenters expressed concern with the provision requiring monthly payments on loans advanced under a line of credit. Specific concerns cited the needs of credit unions serving employee groups which were not employed 12 months out of each year. In these credit unions past practice has provided for repayment of loans only during the months the borrower was actually working. An example provided in several comments referred to credit unions serving school teachers. Another commenter pointed out that lines of credit established for the purpose of purchasing inventory or a farmer purchasing materials and supplies for production purposes would more appropriately be repaid at intervals when the inventory was sold or when crops or other produce were sold, rather than on a monthly basis.

The Administration believes that the establishment of lines of credit for the purpose of obtaining consumer goods and services requires that repayment be made on a monthly basis for the following reasons:

(1) The borrower may draw on the line of credit for any purpose at any time.

(2) In view of the variety of ways the funds from a line of credit may be used, payments should be obtained to coincide with the member's receipt of earnings, to assure that a reasonable portion of the line of credit is repaid when the borrower has funds available to make payment.

(3) Monthly or more frequent contact for purposes of payment improves the credit union's ability to maintain contact with its member borrowers even if the contact is only receipt of a payroll deduction once a month.

(4) Close control over payment activity will assist the officials of a credit union in assuring their policies concerning lines of credit are reasonable in relation to the credit union's ability to provide this service.

With regard to loans and lines of credit to members engaged in farming, or other business, the Administration believes the proposed regulation allows sufficient latitude for establishing single payment loans and special loan plans to meet the needs of these members. While some credit unions do make business and agricultural loans, this type of lending activity is highly specialized and in many cases may not be conducive to use of a line of credit. Therefore, the Administration has not included special provisions concerning this type of lending activity.

While no comments were received regarding the authority of a Corporate Central Federal credit union to offer lines of credit to its credit union members, the Administration has noted a need for clarification of the monthly payment restriction on lines of credit as it pertains to credit unions which are members of corporate central credit unions. Subsection (a) and § 701.21–3(b)(2) have, therefore, been revised to recognize this clarification and subjects payments on loans and lines of credit made by corporate central Federal credit unions to intervals of not greater than 12 months.

EXCEPTIONS TO REQUIRED AMORTIZATION LIMITS

Several commenters indicated that the exceptions to the restrictions on amortization of loans were not broad enough. The Administration believes that the limitations placed on amortization of loans and exceptions to these limits are adequate for the majority of credit unions. These limitations were in effect prior to the current change in the Act and the Administration has not received any evidence in conjunction with the issuance of these proposals, or prior to the proposal, that the previous regulations were overly restrictive. If evidence is presented in the future which warrants a further change in these exceptions, the Administration will give further consideration to their modification.

Lines of Credit to Members: 701.21–3

REQUIRED PROVISIONS FOR A LINE OF CREDIT AGREEMENT

Three commenters recommended that the entire proposal be modified to a more general approach. Other commenters recommended specific changes to generalize the various required provisions of the line of credit agreement, as set forth in subsection (b) of the proposal. These comments included the following recommendations:

(1) The credit limit need not be stated in the agreement. Many credit unions may desire to include the credit limit in the application only. The application may then be incorporated by reference into the agreement in order to alleviate the borrower from resigning the agreement every time the credit limit is changed.

(2) The agreement should clearly recognize the right of the credit union to accelerate payments if a borrower defaults.

(3) Revise the provision of subsection (b)(1) to read "The credit limit, or maximum amount of principal available which may be drawn upon by a member at any time." This wording parallels the wording in the definition of "line of credit."

(4) Six commenters believed the use of the word "maturity" in (b)(2) was not clear or contradicted the concept of line of credit.

(5) Three commenters indicated (b)(6) was not necessary and unenforceable.

(6) Three commenters supported credit committee authority over termination of the line of credit agreement, rather than the board of directors, to assure that the authority to terminate is provided by the same official body having authority to establish the line of credit.

(7) Two commenters indicated the need for the credit union as well as the borrower to be able to terminate the agreement.

In response to these comments the Administration agrees in general with a less restrictive approach to the requirements placed upon the agreement and has revised the provisions of subsection (b) to incorporate these recommendations.

Two commenters indicated they believed the use of the word "fees" in (b)(4) was overly restrictive. The word "fees," which was originally included in (b)(4) with the intent of clarifying those costs which constitute service charges on lines of credit, has been removed in view of the fact that the Administration intends to define by future regulation the term "service charges" as it applies to all Federal credit union lending practices.

REQUIRED 36-MONTH REVIEW OF LOAN FILES FOR MEMBERS HAVING A LINE OF CREDIT

Eleven commenters questioned the need for a mandatory 36 month review of line of credit files. Reasons for objecting to this requirement included:

(1) Too great a financial burden;

(2) Credit card companies only look at payment records;

(3) Credit bureau reports are not worth their cost;

(4) Review is not consistent with the concept of the line of credit; and

(5) The requirement is an administrative burden.

The following recommendations were provided as alternatives:

(1) Allow the board of directors to determine the review period;

(2) Establish a scoring system to determine which files must be reviewed; and

(3) Review only those accounts which fail to pay as agreed.

The Administration has considered these comments and has determined that the proposed regulation requiring review of loan files for members having lines of credit is appropriate and not unduly restrictive. The periodic review requirement of each member's creditworthiness is intended to ensure that the best interests of the member and the credit union are protected. The Administration strongly believes that a 36 month review period is necessary and has retained this provision in the final rule. Furthermore, the provisions of this requirement are permissive, and while the review is mandatory, the 36 month limit allows the board to set more frequent reviews if desired.

APPLICATION BY MEMBERS WHEN CHANGES ARE MADE TO THE PROVISIONS OF THE LINE OF CREDIT AGREEMENT

Four commenters indicated that the credit committee or loan officer should have the option of requiring reapplication for lines of credit if changes are made to the line of credit agreement. Another commenter indicated that the credit committee or loan officer should have the authority to reduce a borrower's credit limit and/or accelerate the payment schedule, if a borrower defaults, without requiring reapplication by the borrower.

The Administration disagrees with the recommendation that the use of applications to modify the terms of a line of credit agreement be optional. However, the Administration has reconsidered the provisions of the proposed rule which require reapplication for any modification to the line of credit agreement. Subsection (e) is amended to provide for mandatory reapplication only when a credit line is increased or when payments are reduced. This provision does not prohibit the credit committee or loan officer from requesting reapplication from any member having a line of credit, at times other than required by the regulation.

DISBURSEMENTS EXCEEDING A BORROWER'S CREDIT LIMIT

One commenter raised a question as to the disposition of advances under a line of credit agreement which exceed the borrower's maximum credit limit. The comment was directed primarily at the provisions of the line of credit agreement, but in the Administration's view, the "overline" provisions need not be a part of the agreement between the credit union and the member.

In response to the question raised, the Administration has included a new subsection (f) in the final rule which requires the board of directors to establish policy for the proper control of advances under a line of credit agreement which exceed the borrower's credit limit. Control measures and policies which might be instituted include:

(1) Approval of any "overline" advances by the credit committee or loan officer with the amount restricted to a specified percentage of the borrower's credit limit.

(2) Providing an authorization system which will allow a specified percentage of the credit limit as an "overline" advance or which will prohibit the borrower from obtaining any advances in excess of the credit limit.

The Administration's policy on "overline" authorization is not a substitute for the requirement that a borrower must reapply and receive approval for increases in his credit limit. This policy is only provided to deal with the occasional "overline" situation which occurs because of the borrower's failure to control his use of the line of credit within the agreed upon limit.

REVIEW OF LIQUIDITY STATUS

Four commenters recommended deletion of all or a portion of subsection (e) and indicated the provisions were unnecessary and burdensome. Three commenters indicated a monthly review was too frequent and suggested a quarterly review. Another commenter recommended that the treasurer's or manager's report could incorporate the information required and could be incorporated by reference into the board of director's minutes.

The Administration has considered the above comments and believes that the inclusion of these requirements in the proposed rule is necessary to assure that the credit union officials monitor the relationship between the credit union's liquidity status and actual and prospective activity on line of credit accounts. Furthermore, to change these requirements by reducing the period of review to quarterly would make the intended action meaningless. The comment concerning inclusion of the required data in the treasurer's report or manager's report is an acceptable method of documenting this information in the board of director's minutes and is not prohibited by the regulation.

Finally, the Administration recognizes that the above requirements represent an initial attempt to assure each credit union properly monitors and evaluates its line of credit programs. Modifications may be made to the regulation if after review of the results of this requirement the Administration determines the requirements to be too burdensome or ineffective in accomplishing the desired result.

Loans to Officials: 701.21–4

CREDIT COMMITTEE APPROVAL OF LOANS TO OFFICIALS

The proposed regulation authorized the board of directors to approve certain loans to officials notwithstanding the credit committee's recommendation that a loan not be offered to a certain official. This action was proposed because of ambiguity in the language of Section 114 of the amended Act concerning the respective roles of the credit committee and board of directors.

Five commenters were opposed to the proposed regulation. They recommended that when board of director's action is required, the credit committee should also be required to evidence favorable action on a loan application involving an official prior to disbursing any funds.

The Administration has reconsidered its proposed regulation. The final regulation has been revised to require approval by the credit committee or loan officer when the board of directors or executive committee is required to act on a loan to or endorsed by an official. Disapproval by either the credit committee or board of directors would result in disapproval of the application. The Administration believes this approach is consistent with the House Report which states that, "(the) Committee is sensitive to any grant of authority which appears to make it easier for 'insiders' to take advantage of funds entrusted to their care." (Page 9.)

APPROVAL OF LOANS TO OFFICIALS BY EXECUTIVE COMMITTEE AND LOAN OFFICER

Three commenters indicated that the regulation should clearly state that the executive committee may act for the board of directors and that the loan officer may act for the credit committee in approving loans to officials.

The Administration concurs with this recommendation and has included the appropriate language in subsections (c) and (e) of the final regulation.

DISCUSSION OF MISCELLANEOUS COMMENTS

The Administration does not agree that the proposed rule would be improved as suggested by some commenters and has rejected the following suggestions:

(1) That the definitions of secured and unsecured loan limits should include the total line of credit established and not just the amount advanced under a line of credit. Since a loan is not created until funds are advanced under a line of credit, only the amount of funds so advanced need be considered in determining a borrower's secured and unsecured loan limit.

(2) That all lines of credit should carry the same rate of interest. The preamble to the proposed rule stated the Administration's position on this matter and noted the ambiguity in the provisions of Pub. L. 95–22 regarding the interest rate on lines of credit.

(3) After the term "endorser" in subsection (e) add the terms, "guarantor", "comaker", or "any party" that shares in contractual liability with the borrower. The Administration believes that the terms "endorser" and "guarantor" sufficiently cover the recommended wording, and for purposes of clarity, has removed the statement that "endorser" and "guarantor" are the same. Both terms are, therefore, set forth in the text of section 701.21–4.

(4) That the regulation should state how value of security should be determined. Each credit union's board of directors is responsible for establishing security requirements. The value of security will be established and documented according to the individual credit union's policies. (701.21–2)

(5) That education loans should be made available to a member who is borrowing the funds for the purpose of educating a member of his/her own family. Subsection (b) of the regulation only provides special consideration for amortization of education loans to the persons actually in school. This exception is necessary because the student normally would not derive income until he/she has completed school. This consideration would not apply to a member who is financing the education of another.

(6) That share secured loans should be exempt from single payment limits. The Administration believes the provisions established requiring payments on loans at intervals no greater than 12 months are adequate to meet the needs of almost all borrowers.

(7) That the line of credit regulation should be more general, leaving discussion of the specifics for the manuals. The Administration will issue additional guidelines and policy statements on the operation of lines of credit in its other publications and manuals. The regulations were designed to cover the general requirements for all lines of credit.

(8) That the Administration should specify the maximum credit limits which may be established by a credit union member and the aggregate amount of credit limits which may be established by a credit union. The Administration does not believe that regulations should be used to establish these limits, which Congress intended to be established by the individual credit union's board of directors.

(9) That the Administration should impose an annual update and review of borrowers having an approved line of credit. The Administration believes that this proposed requirement would be unnecessarily restrictive upon the management of the individual Federal credit union.

(10) That the credit committee or loan officer should be able to approve general modifications to agreements for lines of credit without having an application from the borrower. The Administration believes that modifications to a line of credit desired by a borrower should specifically be approved by the credit committee or loan officer.

POLICY FOR REVIEW OF CREDIT CARD PROGRAMS

The preamble of proposed rule Part 701.21–3 indicated that the Administration viewed the method of access to a line of credit (credit card, loan draft, etc.) as a management decision for each Federal credit union's board of directors. Several commenters requested a statement of the Administration's policy regarding Federal credit unions establishing third party credit card programs (involving credit union, member and merchant) for their members. Instead of issuing specific guidelines at this time for credit card programs, the Administration is requesting that Federal credit unions desiring to establish a credit card program contact the appropriate Regional Office for guidance concerning the desired program. The Administration believes that this approach will sufficiently facilitate the establishment of credit card programs in Federal credit unions desiring to implement this service.

Accordingly, 12 C.F.R. 701 is amended as follows:

(1) Delete § 701.21 and add new sections to read as follows:

§ 701.21–1 Lending policies: Loans and lines of credit to members.

(a) For the purposes of § 701.21: (1) "Security" means an interest in property which has tangible value or any endorsement of a person which will wholly or partially secure a loan obligation. Security includes any contractually created interest in a member's share account, but not that interest created by Section 107(11) of the Federal Credit Union Act (12 U.S.C.A. 1757(11)).

(2) "Unsecured loan limit" means the maximum amount of funds which may be loaned to any member, without security, including any unsecured advances under a line of credit and the unsecured portion of any partially secured loan.

(3) "Secured loan limit" means the maximum amount of funds which may be loaned to any member, including advances under a line of credit, with security.

(4) "Loan file" means a file maintained by a Federal credit union which

includes applications for loans and lines of credit for a specific borrower and other related information concerning the borrower's creditworthiness.

(b) Within the limits of the Act and this Part, the board of directors of a Federal credit union shall establish specific written policies, which shall include at least (1) the secured loan limit and unsecured loan limit, and (2) the classifications established under subsection (c), below, and the rate of interest applying to each classification.

(c) Rates of interest charged on loans (including line of credit balances) may vary according to reasonable classification established by the board of directors. Distinctions among classifications shall be based only upon one or more of the following: Type of line of credit or loan plan, purpose of the loan, and type or value of security in relation to the amount of the loan. Within a given classification, the same rate of interest must be applied uniformly to all member borrowers.

(d) Subject to limitations established by the board of directors, the credit committee or loan officer shall consider the following factors in ruling on applications for loans or loan accounts (including lines of credit):

(1) The amount and regularity of receipt of funds which the borrower intends to rely upon for repayment.

(2) The borrower's other commitments and anticipated financial needs over the term of his obligation to the credit union.

(3) Other valid factors of creditworthiness as determined by the credit committee or loan officer.

(4) The best interests of the member and credit union.

(e) The loan files of a Federal credit union shall contain evidence of the financial responsibility of any endorser and the value of any security provided by a borrower.

§ 701.21–2 Amortization and payment of loans to members.

(a) A loan to a member shall be paid by substantially equal payments of principal at intervals of not greater than 12 months. An approved line of credit to a member other than a member credit union shall provide for payments at intervals of not greater than 1 month.

(b) The board of directors may, by resolution:

(1) Require that any loan agreement provide for periodic substantially equal payments of principal at intervals shorter than 12 months.

(2) Authorize the following exceptions to the requirements of paragraph (a):

(i) A loan for the purpose of vocational or higher education of the member/borrower may be made with a maturity of not greater than 12 years and on such terms of payment as the credit committee or loan officer find to be consistent with the needs of the member/borrower and the best interest of the credit union.

(ii) A loan with a maturity of less than 30 months may be repaid by a single payment of principal if the credit committee or loan officer find that such terms are justified by the needs and condition of the borrower.

(c) Each loan shall provide for:

(1) Payment of interest with each payment of principal;

(2) Payment of interest not less frequently than annually; and

(3) Sufficient payments to pay the loan in full at maturity.

§ 701.21–3 Lines of credit to members.

(a) For the purposes of this section:

(1) "Line of credit" means a fixed amount which may be drawn upon by a member from time to time and which may be replenished by payment on amounts previously drawn.

(2) "Agreement" means the written document signed by the borrower to establish the terms and conditions of a line of credit.

(b) Each line of credit shall be evidenced by an agreement which shall contain, incorporate by reference, or provide for at least the following:

(1) The credit limit, or maximum amount of principal available under the agreement which may be drawn upon by a member at any time.

(2) A schedule of required monthly payments (or annual payments in the case of a line of credit extended by a Corporate Central Federal credit union to its member credit unions) sufficient in amount to retire the unpaid principal balance within the maturity limits of the Act.

(3) Interest at a rate or rates not exceeding 1 per centum per month on the unpaid balance inclusive of all service charges.

(4) The borrower's promise to pay.

(5) Repayment of any amounts outstanding prior to maturity in whole or in part on any business day without penalty.

(6) Other conditions established by the board of directors necessary to protect the best interests of the credit union and to comply with applicable Federal and State laws and regulations.

(7) That the credit committee may terminate the agreement under the following conditions:

(i) Upon adverse reevaluation of the borrower's creditworthiness.

(ii) Upon failure of the borrower to satisfy the terms of the agreement.

(iii) At the option of the borrower or of the credit union with good cause.

(c) Termination of a line of credit agreement by the credit union shall be given by written notice and shall not affect the borrower's obligation to pay the balance outstanding incurred prior to the notice.

(d) The board of directors shall require a review, at least once every 36 months, of the loan file of each member who has a line of credit. To the extent governed by sound lending principles, the review shall be completed by obtaining current information to reassess the member's creditworthiness. The date of this review shall be documented in the member's loan file.

(e) A reapplication by the member and approval by the credit committee or loan officer shall be required, if:

(1) The credit limit is increased, or

(2) The terms of payment are extended beyond the terms of the original agreement.

(f) The board of directors shall establish policy for control of advances disbursed under a line of credit agreement which exceed the borrower's credit limit.

(g) Each month the board of directors shall review the credit union's liquidity status in relation to extending loans approved under line of credit agreements and shall document at least the following information as of the previous month end in the board of director's minutes:

(1) The number and amount of outstanding balances under all line of credit agreements.

(2) The aggregate amount of credit approved under line of credit agreements.

(3) The total amount of loans advanced and the total amount of loans repaid under line of credit agreements for the previous month.

§ 701.21–4 Loans to officials.

(a) For purposes of this section:

(1) "Official" includes a member of the board of directors, credit committee, or supervisory committee.

(2) "Application" shall include all applications by officials for loans and lines of credit and all applications by members for loans and lines of credit for which officials intend to act as endorsers or guarantors.

(b) The credit committee or loan officer shall act upon all applications.

(c) The following computation shall be used to determine which applications must be considered by the board of directors or executive committee.

(1) Add:

(i) The amount of the current application.

(ii) The outstanding balances of loans, including the used portion of an approved line of credit, extended to or endorsed or guaranteed by the official.

(iii) The total unused portion of approved lines of credit extended to or endorsed or guaranteed by the official.

(2) From the above total subtract:

(i) The amount of shares pledged by the official on loans or lines of credit extended to or endorsed or guaranteed by the official.

(ii) The amount of shares to be pledged by the official on the loan or line of credit applied for.

(3) The board of directors shall consider an application if the computation produces a total in excess of $5,000.

(d) The board of directors shall establish a procedure for processing all applications involving officials. This procedure shall include the appointment of an individual(s) responsible for:

(1) Assuring that the application is completed as to income and debt obligations.

(2) Documenting, on the application, the computation explained in paragraph (c).

(e) Prior to disbursing a loan or granting a line of credit, in addition to compliance with the provisions set forth in sections 701.21–1, 701.21–2, and 701.21–3, the following requirements must be met:

(1) The application shall indicate the credit committee's or loan officer's approval and the board of director's or executive committee's approval if required by subsection (c) of this section.

(2) The rate, terms and conditions of the approved loan or line of credit shall not be more favorable than the rate, terms and conditions for comparable loans or lines of credit to other credit union members.

(3) The approved loan or line of credit must comply with the requirements of the Act.

(4) An official shall not consider his/her application or one for which he/she is acting as an endorser or guarantor. Also, an official shall not be present at a meeting while his/her application or one for which he/she is acting as an endorser or guarantor is being considered.

(5) The application may be approved only if a quorum of the board is present and all present agree to approve the application.

(6) As a minimum, the following information shall be recorded in the board's minutes:

(i) Board's decision on an application.

(ii) Name of applicant.

(iii) Names of board members present at the meeting.

(iv) Name of endorsing or guaranteeing official (if applicable).

§ 701.21–5 Insured and guaranteed loans.

(a) A Federal credit union which has been qualified as a lender under a Federal or State insured or guaranteed loan program may make loans to members under the terms and conditions and within the maturities specified by the laws and regulations governing the program.

(b) Loans or lines of credit approved under the provisions referenced in paragraph (a) of this section shall be in full compliance with all applicable provisions of such laws and regulations including any requirements to record liens or related collateral. Where a Federal or State insurance or guarantee is accepted as security for a loan or line of credit, the credit committee shall determine that the interest of the credit union is adequately protected and that the borrower's application reflects his/her creditworthiness.

§ 701.25 [Deleted]

(2) Delete § 701.25

AUTHORITY: Sec. 120, 73 Stat. 635 (12 U.S.C. 1766) and Sec. 209, 84 Stat. 1104 (12 U.S.C. 1789).

Dated: July 29, 1977.

C. AUSTIN MONTGOMERY,
Administrator.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 77-GL-18; Amdt. 39-2994]

PART 39—AIRWORTHINESS DIRECTIVES

McCauley Propellers Two Bladed Constant Speed Models

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), which replaces AD 76–19–04. The new AD requires inspection of additional two bladed constant speed propeller models not included in the initial AD, and as necessary, rework or replacement of the affected ferrules, blade actuating pins and washers in accordance with the manufacturer's service instructions. This action is considered necessary to preclude failure of the blade actuating pin that has resulted in excessive vibration and loss of propeller control in flight. Since the repair stations concerned inadvertently did not comply with the appropriate McCauley service instructions, this condition could develop in some of the propellers they reworked.

DATE: Effective date, August 9, 1977. Compliance schedule—As prescribed in the body of the AD.

ADDRESS: Information relating to the service document referenced in the body of the AD may be obtained from McCauley Accessory Division, Cessna Aircraft Company, Box 7, Roosevelt Station-Dayton, Ohio 45417.

Copies of the service information incorporated in this AD are contained in the Rules Docket, Office of the Regional Counsel, 2300 East Devon Avenue, Des Plaines, Illinois 60018 and Room 916, 800 Independence Avenue, S.W., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

Henry L. Weiss, Engineering and Manufacturing Branch, Flight Standards Division, AGL–214, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone 312–694–4500, extension 308.

SUPPLEMENTARY INFORMATION: AD 76–19–04, Amendment 39–2727 effective September 27, 1976, requires inspection and rework of certain McCauley two bladed propellers which were improperly modified by Hoosier Aircraft Accessory, Inc., Indianapolis, Indiana, and Kal-Aero, Inc., Kalamazoo, Michigan, due to misapplication of McCauley Service Bulletin No. 99. The AD was issued because the propeller repair stations were unable to recover, inspect and, as necessary rework the ferrules, blade actuating pins and washers of the affected propellers in accordance with the proper manufacturer's service instructions.

Since the release of AD 76–19–04 the FAA, Great Lakes Regional Office has been informed of other improperly modified two bladed constant speed propellers which were not included in the initial AD. Accordingly, this amendment covers an updated listing of the affected propellers. Also, it should be noted that there has been some change in the identity of the responsible repair stations concerned. Kal-Aero, Inc. was eliminated because it has recently recovered, inspected and reworked as necessary, the last of its listed affected propellers. Univair Corporation, however, has been added, since it inadvertently used a modified (shortened) blade actuating pin which does not conform to the approved type design part. In view of the fact that such part is only considered satisfactory for about 1200 hours time in service by McCauley, this amendment requires replacement of this blade actuating pin according to circumstances.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impractical and good cause exists for making this amendment effective in less than 30 days.

In accordance with Departmental Regulatory Reform, dated March 23, 1976, we have determined that the expected impact of this final regulation is so minimal that it does not warrant an evaluation.

DRAFTING INFORMATION

The principal authors of this document are H. L. Weiss, Flight and Standards Division, Great Lakes Region, and J. K. McLaughlin, Office of the Regional Counsel, Great Lakes Region.

ADOPTION OF THE AMENDMENT

Accordingly, and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

McCAULEY PROPELLERS. Applies to the following two bladed constant speed McCauley propellers, which were modified by Hoosier Aircraft Accessory Inc., Indianapolis, Ind., or Univair Aircraft Corp., Aurora, Colo., during the period of December 8, 1972 through June 30, 1975. These propellers are installed on, but not limited to the aircraft models listed below.

Propeller model	Hub serial No.	Aircraft model
D2A34C49 (*)	692417 (H) 703405 (H) 705820 (H)	Cessna 185 through 185E (through S/N 185-1114). Cessna 210 through 210C (through S/N 21058220). Cessna 210-5 and 210-5A (through S/N 205-0576). The above models use Continental 10-470 engines/Navion A through G series.
D2A34C50 (*) or 2A34C50 (*)	64746 (H) 690820 (H) 731417 (C)	Cessna 180 through 180H (through S/N 18052264). Cessna 182 through 182G (through S/N 18255844). Cessna 188 through 188B (through S/N 18601346).

		"LASA 60".

Propeller model [1]	Hub serial No. [2]	Aircraft model [3]
2D36C14 (*)	591206 (U)	Beagle A–109.
		Boissvia B–601L.
		Cessna 170 Series
		(STC SA421CE).
		Cessna 172 Series
		(STC SA420CE).
		Cessna 175, 175A
		(STC SA424CE).
		Piper PA–24.
		SAAB 91D.
		Wassmer WA–40.

(*) Denotes suffix letter(s). Some models have one or more suffix letter designations, others have none.

[1] and [2] Propeller model and hub serial numbers are stamped on the side of the propeller hub. The listing of hub serial numbers refers to specific hub serial numbers not series. In the event a spinner is installed, the spinner should be removed to check the model and hub (S/N) designations. The aircraft's records should likewise be checked to ensure that the model and hub serial number coincide with the records. In the event an error is noted, the records should be corrected accordingly. Prior to further flight, spinners should be reinstalled where applicable.

[3] Includes listing of applicable aircraft serial numbers. If no listing is indicated, applies to all applicable serial numbers of a particular aircraft model or series.

[(H) or (U)—Indicates that the propeller rework was accomplished by (H) Hoosier Aircraft Accessory, Inc., or (U) Univair Aircraft Corp. These letters are not part of the manufacturer's hub serial numbers.]

Compliance required as indicated, unless already accomplished. To preclude the possibility of blade actuating pin failures resulting from using an incorrect actuating pin, or improper rework of the ferrules and installation of the blade actuating pins and washers (i.e., a blind actuating pin hole not tapped to the proper depth can cause stripped threads on the ends of the actuating pin resulting in severe stress and may prevent actuating pin from seating on the washers) accomplish the following:

(a) All propellers listed above which were modified by (H)—Hoosier Aircraft Accessory, Inc.

(1) Within 25 hours time in service after the effective date of this AD, disassemble the propeller and inspect the blade actuating pins, washers and ferrules for proper conformity and installation in accordance with McCauley Service Manual No. 720415, Chapter I, or later Federal Aviation Administration approved revision(s).

(2) Prior to further flight, repair or replace as necessary, any improperly installed blade actuating pins, washers, and ferrules, and reassemble the propeller in accordance with McCauley Service Manual No. 720415, or later Federal Aviation Administration approved revision(s).

(b) All propellers listed above, which were modified by (U)—Univair Aircraft Corp.

(1) Within 1200 hours time in service since last rework by Univair, or within two years, whichever comes first after the effective date of this AD, disassemble the propeller and inspect the blade actuating pins, washers and ferrules for proper conformity and installation in accordance with McCauley Service Manual No. 720415, Chapter I, or later Federal Aviation Administration approved revision(s).

(2) Prior to further flight, replace any improper blade actuating pins, washers and repair or replace the ferrules as necessary, and reassemble the propeller in accordance with McCauley Service Manual No. 720415, or later Federal Aviation Administration approved revision(s).

(c) When the above propellers are released for service, compliance with this Airworthiness Directive shall be noted in the Aircraft's Records.

(d) The responsible propeller repair station will notify the Federal Aviation Administration, Chief, Engineering and Manufacturing Branch, AGL–210, 2300 East Devon Avenue, Des Plaines, Ill. 60018, by certified mail about the results of these inspections. The disposition of the affected propeller(s) including the blade and hub serial numbers of the propellers (as received, and where applicable, as returned to service) must be reported. (Reporting approved by the Office of Management and Budget under CMB No. 04–R0174).

The manufacturer's specifications and procedures identified in this Directive are incorporated herein and made part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by the directive who have not already received these documents from the manufacturer, may obtain copies upon request to McCauley Accessory Division, Cessna Aircraft Corp., Box 7, Roosevelt Station, Dayton, Ohio 45417. These documents may also be examined at the Great Lakes Regional Office, 2300 East Devon Avenue, Des Plaines, Ill. 60018, and at FAA Headquarters, 800 Independence Avenue SW., Washington, D.C. 20591. A historical file on this airworthiness directive which includes incorporated material in full is maintained by the FAA at its headquarters in Washington, D.C., and the Great Lakes Region.

This amendment becomes effective: August 9, 1977.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.89).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Des Plaines, Ill., on July 22, 1977.

JOHN M. CYROCKI,
Director, Great Lakes Region.

(NOTE.—The incorporation by reference in the preceding document was approved by the Director of the FEDERAL REGISTER on June 19, 1967.)

[FR Doc.77–22258 Filed 8–3–77;8:45 am]

[Docket No. 16485, Amdt. 39–3001]

PART 39—AIRWORTHINESS DIRECTIVES

Messerschmitt-Bolkow-Blohm (MBB) Model BO–105A and BO–105C Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires modification of the gearbox oil pump and repetitive inspections of the gearbox magnetic chip detector on certain Messerschmitt-Bolkow-Blohm (MBB) Model BO–105A and BO–105C helicopters. This AD is directed at preventing excessive wear of the planet gear which could cause gearbox failure and loss of the helicopter. Excessive wear of the planet gear has occurred in service because of insufficient oil flow.

DATES: Effective September 6, 1977. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: The applicable service bulletin may be obtained from Messerschmitt-Bolkow-Blohm GmbH, Helicopter Division, 8000 Munchen-Ottobrunn, Federal Republic of Germany or Boeing Vertol Company, Mail Stop P31–69, P.O. Box 16858, Philadelphia, Pennsylvania, 19142, telephone 215–522–2755.

A copy of the applicable service bulletin is contained in the Rules Docket, Rm. 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

D. C. Jacobsen, Chief, Aircraft Certification Staff, AEU–100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, Tel. 513.–38.30.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to add an airworthiness directive requiring modification of the gearbox oil pump and repetitive inspections of the gearbox magnetic chip detector on certain MBB Model BO–105A and BO–105C helicopters was published in the FEDERAL REGISTER at 42 FR 9681. The proposal was issued as a result of reports of insufficient oil flow to the sun gear in the planet gear of the main rotor gearbox which has caused excessive wear and premature impairment of the planet gear in service. Excessive wear of the planet gear can result in gearbox failure and loss of the helicopter.

Interested persons have been afforded an opportunity to participate in the making of the amendment. Comments were received on the proposal from the Boeing Vertol Company and the Helicopter Association of America. Both commentators suggested that the proposal be revised so that inspection of the magnetic chip detector in the main rotor gearbox at 10-hour intervals is not required for those affected helicopters that have a cockpit indicating system which continually monitors and warns of any accumulation of metallic particles on the magnetic chip detector. The Federal Aviation Administration agrees that consideration should be given to alternate means of compliance and accordingly has revised the proposed AD to include a new paragraph (c) which provides for the approval of alternate means of compliance.

DRAFTING INFORMATION

The principal authors of this document are M. E. Gaydos, Europe, Africa, and Middle East Region, N. S. Dobi, Flight Standards Service, and K. May, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

MESSERSCHMITT - BOLKOW - BLOHM (MBB). Applies to Model BO–105A and BO–105C helicopters which incorporate main rotor gearbox oil pumps, P/Ns 7631 955 112 or 7631 955 115, having Serial Numbers up to and including 229.

Compliance is required as indicated, unless already accomplished.

To prevent excessive wear of the sun gear in the planet gear carrier of the main rotor gearbox, accomplish the following:

(a) Within the next 100 hours time in service after the effective date of this AD, modify the main rotor gearbox oil pump as follows:

(1) For pumps, P/N 7631 955 115, install a stronger compression spring in accordance with MBB Service Bulletin No. 10–16, dated July 28, 1975, or an FAA-approved equivalent.

(2) For pumps, P/N 7631 955 112, replace the pump plunger in accordance with MBB Service Bulletin No. 10–20, dated May 25, 1976, or an FAA-approved equivalent and install a stronger compression spring in accordance with MBB Service Bulletin No. 10–16, dated July 28, 1975, or an FAA-approved equivalent.

(b) Within the next 10 hours time in service after the effective date of this AD and thereafter at intervals not to exceed 10 hours time in service since the last inspection, inspect the main rotor gearbox magnetic chip detector plug for the presence of metallic particles. If metallic particles are found, comply with the relevant instructions specified in section 10–1–2 of the MBB BO–105 Maintenance and Overhaul Manual, or an FAA-approved equivalent.

(c) An equivalent means of compliance with the requirements in paragraph (b) of this AD, including the initial compliance time and the repetitive inspection interval, may be used in lieu thereof when approved by the Chief, Aircraft Certification Staff, AEU–100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, Tel. 513.38.30.

This amendment becomes effective September 6, 1977.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Washington, D.C., July 27, 1977.

JAMES M. VINES,
Acting Director,
Flight Standards Service.

[FR Doc.77–22153 Filed 8–3–77;8:45 am]

[Docket No. 77–CE–15–AD; Amdt. 39–2998]

PART 39—AIRWORTHINESS DIRECTIVES

Cessna Models 205, 206, P206/TP206, U206/TU206, 207/T207, 210/T210 Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) applicable to certain Cessna Models 205, 206, P206/TP206, U206/TU206, 207/T207, and 210/T210 series airplanes, which requires inspection and testing of the P/N C291503–0101 or P/N 1216100–1 fuel selector valve for proper attachment of the selector disc to the actuating shaft and the replacement of any valves found defective. A loose or improperly attached disc may become incorrectly oriented and result in interruption of fuel flow or selection of a tank other than one indicated by the selector valve handle. This condition may cause partial or total engine power loss.

DATES: This amendment becomes effective August 11, 1977. Compliance: Required within 25 hours time-in-service after the effective date of this AD.

ADDRESSES: Cessna Service Letter Number SE77–22, dated June 27, 1977, which covers the subject matter of this AD, may be obtained from Cessna Aircraft Company, Marketing Division, Attention: Customer Service Department, Wichita, Kansas 67201; telephone 316–685–9111.

FOR FURTHER INFORMATION CONTACT:

Donald L. Page, Aerospace Engineer, Engineering and Manufacturing Branch, FAA, Central Region, 601 East 12th Street, Kansas City, Missouri 64106, telephone 816–374–3446.

SUPPLEMENTARY INFORMATION: Investigations by the manufacturer and FAA following a malfunctioning fuel valve report, disclosed that the selector disc on the malfunctioning valve was not properly attached to the actuating shaft and had rotated on this shaft, causing the disc to be incorrectly oriented with respect to the fuel valve handle. This condition may interrupt or restrict fuel flow or result in the engine feeding from a tank other than one selected by the pilot. Partial or total loss of engine power may result. The manufacturer has determined that this condition may exist on other valves manufactured and installed during a certain period of time and has issued Service Instructions Number SE77–22, dated June 27, 1977, prescribing tests to detect improperly attached selector discs and effect removal of valves which are found defective.

Since an unsafe condition is likely to exist in other airplanes of the same type design, an AD is being issued applicable to certain serial numbers of Cessna Models 205, 206, P206/TP206, U206/TU206, 207/T207, and 210/T210 series airplanes which will require inspection of the installed fuel selector valve to determine if it is within the group that may have an improperly attached selector disc and testing of all valves within the group to verify their airworthiness. Replacement of unairworthy valves will be required prior to further flight. The FAA has determined that there is an immediate need to make the inspection and valve replacement mandatory to assure the continued safe operation of the affected airplanes. Therefore, notice and public procedure under 5 U.S.C. 553(b) is impracticable and contrary to the public interest and good cause exists for making the amendment effective in less than thirty (30) days after the date of publication in the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal authors of this document are: Donald L. Page, Flight Standards Division, Central Region, and John L. Fitzgerald, Jr., Office of the Regional Counsel, Central Region.

ADOPTION OF THE AMENDMENT

Accordingly and pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD.

CESSNA. Applies to Models 210–5(205), 206, P206/TP206, U206/TU206, 207/T207 and 210/T210 series airplanes of the serial numbers specified below.

Compliance: Required within the next 25 hours time-in-service after the effective date of this AD, unless already accomplished.

To prevent malfunction of the P/N C291503–0101 or P/N 1216100–1 fuel selector valve, accomplish the following:

A. On Model 210–5(205) series (serial numbers 205–0481 through 205–0577), Model 206 series (serial numbers 206–0001 through 206–0275), Model P206/TP206 series (serial numbers P206–0001 through P20600647), Model U206/TU206 series (serial numbers U206–0276 through U20603123), Model 207/T207 series (serial numbers 20700001 through 20700322), Model 210/T210 series (serial numbers 21058221 through 21061154, and T210–0001 through T210–0454) airplanes, examine the aircraft maintenance records to determine whether the fuel selector valve has been changed subsequent to December 19, 1975. If the valve has not been changed, make an entry in the maintenance record indicating this AD is not applicable to the airplane and no further action is necessary. Examination of the records and the record entry may be accomplished by the owner/operator.

If the valve has been changed subsequent to December 19, 1975, accomplish a fuel valve inspection and, if indicated, replacement in accordance with paragraph C. below.

B. On Model U206/TU206 series (serial numbers U20603124 through U20603712, U20603714 through U20603791, U20603793 through U20603797, U20603799 through U20603803, U20603805, U20603808 through U20603812, U20603814 through U20603846, U20603848, U20603850, U20603851, U20603853 through U20603857, U20603861, U20603862, U20603867 through U20603871, U20603875, U20603876, U20603882 and U20603886), Model 207/T207 series (serial numbers 20700323 through 20700373, 20700375 through 20700394), and Model 210/T210 series (serial numbers 21061155 through 21061731, 21061733 through 21061766, 21061768 through 21061860, 21061862 through 21061881, 21061883 through 21061987, 21061990 through 21061993, 21061995 through 21062005, 21062007 through 21062009, 21062012 through 21062017, 21062020 through 21062022, 21062024 through 21062027, 21062029, 21062033 through 21062037, 21062043) airplanes, accomplish a fuel selector valve inspection and, if indicated, replacement in accordance with paragraph C. below.

C.1. Place fuel selector valve in OFF position.

2. Remove selector valve handle and associated parts. Obtain access to the valve by removal of the control valve pedestal and selector valve access plate from the floor.

3. Check the selector valve serial number. If the serial number is 1421 through 3269 inclusive, accomplish the pull test inspection described in paragraph C.4. below. If the serial number is not within this block, the valve is not affected, and the aircraft may be returned to service after reassembly.

4. Using tools fabricated in accordance with Figure 1, or an equivalent test arrangement, accomplish a pull test on the selector valve in accordance with the following procedure:

a. Remove safety wire, roll pin, and valve handle shaft from valve control yoke.

b. Feed cable through hole in yoke and crimp cable securely. Place bar in loop in other end of cable.

c. Remove four screws securing selector valve cover. Break the seal between the cover and body and rotate the cover to positively assure it is free.

d. Attach a tensiometer to the cable in the section between loops and from a seated or squatting position, with one foot on each side of the valve, using the legs and arms to lift, apply an upward force of 130 pounds minimum to 150 pounds maximum directly in line with the shaft while observing the shaft for movement. Exert upward force gradually. If any upward movement of valve shaft is noted, release force immediately. Drain fuel from airplane and install a new valve in accordance with the aircraft's Service Manual Instructions.

CAUTION

If the shaft pulls out of the valve body, fuel spillage may result. Therefore, all precautions applicable to working with or around open fuel should be observed.

e. If no upward movement of the valve shaft is noted or evident, reassemble the valve and aircraft and return to service.

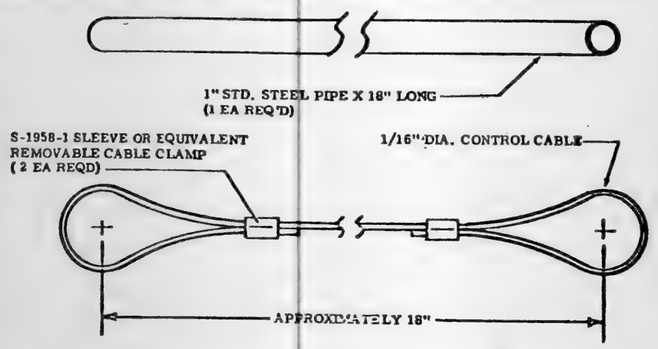

Figure 1.

D. Any equivalent method of compliance with this AD must be approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

Cessna Service Letter SE77–22, dated June 27, 1977, or later approved revisions pertain to the subject matter of this AD.

This amendment becomes effective August 11, 1977.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423); sec. 6(c) Department of Transportation Act (49 U.S.C. 1655(c)); § 11.89 of the Federal Aviation Regulations (14 CFR 11.89).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Kansas City, Missouri on July 26, 1977.

JOHN E. SHAW,
Acting Director, Central Region.

[FR Doc.77–22375 Filed 8–3–77;8:45 am]

[Docket No. 77–EA–19; Amdt. 39–3000]

PART 39—AIRWORTHINESS DIRECTIVES

Leigh Systems

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule (AD) amends AD 74–20–10, applicable to Leigh Systems Sharc 7 series emergency locator transmitters equipped with lithium batteries. The rule will add more serial numbers to those already covered by the AD. It appears that a corrosion problem had not been completly corrected by a potting and compartmentalizing of the units. These latter units are being added under this amendment.

DATES: Effective Date: August 10, 1977. Compliance within 90 days after the effectiveness of the amended rule and each 60 days thereafter.

ADDRESSES: Leigh Systems Bulletins may be acquired from the manufacturer at Leigh Systems, Inc., 6081 Court Street Road, Syracuse, New York 13206.

FOR FURTHER INFORMATION CONTACT:

M. Mavricos, Systems & Equipment Section, Engineering and Manufacturing Branch, AEA–213, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, telephone 212–995–3372.

SUPPLEMENTARY INFORMATION: AD 74–20–10 was issued for inspecting ELT's with lithium batteries for corrosion. The AD was amended in December 1974 to exclude ELT's which incorporated a potting method and a later developed compartmented case. Subsequent use has determined that while the two methods had appeared acceptable when tested, they too were the subject of corrosion. Thus the AD is being amended to add serial numbers which will apply to the compartmentized ELT's. In view of the effect on air safety, notice and public procedure hereon are impractical and good cause exists for making the rule (AD) effective in less than 30 days.

It has been determined that the expected impact of the proposed regulation is so minimal that the proposal does not warrant an evaluation.

DRAFTING INFORMATION

The principal authors of this document are M. Mavricos, Flight Standards Division, and Thomas C. Halloran, Esq., Office of the Regional Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, as follows:

Amend the applicability provision of AD 74–20–10 to read as follows:

Emergency Locator Transmitter Leigh Systems Sharc 7 series. Applies to all Leigh Systems Sharc 7 Emergency Locator Transmitters Serial Numbers all through 163500 equipped with lithium batteries.

Effective date: This AD is effective August 10, 1977.

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended by (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act, (49 U.S.C. 1655(c); 14 CFR 11.89).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Jamaica, New York, on July 27, 1977.

LOUIS J. CARDINALI,
Acting Director, Eastern Region.

[FR Doc.77–22376 Filed 8–2–77;8:45 am]

[Docket No. 77–NE–10; Amdt. 39–2997]

PART 39—AIRWORTHINESS DIRECTIVES

Sikorsky Models S–61L, S–61N, S–61NM, and S–61A Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: On May 16, 1977, the failure of a main landing gear fitting caused a Sikorsky S–61L to roll over on its side. Therefore on May 19, 1977, a telegraphic AD was issued requiring inspections of main landing gear fitting assemblies of Sikorsky S–61L, S–61N, and S–61A hellcopters. This amendment revises that AD in accordance with recently developed information and engineering data.

DATES: Effective date—August 18, 1977. Compliance schedule—As prescribed in the body of the AD.

ADDRESSES: To obtain copies of the service bulletin referenced in the AD, contact Sikorsky Aircraft, Division of United Technologies Corporation, Stratford, Connecticut 06602.

FOR FURTHER INFORMATION CONTACT:

William E. Garlock, Airframe Section, ANE–212, Engineering and Manufacturing Branch, Flight Standards Division, Federal Aviation Administration, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone: (617) 273–7336.

SUPPLEMENTARY INFORMATION: The telegraphic Airworthiness Directive adopted and made effective to all known United States operators of Sikorsky Model S–61 helicopters on May 19, 1977, was required as a result of the collapse of a main landing gear following failure of its upper right forward main gear fitting assembly. The collapse of the main landing gear caused the helicopter to roll over.

The May 19, 1977, telegraphic Airworthiness Directive required fluorescent penetrant inspections for cracks in the main landing gear fitting assemblies of all Sikorsky Model S–61L helicopters and certain S–61N and S–61A helicopters prior to further flight. The AD also required visual inspections for cracks in the fitting assemblies prior to the first flight of each day thereafter.

Since it was found that immediate corrective action was required, notice and public procedure thereon were impracticable and contrary to the public interest, and good cause existed for making the Airworthiness Directive effective immediately to all known United States operators of Sikorsky Model S–61 helicopters by individual telegrams dated May 20, 1977.

After issuing the telegraphic AD and prior to publication of the AD in the FEDERAL REGISTER, the agency determined that these main landing gear fittings may also be installed on Sikorsky S–61NM helicopters and fittings of an earlier thin-walled design may also be in service. Therefore, the AD is being revised to add the Model S–61NM and to require the inspection and removal of the fittings of earlier design. Based upon recent engineering analyses, a new visual inspection and new initial and repetitive fluorescent penetrant inspections are established for the fitting assemblies.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

DRAFTING INFORMATION

The principal authors of this document are William E. Garlock, Engineering and Manufacturing Branch, Flight Standards Division, and George L. Thompson Associate Regional Counsel.

ADOPTION OF THE AMENDMENT

Pursuant to the authority delegated to me by the Administrator (31 FR 13697), an Airworthiness Directive was adopted on May 19, 1977, and made effective immediately by telegram to all known United States operators of Sikorsky Model S–61 helicopters. These conditions still exist and the AD as revised herein is hereby published in the FEDERAL REGISTER as an amendment to § 39.13 of Part 39 of the Federal Aviation Regulations:

SIKORSKY AIRCRAFT. Applies to Sikorsky Models S–61L, S–61N, S–61NM, and S–61A helicopters with fixed S–61L type landing gear. Compliance required as indicated below:

1. Inspect the forward and aft left and right fitting assemblies, P/Ns S6125–50333–1, S6125–50333–2, S6125–50334–1, S6125–50334–2, S6125–50312 series, and S6125–50313 series, in accordance with the following: Prior to next flight, unless already accomplished, strip paint from the installed fittings at all accessible areas with Intex 8563 or equivalent, using a clean lint free cloth. Do not allow chemical remover to seep into holes or into bore of fitting assemblies. Do not use abrasive methods. Inspect the stripped areas with fluorescent penetrant, Spec MIL–I–6866B, Type 1, Method C, with MIL–I–25135C, Group VII designation.

NOTE.—The following are critical areas for inspection: the bottom surface and web of the fitting; upper surface of the fitting inboard from the first bolt toward the fuselage; and the area around the three (3) bolts which attach the forward fitting to the tube.

The helicopter may be flown in accordance with FAR 21.197 to a base where the inspection can be performed.

2. Replace all S6125–50312 series and S6125–S50313 series fitting assemblies with assemblies S6125–50338–1 and S6125–50338–2 within the next ten (10) landings after the accomplishment of the inspection required by Paragraph 1 above. Replacement fitting assemblies must be inspected in accordance with Paragraph 1 prior to installation.

3. Inspect fitting assemblies P/Ns S6125–50333–1, S6125–50333–2, S6125–50334–1, and S6126–50334–2 in accordance with the following: Within 15 hours time in service after the effective date of this AD and thereafter at intervals not to exceed 15 hours time in service, conduct a visual inspecton of accessible areas of the fitting assemblies for cracks in accordance with Section 2, Paragraph B, of Sikorsky Service Bulletin No. 61B25–6A dated June 10, 1977, or later FAA approved revisions.

4. Inspect fitting assembly P/Ns S6125–50333–1, S6125–50333–2, S6125–50334–1, and S6125–50334–2 with 7,000 or more landings in accordance with the following:

Within 120 landings after the effective date of this AD and thereafter at intervals not to exceed 120 landings from the last inspection, conduct a fluorescent penetrant inspection of accessible areas of the fitting assemblies for cracks in accordance with Section 2, Paragraph D, of the above Sikorsky Service Bulletin or later FAA approved revisions.

NOTE.—If number of landings cannot be determined, fitting assemblies shall be considered to have more than 7000 landings.

5. If a crack is found as a result of the above inspections in Paragraphs 1, 3, and 4,

replace the defective fitting assemblies with serviceable tube assemblies S6125-50338-1 and S6125-50338-2 prior to further flight. Replacement fitting assemblies must be inspected in accordance with Paragraph 1 prior to installation. Report immediately to Chief, Engineering and Manufacturing Branch, FAA, New England Region, if cracks are found; telephone 617-273-7328. (Reporting approved by the Office of Management and Budget under OMB No. 04-R0174.)

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)), 14 CFR 11.89.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

The manufacturer's specifications and procedures identified and described in this directive are incorporated herein and made a part hereof pursuant to 5 U.S.C. 552(a)(1). All persons affected by this directive who have not already received these documents from the manufacturer may obtain copies upon request to Sikorsky Aircraft, Stratford, Connecticut 06602. These documents may also be examined at FAA, New England Region, 12 New England Executive Park, Burlington, Massachusetts 01803, and at FAA Headquarters, 800 Independence Avenue, SW., Washington, D.C. A historical file on this AD which includes the incorporated material in full is maintained by the FAA at its Headquarters in Washington, D.C., and at the FAA, New England Region Headquarters, Burlington, Massachusetts.

Issued in Burlington, Mass., on July 26, 1977.

WILLIAM E. CROSBY,
Acting Director,
New England Region.

NOTE.—The incorporation by reference in the preceding document was approved by the Director of the Federal Register on June 19, 1967.

[Docket No. 77-SO-16]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Goldsboro, North Carolina transition area by providing additional controlled airspace in the vicinity of Mount Olive, North Carolina. This action provides necessary controlled airspace for accommodation of IFR operations at the Mount Olive Municipal Airport.

EFFECTIVE DATE: 0901 G.m.t., August 11, 1977.

ADDRESS: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

FOR FURTHER INFORMATION CONTACT:

C. Herman Thompson, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320, telephone 404-763-7647.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on Thursday, May 26, 1977 (42 FR 26992), which proposed an alteration of the Goldsboro, North Carolina transition area. No objections were received from this Notice.

DRAFTING INFORMATION

The principal authors of this document are C. Herman Thompson, Airspace and Procedures Branch, Air Traffic Division and Richard L. Faber, Office of Regional Counsel, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320.

ADOPTION OF AMENDMENT

Accordingly, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.m.t., August 11, 1977, by altering the Goldsboro, North Carolina, transition area as follows:

"* * * northeast of the RBN * * *" is deleted and "* * * northeast of the RBN; within a 6.5-mile radius of Mount Olive Municipal Airport (Lat. 35°13'24" N., Long. 78°02'21" W.); * * * is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c):(14 CFR 11:69).)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in East Point, Ga., on July 25, 1977.

LONNIE D. PARRISH,
Acting Director, Southern Region.

[FR Doc.77-22155 Filed 8-3-77;8:45 am]

[Docket No. 77-SO-21]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Revocation and Designation of Transition Areas; Bainbridge and Donalsonville, Georgia; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction.

SUMMARY: This document corrects a final rule that appeared at page 42 FR 30149 in the FEDERAL REGISTER of Monday, June 13, 1977.

EFFECTIVE DATE: August 11, 1977.

FOR FURTHER INFORMATION CONTACT:

Harlen D. Phillips, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320, telephone 404-763-7646.

SUPPLEMENTARY INFORMATION: In FR Doc. 77-16464, appearing on page 30149 in the issue of Monday, June 13, 1977, the longitude of the Donalsonville Airport was erroneously stated in the Donalsonville, Ga., transition area description, and should read as set forth below:

DONALDSONVILLE, GA.

That airspace extending from 700 feet above the surface within a 6.5-mile radius of Donalsonville Airport (Lat. 31°01'00" N., Long. 84°52'30" W.).

Issued in East Point, on July 25, 1977.

GEORGE R. LACAILLE,
Acting Director, Southern Region.

[Airspace Docket No. 77-NW-01]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Alteration of Controlled Airspace, Transition Area

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule designates additional 700 foot transition area at Lewiston, Idaho. This action is necessary to provide controlled airspace for aircraft holding in the terminal area.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Milton O. Sirois, Airspace Specialist (ANW-533), Operations, Procedures and Airspace Branch, Air Traffic Division, Federal Aviation Administration, Northwest Region, FAA Building, Boeing Field, Seattle, Washington, 98108; telephone: 206-767-2610.

SUPPLEMENTARY INFORMATION:

HISTORY

A notice of proposed rule making (NPRM) was published in the FEDERAL REGISTER on Thursday, June 2, 1977 (42 FR 28149) which described the proposed Lewiston, Idaho, transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. The comment received expressed no objection.

THE RULE

This amendment to Part 71 of the Federal Aviation Regulations (FARs) designates additional 700 foot transition area as controlled airspace to encompass holding aircraft on the Lewiston, Idaho VOR 079° radial.

DRAFTING INFORMATION

The principle authors of this document are Milton O. Sirois, Airspace Specialist, Operations, Procedures and Airspace Branch, and Jonathan Howe, Regional Counsel, Northwest Region.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, the Lewiston Idaho transition area in § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 440) is further amended, effective 0901 G.m.t., October 6, 1977, as follows:

LEWISTON, IDAHO

That airspace extending upward from 700 feet above the surface within an area bound by a line beginning at Latitude 46°27'25" N., Longitude 116°59'20" W., east to Latitude 46°25'15" N., Longitude 116°35'10" W., south to Latitude 46°15'00" N., Longitude 116°38'-00" W., west to Latitude 46°18'05" N., Longitude 117°00'00" W., thence via the arc of a 5-mile radius circle centered on Lewiston-Nez Perce County Airport (Latitude 46°22'-29" N., Longitude 117°00'51" W.,) to Latitude 46°26'58" N., Longitude 117°00'00" W., to point of beginning; that airspace extending upward from 1,200 feet above the surface bounded on the east by W. Longitude 116°, bounded on the south by N. Latitude 46°, bounded on the west by the arc of a 19-mile radius circle centered on the Walla Walla VOR (Latitude 46°06'13" N., Longitude 118°-17'29" W.,) and bounded on the north by V-536.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Seattle, Wash., on July 25, 1977.

C. B. WALK, JR.,
Director, Northwest Region.

[Docket No. 77-SO-29]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Revocation of Transition Area, Craig AFB Aux. (Vaiden), Alabama; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction.

SUMMARY: This document corrects a final rule that appeared at page 42 FR 35640 in the issue of Monday, July 11, 1977.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

William F. Herring, Airspace and Procedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320, Telephone: 404-763-7646.

SUPPLEMENTARY INFORMATION: In FR Doc. 77-19476, appearing on page 35640 in the issue of Monday, July 11, 1977, the first paragraph under Adoption of Amendment should read as set forth below:

Accordingly, pursuant to the authority delegated to me by the Administrator, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 440) is amended, effective 0901 G.m.t., October 6, 1977, the Craig AFB Aux. (Vaiden), Alabama, transition area is revoked.

Issued in East Point, Ga., on July 25, 1977.

GEORGE R. LACAILLE,
Acting Director, Southern Region.

[FR Doc.77-22127 Filed 8-3-77;8:45 am]

[Airspace Docket No. 77-SW-3]

PART 73—SPECIAL USE AIRSPACE

Alteration of a Restricted Area

Correction

In FR Doc. 77-19855 appearing at page 36247 in the issue for Thursday, July 14, 1977, on page 36248, in the first column, under the center heading "R-6302C FORT HOOD, TEX.", in the second line "87°45'00"" should read "97°45'00"".

[Airspace Docket No. 77-WA-8]

PART 75—ESTABLISHMENT OF JET ROUTES AND AREA HIGH ROUTES

Waypoint Name Changes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment changes the five-letter identifier/name of four offshore waypoints to be identical to the reporting point identifier/name at the same locations on several Pacific composite routes. Area high routes requiring change are J937R, J938R, J944R, J945R, J946R, J960R, J961R, J962R, J964R, J965R, J966R and J967R.

EFFECTIVE DATE: October 6, 1977.

FOR FURTHER INFORMATION CONTACT:

Everett L. McKisson, Airspace Regulations Branch, (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202-426-3715.

SUPPLEMENTARY INFORMATION: The purpose of this amendment to Part 75 of the Federal Aviation Regulations (14 CFR Part 75) is to: (1) Change the name of the LEAFS waypoint to ALCOA; (2) Change the name of the CERES waypoint to DINTY; (3) change the name of the YUCAN waypoint to FICKY; and (4) change the name of the FRUIT waypoint to CLUKK, where they appear in the description of Area High Routes.

The four waypoints are collocated with reporting points. Using two names for the same location is confusing and burdensome to the segment of the air traffic control system that is computerized.

Under these circumstances the FAA has concluded that there is a need to take action to eliminate the confusion and relieve the burden caused by having two names for the same location. Because this action merely renames waypoints, it is a minor matter on which the public would have no particular desire to comment; therefore, notice and public procedure thereon are unnecessary.

Since this action involved, in part, the use of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

DRAFTING INFORMATION

The principal authors of this document are Everett L. McKisson, Air Traffic Service, and Jack P. Zimmerman, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart D of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) as republished (42 FR 722) and amended (42 FR 55864) is further amended, effective 0901 G.m.t., October 6, 1977, as follows:

1. In J937R the title is changed to "J937R ALCOA to Chicago, Ill." Also the first waypoint is changed to "ALCOA 37°50'00" N., 125°50'00" W., Ukiah, Calif."

2. In J938R the title is changed to "J938R Chicago, Ill., to ALCOA" also the last waypoint is changed to "ALCOA 37°50'00" N., 125°50'00" W., Ukiah, Calif."

3. In J944R the title is changed to "J944R MORRO to DINTY" also the last waypoint is changed to "DINTY 33°29'00" N., 122°35'00" W., Santa Barbara, Calif."

4. In J945R the title is changed to "J945R CAMEL to DINTY" also the last waypoint is changed to "DINTY 33°29'00" N., 122°35'00" W., Santa Barbara, Calif."

5. In J946R the title is changed to "J946R MORRO to FICKY" also the last waypoint is changed to "FICKY 31°35'00" N., 121°22'00" W., Los Angeles, Calif."

6. In J960R the title is changed to "J960R DINTY to PARIA" also the first waypoint is changed to "DINTY 33°29'00" N., 122°35'00" W., Santa Barbara, Calif."

7. In J961R the title is changed to "J961R DINTY to PARIA" also the first waypoint is changed to "DINTY 33°29'00" N., 122°35'00" W., Santa Barbara, Calif."

8. In J962R the title is changed to "J962R FICKY to PARIA" also the first waypoint is changed to "FICKY 31°35'00" N., 121°22'00" W., Los Angeles, Calif."

9. In J964R the title is changed to "J964R Coaldale, Nev., to CLUKK" also

the last waypoint is changed to "CLUKK 36°05'00" N., 124°05'00" W., Oakland, Calif."

10. In J965R the title is changed to "J965R Coaldale, Nev., to ALCOA" also the last waypoint is changed to "ALCOA 37°50'00" N., 125°50'00" W., Ukiah, Calif."

11. In J966R the title is changed to "J966R ALCOA to Mina, Nev." also the first waypoint is changed to "ALCOA 37°50'00" N., 125°50'00" W., Ukiah, Calif."

12. In J967R the title is changed to "J967R CLUKK to Mina, Nev." also the first waypoint is changed to "CLUKK 36°05'00" N., 124°50'00" W., Oakland, Calif."

(Secs. 307(a), 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1510), Executive Order 10854 (24 FR 9565); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.69.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on July 28, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[FR Doc.77-22379 Filed 8-3-77;8:45 am]

[Docket No. 17063, Amdt. No. 1064]

SUBCHAPTER F—AIR TRAFFIC AND GENERAL OPERATING RULES

PART 97—STANDARD INSTRUMENT APPROACH PROCEDURES

Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: An effective date for each SIAP is specified in the amendatory provisions.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

FOR EXAMINATION

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

FOR PURCHASE

Individual SIAP copies may be obtained from: 1. FAA Public Information Center (APA-430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

BY SUBSCRIPTION

Copies of all SIAPs mailed weekly, may be ordered from Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. The current annual subscription price is $150.00; add $30.00 for each additional copy mailed to the same address.

FOR FURTHER INFORMATION CONTACT:

William L. Bersch, Flight Procedures and Airspace Branch (AFS-730), Aircraft Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591, telephone 202-426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 9) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the FEDERAL REGISTER expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, is location, the procedure identification and the amendment number.

This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPs criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, or contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The principal authors of this document are Rudolph L. Fioretti, Flight Standards Service, and Richard W. Danforth, Office of the Chief Counsel.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective on the dates specified, as follows:

1. By amending § 97.23 VOR-VOR/DME SIAPs identified as follows:

* * * *Effective September 22, 1977:*

Ft. Myers, FL—Page Field, VOR Rwy 13, Amdt. 4
Ft. Myers, FL—Page Field, VOR Rwy 23, Amdt. 2
Douglas, GA—Douglas Muni., VOR-A, Amdt. 2
Dixon, IL—Dixon Municipal-Charles R. Walgreen Field, VOR-A, Amdt. 5

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

SUBCHAPTER G—RULES, REGULATIONS, STATEMENTS AND INTERPRETATIONS UNDER THE MAGNUSON-MOSS WARRANTY ACT

PART 702—PRE-SALE AVAILABILITY OF WRITTEN WARRANTY TERMS

Liberty Distributors

AGENCY: Federal Trade Commission.

ACTION: Advisory Opinion.

SUMMARY: The Federal Trade Commission issues an advisory opinion as to whether a microfiche viewing system which indexes and groups warranties by warrantor, rather than by product class, satisfies the requirements of FTC's Pre-Sale Availability of Written Warranty Terms regulations. The advisory opinion is issued in response to a request from Liberty Distributors of Des Plaines, Illinois.

DATES: Effective immediately.

FOR FURTHER INFORMATION CONTACT:

Stephen Leach, Attorney, Division of Special Statutes, Bureau of Consumer Protection, Federal Trade Commission, Washington, D.C. 20580, 202-724-1145.

SUPPLEMENTARY INFORMATION: By letter of April 22, 1977 Liberty Distributors of Des Plaines, Illinois, requested an advisory opinion as to whether a microfiche viewing system which indexes and groups warranties by warrantor, rather than by product class, satisfies § 702.3(a)(1)(ii) of the Pre-Sale Availability Rule, 16 CFR 702.3(a)(1)(ii). The Pre-Sale Rule implements Section 102(b)(1)(A) of the Magnuson-Moss Warranty Act, 15 U.S.C. 2302(b)(1)(A). Section 702.3(a)(1)(ii) provides that a retailer may satisfy the rule by maintaining a binder "or (other) similar system which will provide the consumers with convenient access to copies of product warranties," 16 CFR 702.1(g). Liberty Distributors is an association of hardware goods wholesalers which arranges buying agreements with manufacturers and assists hardware retailers in sales operations.

The Commission has determined that a microfiche (or ultrafiche) viewing system which arranges warranties by warrantor, rather than by product class, would satisfy § 702.3(a)(1)(ii) of the Pre-Sale Rule if certain conditions de-

signed to ensure convenient consumer access to warranties are met.

The text of the Commission's opinion is as follows:

This is in response to your request for an advisory opinion regarding compliance with the Commission's Rule on the Pre-Sale Availability of Written Warranty Terms, 16 CFR Part 702. You ask whether a microfiche viewing system which indexes and groups product warranties by warrantor, rather than by product class, satisfies § 702.3(a)(1)(ii) of the Pre-Sale Availability Rule. Section 702.3(a)(1)(ii) provides that a seller (retailer) may meet the requirements of the rule by maintaining a binder "or [other] similar system which will provide the consumer with convenient access to copies of product warranties." 16 CFR 702.1(g). The rule permits sellers to index binders according to either product or warrantor.

The Commission has carefully considered the matters set forth in your request. It is the Commission's conclusion that a microfiche viewing system which indexes and groups warranties by warrantor, rather than by product class, would satisfy § 702.3(a)(1)(ii) of the Commission rule, if the following conditions are met:

(1) Simple, complete instructions for use of the system are posted on each viewer;

(2) Personnel in each selling establishment familiar with the operation of the system are available to assist consumers should the need arise; and

(3) The microfiche cards used to display warranties contain only warranty information.

These conditions are similar or identical to the conditions which the Commission set out in its advisory opinions to the National Retail Hardware Association, 41 FR 53472, and Sears, Roebuck, Inc., 42 FR 15679. Those opinions concerned the use of other microfiche or ultrafiche systems under the Pre-Sale Availability Rule. The requirements of those opinions remain applicable to sellers using microfiche or ultrafiche systems in which warranties are grouped and indexed by product class rather than by warrantor.

Your request referred only to microfiche viewing systems. The Commission believes that the differences between microfiche and ultrafiche systems are irrelevant for the purpose of complying with the Pre-Sale Availability Rule. Therefore, this opinion is also applicable to ultrafiche systems in which warranties are indexed and grouped by warrantor.

By direction of the Commission.

CAROL M. THOMAS,
Secretary.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7499]

PART 11—TEMPORARY INCOME TAX REGULATIONS UNDER THE EMPLOYEE RETIREMENT INCOME SECURITY ACT OF 1974

Minimum Funding Standards for Pension Plans

AGENCY: Internal Revenue Service, Treasury.

ACTION: Temporary regulations.

SUMMARY: This document provides temporary regulations relating to the determination of actuarial costs under the minimum funding standards for defined benefit pension plans. These regulations implement provisions of the Employee Retirement Income Security Act of 1974. The temporary regulations provide necessary guidance to the public for compliance with that Act, and affect many sponsors of defined benefit plans. In addition, the rules contained in the temporary regulations promulgated by this document serve as a notice of proposed rulemaking by which the rules contained therein are proposed to be prescribed as final regulations.

DATES: The temporary regulations are effective generally for plan years beginning after 1975, but earlier (or later) in the case of some plans as provided by the Employee Retirement Income Security Act of 1974. The proposed regulations are to be effective for the same period.

Written comments and requests for public hearing must be delivered or mailed by October 28, 1977.

ADDRESS: Send comments and requests for a public hearing to: Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224.

FOR FURTHER INFORMATION CONTACT:

J. Douglas Sorensen of the Legislation and Regulations Division, Office of the Chief Counsel, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, D.C. 20224 (Attention: CC:LR:T) (202-566-3478).

SUPPLEMENTARY INFORMATION:

BACKGROUND

This document contains amendments to the temporary Income Tax Regulations under the Employee Retirement Income Security Act of 1974 (26 CFR Part 11), and a notice of proposed amendments to the income tax regulations (26 CFR Part 1), under section 412(c)(1) of the Internal Revenue Code of 1954. These regulations conform the regulations to section 1013 of the Employee Retirement Income Security Act of 1974 (ERISA) (88 Stat. 914) and are issued under the authority of section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805), and section 3(31) of ERISA (88 Stat. 837; 29 U.S.C. 1002). The temporary and proposed regulations contained in this document will also apply for purposes of section 302 of ERISA (88 Stat. 869). The temporary regulations provided by this document will remain in effect until superseded by the adoption of final regulations proposed by this document.

EXPLANATION OF PROVISIONS

Section 412 of the Internal Revenue Code of 1954, contained in section 1013 of ERISA, provides minimum funding requirements with respect to certain pension plans. These requirements include the maintenance of a minimum funding standard account, to which the normal cost of the plan and certain amortization amounts are charged, and contributions to the plan and certain other amortization amounts are credited annually.

In the Conference Report accompanying ERISA, the conferees noted that, in the case of many collectively bargained plans, annual contributions were negotiated in terms of a specified amount per hour of service or some other unit of production. The conferees expressed the belief that in those cases employers generally must be allowed to base their contributions on the bargained and agreed-upon basis during the period to which the agreement relates. H.R. Rept. No. 93-1280 285 (1974).

In general, in order to reflect the intent of the conferees, these regulations contain detailed rules which allow collectively bargained plans to use a special method termed the "shortfall method" for computing the charges to the funding standard account. Under the shortfall method, the charge is computed on the basis of an estimated number of units of service or production (for which a certain amount per unit is to be charged). The difference between the net amount charged or credited under this method and the net amount that otherwise would have been charged or credited under section 412 for the same period is termed a "shortfall gain or loss" and is to be amortized during certain subsequent plan years. Because of their unique character and needs, special rules are included for the application of the shortfall method to collectively bargained plans that are maintained by more than one employer.

Procedures are provided for electing the shortfall method. In certain cases the shortfall method, and the specific methods of computation applicable to plans maintained by more than one employer, may be elected only upon the approval of the Commissioner.

COMMENTS AND REQUESTS FOR A PUBLIC HEARING

Before adopting the rules contained in the temporary regulations as final regulations, consideration will be given to any written comments that are submitted (preferably eight copies) to the Commissioner of Internal Revenue. All comments are available for public inspection and copying. A public hearing will be held upon written request to the Commissioner by any person who has submitted written comments. However, it is anticipated that any public hearing will be deferred until the issuance of further proposed regulations regarding section 412. If a public hearing is held, notice of the time and place will be published in the FEDERAL REGISTER.

DRAFTING INFORMATION

The principal author of these regulations was J. Douglas Sorensen of the Legislation and Regulations Division of the Office of Chief Counsel, Internal Revenue Service. However, personnel from other offices of the Internal Revenue Service and Treasury Department participated in developing the regulations, both on matters of substance and style.

ADOPTION OF AMENDMENTS TO THE TEMPORARY REGULATIONS

The temporary income tax regulations under the Employee Retirement Income Security Act of 1974, 26 CFR Part 11, are amended by adding in the appropriate place the following new sections:

§ 11.412(c)(1)-1 Determinations to be made under funding method—terms defined.

(a) *Actuarial cost method and funding method.* Section 3(31) of the Employee Retirement Income Security Act of 1974 ("ERISA") provides certain acceptable (and unacceptable) actuarial cost methods which may (or may not) be used by employee plans. The term "funding method" when used in section 412 has the same meaning as the term "actuarial cost method" in section 3(31) of ERISA. For shortfall method for certain collectively bargained plans, see § 11.412(c)(1)-2.

(b) *Computations included in funding method.* The funding method of a plan includes not only the overall funding method used by the plan but also each specific method of computation the overall method. However, the choice of which actuarial assumptions are appropriate to the overall method or specific method of computation is not a part of the funding method. For example, the decision to use or not use a mortality factor in the funding method of a plan is not a part of such funding method. Similarly, the specific mortality rate determined to be applicable to a particular plan year is not part of the funding method. See section 412(c)(5) for permission to change the funding method used by a plan.

§ 11.412 (c)(1)2 Shortfall method.

A collectively bargained plan may elect to determine the charges to the funding standard account required by section 412(b) under the shortfall method. The shortfall method is a funding method. In general, under the shortfall method, the net charge to the funding standard account is computed on the basis of an estimated number of units of service or production for a certain period (for which a certain amount per unit is to be charged). The difference between the net amount charged or credited under the shortfall method and the net amount that otherwise would have been charged or credited under section 412 for the same period is the shortfall gain or loss to be amortized. This section includes special rules for applying the method to collectively bargained plans that are maintained by more than one employer.

(a) *In general*—(1) *Shortfall method.*

(2) *Collectively bargained plans.* For purposes of this section, a collectively bargained plan is a plan described in section 413(a).

(3) *Plan maintained by more than one employer.* For purposes of this section, whether a plan is maintained by more than one employer shall be determined without regard to the rules of section 414(b) and (c) (relating to related employers).

(b) *Computation of net charge*—(1) *In general.* The "net charge" to the funding standard account under the shortfall method is the estimated unit charge described in paragraph (c) of this section multiplied by the actual number of units of service or production which occurred during the plan year. When the shortfall method is used, charges and credits to the funding standard account are not made under section 412(b)(2) and (3)(B).

(2) *Example.* Paragraph (b)(1) of this section may be illustrated by the following example:

Example. A pension plan uses the calendar year as the plan year and the shortfall method. Its estimated unit charge applicable to 1980 is 80 cents per hour of covered employment. During 1980, there were 125,000 hours of covered employment. The net charge for the plan year is $100,000, (i.e., 125,000 × $.80) regardless of the amount which would be charged and credited to the funding standard account under section 412(b)(2) and (3)(B) had the shortfall method not applied. The funding standard account for 1980 will be separately credited for the amount considered contributed for the plan year under section 412(b)(3)(A). The other items which may be credited, if applicable, are a waived funding deficiency and the alternative minimum funding standard credit adjustment under section 412(b)(3)(C) and (D) because these items are not credits under section 412(b)(3)(B).

(3) *Plans maintained by more than one employer.* If a single plan maintained by more than one employer has more than one contribution rate:

(i) The plan may use as a specific method of computation under the shortfall method the computation of a separate net charge for each employer or each benefit level.

(ii) Only one actuarial valuation shall be made for the single plan on each actuarial valuation date.

(iii) The specific method of computation of the net charge must be reasonable, determined in the light of the facts and circumstances.

(c) *Estimated unit charge.* The estimated unit charge is the anticipated annual charge described in paragraph (d) of this section divided by the estimated base units of service or production described in paragraph (e) of this section.

(d) *Anticipated annual charge.* The anticipated annual charge for a plan year is the sum of the following amounts:

(1) The net anticipated charges and credits which, but for using the shortfall method, would be made under section 412(b)(2) and (b)(3)(B).

(2) The amount described in paragraph (g)(4) of this section, if applicable, for amortization of shortfall gain or loss.

(e) *Estimated base units; in general.* The estimated base units are the expected units of service or production for the plan year (hours, days, tons, etc.) based upon the experience of the plan and reasonable expectations for such year. Except as provided in paragraph (f) of this section, the date for estimating base units (the "base unit estimation date") for a current plan year may not be earlier than the last actuarial valuation date occurring on or before the first day of the current plan year.

(f) *Base unit estimation date for plan maintained by more than one employer*—(1) *In general.* If a plan is maintained by more than one employer, the base unit estimation date for the current plan year is determined under this paragraph (f). Such date shall be no earlier than the last actuarial valuation date occurring at least one year before the earliest date any current collectively bargained agreement in existance during the plan year came into effect.

(2) *Four-month rule.* For purposes of this paragraph (f), a current collectively bargained agreement is one in effect during at least four months of the current plan year.

(3) *Effective date of agreement.* For purposes of this paragraph (f), a collectively bargained agreement shall be deemed to have come into effect on the effective date of the agreement containing the currently effective provision for contributions to the plan or the benefits provided under the plan.

(4) *Long-term contract rule.* The effective date of a collectively bargained agreement shall be deemed not to occur prior to the first day of the third plan year preceding the current plan year.

(5) *Transition rule.* In no event shall the base unit estimation date be earlier than the last actuarial valuation date of the plan which occurred on or before January 1, 1976.

(6) *Example.* The rules contained in paragraphs (e) and (f) this section are illustrated by the following table. The table shows the resulting earliest base unit estimation date with respect to the following assumed items:

V Actuarial valuation date (January 1 in each case shown).
B Beginning of a contract.
E End of a contract.

COMPUTATION OF BASE UNIT ESTIMATION DATE

Example	Plan year (calendar year basis) 1976	1977	1978	1979	1980	1981	1982	1983	1984
Plan A 2/	V		V	V			V		
Contract A	----------	----------	----E/B----	----------	----E/B----	----------	----------	----------	----E/B----
Base unit estimation date 1/	1976	1976	1976	1979	1979	1979	1982	1982	1982
Plan B - C 3/	V		----E/B----	V	----------	----------	E/B*----------	----------	----E
Contract B	B*----------	----------	----------	----E/B----	----------	----------	----E/B----	----------	----------
Contract C	----E/B----	----------	----------	----------	----------	----------	----------	----------	----------
Base unit estimation date 1/	1976	1976	1976	1976	1976	1976	1976	1979	1979
Plan D - E 3/	V		V	V	V	V	V	V	V
Contract D	----------	----------	----------	E/B*----------	----------	----------	----E/B----	----------	----------
Contract E	----------	----------	E/B*----------	----------	----------	----------	----------	----E/B----	----------
Base unit estimation date 1/	1976	1976	1976	1978	1978	1978	1978	1979	1982

1/ The base unit estimation date may be on or any time after the actuarial valuation date in the year indicated on this line.

2/ Plan A is maintained by only one employer.

3/ Plans B-C and D-E are maintained by more than one employer.

* Denotes that a new contract begins prior to the fifth month of a plan year.

(g) *Amortization of shortfall gain or loss*—(1) *Definition.* The shortfall gain for a plan is the excess for the plan year of—

(i) The net charge computed under paragraph (b) of this section over

(ii) The anticipated annual charge described in paragraph (d) of this section.

The shortfall loss for a plan is the excess for the plan year of the anticipated annual charge over the net charge.

(2) *Period of amortization; in general.* The shortfall gain or loss shall be amortized—

(i) Beginning with the first and

(ii) Ending with the 15th plan year following the plan year it arose. For a multiemployer plan described in section 414(f), the amortization ends with the 20th plan year instead of the 15th.

(3) *Deferral of shortfall amortization period; plan maintained by more than one employer.* As a specific method of computation under the shortfall method for a plan maintained by more than one employer, the shortfall gain or loss may be amortized—

(i) Beginning with the fifth plan year following the plan year it arose, and

(ii) Ending with the plain year specified in paragraph (g)(2) of this section.

If that specific method is used, the amount of the shortfall gain or loss for a plan year must be adjusted for interest from the last day of such year to the beginning of the first plan year in which it is amortized.

(4) *Annual amortization amount.* The shortfall gain or loss must be amortized in equal annual installments. The total amount to be amortized must be adjusted for interest at the rate used for determining the plan's normal cost. The adjustments are for—

(i) Interest described in paragraph (g)(3) of this section, if applicable, due to a delay of the beginning of amortization, and

(ii) Interest during the period of amortization.

(5) *Example.* This paragraph is illustrated by the following example:

Example. A multiemployer plan described in section 414(f) is maintained with the calendar year as the plan year and uses the shortfall method. A five percent interest assumption is used by the plan, with payments computed as of the first day of each plan year. The administrator chose to defer the beginning of amortization of shortfall gains and losses, as provided under paragraph (g)(3) of this section. The assumed plan costs and estimated base units for selected years, and the computations under this section which follow from such assumptions are shown in the following table. In the table, "*" denotes an assumed item. The remaining figures have been calculated on the basis of these assumptions

(a) *Computation of net charge and shortfall gain or loss.*

Plan year	1976	1977	1978
1. Normal cost*	$100,000	$100,000	$100,000
2. Amortization of unfunded liability*	50,000	50,000	50,000
3. Total anticipated charges	150,000	150,000	150,000
4. Estimated base units*	100,000	100,000	100,000
5. Estimated unit charge (line 3 divided by line 4)	$1.50	$1.50	$1.50
6. Actual units during year*	80,000	90,000	110,000
7. Net charge for year (line 5 multiplied by line 6)	$120,000	$135,000	$165,000
8. Shortfall (gain) or loss (line 3 minus line 7)	$30,000	$15,000	($15,000)

(b) *Annual amortization amount.*

9. Year of shortfall gain or loss	1976	1977	1978
10. 1st year of amortization	1981	1982	1983
11. Last year of amortization	1996	1997	1998
12. (Gain) or loss adjusted for interest to year amortization beigns (4 yr)	$36,465	$18,233	($18,232)
13. Annual amortization (16 yr)	$3,204	$1,602	($1,602)

(c) *Computation of net charges for selected years (including shortfall amortization).*

Plan year	1981	1982	1983
14. Normal cost*	$120,000	$125,000	$130,000
15. Amortization of unfunded liability*	50,000	50,000	50,000
16. Shortfall amortization (see line 13) from:			
1976	3,204	3,204	3,204
1977		1,602	1,602
1978			(1,602)
17. Total anticipated charges	173,204	179,806	183,204
18. Estimated base units*	110,000	110,000	110,000
19. Estimated unit charge (line 17 divided by line 18)	$1.575	$1.635	$1.665
20. Actual units during year*	105,000	110,000	105,000
21. Net charge for year (line 19 multiplied by line 20)	$165,375	$179,850	$174,825
22. Shortfall (gain) loss (line 17 minus line 21)	$7,829	$(44)	$8,379

The amounts in line 22 will be amortized beginning 1986, 1987, and 1988, respectively.

(h) *Amortization of experience gain or loss*—(1) *General rule.* For purposes of determining the net anticipated annual charge under paragraph (d)(1) of this section, an experience gain or loss shall be amortized pursuant to section 412(b)(2)(B)(iv) or (b)(3)(B)(ii). This amortization begins with the first plan year commencing on or after the actuarial valuation date with respect to which such experience gain or loss is determined. For purposes of this section, a shortfall gain or loss is not an experience gain or loss.

(2) *Deferral of experience amortization period; plan maintained by more than one employer.* As a specific method of computation under the shortfall method for a plan maintained by more than one employer, the experience gain or loss may be amortized—

(i) Beginning with the fifth, and

(ii) Ending with the 15th plan year that begins on or after the valuation date with respect to which the experience gain or loss is computed. For a multiemployer plan described in section 414(f), the amortization ends with the 20th plan year instead of the 15th. If that specific method is used, the amount of the experience gain or loss must be adjusted for interest from the valuation date to the beginning of the first plan year in which it is amortized.

(i) *Election procedure*—(1) *In general.* To elect the shortfall method, a collectively bargained plan must attach a statement to the annual report required under section 6058(a) for the first plan year to which it is applied. The statement shall state that the shortfall method is adopted, beginning with the plan year covered by such report. Advance approval from the Internal Revenue Service is not required if the shortfall method is first adopted on or before the later of—

(i) The first plan year which section 412 applies or

(ii) The last plan year commencing before December 31, 1980.

However, approval must be received pursuant to section 412(c)(5) prior to the adoption of the shortfall method at a later time, or the discontinuance of such method, once adopted.

(2) *Use of specific computation methods by plans maintained by more than one employer.* There are specific methods of computation under the shortfall method. They are described in paragraphs (b)(3), (g)(3), (h)(2) of this section, regarding more than one benefit level under the plan, and the delay of amortization of shortfall and experience gains and losses. These specific methods may be adopted with respect to any plan year to which the shortfall method applies. Approval from the Commissioner must be received under section 412(c)(5) prior to the adoption of one or more

of the specific computation methods for a plan year subsequent to the first plan year to which the shortfall method applies, or the discontinuance of a specific computation method, once adopted.

(3) *Reporting requirements.* Each annual report required by section 6058(a) and periodic report of the actuary required by section 6059 must include all additional information relevant to the use of the shortfall method as may be required by the applicable forms and the instructions for such forms.

There is a need for immediate guidance with respect to the provisions contained in this Treasury decision amending the temporary income tax regulations under the Employee Retirement Income Security Act of 1974. For this reason, it is found impracticable to issue it with notice and public procedure under subsection (b) of section 553 of Title 5 of the United States Code or subject to the effective date limitation of sub-section (d) of that section.

This Treasury decision is issued under the authority contained in sections 412 and 7805 of the Internal Revenue Code of 1954 (88 Stat. 914 and 68A Stat. 917; 26 U.S.C. 412 and 7805), and section 3(31) of the Employee Retirement Income Security Act of 1974 (88 Stat. 837; 29 U.S.C. 1002).

JEROME KURTZ,
Commissioner of Internal Revenue.

Approved: July 25, 1977.

LAURENCE N. WOODWORTH,
Assistant Secretary of the Treasury.

Title 28—Judicial Administration

CHAPTER I—DEPARTMENT OF JUSTICE

PART 32—PUBLIC SAFETY OFFICERS' DEATH BENEFITS

Benefit Payments to Certain Survivors

AGENCY: Department of Justice/Law Enforcement Assistance Administration.

ACTION: Final rule.

SUMMARY: LEAA is making two amendments to the regulations implementing the Public Safety Officers' Benefits Act of 1976. The first amendment clarifies that the Administrator reserves the final authority over actions recommended by Administration representatives. The second amendment provides notice of a recent IRS ruling that PSOB benefits are not subject to Federal income tax.

EFFECTIVE DATE: August 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Thomas J. Madden, General Counsel, LEAA, 202-376-3691.

SUPPLEMENTARY INFORMATION: A new paragraph (h) is being added to § 32.24 of the regulations, specifying that the LEAA Administrator may, on his own motion, review and, if appropriate, reverse the decision of the Administration representative who has heard the appeal of a claimant requesting reconsideration of the Administration's initial adverse determination. The Administrator is being given this authority primarily to ensure that no payments are made which are based on decisions inconsistent with the Act or regulations. The procedure is similar to the one used by the Department of Labor in administering the Federal Employees' Compensation Act. See 5 U.S.C. 8128(a) and 20 CFR 10.136.

Accordingly, § 32.24 is amended by the addition of a new paragraph (h), former paragraphs (h) and (i) are redesignated (i) and (j).

§ 32.24 Request for a hearing.

* * * * *

(h) The Administrator may, on his own motion, review an award or denial made by the representative. The Administrator, in accordance with the facts found on review, may order an award paid or deny an award ordered to be paid by the representative. The Administrator's determination shall be the final agency determination.

* * * * *

The other amendment notifies all beneficiaries of the Internal Revenue Service's recent ruling that PSOB benefits are not subject to Federal income tax.

§ 32.18 [Amended]

The second paragraph of the commentary to § 32.18(b), which noted the IRS's earlier tentative opinion on the taxable nature of the benefit is, therefore, deleted and the following paragraph is added:

"On July 11, 1977, the Internal Revenue Service ruled that the PSOB benefit was not subject to Federal income tax. Revenue Ruling No. 77-235, IRB 1977-28."

JAMES M. H. GREGG,
Assistant Administrator,
Office of Planning and Management.

[FR Doc.77-22437 Filed 8-3-77;8:45 am]

Title 33—Navigation and Navigable Waters

CHAPTER I—COAST GUARD, DEPARTMENT OF TRANSPORTATION

[CGD 76-192]

PART 110—ANCHORAGE REGULATIONS

Enlargement of Special Anchorage Area, Beverly Harbor, Salem, Massachusetts

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: This amendment enlarges the special anchorage area at Beverly Harbor, Salem, Massachusetts. This amendment is needed because of the increase in recreational boating in the area. In special anchorage areas, vessels under 65 feet in length, when at anchor, are not required to carry or exhibit anchor lights.

EFFECTIVE DATE: This amendment is effective September 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202-426-1477.

SUPPLEMENTARY INFORMATION: On March 7, 1977 the Coast Guard published a proposed rule (42 FR 12890) concerning this amendment. Interested persons were given until April 20, 1977 to submit comments. No comments were received.

DRAFTING INFORMATION

The principal persons involved in drafting this rule are: LCDR H. E. Snow, Project Manager, Office of Marine Environment and Systems, and Mr. S. D. Jackson, Project Attorney, Office of the Chief Counsel.

In consideration of the foregoing, Part 110 of Title 33 Code of Federal Regulations § 110.25(a) is amended to read as follows:

§ 110.25 Beverly and Salem Harbors, Massachusetts

(a) Beverly Harbor, North of Salem Neck. A line extending from the northerly end of the Salem Willows Yacht Club House 360 yards bearing 281° true to latitude 42°32'14" N., longitude 70°52'26" W.; thence north 275 yards to Monument Bar Beacon thence 540 yards bearing 080° to latitude 42°32'25" N., longitude 70°52'04" W., thence 365 yards bearing 175° to latitude 42°32'14" N., longitude 70°52'03" W.; thence 237° to the shore.

(Sec. 1, 30 Stat. 98, as amended (33 U.S.C. 180); sec. 6(g)(1)(B), 80 Stat. 937 (49 U.S.C. 1655(g)(1)(b)); 49 CFR 1.46(c)(2).)

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended, and OMB Circular A-107.

Dated: July 25, 1977.

O. W. SILER,
Admiral, U.S. Coast Guard
Commandant.

[FR Doc.77-22406 Filed 8-3-77;8:45 am]

[CGD 76-230]

PART 117—DRAWBRIDGE OPERATION REGULATIONS

Sarasota County, Florida

AGENCY: Coast Guard, DOT.

ACTION: Final Rule.

SUMMARY: This amendment revises the regulation for the drawbridges across Hatchett Creek, U.S. 41; Ringling Causeway, S.A. 780; and New Pass, S.R. 789 to allow restricted periods during daylight hours. The Coast Guard feels that this will provide relief for vehicular traffic, which has increased significantly over the past few years, without penalizing marine traffic unduly. The Siesta Key Bridge was rejected for restrictive regulations because the Coast Guard felt that the statistical data submitted did not justify the requested change.

EFFECTIVE DATE: This amendment is effective on September 3, 1977.

FOR FURTHER INFORMATION CONTACT:

Frank L. Teuton, Jr., Chief, Drawbidge Regulations Branch (GWBR/73), Room 7300, Nassif Building, 400 7th Street SW., Washington, D.C. 20590, 202-426-0942.

SUPPLEMENTARY INFORMATION: On December 23, 1976, the Coast Guard published a proposed rule (41 FR 55897) concerning this amendment. The Commander (oan) Seventh Coast Guard District also published these proposals as a public notice on December 23, 1976. Interested persons were given until January 25, 1977, to submit comments. Of some 600 comments received 400 generally supported and 200 generally opposed the proposals. In an attempt to gather as much information as possible, and provide the public an opportunity to be heard on this matter, the Coast Guard held a public hearing on March 17, 1977, at the Sarasota City Mobile Home Park Auditorium.

DRAFTING INFORMATION

The principal persons involved in drafting this rule are: Frank L. Teuton, Jr., Project Manager, Office of Marine Environment and Systems, and Lieutenant Edward J. Gill, Project Attorney, Office of the Chief Counsel.

DISCUSSION OF COMMENTS

In response to the public notice issued on December 23, 1976, and the public hearing held on March 17, 1977, the following comments were received:

a. Seven petitions with 2,238 signatures supporting the proposed regulations.

b. Of the letters of support received, 413 support the regulations at Ringling Causeway, 288 support the regulations at Hatchett Creek, 353 support the regulations at New Pass, and 352 supported the regulations at Siesta Key.

c. Of the letters of opposition received, 145 opposed the regulations at Ringling Causeway, 145 opposed the regulations at Hatchett Creek, 150 opposed the regulations at New Pass, and 146 opposed the regulations at Siesta Key.

d. Forty-one letters were received suggesting alternatives to the proposed regulations. These suggestions varied from opening all bridges on 15-minute intervals, one draw opening each hour, to three closed periods each day during peak traffic periods.

Based on evaluation of statistical data, comments received from all interested parties, and independent investigation by the Coast Guard, it is felt that the proposed regulations are not justified for the Siesta Key drawbridge.

After a full evaluation of the drawbridge openings on the Hatchett Creek and New Pass drawbridges, together with the geographical location of each structure, it is felt that limiting of the bridges to half-hour openings would be an unreasonable restriction to navigation due to the lack of maneuverability and holding areas at Hatchett Creek and the lack of holding areas and swift currents at New Pass. Opening of these bridges on 15-minute intervals will provide the relief necessary for vehicular traffic by avoiding multiple openings, while providing for the reasonable needs of navigation.

The proposed regulations for the Ringling Causeway appear to provide for the reasonable needs of navigation and will also provide a more reasonable flow of vehicular traffic.

The Commander, Seventh Coast Guard District will closely monitor this matter. If conditions change, he may recommend a revision of these regulations to the Commandant.

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is amended by adding a new § 117.462a immediately after § 117.462 to read as follows:

§ 117.462a Sarasota County bridges.

(a) Hatchett Creek, Gulf Intracoastal Waterway, mile 56.9, State of Florida highway bridge, U.S. Highway 41, Venice, Florida. The draw shall open on signal from 6 p.m. to 7:30 a.m. From 7:30 a.m. to 6 p.m. the draw need not open except on the hour, quarter-hour, half-hour, and three-quarter hour, and except as provided in paragraph (d) of this section.

(b) Ringling Causeway, Gulf Intracoastal Waterway, mile 73.6, State of Florida highway bridge, State Road 780, Sarasota, Florida. The draw shall open on signal from 6 p.m. to 7:30 a.m. From 7:30 a.m. to 6 p.m., the draw need not open except on the hour and half-hour, and except as provided in paragraph (d) of this section.

(c) New Pass, mile 0.0, State of Florida highway bridge, State Road 789, Sarasota County, Florida. The draw shall open on signal from 6 p.m. to 7:30 a.m. From 7:30 a.m. to 6 p.m., the draw need not open except on the hour, quarter-hour, half-hour and three-quarter hour, and except as provided in paragraph (d) of this section.

(d) The draws of each bridge in this section shall open at any time for the passage of public vessels of the United States, tugs with tows, or vessels in distress. The opening signal from these vessels is four blasts of a whistle, horn, or by shouting.

(Sec. 5, 28 Stat. 362, as amended, sec. 6(g)(2), 80 Stat. 937; (33 U.S.C. 499, 49 U.S.C. 1655(g)(2)); 49 CFR 1.46(c)(5).)

NOTE.—The Coast Guard has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended and OMB Circular A-107.

Dated: August 1, 1977.

E. L. PERRY,
Vice Admiral, U.S. Coast Guard,
Acting Commandant.

Title 36—Parks, Forests, and Public Properties

CHAPTER II—FOREST SERVICE, DEPARTMENT OF AGRICULTURE

PART 292—NATIONAL RECREATION AREAS

Sawtooth National Recreation Area—Federal Lands

AGENCY: Forest Service, USDA.

ACTION: Final rule.

SUMMARY: The Secretary of Agriculture is directed by law to issue regulations on the use of Federal land in the Sawtooth recreation area including unpatented mining claims. These regulations establish guidelines for the use, management, utilization, and disposal of natural resources on Federally-owned lands including, but not limited to, mineral exploration and development operations. In connection with these regulations, the closure order for the Sawtooth National Recreation Area dated May 14, 1973, is revoked.

EFFECTIVE DATE: August 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Kent Mays, Group Leader, Recreation Planning and Inventory, Recreation Staff, USDA Forest Service, P.O. Box 2417, Washington, D.C. 20013, telephone (202) 447-3520.

SUPPLEMENTARY INFORMATION: On March 16, 1977, a notice of proposed rulemaking was published in the FEDERAL REGISTER (42 FR 14739) proposing regulations on the use and management of natural resources on Federally-owned lands within the Sawtooth National Recreation Area.

The public was given until April 15, 1977, to submit written comments on the proposal; no comments were received. Consequently, the final rulemaking consists of the original proposal, modified slightly to allow flexibility in the implementation of the occupancy provision.

The effect of these regulations was covered by the Final Environmental Statement on the Management Plan for the Sawtooth National Recreation Area which was filed on May 25, 1975.

The Department of Agriculture has determined that publication of this rule is not a major Federal action significantly affecting the quality of the human environment and that a detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is not required. It has also been determined that an economic impact statement is not required.

In light of the foregoing, 36 CFR 292 is amended by adding a subpart D to read as follows:

Subpart D—Sawtooth National Recreation Area—Federal Lands

Sec.
292.17 General provisions
292.18 Mineral resources

AUTHORITY: Sec. 1, 30 Stat. 35, 36, as amended, 16 U.S.C. §§ 478, 551; Sec. 11, 86 Stat. 612, 16 U.S.C. § 460aa-10.

§ 292.17 General provisions.

(a) The use, management and utilization of natural resources on the Federal lands in the Sawtooth National Recreation Area (SNRA) are subject to the General Management Plan and the laws, rules, and regulations pertaining to the National Forests with the exception that part 252 of this chapter does not apply to these resources. No use or disposal of such resources shall be authorized which will result in substantial impairment of the natural values of the Recreation Area.

(b) Definitions: (1) "Act" means Pub. L. 92–400 (86 Stat. 612), which established the SNRA.

(2) "Area Ranger or Superintendent" means the Forest Service officer having administrative authority for the SNRA.

(3) "General Management Plan" means the document setting forth the land allocation and resource decisions for management of the SNRA.

(4) "Letter of Authorization" means a letter signed by the Area Ranger, or his designee, authorizing an operator to conduct operations as approved in the operating plan.

(5) "Mineral Resources" means all locatable minerals.

(6) "Operator" means a person conducting or proposing to conduct operations.

(7) "Operations" means all functions works, and activities in connection with exploration, development, mining or processing of mineral resources and all uses reasonably incident thereto, including roads and other means of access on lands, regardless of whether said operations take place on or off mining claims.

(8) "Operating Plan" means a written instrument describing proposed opeten instrument describing proposed operations on Federal lands and containing such information as required by § 292.18.

(9) "Person" means any individual, partnership, association, corporation, or other legal entity.

(10) "Substantial Impairment" means that level of disturbance of the values of the SNRA which is incompatible with the standards of the General Management Plan. The proposed activities will be evaluated as to: (i) The period of impact, (ii) the area affected, and (iii) the importance of the impact on the SNRA values.

(11) "Unpatented Mining Claims" means any mining claim or millsite claim located prior to August 22, 1972, pursuant to the Mining Law of 1872, but not patented.

§ 292.18 Mineral resources.

(a) *Occupancy.* No unpatented mining claim may be used or occupied, except as otherwise permitted, for any purpose other than exploration, mining, or processing operations and uses reasonably incident thereto.

(b) *Letter of authorization.* A letter of authorization with the posting of an appropriate bond is required prior to conducting operations in the SNRA.

(c) *Operating plan.* A proposed operating plan must be filed with the Area Ranger prior to conducting any operations and prior to construction, reconstruction, improvement or maintenance of roads and trails, bridges, or other facilities for access within the SNRA; provided, that an operating plan is not required for (1) operations which only involve vehicular travel on existing roads open to public use; (2) marking and/or reestablishing claims corners; (3) sampling and exploration work which will not cause significant damage to surface resources and will not involve the removal of more than 100 pounds of material for analysis and study, provided the Area Ranger has prior notice of such activities; or (4) the evaluation and study of existing underground mine workings not involving surface disturbances.

(d) *Operating plan—requirements.* Each operating plan shall include:

(1) The names and mailing addresses of operators and their agents, along with a statement of ownership and/or authorization under which the operation is to be conducted, and including a copy of the location notice(s), proof of assessment labor, and quit claim deeds if ownership has changed within the assessment year.

(2) A map or sketch showing information sufficient to locate the proposed area of operations on the ground, existing and/or proposed roads or access routes to be used in connection with the operations and the approximate location and size of areas where surface resources will be disturbed.

(3) Information describing the nature of operations proposed and how they will be conducted, the type and standard of existing and proposed roads or access routes, the means of transportation to be used, the period during which the proposed operations will take place, and measures to be taken for protecting the values of the SNRA and reclaiming the lands.

(e) *Operating plan—approval.* (1) The Area Ranger shall promptly acknowledge receipt of any operating plan to the operator. The Area Ranger shall review the environmental effects and conduct a technical examination of each proposed operating plan.

The technical examination shall identify the resources and the land uses in the area of operations. The Area Ranger shall use the current General Management Plan of the SNRA and the Final Environmental Statement as guides in determining whether the proposed operations may result in substantial impairment of the values of the SNRA. In his review, the Area Ranger may solicit comments from the general public and/or other government agencies in analysis of environmental effects. In his review, the Area Ranger will consider the compatibility of the proposed operating plan with the Act and the General Management Plan. The Area Ranger may not approve an operating plan for an identical claimed area to more than one operator.

(2) Within 30 working days of receipt of a proposed operating plan, the Area Ranger shall take one of the following actions:

(i) Notify the operator that the operating plan has been approved as submitted; or,

(ii) Notify the operator that the operating plan has been approved as subject to the operator accepting the changes or conditions deemed necessary by the Area Ranger; or,

(iii) Notify the operator that more time is necessary to review the plan because of the need to prepare an environmental impact statement, or conduct a cultural resource survey, or other stated reasons; in such cases, the operator will be notified of the approximate time needed to complete the review; or,

(iv) Notify the operator of an apparent conflict of ownership and that additional proof of ownership is required.

(v) Notify the operator that the operating plan as submitted is inadequate to support any conclusion as to substantial impairment, and that additional information will be required; or,

(vi) Notify the operator that the operating plan is not approved since such operations as specified in the plan would create substantial impairment.

(f) *Operating plans—suspension or modification.* The Area Ranger may suspend or terminate authorization to operate in whole or in part where such operations are causing substantial impairment which cannot be mitigated. At any time during operations under an approved operation plan, the operator may be required to modify the operating plan in order to minimize or avoid substantial impairment of the values of the SNRA.

(g) *Bond requirements.* (1) An operator shall furnish a bond, in the amount determined by the Area Ranger to be appropriate for reclamation of the disturbed surface area, prior to the commencement of operations. In lieu of a bond, the operator may deposit into a Federal depository, as directed by the Forest Service, cash in an amount equal to the required dollar amount of the bond or negotiable securities of the United States having market value at the time of deposit or not less than the required dollar amount of the bond.

(2) When the reclamation of the project, or portions thereof, has been completed, the operator will notify the Area Ranger who will examine the area to determine whether the reclamation is acceptable. When the Area Ranger has accepted as completed any portion of the reclamation, he shall reduce proportionately the amount of bond thereafter to be required with respect to the remaining reclamation. However, the operator will not be released from liability under the bond for the amount which may be necessary to revegetate each planting area for a minimum period of at least 5 years after the first efforts at revegetation if those initial efforts are unsuccessful.

(3) If the Area Ranger determines that revegetation is likely to occur before the expiration of such minimum period, he may release the operator from the extended liability under the bond for revegetation of planting area.

(h) *Access.* The operator shall permit free and unrestricted public access to and through lands included within an unpatented mining claim for all lawful and proper purposes. In areas where such access would unduly interfere with authorized operations or would constitute a hazard to public health and safety, public use may be restricted with prior approval of the Area Ranger.

JAMES NIELSON,
Acting Assistant Secretary for Research, Conservation, and Education.

JULY 29, 1977.

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

[FRL 768-7]

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Oklahoma Regulation 4.2

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: This rule approves revisions to Oklahoma State Implementation Plan (SIP) Regulation 4.2 which provides for public disclosure of emission data and rescinds Regulations by which EPA implemented public disclosure. The Oklahoma SIP was disapproved on September 26, 1974, since it could, in some circumstances, prohibit the disclosure of emission data to the public. The availability of data to the public would be unchanged inasmuch as this revision to the Oklahoma SIP corrects a deficiency which has been provided for by EPA Regulation.

EFFECTIVE DATE: August 4, 1977.

FOR FURTHER INFORMATION CONTACT:

George I. Kennedy, Air Program Branch, Environmental Protection Agency, Region VI, Dallas, Tex. 75270, 214–749–3837.

SUPPLEMENTARY INFORMATION: On September 26, 1974, Regulation 4.2 of the Oklahoma State Implementation Plan (SIP) was disapproved since it could, in some circumstances, prohibit the disclosure of emission data to the public. On November 28, 1975, EPA promulgated regulations for public availability of emission data. On October 7, 1975, the Governor of Oklahoma submitted a revision to the SIP specifically making emission data subject to public disclosure as a revision to Regulation 4. The public hearing for this revision was held by the State Air Quality Council on January 14, 1975. The revision to the regulation was recommended by the State Air Quality Council on March 11, 1975, for adoption by the Oklahoma State Board of Health. The revision was adopted by the State Board of Health on June 29, 1975, and after filing with the Secretary of State was effective on July 9, 1975. This rulemaking was proposed on May 24, 1977 (42 FR 26439), with a period for public comment which ended June 23, 1977. No comments were received.

In this revision to Regulation 4.2 emission data must be made available at all times to the public during normal working hours. In accepting this revision to Oklahoma Regulation 4, EPA is interpreting "emission data" as defined in 40 CFR 2.301(a) and discussed in 40 CFR 51.10(e). Accepting the revised paragraph 4.2 allays the need for 40 CFR 52.1926 which is rescinded.

This action is taken under authority of Section 110(a) of the Clean Air Act as amended, 42 USC 1857c–5(a).

Dated: July 29, 1977.

DOUGLAS M. COSTLE,
Administrator.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart LL—Oklahoma

1. In § 52.1920, paragraph (c) is amended by adding paragraph (8) as follows:

§ 52.1920 Identification of plan.

* * * * * * *

(c) * * *

(8) Revision to Oklahoma Regulation 4.2 (public availability of emission data) was submitted by the Governor on October 7, 1975.

§ 52.1926 [Revoked]

2. Section 52.1926 is revoked.

[FRL 771-8]

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Petroleum Refinery Fluid Catalytic Cracking Unit Catalyst Regenerators; Correction

AGENCY: Environmental Protection Agency.

ACTION: Correction.

SUMMARY: This document corrects the final rule that appeared at page 32425 in the FEDERAL REGISTER of Friday, June 24, 1977 (FR Doc. 77–18129).

EFFECTIVE DATE: August 4, 1977.

FOR FURTHER INFORMATION CONTACT:

Don R. Goodwin, Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone 919–541–5271.

Dated: July 29, 1977.

ERIC O. STORK,
Acting Assistant Administrator for Air and Waste Management.

In FR Doc. 77–18129 appearing on page 32425 in the FEDERAL REGISTER of Friday, June 24, 1977, §§ 60.102(a)(2) and 60.105(e)(1) on page 32427 are corrected as follows:

1. In § 60.102(a)(2), the word "period" is added in the fourth line immediately following the words "in any one-hour."

2. In § 60.105(e)(1), "hourly period" in the first line is corrected to read "one-hour periods."

(Sec. 111, 114, 301(a) of the Clean Air Act as amended [42 U.S.C. 1857c–6, 1857c–9, 1857g (a)]).

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Amdt. No. 2 to Service Order No. 1247]

PART 1033—CAR SERVICE

Bath and Hammondsport Railroad Company Authorized To Operate Over Tracks of Consolidated Rail Corporation

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 2 to Service Order No. 1247).

SUMMARY: As the designated operator for the State of New York, the Bath and Hammondsport operates the Wayland branch of the former Erie-Lackawanna, between Kanona, New York, and Wayland, New York. This line is separated from the Bath and Hammondsport's own line by three miles of Consolidated Rail Corporation trackage. Service Order No. 1247 authorizes the Bath and Hammondsport to operate over this trackage of Consolidated Rail Corporation in order to transfer locomotives, cars, and crews between its own line and the Wayland branch. Amendment No. 2 extends Service Order No. 1247 for six months.

EFFECTIVE DATE: July 31, 1977.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423, Telephone (202) 275–7840.

SUPPLEMENTARY INFORMATION: The order is printed in full below.

At a Session of the Interstate Commerce Commission, Railroad Service Board, held in Washington, D.C., on the 28th day of July, 1977.

Upon further consideration of Service Order No. 1247 (41 F.R. 29819 and 42 F.R. 6370), and good cause appearing therefor:

It is ordered, That: § 1033.1247 *Bath and Hammondsport Railroad Company Authorized to Operate over Tracks of Consolidated Rail Corporation*

Service Order No. 1247 be, and it is hereby, amended by substituting the following paragraph (d) for paragraph (d) thereof:

(d) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., January 31, 1978, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., July 31, 1977.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17 (2). Interprets or applies Secs. 1(10–17), 15 (4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10–17), 15(4), and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington, and John R. Michael.

H. G. HOMME, Jr.,
Acting Secretary.

SUBCHAPTER C—ACCOUNTS, RECORDS AND REPORTS

[Ex Parte No. 289]

PART 1254—MAINTENANCE OF RECORDS PERTAINING TO DEMURRAGE, DETENTION, AND OTHER RELATED ACCESSORIAL CHARGES BY RAIL COMMON CARRIERS OF PROPERTY

Remittance of Demurrage Charges by Common Carriers of Property by Rail

AGENCY: Interstate Commerce Commission.

ACTION: Modification and clarification of final rule.

SUMMARY: Modifies the Commission's rule providing for remittance of demurrage payments in excess of $10 per car per day to the car owner, to exclude from its application Canadian or Mexican owned cars unless Canada and Mexico adopt the rule promulgated in this proceeding. This provides equal treatment for cars of Canadian, Mexican, or United States ownership. Clarifies application of rule to leased cars by specifying application to private cars only.

EFFECTIVE DATE: September 1, 1977.

FOR FURTHER INFORMATION CONTACT:

Deputy Director or Assistant Deputy Director, Section of Rates, Office of Proceedings, Interstate Commerce Commission, Washington, D.C. 20423, 202–275–7693.

The entire rule reads as follows, with the modifications italicized:

§ 1254.10 Remittance of excess demurrage charges.

(a) Except as otherwise provided hereinafter, the nonowning railroad, on whose lines a car is being detained under demurrage, shall remit to the freight car owner, all demurrage charges collected in excess of $10 per car per day.

(b) That under this rule, for the purpose of determining the car owner in the lease of a *private* freight car, the car owner will be the lessor; except that in cases where there is not notice of the identity of the lessor, the lessee shall be considered as the car owner.

(c) Excess demurrage shall not be remitted to a private car owner who for reasons attributable to the car owner causes the accrual of the excess charge. The excess amount, which would otherwise be remitted under the rule, shall in these situations, be retained by the delivering carrier.

(d) *Excess demurrage shall not be remitted to Canadian or Mexican car owners* unless the appropriate authorities of Canada and Mexico adopt the rule promulgated in this proceeding.

This rule was issued under authority of 49 U.S.C. §§ 1(6) and 1(14)(a), and 5 U.S.C. §§ 553 and 559.

Notice of amended rulemaking was published in the FEDERAL REGISTER, April 30, 1975 (Vol. 40, No. 84, p. 18797).

Issued in Washington, D.C., July 25, 1977.

H. G. HOMME, Jr.,
Acting Secretary.

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Opening of Holla Bend National Wildlife Refuge, Arkansas, to Hunting of Mourning Doves

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening of the hunting of Holla Bend National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 3 and September 10, 1977.

FOR FURTHER INFORMATION CONTACT:

Paul D. Daly, Refuge Manager, P.O. Box 1043, Russellville, Arkansas 72801, telephone 501–968–2800.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory bird hunting for individual wildlife refuge areas.

Public hunting of mourning doves on the Holla Bend National Wildlife Refuge, Arkansas, is permitted only on the area delineated by public hunting signs. This open area, comprising approximately 500 acres, is delineated on a map available at refuge headquarters, P.O. Box 1043, Russellville, Arkansas 72801 and from the office of the Regional Director, U.S. Fish and Wildlife Service, 17 Executive Park Drive, NE., Atlanta, Georgia 30329. Hunting shall be in accordance with all applicable State and Federal regulations covering the hunting of mourning doves, subject to the following special conditions:

1. A special refuge permit is required.

2. Each hunter under age 18 must be under the close supervision of an adult. For safety reasons the ratio should be one adult to one juvenile, but in no case should one adult have more than two juveniles under his/her supervision.

3. All firearms must be cased or unloaded when outside the designated hunting areas.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

CRAYTON J. LANKFORD,
Acting Regional Director.

JULY 29, 1977.

[FR Doc.77-22458 Filed 8-3-77;8:45 am]

PART 32—HUNTING

Opening of Mark Twain National Wildlife Refuge, Iowa, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to Big Game Hunting of Big Timber Division and Turkey Island area of Mark Twain National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 8 through December 16, 1977.

FOR FURTHER INFORMATION CONTACT:

Howard A. Lipke, Refuge Manager, Mark Twain National Wildlife Refuge, P.O. Box 225, Quincy, Il. 62301. Telephone: 217–224–8580.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game hunting; for individual wildlife refuge areas.

Upland Game Hunting is permitted on Big Timber Division and Turkey Island area of Mark Twain National Wildlife Refuge, Iowa, on the areas designated by signs. These areas, comprising 1760 acres, are delineated on maps available at the refuge headquarters and from the office of the Regional Director, U.S. Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minn. 55111. Big Game Hunting shall be in accordance with all applicable State regulations.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

Dated: July 29, 1977.

HOWARD A. LIPKE,
Refuge Manager, Mark Twain National Wildlife Refuge.

PART 32—HUNTING

Opening of Arrowwood National Wildlife Refuge, North Dakota, to Deer Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to deer hunting of Arrowwood National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Season dates September 2, 1977 through September 30, 1977 and November 21, 1977 through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

John R. Foster, Refuge Manager, Arrowwood National Wildlife Refuge, Pingree, N. Dak. 58476. Phone number 701–285–3341.

SUPPLEMENTARY INFORMATION:

§ 32.5 Special regulations; deer hunting; for individual wildlife refuge areas.

Deer hunting is permitted on the Arrowwood National Wildlife Refuge, North Dakota, only on the areas designated by signs as being open to deer hunting. These areas comprising 15,900 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, P.O. Box 25486, Denver Federal Center, Denver, Colo. 80225. Deer hunting shall be in accordance with all applicable State regulations subject to the following conditions:

(1) Hunting with guns is not permitted.

(2) Bows only may be used and must conform to state regulations.

(3) The open season for hunting deer on the refuge is from 12:00 noon to sunset September 2, 1977 and from one-half hour before sunrise to sunset thereafter through September 30, 1977. Bow hunting will be permitted again on November 21 and remain open until December 31, 1977.

The provisions of this special regulation supplement the regulations which govern deer hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determintd that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A-107.

PHILLIP M. ARNOLD,
Acting Manager, Arrowwood National Wildlife Refuge, Pingree, N. Dak. 58476.

PART 32—HUNTING

Opening of Chase Lake National Wildlife Refuge, North Dakota to Deer Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to deer hunting for Chase Lake National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: Season dates September 2, 1977 through September 30, 1977 and November 21, 1977 through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

John R. Foster, Refuge Manager, Arrowwood National Wildlife Refuge, Pingree, N. Dak. 58476. Phone number 701–285–3341.

SUPPLEMENTARY INFORMATION:

§ 32.5 Special regulations; deer hunting for individual wildlife refuge areas.

Deer hunting is permitted on the Chase Lake National Wildlife Refuge, North Dakota, only on the areas designated by signs as being open to deer hunting. These areas comprising 4,600 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, P.O. Box 25486, Denver Federal Center, Denver, Colo. 80225. Deer hunting shall be in accordance with all applicable State regulations subject to the following conditions:

(1) Hunting with guns is not permitted.

(2) Bows only may be used and must conform to state regulations.

(3) The open season for hunting deer on the refuge is from 12:00 noon to sunset September 2, 1977 and from one-half hour before sunrise to sunset thereafter through September 30, 1977. Bow hunting will be permitted again on November 21 and remain open until December 31, 1977.

The provisions of this special regulation supplement the regulations which govern deer hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determintd that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

PART 32—HUNTING

Opening of DeSoto National Wildlife Refuge, Iowa to Archery Deer Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to archery deer hunting of the DeSoto National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: October 8, 1977 through December 2, 1977.

FOR FURTHER INFORMATION CONTACT:

George Gage, Refuge Manager, DeSoto National Wildlife Refuge, R–1, Box 114, Missouri Valley, Iowa 51555, telephone 712–642–4121.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Archery hunting of deer on the DeSoto National Wildlife Refuge, Iowa, is permitted only on the area designated by signs as being open to hunting. This area comprising 660 acres is delineated on maps available at the refuge headquarters and from the Area Manager, U.S. Fish and Wildlife Service, 601 E. 12th, Federal Building, Kansas City, Mo. 64106. Hunting will be in accordance with all state regulations governing the hunting of deer with bow and arrow and shall be permitted only during the regular Iowa archery deer season, October 8 through December 2, 1977.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuges generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: July 15, 1977.

PART 32—HUNTING

Opening of DeSoto National Wildlife Refuge, Nebraska to Archery Deer Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to archery deer hunting of the DeSoto National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 17, 1977 through November 11, 1977, and November 21, 1977 through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

George Gage, Refuge Manager, DeSoto National Wildlife Refuge, R–1, Box 114, Missouri Valley, Iowa 51555, telephone AC 712–642–4121.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Archery hunting of deer on the DeSoto National Wildlife Refuge, Nebraska, is permitted only on the area designated by signs as being open to hunting. This area comprising 1200 acres located west of the present Missouri River channel is delineated on maps available at the refuge headquarters and from the Area Manager, U.S. Fish and Wildlife Service, 601 E. 12th, Federal Building, Kansas City, Missouri 64106. Hunting will be in accordance with all state regulations governing the hunting of deer with bow and arrow and shall be permitted only during the regular Nebraska archery deer season, September 17 through November 11, 1977 and November 21 through December 31, 1977.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuges generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

PART 32—HUNTING

Opening of Medicine Lake National Wildlife Refuge, Montana to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Medicine Lake National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreation opportunity to the public.

DATES: September 1, 1977, through December 31, 1977.

FOR FURTHER INFORMATION CONTACT:

Jay R. Bellinger, Medicine Lake, MT 59247, telephone number AC 406–789–2305.

SUPPLEMENTARY INFORMATION:

§ 32.12 Special regulations; migratory birds; for individual wildlife refuge areas.

Migratory game bird hunting is permitted on the Medicine Lake National Wildlife Refuge, Montana, only on the area designated by signs as being open to migratory game bird hunting. This area comprises 9,216 acres and is delineated on maps available at the refuge headquarters and from the office of the Area Manager, U.S. Fish and Wildlife Service, Federal Building, Room 3035, 316 North 26th Street, Billings, MT 59101. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Vehicle travel is permitted only on designated trails.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

§ 32.22 Special regulations; upland game birds and jackrabbits; for individual wildlife refuge areas.

Upland game bird and jackrabbit hunting is permitted on the Medicine Lake National Wildlife Refuge, Montana, only on the areas designated by signs as being open to upland game hunting. These areas comprising 9,216 acres are delineated on maps available at the refuge headquarters and from the office of the Area Manager, U.S. Fish and Wildlife Service, Federal Building, Room 3035, 316 North 26th Street, Billings, MT 59101. Hunting shall be in accordance with all applicable State regulations subject to the following condition:

1. Vehicle travel is permitted only on designated trails.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Big game hunting is permitted on the Medicine Lake National Wildlife Refuge, Montana, only on the areas designated by signs as being open to big game hunting. These areas comprising 9,216 acres are delineated on maps available at the refuge headquarters and from the office of the Area Manager, U.S. Fish and Wildlife Service, Federal Building, Room 3035, 316 North 26th Street, Billings, MT 59101. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. Unlimited vehicle travel is permitted only on county roads. In the hunting areas, vehicle travel is permitted only for the retrieval of deer on designated retrieval roads.

2. Horses may be used only for the retrieval of big game.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

JAY R. BELLINGER,
Refuge Manager.

PART 32—HUNTING

Opening of Mark Twain National Wildlife Refuge, Illinois, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to Big Game Hunting of Gardner Division of Mark Twain National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: November 18, 19, and 20, 1977.

FOR FURTHER INFORMATION CONTACT:

Howard A. Lipke, Refuge Manager, Mark Twain National Wildlife Refuge, P.O. Box 225, Quincy, Illinois 62301. Telephone: A.C. 217–224–8580.

SUPPLEMENTARY INFORMATION:

§ 32.32 Special regulations; Big Game Hunting; for individual wildlife refuge areas.

Public hunting of white-tailed deer with shotgun is permitted on the Gardner Division of Mark Twain National Wildlife Refuge, Illinois, on the areas designated by signs. These areas comprising 4831 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, United States Fish and Wildlife Service, Federal Building, Fort Snelling, Twin Cities, Minnestota 55111. Hunting shall be in accordance with all applicable State regulations subject to the following conditions:

1. A valid State-issued shotgun deer permit with Mark Twain National Wildlife Refuge designation will serve as authorization to enter the public hunting area. One hundred and seventy-five (175) permits will be issued following a May 18, 1977 drawing.

2. Successful hunters will be required to check their deer through the Adams County Check Station near the Division.

3. Hunting will be from 6:30 am to 3:00 pm (CST).

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50 Code of Federal Regulations, Part 32.

NOTE.—The U.S. Fish and Wildlife Service has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11949 and OMB Circular A–107.

Dated: July 29, 1977.

CHAPTER II—NATIONAL MARINE FISHERIES SERVICE, NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 216—REGULATIONS GOVERNING THE TAKING AND IMPORTING OF MARINE MAMMALS

Importation of Yellowfin Tuna and Tuna Products

AGENCY: National Marine Fisheries Service.

ACTION: Interim final rule.

SUMMARY: The amendment extends the effective date of the regulations governing the importation of yellowfin tuna and tuna products to October 1, 1977, and modifies the regulatory language to facilitate customs enforcement of the regulations.

EFFECTIVE DATE: August 4, 1977 through September 30, 1977. Comments will be received until September 1, 1977.

ADDRESSES: Comments or questions may be directed to the Director, National Marine Fisheries Service, Washington, D.C. 20235.

FOR FURTHER INFORMATION CONTACT:

William P. Jensen, Marine Mammal and Endangered Species Division, National Marine Fisheries Service, Washington, D.C. 20235, 202–634–7461.

SUPPLEMENTARY INFORMATION: The National Marine Fisheries Service published interim final rules in the FEDERAL REGISTER on May 16, 1977 (42 FR 24742), to extend the date when an embargo on yellowfin tuna would be effective, to August 1, 1977. A review period was established during which two comments were received. One comment by the Tuna Research Foundation did not oppose the regulation amendments; rather, they restated their position taken during the administrative rulemaking procedures that was ultimately rejected by the Administrative Law Judge, and will not be considered regarding this action. A second comment from the Environmental Defense Fund did not oppose extension of the embargo date.

A resolution was proposed at the June 27–29, 1977 meeting of the Inter-American Tropical Tuna Commission (IATTC) that would establish an international tuna-porpoise research and observer program for IATTC member nations, with provisions for inclusion of non-member nations, operating within the Commission Yellowfin Regulatory Area (CYRA) in the eastern tropical Pacific Ocean. This resolution represents the first significant step taken by the IATTC toward active participation in the problem of incidental porpoise mortality. The resolution has been unanimously approved by all member nations.

On July 15, 1977, the Department of State recommended that, in recognition of the action taken by the IATTC, the effective date be extended to January 1, 1978. Requests for extensions beyond August 1, 1977, were also received from the Tuna Research Foundation and the United Kingdom on behalf of Bermuda.

Therefore, it is proposed to extend the effective date to October 1, 1977. However, in order to avoid undue disruption to tuna imports from tuna importing nations, and to recognize positive movement by those nations toward reducing porpoise mortality, it is necessary that these regulations be effective at the earliest possible time. For these reasons, it is hereby for good cause found that established procedures regarding advance notice of the intent of the National Marine Fisheries Service in implementing public comment (5 U.S.C. 553), are impractical. These regulations are, therefore, effective until September 30, 1977. Public comments will be received until September 1, 1977. After that date, the Director will review all comments received and assess the status of initiation of the IATTC international tuna-porpoise program resolution, whereupon he will publish his final decision in the FEDERAL REGISTER regarding possible extension of the effective date of the embargo past October 1, 1977.

Accordingly, § 216.24 of the National Marine Fisheries Service marine mammal regulations (16 U.S.C. 216.24) is amended as follows:

§ 216.24 [Amended]

1. Section 216.24(e)(2)(ii) is amended by deleting the date "July 31, 1977:" and inserting the date "September 30, 1977:".

2. Section 216.24(e)(4) is amended by deleting the date "August 1, 1977," in the first line and inserting the date "October 1, 1977,"; and by deleting the date "May 31, 1977," in the seventh line and inserting the date "September 30, 1977,".

3. Section 216.24(e)(4) is amended by deleting the phrase "may not be unloaded into the United States" at line ten and eleven and inserting the phrase "shall be prohibited entry into the United States and shall not be released from Customs custody"; and is further amended by deleting the phrase" * * * further, shall be denied entry into the United States * * * " at lines thirteen and fourteen of this Section.

4. Section 216.24(e)(5)(i) is amended by deleting the date "July 31, 1977," in the first line and inserting the date "September 30, 1977,"; and by deleting the phrase " * * * it shall be illegal to unload into the United States" at lines one and two, and amending line eleven of this Section to read " * * * (serv)ice; shall be prohibited entry into the United States and shall not be released from Customs custody unless the Director makes a finding * * * "

Dated: August 1, 1977.

WINFRED H. MEIBOHM,
National Marine Fisheries Service.

[FR Doc.77–22364 Filed 8–3–77;8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 945]

IRISH POTATOES GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

Proposed Expenses and Rate of Assessment

AGENCY: Agricutural Marketing Service, USDA.

ACTION: Proposed rule.

SUMMARY: This notice invites written comments on proposed expenses of $44,415 and a rate of assessment of twenty-six hundredths ($0.0026) cent per hundredweight of potatoes for the functioning of the Idaho-Eastern Oregon Potato Committee. The regulation would enable the committee to collect assessments from first handlers on all assessable potatoes handled and to use the resulting funds for its expenses.

DATE: Comments due on August 19, 1977.

ADDRESSES: Comments should be sent to: Hearing Clerk, Room 1077 South Building, U.S. Department of Agriculture, Washington, D.C. 20250. Two copies of all written materials shall be submitted. Comments will be made available for public inspection at the office of the Hearing Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, Deputy Director, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250. Telephone: (202) 447–3545.

SUPPLEMENTARY INFORMATION: Marketing Agreement No. 98 and Order No. 945, both as amended, regulate the handling of Irish potatoes grown in designated counties in Idaho and Malheur County, Oregon. It is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The Idaho-Eastern Oregon Potato Committee, established under the order, is responsible for its local administration.

The proposals are as follows:

§ 945.230 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period ending May 31, 1978, by the Idaho-Eastern Oregon Potato Committee for its maintenance and functioning and for such other purposes as the Secretary determines to be appropriate will amount to $44,415.

(b) The rate of assessment to be paid by each handler in accordance with this part shall be $0.0026 per hundredweight, or equivalent quantity, of assessable potatoes handled by him as the first handler during the fiscal period.

(c) Unexpended income in excess of expenses for the fiscal period may be carried over as a reserve to the extent authorized in § 945.44(b).

(d) Terms used in this section shall have the same meaning as when used in the marketing agreement and this part.

Dated: August 1, 1977.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

FEDERAL ENERGY ADMINISTRATION

[10 CFR Part 211]

CRUDE OIL SUPPLIER/PURCHASER RULE

Proposed Amendments and Public Hearing

AGENCY: Federal Energy Administration.

ACTION: Notice of proposed rulemaking and public hearing.

SUMMARY: The Federal Energy Administration (FEA) hereby gives notice of a proposal to amend the crude oil supplier/purchaser rule as set forth in 10 CFR 211.63 of the Mandatory Petroleum Allocation Regulations. The rule in its present form operates generally to maintain historical supplier/purchaser relationships, including those between crude oil producers and crude oil resellers. The purpose of this proposed amendment is to alleviate the apparent barriers to entry into the business of crude oil reselling that are entailed by the present rule, and thereby to facilitate competition in this sector of the industry. The proposal would permit a crude oil supplier/purchaser relationship between a producer and reseller to be terminated with respect to crude oil being delivered to refiners other than small refiners, if the new reseller offers to continue to supply these refiners with such crude oil. Prices charged in such sales by the new reseller would, of course, be subject to the Mandatory Petroleum Price Regulations.

DATES: Comments by August 25, 1977, 4:30 p.m.; Requests to speak by August 19, 1977, 4:30 p.m.; Hearing date: September 1, 1977, 9:30 a.m.

ADDRESSES: Comments and requests to speak to: Executive Communications, Room 3317, Federal Energy Administration, Box OF, Washington, D.C. 20461; Hearing Location: Room 2105, 2000 M Street NW., Washington, D.C. 20461.

Michael Paige, (Office of General Counsel), 12th & Pennsylvania Avenue NW., Room 5134, Washington, D.C. 20461 (202) 566–9565.

SUPPLEMENTARY INFORMATION:

I. Background
II. Proposed Amendments
III. Additional Comments Requested
IV. Comment Procedures

I. BACKGROUND

The crude oil supplier/purchaser rule (the "rule") was adopted in January 1974 (39 FR 1924, January 15, 1974). Its purpose was to maintain intact the national distribution system for domestic crude oil as it existed on December 1, 1973, and thereby to assure small and independent refiners continued access to their historical domestic crude oil supplies in the face of the Arab oil embargo which began in the fall of 1973.

The rule was continued in February 1976 (41 FR 7386, February 18, 1976), with certain modifications to conform to the new pricing provisions of the Energy Policy and Conservation Act ("EPCA"), Pub. L. 94–163, and with a change in the reference date from December 1, 1973, to January 1, 1976. The primary reason for continuation of the rule was that it remained an essential means of assuring an adequate supply of crude oil to small and independent refiners.

Although the rule has served to further the foregoing objective, FEA has been concerned over the possible anti-competitive effects of freezing supplier/purchaser relationships, particularly those between crude oil producers and resellers, and the applicability of the rule to crude oil resellers has therefore been under continuing review by FEA.

The rule was first amended in this regard in November 1975 (40 FR 54422 November 24, 1975), to provide pro-

ducers and refiners with the flexibility to obtain services normally performed by crude oil resellers on the most favorable terms available. Under that amendment, a supplier/purchaser relationship between a producer and a reseller could be terminated if the refiners who were receiving the crude oil involved consented. This amendment was intended to provide producers and refiners with flexibility to select the resellers with which they did business, while continuing to assure small and independent refiners that they would receive needed crude oil supplies.

In June 1976 (41 FR 24338, June 16, 1976) FEA again amended the rule, to its current form. Several of the termination provisions of the rule were modified with the intention of providing further flexibility to more accurately reflect industry conditions. In particular, the rule was revised to permit a supplier/purchaser relationship between a producer and a reseller to be terminated without the consent of the refiner receiving the crude oil involved, provided the new reseller offered to continue to supply the refiner with such crude oil at a price reflecting no higher handling and transportation charges than those of the previous reseller. In the notice of proposed rulemaking preceding issuance of the June 1976 amendments, FEA reaffirmed that "the principal objective of the rule [is] to assure that crude supplies continue to be available to historic purchasers" (41 FR 16663, April 21, 1976), but further stated its belief that the new conditions for reseller substitutions (not requiring the consent of refiners to the substitutions, but requiring a continuation of the supplies of crude oil to refiners through new resellers), would adequately protect small and independent refiners.

In its continuing review of this matter, FEA has concluded that certain of the provisions of the rule adopted in June of 1976 appear to be impracticable for crude oil resellers and are not serving to facilitate competition in the crude oil reseller segment of the industry to the extent that it was anticipated they would. The reasons for this, of which FEA was not made aware in the June 1976 rulemaking proceeding, are as follows: First, FEA is informed that it is very difficult, as required by the current regulation, for a reseller to identify the refiners to which the volume of crude oil involved in a proposed termination is being delivered and thus which refiners should be notified of the proposed termination. Or, if the crude oil involved in the termination is being commingled with other crude oil and delivered to several refiners who are notified of the proposed termination, it is difficult for a new reseller to determine the volume of crude oil which it must offer to continue to supply to each refiner which has been receiving crude oil from the former reseller. Also, FEA is informed that it has proved difficult for a new reseller to determine the transportation and handling charges being charged a refiner by the reseller whose supplier/purchaser relationship is proposed to be terminated. If these charges cannot be determined, a proposed new reseller typically does not have adequate information with which to formulate an offer that meets the requirements of the current rule concerning transportation and handling charges.

For the above reasons, FEA is hereby proposing to amend the rule to permit a producer to substitute a new reseller in a supplier/purchaser relationship without consent by the refiners that have previously been receiving the crude oil involved. The proposed amendment is designed, however, to continue to assure adequate supplies of crude oil to small refiners, consistent with the principal purpose of the rule.

II. Proposed Amendments

The proposed amendments retain the current provision of the rule whereby a new purchaser may be substituted in a supplier/purchaser relationship by a producer if the refiner or refiners receiving the supply of crude oil involved consent to the substitution. The proposed amendments would add, however, provisions whereby a new purchaser could be substituted if the refiner or refiners (other than small refiners) that have been receiving the crude oil involved are simply afforded a right of first refusal to purchase such crude oil from the new reseller at not more than the maximum lawful price. This latter type of substitution could not be carried out in those cases where the refiners that have been receiving the crude oil involved are small refiners, as defined in § 211.62 (i.e., having total refinery capacity of 175,000 barrels per day, or less).

The proposed amendments thus represent a change in the structure of the reseller provisions of the supplier/purchaser rule, that would permit substitution of resellers in a manner that might result in the termination of delivery of a particular volume of crude oil to a refiner which is not a small refiner. The proposed amendments appear to provide a practicable basis to facilitate competition in crude oil reselling while continuing to assure small refiners of an adequate supply of crude oil.

Specifically, the proposal would modify 10 CFR 211.63(d)(1)(iv) to provide the following new procedures whereby a producer may terminate a supplier/purchaser relationship with one purchaser and institute a new supplier/purchaser relationship with a new purchaser. First, a producer would be required to give written notice at least 30 days in advance of any proposed termination to the purchaser with which it proposes to terminate a supplier/purchaser relationship. This notice would be required to state the proposed date of termination, the source and estimated volume of crude oil involved (including the portion of that volume that is priced as lower tier crude oil under the Mandatory Petroleum Price Regulations), and the name and address of the proposed new purchaser.

Second, within 10 days of receiving a termination notice, the current purchaser would be required to provide a copy of the notice to a refiner (or reseller) receiving the crude oil. The current purchaser would be required to determine with respect to each termination notice which refiners (or second resellers) were receiving, either directly or through exchanges, the crude oil involved in the termination—that is, the refiners (or second resellers) that would be subject to a potential reduction in deliveries as a result of such a termination. In addition to forwarding a copy of the termination notice, the current purchaser would also have to inform the refiner (or second reseller) as to the volume of crude oil involved in the proposed termination applicable to that refiner (or second reseller).

To the extent that a current purchaser has any option in deciding which of its customers is to be affected by a proposed termination, the following priorities shall apply:

(1) A copy of the notice and identification of the volume of crude oil involved would be sent to a refiner other than a small refiner.

(2) If the proposed termination would result in a reduction in deliveries to one such refiner of more than 1,000 barrels per day, a copy of the termination notice and identification of the volume of crude oil involved would be required to be sent to an additional such refiner for each additional 1,000 barrels per day involved in the proposed reduction. The ceiling of 1,000 barrels per day is designed to limit the reduction in deliveries of crude oil to which any one refiner would be potentially subject as a result of a single supplier/purchaser termination.

(3) If the proposed termination would result in a reduction in deliveries beyond that which could be accounted for in sales to refiners other than small refiners, a copy of the notice and identification of the volume of crude oil involved would be sent to any reseller receiving the crude oil involved in the termination. Such a "second reseller" would, in turn, be subject to the same notification procedures as the "first reseller."

(4) If only small refiners remain as purchasers of the crude oil involved in the termination, the current purchaser would be required to notify such small refiners. As discussed above, however, the proposed termination could not be effected with respect to any crude oil deliveries to a small refiner without that refiner's consent.

Copies of all notices sent by the current purchaser pursuant to the foregoing proposed new provisions would be required to be sent also to the proposed new purchaser.

Third, the proposed new purchaser would be required to offer to supply each of the refiners notified of the proposed termination with the volume of crude oil which would be subject to the proposed termination and which was being supplied to each by the current purchaser. This offer would be required to be made at a price consistent with the provisions of the Mandatory Petroleum Price Regulations (10 CFR Part 212).

Following the observance of the foregoing procedures, a producer would be permitted to terminate a supplier/purchaser relationship with the current purchaser and institute a new supplier/purchaser relationship with a new purchaser except where a small refiner does not consent to the termination. Of course, in those instances in which an offer to supply a refiner other than a small refiner is accepted, a new supplier/purchaser relationship would thereby be established.

A provision of paragraph (d) that makes clear that none of the terminations permitted by paragraph (d) shall be construed as abrogating the rights any firm may have under private contracts, so long as such contracts are otherwise consistent with FEA allocation and price regulations, is proposed to be retained.

Copies of all notices and offers required under these proposed new provisions would be required to be sent to the appropriate FEA regional office. This would permit FEA to monitor the extent to which these proposals, if adopted, would ultimately serve to facilitate competition in crude oil resales.

Finally, FEA seeks to ensure that the proposed amendments, if adopted, do not permit abuses by crude oil resellers. Of particular concern to FEA is the practice commonly known as "layering": the insertion of one or more "resellers" between the producer and refiner and the charging of one or more markups, where the layering firm performs no service or other function traditionally and historically associated with the resale of crude oil. FEA will soon consider in a separate proceeding the question of "layering" and whether regulatory amendments, interpretive rulings or other actions should be instituted to deal with such practice. For purposes of this rulemaking proceeding, FEA is proposing to amend the rule to provide that where a supplier/purchaser relationship is terminated, no subsequent purchaser, other than the first purchaser substituted by the supplier, may charge a price for sales of such crude oil in excess of the price actually paid for the crude oil, where such purchaser does not perform services or other functions traditionally and historically associated with the resale of crude oil.

Although the proposed regulations extend only to termination of supplier/purchaser relationships between producers and resellers, FEA intends also to consider in this proceeding the extent to which the regulations might be modified to permit resellers to displace refiners and to permit refiners to displace resellers in existing supplier/purchaser relationships. Accordingly, comments are requested on whether such terminations should be permitted and, if so, what criteria should apply, in light of the objectives sought to be achieved by this proposal.

III. Additional Comments Requested

In addition to requesting comments on the provisions of the proposed rule as discussed above and as set forth below, FEA also requests comments as to whether the proposed requirement that FEA would receive copies of the notices and offers prior to terminating any supplier/purchaser relationships with current purchasers should include a provision whereby FEA could intercede to prevent such a termination from taking place. Such a mechanism would permit FEA to investigate any actions under the rule that might appear to involve unwarranted price increases.

Finally, comments are requested generally as to whether or to what extent FEA might consider proposing to exempt crude oil resellers from the Mandatory Petroleum Price Regulations. Such an action would, of course, pursuant to the provisions of section 12 of the Emergency Petroleum Allocation Act of 1973, as amended, require submission to the Congress for its approval in accordance with the provisions of section 551 of the Energy Policy and Conservation Act. Therefore, FEA hereby requests only preliminary comments as to whether such an exemption should be studied for possible implementation. Among the considerations in this regard are the extent to which competition, the crude oil price controls, and the entitlements program operate as an effective constraint on reseller margins. Comments are also requested on the extent to which the supplier/purchaser rule of § 212.63 continues to be necessary to assure access by small refiners to adequate supplies of crude oil.

IV. Comment Procedures

A. Written comments

Interested persons are invited to participate in this rulemaking by submitting data, views, or arguments with respect to the proposal set forth in this notice. Comments should be submitted to the address indicated in the addresses section of this preamble and should be identified on the outside envelope with the designation "Amendments to Crude Oil Supplier/Purchaser Rule." Fifteen copies should be submitted. All comments received by FEA will be available for public inspection in the FEA Reading Room, room 2107, Federal Building, 12th and Pennsylvania Ave. NW., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEA reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

B. Public hearing

1. *Request procedure.* The time and place for the hearing are indicated in the dates and addresses sections of this preamble. If necessary to present all testimony, the hearing will be continued to 9:30 a.m. of the first business day following the date of the hearing shown above.

Any person who has an interest in the proposed amendments issued today, or who is a representative of a group or class of persons that has an interest in today's proposed amendments, may make a written request for an opportunity to make an oral presentation. The person making the request should be prepared to describe the interest concerned, if appropriate, to state why he or she is a proper representative of a group or class of persons that has such an interest, and to give a concise summary of the proposed oral presentation and a phone number where he or she may be contacted through the day before the hearing.

Each person selected to be heard will be so notified by the FEA before 4:30 p.m., e.d.t., August 23, 1977, and must submit 100 copies of his or her statement to Regulations Management, room 2214, 2000 M St. NW., Washington, D.C., before 4:30 p.m., e.d.t., on August 31, 1977.

2. *Conduct of the hearing.* The FEA reserves the right to select the persons to be heard at this hearing, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearing. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEA official will be designated to preside at the hearing. This will not be a judicial or evidentiary-type hearing. Questions may be asked only by those conducting the hearing, and there will be no cross-examination of persons presenting statements. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he or she so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearing, to Executive Communications before 4:30 p.m., e.d.t., August 25, 1977. Any person who wishes to ask a question at the hearing may submit the question, in writing, to the presiding officer. The FEA or the presiding officer, if the question is submitted at the hearing, will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearing will be announced by the presiding officer.

A transcript of the hearing will be made and the entire record of the hearing, including the transcript, will be retained by the FEA and made available for inspection at the Freedom of Information Office, room 2107, Federal Building, 12th and Pennsylvania Ave. NW., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday. Any person may

purchase a copy of the transcript from the reporter.

As required by section 7(c)(2) of the Federal Energy Administration Act of 1974, Pub. L. 93-275, a copy of this notice has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator had no comments on this proposal.

NOTE.—The FEA has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A-107.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-385; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385; E.O. 11790, 39 FR 23185).

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is proposed to be amended as set forth below.

Issued in Washington, D.C. July 28, 1977.

ERIC J. FYGI,
Acting General Counsel.

Section 211.63 is amended by revising paragraph (d)(1)(iv) to read as follows:

§ 211.63 Domestic crude oil supplier/purchaser relationships.

* * * * *

(d) *Termination of supplier/purchaser relationships.* * * *

(1) * * *

(iv) By a producer (as defined in Part 212 of this chapter) as to a reseller purchasing crude oil from that producer: *Provided*, That:

(A) At least thirty days in advance of any termination under this subdivision (iv), the producer shall give to the reseller purchasing from it whose supplier/purchaser relationship is proposed to be terminated a written termination notice stating the date of termination, the source and estimated volume of crude oil involved (including the portion of that volume that is priced as lower tier crude oil under Part 212 of this chapter), and the name and address of the new reseller to which such crude oil is proposed to be sold.

(B) Any reseller that has received a termination notice from a producer as provided in (A) of this subdivision, which proposed termination would effect a reduction in deliveries of crude oil by that reseller, either directly or through exchanges, to any refiner or other reseller shall:

(*1*) Within 10 days of receipt of the termination notice, provide a copy of the termination notice, together with a statement as to the volume of crude oil involved, to the purchasers of the crude oil subject to such termination notice. To the extent that such reseller has any option in deciding which of its customers is to be regarded as the purchaser of the crude oil subject to such termination notice, the following priorities shall apply:

(*i*) To any refiner other than a small refiner;

(*ii*) If the proposed termination would affect crude oil deliveries to a refiner other than a small refiner of more than 1,000 barrels per day, to an additional refiner other than a small refiner for each additional 1,000 barrels per day of crude oil subject to the termination notice;

(*iii*) If the proposed termination would affect crude oil deliveries beyond that which could be accounted for in sales to refiners other than small refiners, to any reseller receiving crude oil subject to the termination notice. (Any reseller receiving such notice would, in turn, be subject to the requirements of this § 211.63 (d)(1)(iv)(B)).

(*iv*) If only small refiners remain as purchasers of the crude oil subject to the termination notice, to such small refiners

(2) Provide copies of such notices to the proposed new purchaser, including the name and address of each person to which a copy of the termination notice was provided and the volume of the crude oil affected for each such person.

(C) The proposed new purchaser of the crude oil shall offer to continue to supply the volume of that crude oil to each refiner provided with a copy of the termination notice as that refiner would otherwise lose as a result of the proposed termination. Such offer or offers shall be at prices consistent with the provisions of Part 212 of this chapter: *Provided*, That, no firm that resells that crude oil may charge a price in any sale of that crude oil in excess of the actual price paid for that crude oil, where such firm does not provide a service or other function traditionally and historically associated with the resale of crude oil.

(D) Upon receipt of the offer or offers under (C) of this subdivision by the refiner or refiners concerned, the proposed new purchaser may be substituted by the producer for the purchaser whose supplier/purchaser relationship has been proposed to be terminated: *Provided*, That if a small refiner that was notified as to a proposed termination does not accept the offer of the proposed new purchaser, the proposed termination shall not be effective as to the volume of the crude oil being delivered to that small refiner.

(E) Nothing in this paragraph (d) shall be construed as authorizing any firm to terminate a supplier/purchaser relationship in breach of a contract or agreement it may have with another firm.

(F) Copies of all notices and offers required under this paragraph (d)(iv) shall be sent to the FEA regional office for the region in which the producer is located.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 39]

[Docket No. 17064]

AIRWORTHINESS DIRECTIVES

Rolls Royce Dart Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt an airworthiness directive (AD) that would require inspections for cracking and replacement, if necessary, of flame tube bridge suspensions on Rolls Royce Dart Engines. The notice is prompted by reports of serious engine failures due to overheating and failure of the high pressure turbine disc caused by loss of flame tube suspension and subsequent burner stem failure.

DATES: Comments must be received on or before: September 6, 1977.

ADDRESSES: Send comments on the proposal in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-24) Docket No. 17064, 800 Independence Avenue SW., Washington, D.C. 20591. The applicable service bulletin may be obtained from: Rolls Royce, P.O. Box 31, Derby DE 2 8BJ, England. A copy of the applicable service bulletin is contained in the Rules Docket, Rm. 916, 800 Independence Avenue SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

D. C. Jacobsen, Chief Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, Tel. 513-38-30.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the docket number and be submitted in duplicate to the address specified above. All communications received on or before the date specified above will be considered by the Administrator before taking action upon the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

There have been reports of engine flame tube suspension failures which have resulted in serious engine failures on Rolls Royce Dart engines. Since this condition is likely to exist or develop in other engines of the same type design, the proposed airworthiness directive would require inspections of the flame tube bridge pieces for cracking and replacement of those that are found to be cracked.

The principal authors of this document are Mr. R. E. Follensbee, Western Region, Mr. R. F. Nugent, Flight Standards Service, and Mr. R. Lane, Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

ROLLS ROYCE AERO, LTD. Applies to Dart Engines Series 527, 528, 529, 531, 532, 533, 534, 535, 536, 550, 542-4, 542-10, and 543-10 that have modification 1425 incorporated and are installed on, but not necessarily limited to, Nihon YS-11, Convair 600 and 640, Handley Page Herald, Fokker F27, Fairchild F27, Grumman Gulfstream I, and Hawker Siddeley 748 series aircraft.

Compliance is required as indicated.

To prevent overheating and failure of high pressure turbine discs, accomplish the following:

(a) Within the next 500 hours engine time in service after the effective date of this AD and thereafter at intervals not to exceed 1500 hours engine time in service, inspect the flame tube bridge pieces for cracking of the support legs in accordance with the instructions contained in paragraph 4.C of Rolls-Royce Dart Service Bulletin Da 72-420, dated October 1975 (hereinafter referred to as the Bulletin), or an equivalent approved by the Chief, Aircraft Certification Staff, Europe, Africa, and Middle East Region, FAA, c/o American Embassy, APO New York, N.Y. 09667 (hereinafter referred to as FAA-approved equivalent).

(b) If, during an inspection required by this AD, flame tube bridge piece cracking is detected, replace the affected part with a serviceable part before further flight (except that the aircraft may be flown in accordance with FAR 21.197 and 21.199 to a base where the work can be performed), and continue to inspect in accordance with either paragraphs (c) or (d) of this AD, as applicable.

(c) If, during an inspection required by paragraph (a) of this AD, flame tube bridge piece leg cracking is found, establish a reptitive inspection interval for all engines in the fleet in accordance with paragraph 4.A.(3)(b) of the Bulletin or an FAA-approved equivalent and continue to inspect the fleet in accordance with paragraph (a) of this AD within the fleet repetitive inspection interval established under this paragraph.

(d) If, during a repetitive inspection conducted in accordance with this paragraph or paragraph (c) of tihs AD, a cracked bridge piece leg of any flame tube in the fleet is found, establish a further reduced repetitive inspection interval for all engines in the fleet in accordance with paragraph 4.B.(3) of the Bulletin or an FAA-approved equivalent and continue to inspect the fleet in accordance with paragraph (a) of this AD within the fleet repetitive inspection interval established under this paragraph.

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C. on July 26, 1977.

JAMES M. VINES,
Acting Director,
Flight Standards Service.

[14 CFR Part 39]

[Docket No. 17065]

AIRWORTHINESS DIRECTIVES

British Aircraft Corp. BAC 1-11 200 and 400 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to adopt an Airworthiness Directive (AD) that would require the installation of placards, repetitive inspections of the fuel boost pump electrical connectors, and replacement of defective parts, as necessary, on certain BAC 1-11 200 and 400 series airplanes to prevent failures in the electrical connectors that could result in possible fuel system fires.

DATES: Comments must be received on or before September 20, 1977.

ADDRESSES: Send comments on the proposal in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn.: Rules Docket (AGC-24) Docket No. 17065, 800 Independence Avenue SW., Washington, D.C. 20591. The applicable service bulletin may be obtained from: British Aircraft Corp., Inc., 399 Jefferson Davis Highway, Arlington, Va. 22202, Telephone 703-979-1400.

FOR FURTHER INFORMATION CONTACT:

D. C. Jacobsen, Chief, Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, Telephone 513.38.39.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the docket number and be submitted in duplicate to the address specified above. All communications received on or before the date specified above, will be considered by the Administrator before taking action upon the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact, concerned with the substance of the proposed AD, will be filed in the Rules Docket.

There have been reports of arcing of the electrical connector of the fuel boost pump to its flooded housing within the fuel tank on certain British Aircraft Corporation BAC 1-11 200 and 400 series airplanes that could result in fuel system fires. Since this condition is likely to exist or develop in other airplanes of the same type design, the proposed AD would require the installation of placards, repetitive inspections of the fuel boost pump electrical connectors, and replacement of defective parts.

DRAFTING INFORMATION

The principal authors of this document are M. Gaydos, Europe, Africa, and Middle East Region, E. Newberger, Flight Standards Service, and K. May, Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new Airworthiness Directive.

BRITISH AIRCRAFT CORP. Applies to BAC 1-11, Model/Types 203/AE, 204/AF, 212/AR, 215/AU, 201/Z/AC, 401/AK, 410/AQ, 419/EP, and 412A/EB airplanes.

Compliance is required as indicated.

To prevent fuel system fires, accomplish the following:

(a) Within the next 300 hours airplane time in service after the effective date of this AD, unless already accomplished, comply with the following:

(1) Permanently install a placard at all cockpit fuel boost pump circuit breakers, using white letters on a red background, to read as follows:

DO NOT RESET IN FLIGHT

(2) Insert in the limitations section of the Airplane Flight Manual the statement: "Do not reset fuel boost pump circuit breakers until the affected boost pump electrical connector has been inspected in accordance with paragraph 2.3.7 of BAC Albert Service Bulletin 28-A-PM 5220, Issue 4, dated October 22, 1975, or an FAA-approved equivalent".

(3) Permanently install a placard in the cockpit next to the center fuel tank transfer pumps, using white letters on a red background, to read as follows:

TURN TRANSFER PUMP OFF WHEN L.P. LIGHT ILLUMINATES

(4) Insert in the limitations section of the Airplane Flight Manual the statement: "Turn center tank fuel transfer pumps "off" when the L.P. light illuminates."

(b) For airplanes equipped with fuel boost pump and housing TRW P/N 249000-6 or Plessey P/N 570-8-21225 (which includes boost pump housing connector assembly TRW P/N 209237-1 or Plessey P/N 570-1-21227), comply with the following:

(1) Prior to accumulation of 6,000 hours total time in service on the fuel boost pump housing connector assembly, or within the next 100 hours airplane time in service after the effective date of this AD, whichever occurs later, unless already accomplished within the preceding 100 hours airplane time in service, and thereafter at intervals not to exceed 200 hours airplane time in service from the last inspection, until compliance with paragraph (g) of this AD, comply with paragraphs (d), (e), and (f) of this AD.

(2) Prior to the accumulation of 6,000 hours total time in service on the fuel boost pump housing connector assembly, or with-

in the next 1,500 hours airplane time in service after the effective date of this AD, whichever occurs later, unless already accomplished within the preceding 1,500 hours airplane time in service, and thereafter at intervals not to exceed 6,000 hours airplane time in service from the previous compliance, comply with paragraph (g) of this AD.

(c) For airplanes equipped with fuel boost pump and housing, TRW P/N 249000–7 or Plessey P/N 570–8–23456 (which includes boost pump housing connector assembly TRW P/N 209237–1 or Plessey P/N 570–1–21227), comply with the following:

(1) Prior to accumulation of 10,000 hours total time in service on the fuel boost pump housing connector assembly, or within the next 100 hours airplane time in service after the effective date of this AD, whichever occurs later, unless already accomplished within the preceding 100 hours airplane time in service, and thereafter at intervals not to exceed 200 hours airplane time in service from the last inspection, until compliance with paragraph (g) of this AD, comply with paragraphs (d), (e), and (f) of this AD.

(2) Prior to the accumulation of 10,000 hours total time in service on the fuel boost pump housing connector assembly, or within the next 1,500 hours airplane time in service after the effective date of this AD, whichever occurs later, unless already accomplished within the preceding 1,500 hours airplane time in service, and thereafter at intervals not to exceed 10,000 hours airplane time in service from the previous compliance, comply with paragraph (g) of this AD.

(d) Visually inspect all fuel boost pumps on the airplane by operating them for 10 minutes and inspecting for signs of fuel leakage at the fuel pump conduit drains in accordance with paragraph 2.3.3 of BAC Alert Service Bulletin 28–A–PM 5220, Issue 4, dated October 22, 1975 (hereinafter referred to as BAC ASB), or an FAA-approved equivalent.

(e) If, during any inspection required by this AD, fuel leakage is detected, identify the pump causing the leak and visually inspect its housing connector assembly, TRW P/N 209237–1 or Plessey P/N 570–1–21227, within the boost pump housing, and its associated fuel boost pump electrical connector for evidence of arcing, overheating, or deterioration of the 'O' ring in accordance with paragraph 2.3.7 of BAC ASB, or an FAA-approved equivalent.

(f) Where evidence of arcing, overheating, or deterioration of the 'O' ring seal is found in either the boost pump housing or the electrical connector as a result of an inspection required by this AD, replace the affected parts with serviceable parts before further flight, except that the airplane may be flown in accordance with FAR §§ 21.197 and 21.199 to a base where the work can be performed, provided that the affected pumps are isolated by pulling and clipping the affected pump circuit breaker and placarding the affected pump On-Off switch in the cockpit third crewman's panel with the word, Inoperative.

(g) Disassemble the electrical connector assembly, perform the inspections, and replace the appropriate parts in accordance with paragraphs 2.3.10, 2.3.11 and 2.3.12 of BAC ASB, or an FAA-approved equivalent.

(h) Upon the request of an operator, the Chief, Aircraft Certification Staff, FAA, Europe, Africa, and Middle East Region, c/o American Embassy, APO New York 09667, may approve alternate repetitive inspection intervals and inspection procedures to facilitate continued operations by the operator, if data substantiating such action are submitted by the operator.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.85.)

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Washington, D.C. on July 28, 1977.

JAMES M. VINES,
Acting Director,
Flight Standards Services.

[14 CFR Part 71]

[Airspace Docket No. 77–WE–18]

TRANSITION AREA, TUCSON, ARIZONA

Proposed Alteration

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposed to alter the Tucson, Ariz. 700-foot transition area. This proposal is necessary in order to provide controlled airspace for radar vector services south, east and north of Tucson.

DATES: Comments must be received on or before August 31, 1977.

ADDRESSES: Send comments on the proposal to: Federal Aviation Administration, Chief, Airspace and Procedures Branch, AWE–530, 15000 Aviation Boulevard, Lawndale, Calif. 90261.

FOR FURTHER INFORMATION CONTACT:

Thomas W. Binczak, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, Calif. 90261. Telephone: 213–536–6182.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Intrested persons may participate in the proposed rulemaking by submitting such written data, views, or arguments as they may desire. Communications should identify the Airspace Docket Number and be submitted in triplicate to the Chief, Airspace and Procedures Branch, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90261. All communications received on or before August 31, 1977, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments received will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to Federal Aviation Administration, Chief, Airspace and Procedures Branch, AWE–530, 15000 Aviation Boulevard, Lawndale, Calif. 90261, or by calling 213–536–6180. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the 700 foot transition area at Tucson, Arizona. The present 700-foot transition area was found to be inadequate to provide controlled airspace for radar vector procedures south, east and north of Tucson.

DRAFTING INFORMATION

The principal authors of this document are Thomas W. Binczak, Air Traffic Division and DeWitte T. Lawson, Jr., Esquire, Regional Counsel, Western Region.

THE PROPOSED AMENDMENT

§ 71.181 [Amended]

Accordingly, the Federal Aviation Administration proposes to amend § 71.181 Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

TUCSON, ARIZONA

Delete the description of the 700 foot transition area and substitute the following:

That airspace extending upward from 700 feet above the surface within a 10-mile radius of Tucson International Airport (latitude 32°07'05" N., longiture 110°56'32" W.); within 16 miles NE and 13 miles SW of the Tucson VORTAC 138° radial extending from the 10-mile radius area to 16 miles SE of the VORTAC, within 1 mile NE and 9 miles SW of the Tucson VORTAC 318° radial, extending from the 10-mile radius area to 22 miles NW of the VORTAC and within 16 miles NE of the Tucson VORTAC 318° radial extending from the Tucson VORTAC to 30 miles NW of the VORTAC.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

NOTE.—The Federal Aviation Administration has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Los Angeles, Calif., on July 20, 1977.

FRANK HAPPY,
Acting Deputy Director,
Western Region.

[FR Doc.77–22156 Filed 8–3–77;8:45 am]

[14 CFR Part 71]

[Airspace Docket No. 77–AL–5]

PROPOSED DESIGNATION OF ADDITIONAL CONTROL AREA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to establish an additional control area, identified as Gulf of Alaska, west of the Yakutat, Alaska, transition area. At the present time there are numerous IFR direct routes for helicopters from onshore airports to oil exploration sites and between drilling sites. This proposed action would support IFR routes to the numerous offshore drilling sites and encompass IFR arrival and departure procedures.

DATES: Comments must be received on or before September 19, 1977.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Alaskan Region, Attention: Chief, Air Traffic Division, Docket No. 77–AL–5, FAA, 632 Sixth Avenue, Anchorage, Alaska 99501. The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket, (AGC–24), Room 916, 800 Independence Avenue SW., Washington, D.C. 20591. An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Huff, Airspace Regulations Branch (AAT–230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone 202–426–3715.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Alaskan Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 632 Sixth Avenue, Anchorage, Alaska 99501. All communications received on or before September 19, 1977, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue SW., Washington, D.C. 20591, or by calling 202–426–8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2 which describes the application procedures.

The FAA is considering an amendment to Subpart E of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to establish an additional control area, identified as Gulf of Alaska, west of the Yakutat, Alaska, transition area. Numerous IFR direct routes for helicopters have been approved from onshore airports to oil exploration drilling vessels and between drilling vessels in the northern Gulf of Alaska. The lowest minimum en route altitude on approved routes is 1,300 feet. This additional control area, with a 700-foot floor over the northern Gulf of Alaska, is required to provide IFR ATC services above 700 feet on approved IFR routes between shoreline airports and drilling vessels and between drilling vessels. Although IFR ATC separation service would be provided primarily to helicopter operations serving the drilling rigs, all aircraft operating in the designated control area would be provided standard IFR separation service as required during instrument weather conditions. Subpart E of Part 71 was republished in the FEDERAL REGISTER on January 3, 1977 (42 FR 348).

ICAO CONSIDERATIONS

As part of this proposal relates to the navigable airspace outside the United States, this notice is submitted in consonance with the International Civil Aviation Organization (ICAO) International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States is governed by Article 12 of and Annex 11 to the Convention on International Civil Aviation, which pertains to the establishment of air navigation facilities and services necessary to promoting the safe, orderly, and expeditious flow of civil air traffic. Their purpose is to insure that civil flying on international air routes is carried out under uniform conditions designed to improve the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting state, derived from ICAO, wherein air traffic services are provided and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting state accepting such responsibility may apply the International Standards and Recommended Practices to civil aircraft in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting state, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since this action involves, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

DRAFTING INFORMATION

The principal authors of this document are Mr. Richard Huff, Air Traffic Service, and Jack P. Zimmerman, Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.163 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 348) by adding the following:

GULF OF ALASKA

From Lat. 60°09' N., Long. 144°30' W., thence eastward 3 NM offshore and parallel to the shoreline to Lat. 59°43'30" N., Long. 140°00'00" W., to Lat. 59°27' N., Long. 140°00'-W., thence westward along the south boundary of V–440 to Long. 144°30' W., to point of beginning, excluding that portion that lies within transition areas at Yakataga and Yakutat, Alaska.

(Secs. 307(a), 313(a), and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a) and 1510); Executive Order 10854 (24 FR 9565); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A–107.

Issued in Washington, D.C., on July 27, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

[Airspace Docket No. 77–SW–27]

PROPOSED ALTERATION AND EXTENSION OF FEDERAL AIRWAYS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: The proposed extensions of V–161, V–358 and also the alteration of V–17, V–163 and V–222 are the result of an evaluation of the present and future requirements for airways into and out of the San Antonio, Tex., area. Additional airway changes will be proposed as new and relocated navigation aids are

commissioned. The action proposed at this time will assist in the control of air traffic and the reduction of congestion in this area.

DATES: Comments must be received on or before September 5, 1977.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Southwest Region, Attention: Chief, Air Traffic Division, Docket No. 77-SW-27, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101. The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket, (AGC-24), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591. An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Mr. Everett L. McKisson, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-3715.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southwest Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Tex. 76101. All communications received on or before September 5, 1977 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rule making (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8059. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would accomplish the following:

1. Realign a segment of V-17 from Cotulla, Tex., via the INT of the Cotulla 042°T (033°M) and the San Antonio, Tex., 198°T (189°M) radials; San Antonio; including an east alternate via the INT of the Cotulla 042°T (033°M) and the San Antonio 183°T (174°M) radials; INT of the San Antonio 042°T (033°M) and the Austin, Tex., 229°T (220°M) radials; Austin; including an east alternate via the INT of the San Antonio 057°T (048°M) and the Austin 211°T (202°M) radials; and also including a west alternate via the INT of the San Antonio 027°T (018°M) and the Austin 244°T (235°M) radials. The description of the main airway between San Antonio and Austin is not a change, but is included to describe the east and west alternates.

2. Extend V-161 to begin at Llano, Tex., and go via Millsap, Tex., to Bridgeport, Tex., thence as presently described.

3. Realign and extend a segment of V-163 to extend from Three Rivers, Tex., via the INT of the Three Rivers 345°T (336°M) and the San Antonio, Tex., 168°T (159°M) radials; San Antonio; including a west alternate via the INT of the Three Rivers 326°T (317°M) and the San Antonio 183°T (174°M) radials; Lampasas, Tex.; Acton, Tex.; including a west alternate via Stonewall, Tex.; and Llano, Tex.; to Bridgeport, Tex., thence as presently described.

4. Realign a segment of V-222 to extend from Junction, Tex., via Stonewall, Tex., to San Antonio, Tex., thence as presently described.

5. Extend V-358 to begin at San Antonio, Tex., and go via Stonewall, Tex.; Lampasas, Tex.; the INT of the Lampasas 041°T (033°M) and the Waco, Tex., 248°T (240°M) radials to Waco, thence as presently described.

The following new VORTACs will be installed to support the proposed airways, if adopted.

Lampasas, Tex., Lat. 31°11'04" N., Long. 98°08'28" W.
Stonewall, Tex., Lat. 30°12'23" N., Long. 98°42'19" W.

DRAFTING INFORMATION

The principal authors of this document are Mr. Everett L. McKisson, Air Traffic Service, and Mr. Jack P. Zimmerman, Office of the Chief Counsel.

THE PROPOSED AMENDMENT

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to further amend § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (42 FR 307) and amended (42 FR 55863) as follows:

1. In V-17 all between "Laredo, Tex.;" and "Waco, Tex.," is deleted and "Cotulla, Tex.; INT Cotulla 042° and San Antonio, Tex., 198° radials; San Antonio, including an east alternate via INT Cotulla 042° and San Antonio 183° radials; INT San Antonio 042° and Austin, Tex., 229° radials; Austin, including an east alternate via San Antonio 057° and Austin 211° radials and also including a west alternate via San Antonio 027° and Austin 244° radials;" is substituted therefor.

2. In V-161 "From Bridgeport, Tex., via" is deleted and "From Llano, Tex., via Millsap, Tex.; Bridgeport, Tex.;" is substituted therefor.

3. In V-163 all between "Corpus Christi;" and "Ardmore, Okla.;" is deleted and "Three Rivers, Tex., including a west alternate via INT Corpus Christi 296° and Three Rivers 165° radials; INT Three Rivers 345° and San Antonio 168° radials; San Antonio, including a west alternate via INT Three Rivers 326° and San Antonio 183° radials; Lampasas, Tex.; Acton, Tex., including a west alternate from San Antonio via Stonewall, Tex., and Llano, Tex.; Bridgeport, Tex." is substituted therefor.

4. In V-222 "Junction, Tex.; INT Junction 112° and San Antonio, Tex., 334° radials;" is deleted and "Junction, Tex.; Stonewall, Tex.;" is substituted therefor.

5. In V-358 "From Waco, Tex., via" is deleted and "From San Antonio, Tex., via Stonewall, Tex.; Lampasas, Tex.; INT Lampasas 041° and Waco 248° radials; Waco, Tex.;" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

NOTE.—The FAA has determined that this document does not contain a major proposal requiring preparation of an Economic Impact Statement under Executive Order 11821, as amended by Executive Order 11949, and OMB Circular A-107.

Issued in Washington, D.C., on July 27, 1977.

WILLIAM E. BROADWATER,
Chief, Airspace and Air Traffic Rules Division.

CONSUMER PRODUCT SAFETY COMMISSION

[16 CFR Part 1605]

CALIFORNIA CHILDREN'S CLOTHING FLAMMABILITY REGULATIONS

Denial of Application for Exemption From Preemption; Withdrawal of Proposed Rulemaking

AGENCY: Consumer Product Safety Commission.

ACTION: Notice of denial of application to exempt California children's clothing flammability regulations from preemption under the Flammable Fabrics Act; withdraw of proposed exemption.

SUMMARY: In this document the Commission announces that it has decided to deny an application from the California State Fire Marshal to exempt its children's clothing flammability regulations from preemption under the Flammable Fabrics Act. The Commission has denied this application since information it has received indicates that the California regulations, if in effect, would unduly burden interstate commerce. In this document the Commission also withdraws the proposed rule, published in the FEDERAL REGISTER on December 27, 1976 (41 FR 56294), that would exempt the California regulations from preemption.

FOR FURTHER INFORMATION CONTACT:

Philip Bechtel, Office of the General Counsel, Consumer Product Safety Commission, Washington, D.C. 20207, 202-634-7770.

A. BACKGROUND

SUPPLEMENTARY INFORMATION:

Section 17(b) of the Consumer Product Safety Commission Improvements Act (Pub. L. 94-284), which became effective on May 11, 1976, amended section 16 of the Flammable Fabrics Act (FFA) (15 U.S.C. 1203) to provide, with specified exceptions, that whenever a federal flammability standard or other regulation for a fabric, product, or related material is in effect, no State or political subdivision may establish or continue in effect a flammability standard or other regulation for such item designed to protect against the same risk of occurrence of fire unless it is identical to the federal standard or regulation.

Section 17(b) of Pub. L. 94-284 permits the Commission, upon application by a State or local government, to grant an exemption from the preemption provision if: (1) Compliance with the State or local flammability requirement would not cause the fabric, product, or related material to be in violation of the federal requirement, (2) the State or local flammability requirement provides a significantly higher degree of protection than the federal requirement, and (3) the State or local requirement would not unduly burden interstate commerce. Section 17(b) of Pub. L. 94-284 enumerates the findings that the Commission is required to make with respect to the State or local requirement to determine the burden on interstate commerce. An exemption may be granted only after the Commission has provided public notification of the proposed exemption and has afforded interested persons an opportunity to present oral and written comments.

(1) CALIFORNIA APPLICATION

The California State Fire Marshal, in a communication dated October 25, 1976, requested the Commission to grant an exemption from preemption under the Flammable Fabrics Act for regulations regarding the flammability of children's clothing. (Regulations of the State Fire Marshal, Title 19, Subchapter 5, Flammability Standards for Children's Clothing (July 1, 1974)). This request was made in accordance with the Commission's proposed and interim procedures for submitting and considering applications for exemption from preemption under the Flammable Fabrics Act. The proposed and interim procedures were published in the FEDERAL REGISTER July 29, 1976 (41 FR 31569). The California request has been considered under these procedures.

After determining that the California application contained the information required by the Commission's interim regulations to qualify for proposal, the Commission, in accordance with § 1604.9 of the regulations, proposed an exemption in the FEDERAL REGISTER (41 FR 56294, December 27, 1976). The Commission allowed interested persons an opportunity to submit written comments until March 28, 1977, and also permitted interested persons to make oral presentations, in Washington, D.C., on February 7 and 8, 1977; in San Francisco, California, on February 14, 1977; and in Los Angeles, California, on February 15, 1977.

(2) CALIFORNIA REGULATIONS

The California application concerned regulations of the California State Fire Marshal for the flammability of children's clothing that were issued on July 1, 1974. These regulations include the following requirements:

(a) On or after July 1, 1975 no item of children's clothing shall be sold or offered for sale in California unless such item has been tested and conforms to the criteria of acceptance specified in any one of the following standards: (i) Federal Standard FF 3-71, children's sleepwear sizes 0 through 6x as published in the FEDERAL REGISTER July 21, 1972, (ii) Federal Standard FF 5-74, children's sleepwear sizes 7 through 14 as published in the FEDERAL REGISTER May 1, 1974, (iii) any other standard approved by the State Fire Marshal which will provide a level of flame resistance substantially equivalent to the above children's sleepwear standards, or (iv) Commercial Standard CS 191-53 (Class 1 or Class 2), the mandatory federal standard for the flammability of clothing textiles.

(b) On or after July 1, 1976, no item of children's clothing which is flame retardant in accordance with the provisions of FF 3-71, FF 5-74, or any other standard approved by the State Fire Marshal shall be sold or offered for sale unless such item is labeled as being flame resistant in accordance with such standard.

(c) On or after July 1, 1977, no item of children's clothing which is not flame retardant and meets only the criteria of acceptance stipulated in CS 191-53 shall be sold or offered for sale unless such item bears cautionary labeling, as provided in the regulations. (In a later memorandum submitted to the Commission, dated December 15, 1976, the California State Fire Marshal stated that the effective date of the negative labeling provision had been postponed until January 1, 1978. For purposes of this application, the Commission has considered January 1, 1978 as the effective date of this provision.)

(d) On or after July 1, 1979, no item of children's clothing shall be sold or offered for sale unless such item is flame retardant and meets the criteria of acceptance stipulated in DOC FF 3-71, DOC FF 5-74, or any other standard approved by the State Fire Marshal.

(3) PREEMPTION OF THE CALIFORNIA REGULATIONS

At the present time the Consumer Product Safety Commission has in effect three flammability standards applicable to wearing apparel: Commercial Standard 191-53 (16 CFR Part 1610), which applies to general wearing apparel; FF 3-71 (16 CFR Part 1615) which applies to children's sleepwear in sizes 0 through 6x; and FF 5-74 (16 CFR Part 1616), which applies to children's sleepwear in sizes 7 through 14. The two flammability standards for children's sleepwear are more stringent than CS 191-53.

The California State Fire Marshal requests an exemption from preemption by CS 191-53 for the California children's clothing flammability regulations. He believes CS 191-53 covers the same items as the California regulations and is designed to protect against the same risk of occurrence of fire as the California regulations. He states that the federal standard is not identical to the state regulations since the federal standard does not require items of children's clothing meeting only the criteria of acceptance in CS 191-53 to bear cautionary labeling, when sold or offered for sale on or after January 1, 1978. In addition, CS 191-53 is not identical to the state regulation since it does not require items of children's clothing sold or offered for sale on or after July 1, 1979 to meet the criteria of acceptance stipulated in the federal flammability standards for children's sleepwear (or any other standard approved by the State Fire Marshal.)

B. COMMISSION CONSIDERATION OF THE MERITS OF THE APPLICATION—EFFECT ON INTERSTATE COMMERCE

Prior to granting any application for an exemption, the Commission is required to make the statutory findings that: (1) Compliance with the State or local government requirement would not result in violation of the federal requirement; (2) the State or local government requirement provides a significantly higher degree of protection from the risk of occurrence of fire than the federal requirements; and (3) the State or local government requirement does not unduly burden interstate commerce.

In determining whether a state or local government requirement affects interstate commerce, Section 16(c) of the FFA requires the Commission in its discretion to consider and make factual findings on the following enumerated factors:

(1) Whether it is technologically feasible to comply with the State or local government regulations;

(2) Whether it is economically feasible to comply with the State or local government regulations;

(3) Whether the cost of complying with the State or local government regulations would unduly burden interstate commerce;

(4) The geographic distribution of the products to which the State or local government regulations would apply;

(5) The probability that other State or local governments will apply for an exemption for a simliar flammability standard or other regulation; and

(6) The need for a national, uniform flammability standard or other regulation under the FFA for the products covered by the State or local government provision.

Before making a decision on this application, the Commission solicited written and oral comments from the State of California and all other interested persons on the issues related to the statutory findings. The Commission re-

ceived written and oral comments from the State of California; from industry representatives including trade associations, manufacturers, distributors, and retailers affected by the regulations; and from physicians, burn institutions, hospitals, and consumers. The Commission has based its decision on information received from these commentors, as well as information included in the application for an exemption.

(1) FACTUAL FINDINGS CONCERNING THE EFFECT ON INTERSTATE COMMERCE THAT WOULD BE CAUSED BY THE NEGATIVE LABELING PROVISION OF THE CALIFORNIA REGULATIONS

The California children's clothing flammability regulations provide that on or after January 1, 1978, no item of children's clothing which is not flame retardant and meets only the criteria of acceptance stipulated in Commercial Standard 191–53 (16 CFR Part 1610), shall be sold or offered for sale unless such item bears cautionary labeling, as provided in the regulations. In response to the proposed exemption from preemption published in the FEDERAL REGISTER on December 27, 1976, the Commission received the following information regarding the effect on interstate commerce of the regulations:

(a) *The economic feasibility of complying with the negative labeling requirement.* Oral and written comments received by the Commission stated that granting the requested exemption for the labeling provision of the California regulation would reduce the availability of the products in California, since most production facilities have assembly line methods of manufacturing that would require disruption in order to produce specially labeled items to be shipped to California. Some commentors stated that manufacturers outside the State of California would not manufacture garments for the California market, since it is not feasible to attach labels for the 10 percent of production intended for the California market. According to one oral commentor, California manufacturers would be placed at a competitive disadvantage since they would be required to label 40 percent or more of their sales as opposed to 10 percent of the children's wear sold by manufacturers outside the State of California.

One commentor undertook a cost study revealing that approximately 400 minutes of labor time would be required to affix labels to the 120 garments involved in the study. The specific time breakdown was as follows:

	Minutes
1. Remove polybag	24
2. Unbutton garment and remove hanger	120
3. Sew label and trim	90
4. Replace hanger and button garment	120
5. Rebag garment	34
6. Transport from distribution center to sewing room and back	12
Total	400

One commentor noted that the imposition of the California labeling requirements would act to accelerate the increase in product liability insurance for the wearing apparel industry.

Another commentor stated that the cost of the special labeling required to comply with the California regulations is estimated to be $20.00 per thousand labels.

Several commentors indicated that the absence of a negative labeling requirement for these products in neighboring states could lead California consumers to believe that the same products sold in neighboring states are safer than the products sold in California with a negative label. This could adversely affect the sale of California products.

Several commentors also noted, based on experience with children's sleepwear, that the presence of the negative labeling required by California would discourage consumers from buying such products that are negatively labeled.

The Commission finds that the preceding information presented by the comments concerning the economic feasibility of complying with the California regulations indicates a burden on interstate commerce.

(b) *The cost of complying with the negative labeling requirement.* One commentor undertook a cost study of the effect of the California negative labeling requirement on the retail price of a garment. Based on labor costs, the cost of materials, social security, unemployment, workman's compensation, pension benefits, and health insurance, the study indicated that compliance with the California labeling requirement would raise the cost of a $4.00 garment by 25 percent to $5.00. According to the commentor, the cost of higher priced garments would not be increased by the same percentage. Several commentors noted that the labels required by California would, as a practical matter, be sewn in as opposed to stick-on labels, since stick-on labels could fall off and create product liability problems.

Another commentor noted that the extra burden of maintaining separate production steps in applying labels for California goods would add costs to the California goods that can not be specifically allocated to California bound goods. Instead, the costs will be borne generally by consumers in all of the States.

The Commission finds that the preceding information presented by the comments concerning the economic feasibility of complying with the California regulations indicates a burden on interstate commerce.

(c) *The geographic distribution of the products to which the California labeling requirement would apply.* Several commentors indicated that the burden of the requirement of special labels for children's clothing intended for the California market would prevent out of state manufacturers, distributors, and retailers from marketing children's clothing in California. This could reduce the supply of children's clothing to California. The Commission finds that this information indicates that the California regulations would burden interstate commerce.

(d) *The probability that other states or local governments will apply for an exemption for similar labeling requirements in a flammability standard or other regulation.* The Commission did not receive any comments, oral or written, concerning the probability that other states or local governments will apply for an exemption for similar labeling requirements in a flammability standard or other regulation. Therefore, the Commission has not been able to find whether the probability of similar exemption requests would burden interstate commerce.

(e) *The need for a national, uniform flammability standard requiring negative labeling for products covered by the California regulations.* The Commission did not receive any comments, oral or written, concerning the need for a national, uniform flammability standard requiring negative labeling for products covered by the California regulations and did not receive any comments indicating any particular circumstances affecting the State of California that make it necessary for California to establish the negative labeling requirement in its regulations. Therefore, the Commission has not been able to make a factual determination based on these proceedings, concerning the need for a national, uniform flammability standard requiring negative labeling.

(f) *The technological feasibility of complying with the California labeling requirement.* The Commission did not receive any comments, oral or written, indicating that it is not technologically feasible to comply with the labeling provisions of the California regulations. Therefore, the Commission is unable to find that the technological feasibility of complying with the California labeling requirements would burden interstate commerce.

(2) FACTUAL FINDINGS CONCERNING THE BURDEN ON INTERSTATE COMMERCE THAT WOULD BE CAUSED BY THE PERFORMANCE REQUIREMENTS OF THE CALIFORNIA CHILDREN'S CLOTHING FLAMMABILITY REGULATIONS

The California children's clothing flammability regulations provide that on or after July 1, 1979, no item of children's clothing shall be sold or offered for sale unless such item is flame retardant and meets the criteria of acceptance stipulated in FF 3–71 (16 CFR Part 1615), the federal standard in effect under the FFA which applies to children's sleepwear in sizes 0 through 6x; or FF 5–74 (16 CFR Part 1616), the federal standard in effect under the FFA which applies to children's sleepwear sizes 7 through 14; or any other standard approved by the State Fire Marshall. In response to the proposed exemption from preemption published in the FEDERAL REGISTER on December 27, 1976, the Commission received the following information regarding the effect on interstate commerce of the regulations:

(a) *The technological feasibility of complying with the performance requirements of the California regulations.* The Commission received many oral and written comments indicating that it is not technologically feasible to comply with the requirement of the California regulations that by July 1, 1979, items of children's clothing must meet the criteria of acceptance stipulated in the federal flammability standards for children's sleepwear, or any other standard approved by the State Fire Marshal.

Comments received by the Commission stated that only a few fabrics can be treated to comply with the federal standards for children's sleepwear. According to those comments, 100 percent polyester fabrics, some 100 percent cotton fabrics (e.g. cotton flannels), and some 100 percent nylon fabrics can be treated. However, these fabrics represent only a small percentage (estimated at less than 4 percent) of the total volume of apparel textiles manufactured in the United States and are used for children's sleepwear. One comment received by the Commission furnished the following data on the current use of fabric in the children's wearing apparel market:

	Percent
100 percent polyester	10
100 percent nylon	8
Cotton/polyester	50
100 percent cotton	24
100 percent acrylic	6
Other	1

Comments received by the Commission noted that new technologies are necessary in order to make the other fabrics used in children's clothing comply with the California regulations.

Comments received by the Commission stated that absent new technologies, consumers would not be able to buy clothing made from polyester/cotton blends, one of the most popular fabrics for children's wear (comprising approximately 44–62 percent of the children's apparel market). Information received by the Commission stated that it is not possible to flame retard polyester/cotton blends to comply with the federal standards, since the means for treating polyester and cotton fibers are different and incompatible with each other. The commentor did point out that, in theory, a treatment process for polyester/cotton blends would be based on combining inherently treated polyester with cotton, and topically finishing the application with flame retardant chemicals to treat the cellulosic component of the fabric. However, the commentor noted that the flame retardant characteristics of any blend (including blends of two inherently flame retardant fibers) cannot be relied on, since two inherently flame retardant fibers, when woven together, may lose their flame retardant properties as a result of chemical and physical interaction.

According to the comment, there are also technological difficulties in imparting a flame retardant treatment to 100 percent cotton fabrics. (Comments received by the Commission indicated that 100 percent cotton fabrics represent approximately 28 percent of the children's apparel market at the present time). Although it is possible to flame retard cotton flannels and similar cotton fabrics, the comment stated that most other 100 percent cotton fabrics cannot be given flame retardant treatment. Other types of acceptable flame retardant treatments for cotton require the use of heavier fabrics which are generally appropriate only for industrial work clothing, tents, or outdoor fabrics. The commentor also stated that denim cannot be made flame retardant in accordance with the test procedures specified in the children's sleepwear standards unless product quality is sacrificed, in terms of severe loss of strength and abrasion resistance. Two chemical processes Pyrovatex CP and Fyrol 76, involving a phosphorous-nitrogen based resin system, are, according to the commentor, unsuitable as a result of loss of abrasion resistance and strength. The comment stated that these chemicals cause the durability of 100 percent cotton to be reduced at least 10–20 percent. Another process, involving precondensates of tetrakis hydroxymethyl phosphonium sulfate with urea, cured by ammonia (THPOH/Ammonia Cure), permits acceptable strength retention and durability but does not provide for the control of shrinkage during home washing. Lightweight cottons treated with an ammonia based cure may pass the children's sleepwear standard yet lose their permanent press qualities.

According to the commentor, there is also no commercially acceptable treatment for acrylic fabrics, which are the dominant fabrics used for sweaters. The commentor stated that unless new flame resistant fabrics are discovered, manufacturers would be compelled to manufacture their children's clothing from the few fabrics that can be successfully treated with a chemical flame retardant.

Several commentors noted that the discontinuance of the use of the flame retardant TRIS (2,3 dibromopropyl phosphate) may cause additional problems in obtaining an inexpensive and satisfactory flame retardant. One commentor pointed out that the California flammability regulations could lead to the development of untested chemical flame retardants based on brominated and chlorinated compounds that could expose children to biological hazards.

Comments received by the Commission indicated that there are many obstacles to developing flame resistant treatment. According to one comment, finishing steps must be perfected to impart softness, lubricity, and antistatic properties; technology must be developed for dyes to give desired color, as well as builders to give body; finishes to provide permanent press qualities, water repellancy, and soil resistance; and bleaches or brighteners to improve whiteness and color. In addition FR fabric must be durable since children's clothing is subject to repeated laundering. The federal children's sleepwear standards require samples to be flame resistant initially, as well as after 50 launderings using a high-phosphate detergent. According to this commentor, using low or non-phosphate detergents may reduce FR performance, especially in hard-water areas, since calcium and magnesium salts may accumulate on fabrics in hard water areas when high phosphate detergents are not used. The accumulation of calcium and fatty acid soap deposits can result in failure of the fabric to pass the test methods. The commentor pointed out that recent trends away from the use of high-phosphate detergents caused by restrictions imposed by States and consumer preference based on ecology reasons could increase the risk of flammability associated with non-phosphate or low phosphate detergents. The commentor also pointed out that many chemicals that may be effective flame retardants can not be used since they are either soluble or susceptible to degradation by some combination of detergents or bleaches.

One commentor observed that dyeing of FR-treated cellulosics and thermoplastics requires extensive technological modifications. Although children's sleepwear made of 100 percent polyester generally consists of pastels and light prints, fabrics used for general children's clothing require darker and brighter colors. According to one commentor, special equipment and new technology is required in order to obtain these colors, as well as additional polyester dyeing capacity. Since flame resistant fabrics generally repel water, the capacity to dye these products is impaired.

The commentor also described difficulties in handling and processing 100 percent polyester in the manufacturing process as a result of its generation of static electricity and tendency to pick up oil and grease spots, as well as unwanted colors from the processing equipment. The commentor also noted that special care must be used in handling polyester fabrics to avoid the pick up and retention of soil and observed that the equipment used in processing polyester must be specially cleaned and maintained. According to the commentor, application of the federal sleepwear standards to children's clothing made of 100 percent cellulosics would result in reduced wearing life and durability of this clothing.

One commentor noted that most inherently flame retardant fibers are corrosive to spinning and cording equipment, and are too weak to be used in woven goods, except in coordination with polyester for added strength. When inherently flame retardant fibers are used in woven goods constitutional factors become very limiting. In addition, inherent shrinkage characteristics of most modacrylic and vinyon fibers reduce their desirability.

Most of the preceding problems are encountered with any significant fiber modification or textile processing change. Many of these problems were encountered during development of the children's sleepwear standards and were resolved by the industry at that time. The California proposal would expand the requirements for flame resistant garments

to children's wear sold in California. Comments received by the Commission stated that companies making children's wear in general are not familiar with the special technologies required to produce flame resistant children's sleepwear garments. As a result, the necessary introduction of this special technology to these previously unaffected companies could be a burden.

Based on the preceding information presented by the comments concerning the technological feasibility of complying with the performance requirements of the California regulations, the Commission finds that this information indicates a burden on interstate commerce.

(b) *The economic feasibility of complying with the performance requirements of the California Regulations.* The Commission also received comments indicating that it is not economically feasible to comply with the California requirements. Many comments noted that there is insufficient complying fabric available to meet the demand if the California regulation became effective, although one commentor did observe that manufacturers of certain inherently flame retardant fibers could expand production to meet demand on reasonable notice. Several commentors alleged that the California requirements would reduce or eliminate the availability of certain fabrics for children's clothing, since these fabrics cannot, at the present time, be successfully treated with a flame retardant chemical. In addition, comments received by the Commission indicated that use of existing flame retardant methods would require compromises in desirable qualities of fabrics in terms of aesthetics, wearability, fashion, and comfort. One commentor explained, in detail, the two methods generally used to make children's sleepwear flame resistant: (1) Topical treatment of cellulosic and thermoplastic fabrics and (2) use of inherently flame resistant fibers. The commentor stated that these processes require extensive commitment of resources. According to this commentor, the leading inherently flame resistant fibers, vinyons and modacrylics, are expensive and unlikely to be used in large quantities for children's clothing.

FR chemicals incorporated into fibers by addition to spin melts or solutions are expensive and limited in selection, according to one commentor, since the chemicals must be stable to the spinning conditions which often involve high temperatures (250–300° C) and either acidic or basic conditions. This commentor also observed that, in dyeing FR-treated cellulosics and thermoplastics, more expensive rapidogens and fiber reactive dyestuffs are used in FR-treated cellulosics, as opposed to less expensive flammable pigment binder resins. More expensive disperse dyes are used with 100 percent polyester fabrics. According to this commentor, polyester dyeing capacity in the United States is sufficient to furnish less than one-fourth of the apparel market with medium and dark shade flame resistant polyester fabrics.

One commentor, in considering what percentage of fabrics presently used in articles of children's clothing would comply with the California regulations, provided the following figures:

80 percent of fabrics used in tops will *not* comply.

96 percent of fabrics used in bottoms will *not* comply.

95 percent of fabrics in woven coordinates will *not* comply.

95 percent of fabrics in knit coordinates will comply.

40 percent of outerwear is acrylic knit that will *not* comply.

35 percent of outerwear is woven nylon that will comply.

18 percent of outerwear is polyester cotton blend that *may* comply.

The Commission finds that the preceding information presented in the comments concerning the economic feasibility of complying with the California regulations indicates that the performance requirements in these regulations would burden interstate commerce.

(c) *The cost of complying with the performance requirements of the California regulations.* Comments received by the Commission stated that compliance with the performance requirements of the California flammability regulations would increase the price of children's clothing for California consumers and consumers outside California. Estimates of cost increases as a result of complying with the California regulations ranged from 25 to 65 percent.

Commentors noted that the California regulations would result in an increase in direct costs of manufacture as well as "indirect costs", resulting from loss of product performance, decreased consumer choice and potential effects on human health and safety. According to this commentor, these costs would be passed through the apparel industry to the consumer.

One commentor estimated that for specific garments, the added cost of making a shirt flame retardant is $.50, while the added cost is $1.50 for a pair of pants and $2.00 for a jacket.

Cost figures provided by another commentor revealed that the California regulations would have an anticipated textile price increase from 25 to 40 percent above the current price. This commentor provided figures indicating that in 1976 retail sales of outerwear for California children from ages 0–13 were $463,000,000. Based on cost and pricing experience, the commentor stated that percentage increases in textile prices are normally reflected in approximately equal increases in apparel prices. Thus, applying the lower estimate of a 25 percent increase to the available data, containing 1976 retail sales, outerwear prices would increase by $115,750,000. If the higher estimate of a 40 percent increase is applied to the data concerning 1976 retail sales, the increase in price would be $185,200,000. The commentor estimated that in 1976 there were 2.7 million families in California with children in the 0–13 age bracket, so that the additional cost for the average California family could range between $42.85 and $68.50 per year. The estimate would be lower if families bought less outerwear as a result of the California regulations, if California consumers bought clothing outside California, made their own clothes from less expensive fabric, or adopted adult clothing as children's clothing. The estimate would be higher as a result of indirect costs or added costs at other levels of the apparel industry.

The commentor described the elements of the cost of manufacture attributable to FR treatment as follows:

1. At the griege mill, for 100 percent cotton fabric, expenses would be incurred since a heavier substrate (more cotton) must be used to support FR treatment while retaining acceptable performance levels. Where 100 percent polyester is used, handling problems resulting from static electricity, soiling, and the necessity of spinning the yarns at slower speeds to prevent milling can result in a decrease in efficiency at the griege mill, affecting the end price of the fabric.

2. Processing expenses arise at the treatment stage from the cost of chemicals, other materials, capital expenditure, labor, the use of energy, research and development, and cost efficiency. Expenses also arise since colors of fabrics can present problems.

3. If a dual process treatment is designed for polyester/cotton blends, the use of two processes could increase the cost of the fabric.

4. In addition to costs associated with the treatment process, capital expenditures for flame retardant equipment would be required. As an example, a single unit for the THPOH/Ammonia cure process costs approximately $200,000. Since this process is relatively slow, more than one unit would be required in any substantial mill producing FR fabrics complying with the California regulations.

5. Although the assistant California State Fire Marshal stated that the California regulations did not incorporate testing and recordkeeping requirements, the commentor alleged that the risk of product liability, return of products, and damage to reputation, would, as a practical matter, require extensive testing and recordkeeping. Several commentors noted that the increased recordkeeping and testing costs that would be associated with the California regulations would raise the price of the fabric approximately 7–10 percent.

6. There would also be increased energy costs, since present flame retardant processes are energy intensive. In addition, inventory and warehousing expenses would be increased as a result of the necessity to segregate flame retardant fabrics and non-flame retardant fabrics.

Based on experience with fabric for children's sleepwear, the commentor estimated average costs *per yard* for the following fabrics complying with the California regulations:

1. 100 percent cotton fabric (lightweight—five ounces or less per yard), using the THPOH/Ammonia process:

	Per yard
Chemicals	$0.10
Process, labor overhead	.13
Energy	.02
Equipment depreciation, taxes	.005
Warehousing and inventory	.002
Testing	.02
	.277

2. 100 percent polyester fabric (lightweight—five ounces or less per yard):

	Per yard
Chemicals	$0.025
Process, labor overhead	.10
Energy	.005
Equipment depreciation, taxes	.001
Warehousing and inventory	.002
Testing	.02
	.153

The commentor indicated that these cost estimates would be increased as a result of the decrease in volume associated with flame retarding fabric to comply with the California regulations. Several comments noted that producing fabric to comply with the California regulations would result in diseconomies of scale, leading to increased costs of production. For fabric runs in a lot of 100,000 yards, decreased economies would add approximately five percent to the total cost of producing the fabric in 5,000 yard lots according to one commentor. Processing fabric in smaller lots would lead to multiplication of waste and clean up efforts, and the problem of seconds resulting at the start of every dye run.

Another commentor pointed out that the increase in the cost of wool garments complying with the California regulations would be at least 20–30 percent.

Another commentor, in estimating chemical costs for treating fabric, noted that treatment of 100% cotton fabrics, using THPOH/Ammonia cure, costs approximately 30–45 cents per pound of fabric treated.

Another commentor stated that inefficiency created by the FR treatment process would cause production to be slower and increase the potential error factor. In addition, research and development costs for flame retardation would be increased.

The commentor stated that the increased textile manufacturing costs would be passed on to consumers, as a result of the high volume and low profit margin nature of the textile industry.

The commentor described the following indirect costs resulting from the California regulations:

1. The costs associated with diminished consumer choice, e.g., variations of polyester/cotton blends and denims;

2. The costs associated with sacrifice in durability, permanent press characteristics, shrinage control, hand, and color; and

3. Costs created by the use of organic substances as a result of their potential impact on consumer safety, occupational health and safety, and the environment.

The increased costs or technological difficulties that several commentors state are associated with flame retarding children's clothing made of cotton may result in a decline in the use of cotton in the children's apparel market. At the present time this market annually uses 270,000 bales of 100 percent cotton and 475,760 bales of cotton polyester.

Another commentor noted that if the California regulations become effective, any shortages or unavailability of flame retardant fabrics resulting from the requirements of these regulations and the reluctance of the textile industry to produce fabric to comply with the California regulations could force California manufacturers out of business.

The Commission finds that the preceding information presented in the comments concerning the cost of complying with the California regulations indicates that the performance requirements in these regulations would burden interstate commerce.

(d) *The geographic distribution of the products to which the performance requirements of the California regulations would apply.* The Commission received comments stating that the apparel and textile industries are national in nature, and would be burdened by the California regulations. According to one commentor, in 1976 total retail sales of children's outerwear in the U.S. were $5.213 billion, of which $463 million, or approximately nine percent, were sold in California. Based on 1975 Bureau of Labor Statistics, the commentor noted that California produces only about three percent of the nation's children's outerwear. In comparing these statistics the commentor observed that even if all of the children's outerwear produced in California were sold in California, children's outerwear with a value of at least $308.7 million was imported into California. According to this commentor, since the concentration of textile plants is heaviest in the southeastern part of the country, the treatment process to be regulated by California occurs primarily in states that are located farthest from California.

Based on experience associated with children's sleepwear, another commentor stated that imposition of the California regulations would result in the elimination of foreign imports of children's clothing to California.

Another commentor stated that if the California request were granted, retailers would be required to conduct separate advertising campaigns in California since the California merchandise would differ from merchandise sold in the rest of the country. This commentor estimated that increases in the cost of an advertising campaign could be approximately $125,000, while the cost of a separate catalog for California could be between $500,000 and $750,000.

The Commission finds that the preceding information presented in the comments concerning the geographic distribution of the products covered by California regulations indicates that the performance requirements in these regulations would burden interstate commerce.

(e) *Probability that other States or local governments will apply for an exemption for similar performance requirements in a flammability standard or other regulation.* The Commission received several comments stating that it is likely other states would adopt similar regulations and would apply for an exemption if the California application is granted.

Comments received by the Commission indicated that nine states—Texas, Colorado, Massachusetts, Michigan, New Hampshire, New York, Washington, Arkansas, and Wisconsin—have indicated an interest in flammability regulations. According to one commentor, Texas has enacted a statute authorizing the issuance of standards applicable to all types of children's apparel.

Based on this information presented in the comments, the Commission finds that the performance requirements in the California regulation would burden interstate commerce.

(f) *The need for a national uniform flammability standard imposing performance requirements on products covered by the California regulations.* The Commission received oral and written comments indicating that there are no particular circumstances making it necessary for California to establish its regulations. Comments received by the Commission stated that there is a need for national regulation, and that national regulation is preferable to state regulation in this area.

Based on this information presented in the comments, the Commission finds that the performance requirements in the California regulations would burden interstate commerce.

(3) ALLEGED BENEFIT TO PUBLIC HEALTH AND SAFETY THAT WOULD BE PROVIDED BY THE CALIFORNIA REGULATIONS

The Commission has received the following information concerning the alleged benefit to public health and safety that would be provided by the California regulations:

(a) *Negative labeling.* Several commentors stated that the negative labeling provisions of the California regulations would be effective in reducing the sale of the garments negatively labeled and would be an effective means of conveying information to the consumer. Other commentors noted that, based on experience with children's sleepwear, the presence of negative labeling on sleepwear did not deter consumers from purchasing these articles.

(b) *Performance requirements.* Several commentors questioned the need for applying the performance requirements specified in the federal children's sleepwear standards to all articles of children's clothing. Commentors pointed out that the burn scenarios for children's clothing, or ways in which children are burned wearing children's clothing, have not been made clear, so that the risks associated with children's clothing are undefined. One commentor pointed out

that for certain burn scenarios, such as gasoline ignition, compliance with the performance requirements specified in the federal children's sleepwear standards may not provide any additional protection than that afforded by Commercial Standard 191–53. In addition, the commentor pointed out that while performance requirements of the California regulations could provide benefits for certain articles of children's clothing, such as parkas and outerwear, benefits associated with application of the California regulations to other articles of children's clothing, such as girl's dresses, would be speculative. Many commentors indicated their opposition to the California regulations, since these regulations may lead to the increased use of untested chemicals that may be harmful to human beings.

On the other hand, several commentors pointed out that the performance requirements in the California regulations are more stringent than the federal flammability standard currently in effect for these products, CS 191–53. Other commentors indicated that the performance requirements of the California regulations would provide more protection than the current federal flammability standard, CS 191–53.

The California State Fire Marshall, in a memorandum accompanying his application for an exemption, stated that an analogy should be drawn from the benefits provided by the federal children's sleepwear regulations to the benefits that would be provided by the imposition of the performance requirements of these regulations to all articles of children's clothing. The memorandum stated that large losses of life and injuries to children must be due to children's clothing, other than sleepwear. Some commentors stated that fires involving children frequently also involved children's clothing and often inflicted severe burn injuries. One commentor, in referring to a study conducted by the Shriners' Burn Institute, stated that of 583 acute admissions to the burn care facility, 61 percent of the burns to children involved clothing. In this study, according to the commentor, the most frequently burned garments for boys were shirts (30 percent), and trousers (25 percent). For girls, the most frequently burned garments were dresses (28 percent) and nightgowns (22 percent). The commentor referred to another study, a paper published by Food Machinery Corporation and Guilford Mills indicating that there have been 3,000 deaths and more than 150,000 injuries resulting from burns associated with flammable fabrics in the last few years. According to the commentor, this study indicated that at least six percent of the fatalities and injuries involved small children's sleepwear, while 94 percent of the fatalities involved other types of clothing and other age groups. Another commentor referred to a survey conducted in California in 1971 that revealed 1,200 children suffering severe clothing burns and requiring a total of 24,000 days of hospitalization. Several commentors pointed out that injury collection sources for burn injuries are inadequate, and may lead to gross underreporting of injuries. Other commentors referred to other statistics concerning the frequency of fires involving nonsleepwear children's clothing in support of the conclusion that there is a need to protect children from the risk of injury from fire associated with children's clothing.

One commentor noted that the California regulations could be effective in protecting children against gasoline fires. The commentor cited burn injuries associated with gasoline reported to the American Academy of Pediatrics. In one injury, the child was wearing flame retardant pajamas and received no deep burns or scars. However, in the other injury, the child was wearing outer clothing that was not flame retardant and received burns to 90 percent of his body.

C. DETERMINATION THAT THE BURDEN ON INTERSTATE COMMERCE IS UNDUE—DENIAL OF CALIFORNIA APPLICATION—WITHDRAWAL OF PROPOSED EXEMPTION

After having made the factual findings specified by section 16(c) of the FFA in determining whether the California regulations burden interstate commerce, the Commission must also consider whether the burden on interstate commerce is undue.

The State of California, through its Fire Marshal, has itself recognized that imposition of the California flammability regulations for children's clothing could have a substantial impact on interstate commerce. In its application, the State claimed that although the burden was not an undue one, the regulations would have an effect on interstate commerce. The State also indicated, in its application, that if the regulation became effective some fabrics could no longer be made available in the California market since they do not comply. According to California, these fabrics might be made available through advanced technology. In written comments submitted to the Commission, the California State Fire Marshal included a January 1977 study concerning the availability, cost, and effectiveness of flame resistant fabrics suitable for children's clothing made from such fabrics. The Fire Marshal recognized that the vast majority of consumers would not consider the few available flame retardant fabrics to be satisfactory for most articles of children's clothing. The Fire Marshal also indicated that present flame retardant technology has not yet provided a satisfactory method for treating cottons or cotton/polyester blends while meeting consumer expectations. According to the Fire Marshal, the annual increased cost to California consumers of complying with the California flammability regulations would be at least $150 million, and could be as much as $250 million.

Since the application submitted by the State of California and comments filed with the Commission by the State and other persons have not shown that the burden of the California regulations on interstate commerce is outweighed by any benefit to public health and safety that may be provided by the California regulations, the Commission determines that the burden on interstate commerce is undue. Although the State of California alleged in its application that compliance with the State regulations would not result in a violation of the federal requirements and that the State regulations provide a significantly higher degree of protection than the federal requirements, the Commission believes that it is unnecessary to make findings on these issues, since the Commission has determined that the California regulations would unduly burden interstate commerce. The Commission, as provided in section 16(c) of the FFA, must accordingly deny the application for an exemption from preemption submitted by the State of California for its children's clothing flammability regulations. Since the Commission has decided to deny the California application, the Commission also withdraws the proposed § 1605.1 of Title 16, Chapter II, Subchapter D, published in the December 27, 1976 FEDERAL REGISTER (41 FR 56294).

(Sec. 16(c), 81 Stat. 574, as amended 90 Stat. 512–513 (15 U.S.C. 1203(c)); sec. 30(b), Pub. L. 92–573, 86 Stat. 1231 (15 U.S.C. 2079(b)).)

Dated: August 1, 1977.

SADYE E. DUNN,
Deputy Secretary,
Consumer Product Safety Commission.

POLLUTION PREVENTION

Vessel and Oil Transfer Facilities; Extension of Comment Period

AGENCY: Coast Guard, DOT.

ACTION: Extension of comment period for proposed rules.

SUMMARY: The Coast Guard published proposed rules in the FEDERAL REGISTER of June 27, 1977 (42 FR 32670) to amend the pollution prevention regulations for vessels and oil transfer facilities. This notice extends the comment period to September 2, 1977. The original closing date was August 11, 1977. Two requests have been received to extend the comment period in order to allow additional time for a thorough review of the proposal.

DATES: As explained above, comments must be received on or before September 2, 1977.

ADDRESSES: As explained in the notice of proposed rule making published on June 27, 1977, comments should be submitted to Commandant (G-CMC/81) U.S. Coast Guard, Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Captain George K. Greiner, Marine Safety Council (G-CMC/81), Room 8117, Department of Transportation, Nassif Building, 400 Seventh Street SW., Washington, D.C. 20590, 202–426–1477.

DRAFTING INFORMATION

The principal persons involved in drafting this proposal are: Lieutenant Commander Harvey G. Knuth, Project Manager, Office of Marine Environment and Systems, and Stephen D. Jackson, Project Attorney, Office of the Chief Counsel.

(Sec. 311(j)(1)(C) and (D), Pub. L. 92–500, as amended, Sec. 2, 86 Stat. 868, as amended, (33 U.S.C. 1321(j)(C) and (D); E.O. 11735, 3 CFR 1966–1970 Comp., p. 949; (49 CFR 1.46(m)).)

VETERANS ADMINISTRATION

[38 CFR Part 17]

MEDICAL INFORMATION

Grants for Exchange

AGENCY: Veterans Administration.

ACTION: Proposed Regulations.

SUMMARY: These proposed amendments apply standards for obtaining consistency and uniformity among Federal agencies in the administration of grants. The amendments incorporate requirements of the Office of Management and Budget. In addition organizational titles have been updated, the title of the subcommittee has been changed to the Subcommittee on Academic Affairs, and minor editorial changes have been made to reflect agency policy of using precise terms denoting gender.

DATES: Comments must be received on or before September 6, 1977. It is proposed to make these amendments effective the date of final approval.

ADDRESSES: Send written comments to:

Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue NW., Washington, D.C. 20420.

Comments will be available for inspection at the address shown above during normal business hours until September 16, 1977.

FOR FURTHER INFORMATION CONTACT:

Robert B. Shamaskin, Deputy Director, Learning Resources Service (142A), Office of Academic Affairs, 810 Vermont Ave. NW., Washington, D.C. 20420, 202–389–3811.

SUPPLEMENTARY INFORMATION: The Administrator of Veterans Affairs proposes regulatory changes to Part 17, Title 38, Code of Federal Regulations, relating to grants under 38 U.S.C. 5055 for programs for the exchange of Medical Information.

Section 17.266 provides procedures for application for a grant. Among the assurances is a requirement that records will be retained for a period of 3 years after final payment unless, prior to that time, such records have been audited. The proposed amendment clarifies the retention period if litigation, claims or audit is started before the end of the 3-year period.

Section 17.285 provides procedures for suspension and termination of a grant. The proposed amendment is in concert with Office of Management and Budget Circular A–110. This section provides procedures for resolution of postaward disputes.

Section 17.286 provides procedures when a grantee cancels its obligations under an agreement for the exchange of information. The proposal revokes this section since it is incorporated as part of § 17.285.

Section 17.290 provides that grant payments may be made in advance in a lump sum or in scheduled payments, whichever method will best achieve project objectives. The proposed amendment has been rewritten and expanded in scope to provide procedures for payment of grant funds through a letter-of-credit, an advance by Treasury check or a reimbursement by Treasury check, as appropriate.

ADDITIONAL COMMENT INFORMATION

Interested persons are invited to submit written comments, suggestions, or objections regarding the proposal to the Administrator of Veterans Affairs (271A), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420. All written comments received will be available for public inspection at the above address only between the hours of 8 am and 4:30 pm Monday through Friday (except holidays), until September 16, 1977. Any person visiting Central Office for the purpose of inspecting any such comments will be received by the Central Office Veterans Services Unit in room 132. Such visitors to any VA field station will be informed that the records are available for inspection only in Central Office Veterans Services Unit in the above room number.

INFLATION IMPACT.—The Veterans Administration has determined that this document does not contain a major proposal requiring preparation of an Inflation Impact Statement under Executive Order 11821 and OMB Circular A–107.

Approved: July 27, 1977.

By direction of the Administrator.

RUFUS H. WILSON,
Deputy Administrator.

1. Sections 17.261 and 17.262 are revised to read as follows:

§ 17.261 The Subcommittee on Academic Affairs.

There is established within the Special Medical Advisory Group authorized under the provisions of 38 U.S.C. 4112(a) a Subcommittee on Academic Affairs, and the Subcommittee shall advise the Administrator, through the Chief Medical Director, in matters pertinent to achieving the objectives of programs for exchange of medical information. The Subcommittee shall review each application for a grant and prepare a written report setting forth recommendations as to the final action to be taken on the application.

§ 17.262 Ex Officio Member of Subcommittee.

The Assistant Chief Medical Director for Academic Affairs shall be an ex officio member of the Subcommittee on Academic Affairs.

2. In § 17.266, paragraph (e) is revised to read as follows:

§ 17.266 Applications.

Each application for a grant shall be submitted to the Chief Medical Director on such forms as shall be prescribed and shall include the following evidence, assurances, and supporting documents:

* * * * * *

(e) *To include assurance records will be kept.* Each application shall include sufficient assurances that the applicant shall keep records which fully disclose the amount and disposition of the proceeds of the grant, the total cost of the project or undertaking in connection with which the grant is made or used, the portion of the costs supplied by non-Federal sources, and such other records as will facilitate an effective audit. All such records shall be retained by the applicant (grantee) for a period of 3 years after the submission of the final expenditure report, or if litigation, claim or audit is started before the expiration of the 3-year period, the records shall be retained until all litigation, claims or audit findings involving the records have been resolved, and

* * * * * *

3. In § 17.270, the introductory portion preceding paragraph (a) and paragraph (a) are revised to read as follows:

§ 17.270 Awards procedures.

Applications for grants for planning or implementing agreements for the exchange of medical information or information facilities shall be reviewed by the Chief Medical Director or designee. If it is determined approval of the grant is warranted, recommendations to that ef-

fect shall be made to the Administrator in writing and shall be accompanied by the following:

(a) The recommendation for approval shall be accompanied by the written recommendation of the Subcommittee on Academic Affairs, and

* * * * *

4. Sections 17.281 and 17.285 are revised to read as follows:

§ 17.281 Authority to approve applications discretionary.

Notwithstanding any recommendation by the Subcommittee on Academic Affairs of the Special Medical Advisory Group, or any recommendation by the Chief Medical Director or designee, the final determination on any application for a grant rests solely with the Administrator.

§ 17.285 Suspension and termination procedures.

Termination of a grant means the cancellation of Veterans Administration sponsorship, in whole or in part, under an agreement at any time prior to the date of completion. Suspension of a grant is an action by the Veterans Administration which temporarily suspends Veterans Administration sponsorship under the grant pending corrective action by the grantee or pending a decision to terminate the grant by the Veterans Administration.

(a) *Posttermination appeal.* The following procedures are applicable for reviewing postaward disputes which may arise in the administration of or carrying out of the Exchange of Medical Information Grant Program.

(1) *Reviewable decisions.* The Veterans Administration reserves the right to terminate any grant in whole or in part at any time before the date of completion, whenever it determines that the grantee has failed to comply with conditions of the agreement, or otherwise failed to comply with any law, regulation, assurance, term, or condition applicable to the grant.

(2) *Notice.* The Veterans Administration shall promptly notify the grantee in writing of the determination. The notice shall set forth the reason for the determination in sufficient detail to enable the grantee to respond, and shall inform the grantee of his or her opportunity for review by the Assistant Chief Medical Director as provided in this section.

(3) *Request for appeal.* A grantee with respect to whom a determination described in paragraph (a)(1) of this section has been made, and who desires review, may file with the Assistant Chief Medical Director for Academic Affairs an application for review of such determination. The grantee's application for review must be post-marked no later than 30 days after the postmarked date of notification provided pursuant to paragraph (a)(2) of this section.

(4) *Contents of request.* The application for review must clearly identify the question or questions in dispute, contain a full statement of the grantee's position in respect to such question or questions, and provide pertinent facts and reasons in support of his or her position. The Assistant Chief Medical Director for Academic Affairs will promptly send a copy of the grantee's application to the Veterans Administration official responsible for the determination which is to be reviewed.

(5) *Effect of submission.* When an application for review has been filed no action may be taken by the Veterans Administration pursuant to such determination until such application has been disposed of, except that the filing of the application shall not affect the authority which the constituent agency may have to suspend the system under a grant during proceedings under this section or otherwise to withhold or defer payments under the grant.

(6) *Consideration of request.* When an application for review has been filed with the Assistant Chief Medical Director for Academic Affairs, and it has been determined that the application meets the requirements stated in this paragraph, all background material of the issues shall be reviewed. If the application does not meet the requirements, the grantee shall be notified of the deficiencies.

(7) *Presentation of case.* If the Assistant Chief Medical Director for Academic Affairs believes there is no dispute as to material fact, the resolution of which would be materially assisted by oral testimony, both parties shall be notified of the issues to be considered, and take steps to afford both parties the opportunity for presenting their cases, at the option of the Assistant Chief Medical Director for Academic Affairs, in whole or in part in writing, or in an informal conference. Where it is concluded that oral testimony is required to resolve a dispute over a material fact, both parties shall be afforded an opportunity to present and cross-examine witnesses at a hearing.

8. *Decision.* After both parties have presented their cases, the Assistant Chief Medical Director for Academic Affairs shall prepare an initial written decision which shall include findings of fact and conclusions based thereon. Copies of the decision shall be mailed promptly to each of the parties together with a notice informing them of their right to appeal the decision of the Administrator, or to the officer or employee to whom the Administrator has delegated such authority, by submitting written comments thereon within a specified reasonable time.

(9) *Final decision.* Upon filing comments with the Administrator, or designated officer or employee, the review of the initial decision shall be conducted on the basis of the decision, the hearing record, if any, and written comments submitted by both parties. The decision shall be final.

(10) *Participation by a party.* Either party may participate in person, or by counsel pursuant to the procedures set forth in this section.

(b) *Termination for convenience.* The Veterans Administration or the grantee may terminate a grant in whole or in part when both parties agree that the continuation of the project would not produce beneficial results commensurate with the further expenditure of funds. The two parties shall agree upon the termination conditions, including the effective date and, in the case of partial terminations, the portion to be terminated. The grantee shall not incur new obligations for the terminated portion after the effective date, and shall cancel as many outstanding obligations as possible. The Veterans Administration shall allow full credit to the grantee for the Veterans Administration share of the noncancellable obligations, properly incurred by the grantee prior to termination.

(c) *Suspension procedures.* When a grantee has failed to comply with the terms of the grant agreement and conditions or standards, the Veterans Administration may, on reasonable notice to the grantee, suspend the grant and withhold further payments, prohibit the grantee from incurring additional obligations of funds, pending corrective action by the grantee, or make a decision to terminate as described in paragraph (a) of this section. The Veterans Administration shall allow all necessary and proper costs that the grantee could not reasonably avoid during the period of suspension provided that they meet the provisions of the applicable Federal cost principles.

§ 17.286 [Revoked]

5. Section 17.286 is revoked.

6. Sections 17.287 and 17.290 are revised to read as follows:

§ 17.287 Recoupments and releases.

In any case where the Veterans Administration's or a grantee's obligations under an exchange of information agreement imolemented by grant funds are terminated, or where grant-financed equipment or facilities cease to be used for the purposes for which grant support was given, or when grant-financed property is transferred, the grantee shall return the proportionate value of such equipment or facility as was financed by the grant. When it is determined the Veterans Administration's equitable interest is greater than proportionate value, then a claim in such greater amount shall be asserted. If it is determined an amount less than proportionate value or less than the Veterans Administration's equitable interest should be recouped, or that the Veterans Administration should execute any releases, then a proposal concerning such a settlement or releases complete with explanations and justifications shall be submitted to the Assistant Chief Medical Director for Academic Affairs for a final determination.

§ 17.290 Payments.

Payments of grant funds are made to grantees through a letter-of-credit, an advance by Treasury check, or a reimbursement by Treasury check, as appropriate. A letter-of-credit is an instrument certified by an authorized official

of the Veterans Administration which authorizes the grantee to draw funds when needed from the Treasury, through a Federal Reserve bank and the grantee's commercial bank and shall be used by the Veterans Administration where all the following conditions exist: (a) When there is or will be a continuing relationship between the grantee and the Veterans Administration for at least a 12-month period and the total amount of advance payments expected to be received within that period is $250,000, or more; (b) when the grantee has established or demonstrated the willingness and ability to maintain procedures that will minimize the time elapsing between the transfer of funds and their disbursement by the grantee; and (c) when the grantee's financial management meets the standards for fund control and accountability. An advance by Treasury check is a payment made to a grantee upon its request before outlays are made by the grantee, or through use of predetermined payment schedules and shall be used by the Veterans Administration when the grantee meets all of the above requirements of this section except that advances will be less than $250,000, or for a period less than 12 months. Reimbursement by Treasury check is a payment made to a grantee upon request for reimbursement from the grantee and shall be the preferred method when the grantee does not meet the requirements of paragraphs (b) and (c) of this section. This method may be used on any construction agreement, or if the major portion of the program is accomplished through private market financing or Federal loans, and the Federal assistance constitutes a minor portion of the program. When the reimbursement method is used, the Veterans Administration shall make payment within 30 days after receipt of the billing, unless billing is improper. Unless otherwise required by law, payments shall not be withheld for proper charges at any time during the grant period unless a grantee has failed to comply with the program objectives, award conditions, or Federal reporting requirements; or the grantee is indebted to the United States, and collection of the indebtedness will not impair accomplishment of the objectives of a project or program sponsored by the United States. Under such conditions, the Veterans Administration may, upon reasonable notice, inform the grantee that payments will not be made for obligations incurred after a specified date until all the conditions are corrected or the indebtedness to the Federal government is liquidated.

[FR Doc.77-22397 Filed 8-3-77;8:45 am]

POSTAL SERVICE

[39 CFR Part 111]

THIRD CLASS

Certifications by Nonprofit Third Class Bulk Mailers

AGENCY: Postal Service.

ACTION: Proposed Rule.

SUMMARY: The proposed rule would add a reference in postal regulations to two Postal Service forms filed with the Postal Service at the time of mailing by nonprofit third-class bulk mailers. The forms would also be revised to include certain express certifications that mailers filing such forms are in compliance with postal regulations pertinent to such mailings. These proposed changes in the regulations and the forms result from a settlement agreement in two lawsuits.

DATE: Comments must be received on or before September 15, 1977.

ADDRESS: Written comments should be directed to Mr. Theodore W. Troy, Acting Director, Office of Mail Classification, Rates & Classification Department, United States Postal Service, 475 L'Enfant Plaza West, SW., Washington, D.C. 20260.

FOR FURTHER INFORMATION CONTACT:

Arthur S. Cahn, 202-245-4604.

SUPPLEMENTAL INFORMATION: Section 134.57 of the Postal Service Manual provides as follows:

"An organization authorized to mail at the special bulk third-class rates for qualified nonprofit organizations may mail *only* its own matter at these rates. An organization may not delegate or lend the use of its permit to mail at special third-class rates to any other person, organization or association. Cooperative mailings may not be made at the special bulk third-class rates for qualified nonprofit organizations if one or more of the cooperating persons or organizations is not entitled itself to the special rates. Cooperative mailings involving the mailing of matter in behalf of or produced for an organization not authorized to mail at the special bulk third-class rates for qualified nonprofit organizations must be paid at the applicable regular rate. If customers disagree with a postmaster's decision that the regular rate of postage applies to a particular mailing, the procedures in 146.14 may be followed."

The Postal Service proposes to add at the end of 134.57 a new sentence referring to Postal Service Forms 3602 and 3602-PC, which must be submitted to the Postal Service by the mailer with each mailing pursuant to 134.424 of the Manual. The new sentence would read as follows: "See Form 3602, *Statement of Mailing with Permit Imprints* or Form 3602-PC, *Statement of Mailing—Bulk Rates* for the certifications required to be made by nonprofit mailers undertaking third-class bulk mailings under 134.57."

The Postal Service also proposes to add to Postal Service Forms 3602 and 3602-PC the following statements to which the signer of such a form would certify:

"The signature of a nonprofit mailer certifies that: (1) The mailing does not violate the provisions of § 134.57, Postal Service Manual; (2) Only the mailer's matter is being mailed; and (3) This is not a cooperative mailing with other persons or organizations that are not entitled to special bulk mailing privileges; and (4) This mailing has not been undertaken by the mailer on behalf of or produced for another person or organization that is not entitled to special bulk mailing privileges."

Copies of the Forms 3602 and 3602-PC with the proposed language are reproduced below.

Under the provisions of 39 CFR 111.3, the Postal Service is proposing to add the above-described sentence at the end of 134.57 of the Postal Service Manual, Chapter I of which has been incorporated by reference in the FEDERAL REGISTER, see 39 CFR 111.1. Although exempt from the requirements of the Administrative Procedure Act (5 U.S.C. 553 (b), (c)) regarding proposed rulemaking, 39 U.S.C. 410(a), the Postal Service invites public comment on certifications proposed to be added to Postal Service Forms 3602 and 3602-PC and on the following proposed revision of the Postal Service Manual:

PART 134—THIRD CLASS

In part 134 of the Postal Service Manual, add at the end of .57 the following sententence:

134.57 What May Be Mailed at the Special Bulk Third-Class Rates for Qualified Nonprofit Organizations.

* * * * *

See Form 3602, *Statement of Mailing with Permit Imprints* or Form 3602-PC, *Statement of Mailing—Bulk Rates* for the certifications required to be made by nonprofit mailers undertaking third-class bulk mailings under 134.57.

An appropriate amendment to 39 CFR 111.3 to reflect this change will be published if the proposal is adopted. (39 U.S.C. 401(2))

LOUIS A. COX,
General Counsel.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 20]

[FRL 726-5]

CERTIFICATION OF FACILITIES

Certification of Pollution Control Facilities To Conform to Tax Reform Act of 1976

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed rulemaking.

SUMMARY: The proposed regulations would revise EPA provisions for certification of pollution control facilities. The amendments are necessary to implement reinstated provisions of the Internal Revenue Code authorizing rapid amortization of certified pollution control facilities.

DATES: Comments must be received on before September 6, 1977.

ADDRESS: Written comments should be addressed to: Environmental Protection Agency, Office of General Counsel, Division of Grants, Contracts and General Administration (A-134), 401 M Street, SW., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Donnell L. Nantkes, Office of General Counsel, telephone 202-755-0775.

SUPPLEMENTARY INFORMATION: The proposed regulations would revise EPA provisions for certification of pollution control facilities to be consistent with section 2112 of the Tax Reform Act of 1976 (Pub. L. 94-455, Oct. 4, 1976), which reinstated the provisions of the Internal Revenue Code (26 U.S.C. 169) authorizing rapid amortization of certified pollution control facilities.

Section 2112 of the Act changed the definition of "certified pollution control facilities" to include equipment which "prevents" the creation of pollutants; e.g., fuel desulfurization equiment used in connection with a taxpayer's plant. The new law further provides that the term "certified pollution control facility" does not include a facility which "significantly" increases the output or capacity, extends the useful life, or reduces the total operating costs of the plant or other property with which it is used. (The Conference Committee indicated that any increase, extension, or reduction greater than 5 percent was to be considered "significant" and that this percentage was to be applied to the "operating unit" of the plant most directly associated with the pollution control facility. See House Report No. 94-1515, page 498).

The benefits of section 169 are now available with respect to facilities used in connection with a plant or other property in operation before December 31, 1976 (the former law established December 31, 1969, as the operable date). Further, as to facilities installed after December 31, 1976, a taxpayer may claim 50% of the investment credit otherwise allowable under section 48 of the Code in addition to rapid amortization (the former law required an election between rapid amortization and any investment credit).

Finally, present EPA regulations at 40 CFR § 20.8(h) are unclear as to the time allowed for deciding appeals from denials of certification. The proposed regulation would require a decision within 60 days of an applicant's notice of appeal.

Guidelines for certification will be separately published in the near future as an Appendix to this Part to update guidelines published September 29, 1971, at 36 FR 19132.

Accordingly, the EPA proposes to amend 40 CFR, Part 20 as follows: 1. By revising § 20.1 to read as follows:

§ 20.1 Applicability.

The regulations of this part apply to certifications by the Administrator of water or air pollution control facilities for purposes of section 169 of the Internal Revenue Code of 1954, as amended, 26 U.S.C. 169, as to which the amortization period began after December 31, 1975. Certification of air or water pollution control facilities as to which the amortization period began before January 1, 1976, will continue to be governed by Environmental Protection Agency regulations published November 25, 1971, at 36 F.R. 22382. Applicable regulations of the Department of the Treasury are at 26 CFR 1.169 et seq.

2. By revising paragraph (a) and subparagraph (1) of paragraph (b) of § 20.2 to read as follows:

§ 20.2 Definitions.

* * * * *

(a) "Act" means, when used in connection with water pollution control facilities, the Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 *et seq.*) or, when used in connection with air pollution control facilities, the Clean Air Act, as amended (42 U.S.C. 1857 *et seq.*).

(b) * * *

(1) For water pollution control facilities, the State pollution control agency as defined in § 502 of the Act.

* * * * *

3. By revising the last sentence of paragraph (h) of § 20.3 to read as follows:

§ 20.3 General provisions.

* * * * *

(h) * * * Within 60 days after receipt of such appeal the Administrator shall affirm, modify, or revoke the decision of the Regional Administrator, stating in writing his reasons therefor.

§ 20.5 [Amended]

4. By revising paragraphs (d), (e), (f), (g), and (n) of § 20.5 and by adding a new paragraph (o) as follows:

* * * * *

(d) A general description of the operation in connection with which the facility is (or will be) used and a description of the specific process or processes resulting in discharges or emissions which are (or will be) controlled or prevented by the facility.

(e) If the facility is (or will be) used in connection with more than one plant or other property, one or more of which were not in operation before January 1, 1976, a description of the operations of the facility in respect to each plant or other property, including a reasonable allocation of the costs of the facility among the plants being serviced, and a description of the reasoning and accounting method or methods used to arrive at these allocations.

(f) A description of the effect of the facility in terms of type and quantity of pollutants, contaminants, wastes, or heat, removed, altered, stored, disposed of, or prevented by the facility.

(g) If the facility performs a function other than removal, alteration, storage, prevention, or disposal of pollutants, contaminants, wastes, or heat, a description of all functions performed by the facility, including a reasonable identification of the costs of the facility allocable to removal, alteration, storage, prevention, or disposal of pollutants, contaminants, wastes, or heat and a description of the reasoning and accounting method or methods used to arrive at the allocation.

* * * * *

(n) The percentage (if any, and if the taxpayer claims that the percentage is 5 percent or less) by which the facility (1) increases the output or capacity, (2) extends the useful life, or (3) reduces the total operating costs of the operating unit of the plant or other property most directly associated with the pollution control facility and a description of the reasoning and accounting method or methods used to arrive at this percentage.

(o) Such other information as the Administrator deems necessary for certification.

5. By revising subparagraphs (2) and (3) of paragraph (a); subparagraphs (1), (2), and (3) of paragraph (b); paragraph (d); and paragraph (e) of § 20.8 to read as follows:

§ 20.8 Requirements of certification.

(a) * * *

(2) That the facility: (i) Removes, alters, disposes of, stores, or prevents the creation of pollutants, contaminants, wastes, or heat, which, but for the facility, would be released into the environment;

(ii) Does not by a factor of more than 5 percent: (A) increase the output or capacity, (B) extend the useful life, or (C) reduce the total operating cost of the operating unit (of the plant or other property) most directly associated with the pollution control facility; and

(iii) does not significantly alter the nature of the manufacturing or production process or facility.

(3) The applicant is in compliance with all regulations of Federal agencies applicable to use of the facility, including conditions specified in any NPDES permit issued to the applicant under section 402 of the Act.

(b) * * *

(1) All applicable water quality standards, including water quality criteria and plans of implementation and enforcement established pursuant to section 303 of the Act or State laws or regulations;

(2) Decisions issued pursuant to section 310 of the Act;

(3) Water pollution control programs required pursuant to any one or more of the following sections of the Act: § 306, § 307, § 311, § 318, or § 405; or in order to be consistent with a plan under § 208.

* * * * *

(d) A facility that removes elements or compounds from fuels that would be released as pollutants when such fuels are burned is eligible for certification if the facility is—

(1) Used in connection with a plant or other property in operation before January 1, 1976 (whether located and used at a particular plant or as a centralized facility for one or more plants) and

(2) Is otherwise eligible for certification.

(e) Where a facility is used in connection with more than one plan or other property, one or more of which were not in operation before January 1, 1976, or where a facility will perform a function other than the removal, alteration, storage, disposal, or prevention of pollutants, contaminants, wastes, or heat, the Regional Administrator will so indicate on the notice of certification and will approve or disapprove the applicant's suggested method of allocating costs. If the Regional Administrator disapproves the applicant's suggested method, he shall identify the proportion of costs allocable to each such plant, or to the removal, alteration, storage, disposal, or prevention of pollutants, contaminants, wastes, or heat.

(90 Stat. 1905, (section 2112 of Pub. L. 94-455, Oct. 4, 1976), 80 Stat. 379; 26 U.S.C. 169, 5 U.S.C. 301.)

Dated: July 28, 1977.

DOUGLAS M. COSTLE,
Administrator.

[40 CFR Part 52]

[FRL 768-3]

OKLAHOMA

Approval and Promulgation of Implementation Plans

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: General Motors Corporation's permit application to construct an automobile assembly plant in Oklahoma City, Oklahoma is subject to the Agency's emission offset policy, published December 21, 1976 at FR 55524, as it pertains to major new sources seeking to locate in non-attainment areas for the hydrocarbon/oxidant standard.

The State of Oklahoma has obtained the required hydrocarbon emission offsets and submitted them, in the form of Consent Agreements from existing sources, for incorporation into the Oklahoma Air Quality Implementation Plan. The offsets consist of control of hydrocarbon emissions from six fixed-roof crude oil storage tanks and two fixed-roof gasoline storage tanks by installation of either floating roofs or vapor recovery systems, or by shut-down of the tanks. None of these sources require control under the currently approved State Implementation Plan. This notice proposes the approval of the State submitted revision to the Oklahoma Air Quality Implementation Plan in the form of Consent Agreements for hydrocarbon emission reductions creditable for offsets for General Motors Corporation.

DATES: Comment must be received on or before September 6, 1977.

ADDRESS: Submit comments to Air Programs Branch, Environmental Protection Agency, Region VI, 1201 Elm Street, Dallas, Texas 75270.

FOR FURTHER INFORMATION CONTACT:

Oscar Cabra, Jr., Chief, Technical Support Section, Air & Hazardous Materials Division, EPA—Region VI, Dallas, Texas, 75270 (214-749-3837).

SUPPLEMENTARY INFORMATION:

BACKGROUND

Under the Agency's Interpretative Ruling published December 21, 1976 at FR 55524 a major new source may locate in an area with air quality worse than a national standard only if the following conditions are met:

(1) The new source's emissions will be controlled to the lowest achievable emission rate.

(2) More than equivalent offsetting emission reductions will be obtained from existing sources.

(3) There will be progress towards achievement of the standards.

On January 21, 1977, with a subsequent submittal on February 4, 1977, General Motors Corporation applied to the Oklahoma City-County Health Department for a permit to construct an automobile assembly plant in Oklahoma City, Oklahoma. The proposed assembly plant would emit more than 100 tons per year of hydrocarbons and would be located in a city which is not attaining the National Ambient Air Quality Standard (NAAQS) for hydrocarbon/oxidant. The proposed automobile assembly plant was, therefore, subject to the Agency's Interpretative Ruling on emission offsets.

The State of Oklahoma determined that the proposed General Motors (GM) assembly plant, with technology resulting in the lowest achievable hydrocarbon emissions, would emit an estimated 3240 tons per year of hydrocarbons. These emissions were based on mass balance calculations, i.e. solvent in equals solvent out. Offsetting hydrocarbon emissions totaling an estimated 5180 tons per year were found by the State. Letters of consent were obtained by the State from the existing sources to reduce hydrocarbon emissions before the GM assembly plant target operation date of November 1979. These Consent Agreements were submitted by the Governor of Oklahoma to the Environmental Protection Agency (EPA) on March 28, 1977 for incorporation into the Oklahoma Air Quality Implementation Plan (SIP). All requirements in 40 CFR 51.4 and 51.6 for notice and public hearings for plan revisions were met.

HYDROCARBON OFFSETS

The hydrocarbon emission offsets submitted by the State of Oklahoma consist of the extension of requirements under section 15.211 of the Oklahoma Air Pollution Control Regulation No. 15 (adopted January 23, 1972) to the following existing storage tanks:

(1) Tanks 121 and 122 for crude oil storage at the Sun Oil Company refinery at Duncan, Oklahoma, with a final compliance date of August 1, 1979.

(2) Tanks 118 and 119 for gasoline storage at the Apco Oil Corporation refinery at Cyril, Oklahoma, with a final compliance date of February 1, 1979.

(3) Tank 286 for crude oil storage at the Continental Pipe Line Company in Oklahoma County, Oklahoma (Section 32-12N-2W) with a final compliance date of February 1, 1979.

(4) Three 80,000 barrel capacity crude oil storage tanks at the Champlin Petroleum Company, Noble Station, 13th and Bryan Streets, Oklahoma City, Oklahoma, with a final compliance date of September 1, 1979.

To meet the requirements of Oklahoma Regulation No. 15, these existing fixed roof storage tanks must be equipped with either floating roofs or vapor recovery systems. Such control is not presently required on these facilities under the approved SIP. Control of these tanks will result in estimated hydrocarbon emission reductions of 5180 tons per year based on calculations using EPA's emission factors in "Compilation of Air Pollutant Emission Factors," February 1976, publication number AP–42.

By incorporation of these emission control requirements in the State Implementation Plan, both the EPA and the State of Oklahoma consider the offsets to be enforceable under section 113 of the Clean Air Act. The offsets are also considered to be enforceable by citizens under Section 304 of the Clean Air Act as "emission standards or limitations."

PROPOSED ACTION

The EPA agrees with the State of Oklahoma's determination that the proposed General Motors Corporation automobile assembly plant will use technology resulting in lowest achievable emissions of hydrocarbons and that these emissions will total an estimated 3240 tons per year. The hydrocarbon offsets from existing sources, totaling an estimated 5180 tons per year, are considered to be valid and enforceable by the State of Oklahoma and the EPA. As a result of the substantially greater than one-for-one emission offset, the EPA considers that there will be progress towards attainment of the hydrocarbon/oxidant standard. Thus, the EPA considers that all conditions stipulated under the Agency's Interpretative Ruling of December 21, 1976, published at FR 55524 have been met for the GM automobile assembly plant to locate in Oklahoma City, Oklahoma.

In this notice EPA is proposing the approval of the hydrocarbon emission offsets as discussed above, creditable to GM automobile assembly plant, for incorporation in the Oklahoma Air Quality Implementation Plan. The offset requirements are being proposed in a new section to 40 CFR Part 52 to ensure their enforceability under the Clean Air Act.

The State of Oklahoma has adopted the emission offset agreements as Addendum I to Chapter IV of the Oklahoma SIP. The State procedures met all requirements of 40 CFR Part 51 including Section 51.4, the requirement for adequate public participation. Interested persons may participate in this rulemaking by submitting written comments to:

Air Programs Branch, Environmental Protection Agency, Region VI, 1201 Elm Street, Dallas, Texas 75270

Relevant comments submitted within 30 days of this notice will be considered. The material submitted by the State of Oklahoma is available for inspection during normal business hours at the above EPA regional office and also at the following offices:

Environmental Protection Agency, Public Information Reference Unit, Room 2922, EPA Library, 401 M Street, S.W., Washington, D.C. 20460

Oklahoma State Department of Health, Northeast 10th Street & Stonewall, Oklahoma City, Oklahoma 73105.

This notice is issued under the authority of Sections 110 and 301 of the Clean Air Act, as amended (42 USC 1857c–5, 1857g).

Dated: July 14, 1977.

JOHN C. WHITE,
Regional Administrator, EPA.

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is proposed to be amended as follows:

Subpart LL—Oklahoma

1. In § 52.1920, paragraph (c) is amended by adding paragraph (10) as follows:

§ 52.1920 Identification of plan.

* * * * * * *

(c) * * *

(10) Consent agreements creditable as emission offsets submitted by the Governor on March 28, 1977 as Addendum I to Chapter IV of Oklahoma Air Quality Implementation Plan.

2. Section 52.1931 is added to read as follows:

§ 52.1931 Petroleum Storage Tank Controls.

(a) Notwithstanding any provisions to the contrary in the Oklahoma implementation plan, the petroleum storage tanks listed in paragraphs (b) through (e) of this section shall be subject to the requirements of § 15.211 of the Oklahoma Air Pollution Control Regulations and to the monitoring, inspection, reporting, and other procedural requirements of the Oklahoma implementation plan and the Clean Air Act. The owner or operator of each affected facility shall secure compliance with § 15.211 in accordance with the schedule set forth below.

(b) Tanks 121 and 122 for crude oil storage at the Sun Oil Company refinery at Duncan, Oklahoma, shall be in compliance with § 15.211 no later than August 1, 1979.

(c) Tanks 118 and 119 for gasoline storage at the Apco Oil Corporation refinery at Cyril, Oklahoma, shall be in compliance with § 15.211 no later than February 1, 1979.

(d) Tank 286 for crude oil storage at the Continental Pipe Line Company property in Oklahoma County, Oklahoma (Section 32–12N–2W) shall be in compliance with §15.211 no later than February 1, 1979.

(e) The three 80,000 barrel capacity crude oil storage tanks at the Champlin Petroleum Company, Noble Station, 13th and Bryan Streets, Oklahoma City, Oklahoma, shall be in compliance with § 15.211 no later than September 1, 1979.

notices

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Cooperative State Research Service

COMMITTEE OF NINE

Notice of Meeting

Pursuant to the Federal Advisory Committee Act, Pub. L. 92–463, notice is hereby given of a meeting of the Committee of Nine at 8:30 a.m., September 8, 1977, in the Conference Room of the USDA Metabolism and Radiation Research Laboratory, 1605 West College Street, North Dakota State University Campus, Fargo, North Dakota.

The purpose of the meeting is to evaluate and recommend proposals for cooperative research on problems that concern agriculture in two or more States, and to make recommendations for allocation of regional research funds appropriated by Congress under the Hatch Act for research at the State agricultural experiment stations. The meeting is open to the public, and written statements can be filed with the Committee before or after the meeting.

The names of the members of the Committee, the agenda, minutes, and other information pertaining to the meeting may be obtained from the Recording Secretary, U.S. Department of Agriculture, Cooperative State Research Service, Washington, D.C. 20250, telephone 202–447–5260.

Dated: July 28, 1977.

R. J. ALDRICH,
Administrator.

Farmers Home Administration

[Designation No. A491]

MICHIGAN

Designation of Emergency Areas

The Secretary of Agriculture has determined that farming, ranching, or aquaculture operations have been substantially affected in the following Michigan Counties as a result of severe cold December 29 through 31, 1976, January 13, through 18 and January 28 through 30, 1977, unseasonably warm weather May 13 through 31 and June 1 through 5, 1977, frost April 26, 29, and 30 and May 8 through 11, 1977, and drought April 26 to May 29, 1977, in Berrien County; and freezing temperatures April 26, 28, and 29, May 7 through 12, and June 2, 1977, and drought May 1 through 31, 1977, in Cass County.

Therefore, the Secretary has designated this area as eligible for emergency loans pursuant to the provisions of the Consolidated Farm and Rural Development Act, as amended by Pub. L. 94–68, and the provisions of 7 CFR 1832.3(b) including the recommendation of Governor William G. Milliken that such designation be made.

Applications for emergency loans must be received by this Department no later than September 22, 1977, for physical losses and April 24, 1978, for production losses, except that qualified borrowers who receive initial loans pursuant to this designation may be eligible for subsequent loans. The urgency of the need for loans in the designated area makes it impracticable and contrary to the public interest to give advance notice of proposed rulemaking and invite public participation.

Done at Washington, D.C. this 27th day of July 1977.

GORDON CAVANAUGH,
Administrator,
Farmers Home Administration.

[FR Doc 77–22367 Filed 8–3–77;8:45 am]

Packers and Stockyards Administration

[P. & S. Docket No. 5485]

EMMETT LIVESTOCK COMMISSION, INC.

Complaint, Order of Suspension and Notice of Hearing Regarding Respondent's Schedule of Rates and Charges

Notice is hereby given that on July 7, 1977, the respondent filed a proposed schedule of rates and charges under Title III of the Packers and Stockyards Act, 1921, as amended, 42 Stat. 159, as amended, (7 U.S.C. 181 et seq.), to become effective July 25, 1977.

That section of the schedule of rates and charges in the present tariff which is to be changed or modified reads as follows:

ITEM No. II—CHARGE CLASSIFICATION

Sections I.—Selling Commission and Yardage:

	Dollars per head
a. Cattle, Carload Lots:	
(1) Calves in excess of 40 head lots	$3.35
(2) Cattle in excess of 40 head lots	4.60
b. Cattle, other than carload lots:	
(1) Calves, 350 lbs. and under	3.75
(2) Cattle, over 350 lb	4.85
(3) Milk and stock cows, sold by head	7.50
(4) Cows with calves at side	8.50
(5) Bulls, 800 lb. to 1,000 lb	6.50
(6) Bulls, over 1,000 lb	9.50
(7) Registered cattle	12.00
(8) Baby calves	2.60
c. Hogs:	
(1) Feeder pigs, under 150 lb	1.25
(2) Hogs, 150 lb. and over	1.60
(3) Sows, boars, and stags, 270 lb and over	2.75
d. Sheep and Goats:	
(1) Sheep and Goats, except rams and billies	1.60
(2) Rams and billies	2.00
e. Horses, Mules and Ponies:	
(1) Horses	10.00
(2) Mules and Ponies	6.00

Notice is given hereby also that on July 25, 1977, the Packers and Stockyards Administration, United States Department of Agriculture, filed a "Complaint, Order of Suspension, and Notice of Hearing" with respect to respondent's rates and charges. The contents of such document are as follows:

This proceeding is instituted pursuant to the provisions of Title III of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), hereinafter referred to as the Act.

I

The respondent is now, and at all times mentioned herein was, registered with the Secretary of Agriculture as a market agency to sell livestock on commission at the Emmett Livestock Commission, Inc., Emmett, Idaho, which is now, and at all times mentioned herein was a posted stockyard subject to the provisions of the Act.

II

In accordance with the requirements of the Act, the respondent has heretofore filed and presently has in effect a schedule of rates and charges for its services at the aforementioned stockyard.

III

On July 7, 1977, a tariff with an effective date of July 18, 1977, was received containing certain increases and modifications in the current rates and charges of the respondent. Respondent, through its counsel extended the effective date of the proposed tariff until July 25, 1977.

IV

Upon an analysis of the information available to the Packers and Stockyards Administration, United States Department of Agriculture, there is reason to believe that the charges are unjust, unreasonable, or discriminatory. Specifically, it is estimated that the proposed per head rates would produce a substantial increase in respondent's revenue, which revenue appears to already exceed the respondent's reasonable revenue requirements.

V

It is concluded, therefore, that a proceeding under Title III of the Act should be instituted for the purpose of determining the reasonableness and lawfulness of the rates and charges set forth in the respondent's schedule of rates and charges as modified by the tariff filed on July 7, 1977, and that pending a hearing and decision in this proceeding, the operation of the modifications of the current schedule of rates and charges should be suspended and the use of such modified rates and charges deferred.

VI

It is further concluded that a hearing should be had for the purpose of determining the lawfulness of all rates and charges of the respondent and of any rule, regulation, or practice affecting said rates and charges.

It is therefore ordered that the operation and use by the respondent of the modifications of the current schedule of rates and charges filed on July 7, 1977, to become effective on July 25, 1977, are hereby suspended and deferred until the expiration of thirty days beyond the time when such modified rates would otherwise go into effect.

It is further ordered that notice to the respondent shall be, and is hereby, given that a hearing concerning the matters set forth herein will be held before an Administrative Law Judge of the Department at a time and place to be specified at a later date, of which the respondent will receive adequate notice. The complainant shall upon completion of further investigation into the operations and records of the respondent file a motion for the assignment of a date for oral hearing at a location convenient to the respondent's place of business. At such hearing the respondent and all other interested persons will have a right to appear and present such evidence with respect to the matters and things set forth herein as may be relevant and material.

It is further ordered that a copy hereof be served upon the respondent.

Done at Washington, D.C. July 29, 1977

CHARLES B. JENNINGS,
Administrator, Packers and Stockyards Administration.

[FR Doc 77-22481 Filed 8-3-77;8:45 am]

DEPARTMENT OF COMMERCE

Domestic and International Business Administration

BOWDOIN COLLEGE

Notice of Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00432. Applicant: Bowdoin College, Brunswick, Maine 04011. Article: Scanning Electron Microscope, Model SSM-2A. Manufacturer: Hitachi Perkin-Elmer, Japan. Intended use of article: The article is intended to be used for studies of muscle and red blood cells from normal and dystrophic animals and human patients. Examination of surface characteristics of these materials will be done to discover the primary cause of dystrophy and methods for diagnosis and identification of the carrier state. The article will also be used for educational purposes in the following courses.

(1) Introductory Biology—A general introduction to the biological sciences with special emphasis on cell and molecular biology.

(2) Cell Physiology—An introduction to cell biology with emphasis on properties of membranes.

(3) Independent Study—Laboratory work for students under the supervision of a faculty member.

Comments: No comments have been received with respect to this application.

Decision: Application denied. An instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (December 19, 1973).

Reasons: This application is a resubmission of Docket Numbers 74-00427-33-46070 and 75-00183-33-46040 which were denied without prejudice to resubmission on August 7, 1974 and February 24, 1976, respectively, for informational deficiencies. The applicant alleges in his response to Question 8 that the pertinent features of the article are (a) ease of operation, (b) clarity of images and (c) ease of maintenance. The National Bureau of Standards (NBS) advises in its memoranda dated September 29, 1976 and January 13, 1977 that the applicant makes no claim as to specifications of the article which are both pertinent to his intended purposes and not available in a domestic instrument [i.e., the differences noted between domestic instruments and the foreign article with respect to the characteristics (a), (b) and (c) cited above are not pertinent and instead represent subjective judgments on the part of the applicant] NBS identified the AMR Corporation Model AMR 1000 scanning electron microscope (SEM) as the domestic instrument most closely comparable to the article, compared the article with the AMR 1000 and found this domestic instrument to be scientifically equivalent to the foreign article for the applicant's intended use. We concur with NBS. A discussion of the applicant's allegations in response to Question 8 follows.

EASE OF OPERATION

The applicant notes that the AMR 1000 can be used without its built-in T.V. display but states that this domestic instrument delivers continuous magnifications and high voltages which increase the difficulties of its use and make it less suitable for undergraduate use, while the foreign article provides only step-wise magnification increases and thus is simpler for undergraduates to use. The applicant further states that a considerably greater training period would "seem" to be required to operate the AMR 1000 because of the number of adjustments necessary and argues that this limits its value for undergraduate instructional purposes. The Department's review of the specifications for the AMR 1000 printed before and after the article was ordered (Brochures 5M-BA-471 and IM-BAI-1274) indicates that the domestic instrument does in fact also provide step-wise magnification (NOTE.—For example, the dial for step-wise magnification involving 11 steps) and step-wise accelerating voltages of 1, 5, 10 and 20 kilovolts (the foreign article provides 4, 10, and 20 kilovolts). The provision for continuous magnification and accelerating voltages as well as higher accelerating voltages are available, in this domestic instrument, but only as optional features. Thus, the AMR 1000 provides all of the specifications that the applicant claims are lacking in this instrument and are needed to confer ease of operation. Further, the literature of the domestic and foreign manufacturer is very similar with respect to claims of ease of operation. The brochure of the foreign article states, "No special skills in electron microscopy are required to learn to operate the Scanscope thus eliminating the need for a full time specialized operator." The brochure for the AMR 1000 similarly states, "No special skills are required to learn to operate the AMR 1000, thus eliminating the need for a highly trained specialist." In view of the above, we find no support in the application or specifications of the two instruments in question for a conclusion that the article is easier to operate than the AMR 1000. We further note that the article will be demonstrated to (not used by) the great majority of the applicant's students and that 2-6 students will be involved in a research project under faculty supervision. Students involved in learning to use an SEM for research purposes could benefit greatly from the use of an instrument suitable for research. Moreover, the applicant will not be utilizing the foreign article for educational purposes entirely. Though it is stated that much of the article's use is in a scheduled class situation, the applicant will also use the article in research on muscle and red blood cells.

In response to Question 8(c)(3) the applicant states that the foreign article appeared to be uniquely suited to his needs through its simplicity [i.e., its ease of operation] and his experience since the purchase of the article has borne out that judgment. We are not certain what the applicant's experience is with respect to domestic instruments. In the first and second submissions the applicant stated that actual research was performed on an AMR instrument [Model not identified] located at Hershey Medical Center. [To our knowledge the only SEM at the Hershey Medical Center is an AMR 900, a much more complicated instrument than either the AMR 1000 or the article.] However, in this third submission the applicant makes no mention of any experience with domestic instruments. In fact, in response to Question 9, the applicant indicates that brochures describing the SEMs of interest were the sole basis for the purchase decision. No description of requirements was provided to any manufacturer, no invitations to bid were extended and no correspondence other than the purchase order itself was exchanged. This method of deciding a particular instrument's capabilities or of comparing instruments could be misleading. For example, domestic manufacturers have been known to modify their products to suit the needs of the buyer. Further, cost and experience could influence a purchase decision where ease of operation is a consideration. In the initial submission, the applicant pointed out that the AMR 1000 was more costly than the foreign article. However, Subsection 301.2(n) of the regulations precludes consideration of the differences in cost between the foreign article and the most closely comparable domestic instrument as a factor in our decision.

With respect to ease of operation, NBS provides the following advice in its memorandum of September 29, 1976:

> We find that (a), above [ease of operation], is a subjective judgment on the part of the applicant. Our experience with transfer of observation on the CRT [cathode ray tube] of the SEM from one specimen to another required ten to eleven steps on the foreign article whereas a similar specimen change operation with domestic instruments requires only five to six steps. The reduction in the number of steps required is attributed to the automation built [into] domestic instruments, which produces a more expensive instrument as contended by the applicant in his original application, docket No. 74-00427.

In a memorandum dated January 13, 1977 NBS noted further:

> Since the applicant chose to order features which upgraded the foreign article from a basic scanning electron microscope to a more complex and versatile instrument, we must compare these additional features with those available on domestic instruments. Features such as secondary electron and backscatter electron operating modes; voltage contrast unit including extra features; transmitted electron image display system including various additional features, and a TV scan unit, clearly indicate that the foreign article, as ordered, is no less complex than domestic instruments.

In view of the foregoing, the Department finds that the AMR 1000 is scientifically equivalent to the foreign article with respect to ease of operation for the applicant's intended purposes.

CLARITY OF IMAGES

The applicant, in response to Question 8(c)(2)(b) states that both the article and the AMR 1000 produce satisfactory images. NBS advises and we concur that the domestic AMR 1000 is of equivalent scientific value to the foreign article, for the applicant's intended purposes, with respect to the clarity of images produced.

EASE OF MAINTENANCE

Although the applicant claims that ease of maintenance is an especially important consideration, this issue is raised for the first time in this, the third, submission.

The applicant, in response to Question 8(c)(2)(c) states that at the time of order consultation with users of the article indicated that it required little maintenance which could not be done by personnel available at an undergraduate institution whereas the greater complexity of domestic instruments made them suspect in this regard. In response to Question 8(c)(3) the applicant alleges that the article has been reasonably trouble free, supporting the earlier judgment. However, neither at the outset nor subsequently has the applicant objectively compared the foreign article and domestic instruments available at the time of purchase with respect to ease of maintenance. NBS advises, and the Department concurs, that the claim of greater ease of maintenance of the foreign article is a subjective judgment on the applicant's part.

Subsection 301.2(n) of the regulations stipulates that ease of maintenance is not to be considered a pertinent characteristic unless the applicant can demonstrate that it is necessary for accomplishing the purposes for which the foreign article is intended to be used. In this connection, the statement of the applicant, in reply to Question 8.b. of the initial and second submission, that, "There are instruments manufactured in the U.S.A. which, although not exactly comparable, could be used for the purposes stated" takes on special significance. Further, NBS has advised that the foreign article as ordered is comparable to available domestic instruments. Accordingly, the Department finds that ease of maintenance is not pertinent within the meaning of Subsection 301.2(n). Moreover, we note that AMR Corporation provides service all over the country for its instruments at a price. Thus ease of maintenance is either a matter of cost of convenience both of which are not pertinent within the meaning of Subsection 301.2(n).

Thus based on the recommendation of our scientific advisors at NBS, the Department's own review of the application and factual information in our possession (specifications, textbooks, etc.), we find that the Model AMR 1000 SEM was of equivalent scientific value to the foreign article for such purposes as the article was intended to be used at the time the foreign article was ordered.

SCIENTIFIC RESEARCH PERMIT

Receipt of Application

Notice is hereby given that the following applicant has applied in due form for a permit to take marine mammals for scientific research as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

Dr. Louis M. Herman, Professor and Principal Investigator, Kewalo Basin Dolphin Research Laboratory, Hawaii Institute of Marine Biology, University of Hawaii, 1129 Aloa Moana, Honolulu, Hawaii 96814 to take four (4) Atlantic bottlenose dolphins (*Tursiops truncatus*).

The animals will be used in studies of the visual and hearing senses in relation to their ability to hear rudimentary language comprehension. The animals will be maintained in two circular concrete tanks each 50 feet in diameter and 5.4 feet in depth. The water is from a deep seawater well located next to the facilities. Holding pens are adjacent to each tank and the animals are held there while the larger tanks are cleaned weekly.

The animals are requested in order to continue a research program that began in 1969. A veterinarian is available if needed.

Documents submitted in connection with this application are available for review in the following offices:

Director, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.;
Regional Director, National Marine Fisheries Service, Southwest Region, 300 South Ferry Street, Terminal Island, Calif. 90731; and
Regional Director, National Marine Fisheries Service, Southeast Region, 9450 Gandy Boulevard, Duval Building, St. Petersburg, Fla. 33702.

Concurrent with the publication of this notice in the FEDERAL REGISTER, the

Secretary of Commerce is sending copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Interested parties may submit written data or views, or requests for a public hearing on this application to the Director, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Director.

All statements and opinions contained in this notice in support of this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Dated: July 24, 1977.

ROBERT J. AVERS,
Acting Assistant Director for Fisheries Management, National Marine Fisheries Service.

WEATHER MODIFICATION ADVISORY BOARD

Public Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C., App. I (Supp. V, 1975), notice is hereby given of the third meeting of the Weather Modification Advisory Board.

The Weather Modification Advisory Board will meet from 8:30 a.m. to 5:00 p.m. on August 27, 1977, in Grand Forks, North Dakota. During the morning of August 28, the Board will tour facilities in Bowman, North Dakota; during the afternoon, the Board will inspect a research site in Miles City, Montana.

The Board was established in January 1977 (42 FR 4512, 1-25-77) to advise the Secretary of Commerce on matters of a national policy, a national research and development program, and other aspects of weather modification as outlined in the National Weather Modification Policy Act of 1976 (Public Law 94-490), enacted on October 13, 1976. The Board consists of 17 members, with a balanced representation selected from scientific, academic, commercial, consumer, legal, and environmental groups, who are appointed by the Secretary of Commerce.

The purpose of this meeting is to hear from officials concerned with the North Dakota Weather Modification Program, the State Department of Agriculture, and the University of North Dakota Aviation Department. Opponents of weather modification will also be on the program. A representative of a hail insurance firm is scheduled to speak. Tours of weather modification research and operational facilities will be included on both days.

The agenda for the meeting is:

AUGUST 27 (SATURDAY):

8:30 to 8:45 a.m.	Introductory remarks (Alumni Board of Directors Room, Twamley Hall, campus of the University of North Dakota).
8:45 to 11:30 a.m.	Presentations by the University of North Dakota Aviation Department, managers and operational personnel of the State weather modification program, members of the State Department of Agriculture and representatives of a hail insurance company.
11:30 to 12 m.	Comments from opponents of weather modification.
12:00 to 1:30 p.m.	Recess for lunch.
1:30 to 2:30 p.m.	Tour of University research facility.
2:30 to 5:00 p.m.	Tour of flight facilities and aircraft, including demonstrations at the airport at Grand Forks.

AUGUST 28 (SUNDAY):

7:30 to 12 m.	The Board will meet at the Ramada Inn at Grand Forks, North Dakota. From there, they will proceed to the airport, board aircraft and fly to Bowman, North Dakota, to inspect radar installations and the operations base associated with the State weather modification program. Transportation from Grand Forks to Bowman will be provided only for the Board. However, members of the public who proceed to Bowman at their own expense may accompany the Board during its tour.
Noon to 1 p.m.	Recess for lunch.
1 to 5 p.m.	The Board will fly from Bowman, North Dakota, to Miles City, Montana, to tour the High Plains Experiment Center of the Bureau of Reclamation and inspect the radar and flight facilities. Transportation from Bowman to Miles City will be provided only for the Board. However, members of the public who proceed to Miles City at their own expense may accompany the Board during its tour.
5 p.m.	Adjournment. The Board will fly from Miles City, Montana, to Grand Forks, North Dakota, via Bismarck, North Dakota. Transportation to Bismarck and Grand Forks will be provided only for the Board.

The meeting will be open to the public and a period will be set aside at the discretion of the Chairman for oral comments or questions by the public which do not exceed 10 minutes each. More extensive questions or comments should be submitted in writing before August 24. Other public statements regarding Board affairs may be submitted at any time before or after the meeting. Seating will be available for the public on a first-come first-served basis at Twamley Hall on the morning of August 27.

Copies of the minutes will be available on request 30 days after the meeting.

Inquiries may be addressed to Dr. Ronald L. Lavoie, Director, Environmental Modification Office, National Oceanic and Atmospheric Administration, Rockville, Maryland 20852, phone: 301-443-8721.

Dated: August 1, 1977.

R. L. CARNAHAN,
Acting Assistant Administrator for Administration.

COUNCIL ON ENVIRONMENTAL QUALITY

TSCA INTERAGENCY TESTING COMMITTEE

Meeting

This notice is intended to advise all interested persons of the Toxic Substances Control Act Interagency Committee meeting on Thursday, August 11, 1977, Room 2010, New Executive Office Building, 722 Jackson Place NW., starting at 9 a.m. The public is invited.

The purpose of the meeting is to discuss the criteria to be considered in determining the adequacy of existing test information on a given chemical substance.

The Committee has invited four Federal regulatory agencies to present information on the basis used by these agencies to evaluate and request testing data under their various statutory authorities. The invited agencies are the Environmental Protection Agency, the Occupational Safety and Health Administration, the Food and Drug Administration and the Consumer Products Safety Commission.

Please contact Phyllis Tucker, 202 633-7074, for any additional information.

Dated: August 2, 1977.

WARREN R. MUIR,
Chairman, TSCA/ITC.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 771-7]

ADVANCED FLUE GAS DESULFURIZATION TECHNOLOGY

Public Meeting

Pursuant to Section 103(a)(1) of the Clean Air Act (Pub. L. 91-604, 42 U.S.C.A. 1857b), notice is hereby given of a public meeting conducted by the U.S. Environmental Protection Agency's Office of Research and Development to gather information in support of an Interagency Flue Gas Desulfurization Evaluation Study for the President's Office of Energy Policy and Planning. The meeting will be held Monday, August 22, 1977 in Room 2814, EPA headquarters, 401 M Street SW., Washington, D.C. The meeting will begin at 1 p.m. and adjourn at 5 p.m. The meeting is open to the public.

The purpose of this meeting is to receive statements and submissions regarding advanced flue gas desulfurization technology for possible demonstration by the Environmental Protection Agency. These submissions should be limited to those processes/subsystems capable of beginning full scale demonstration within three years. Submissions should contain sufficient information and data to enable evaluation of whether the new technology offers sufficient environmental, cost, and reliability advantages over current technology and technology under development.

Statements and submissions concerning the federal demonstration policies in the flue gas desulfurization area will be considered germane.

Copies of statements should be given to the hearing panel prior to presentation. The statements and submissions given at this hearing will be used to help frame report recommendations concerning the flue gas desulfurization demonstration program. The Interagency Report of the Office of Energy Policy and Planning will include highlights of the meeting. A transcript of the meeting will be available at cost by contacting Acme Reporting Company, 1411 K Street NW., Washington, D.C.

Persons wishing to present oral statements and/or to make submissions should notify, not later than the last working day before the meeting, Ms. Evelyn Wray, Energy Processes Division, Office of Energy, Minerals, and Industry, Office of Research and Development (RD-681), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460 or by calling (202) 755-0205.

Issued in Washington, D.C. on July 29, 1977.

STEPHEN J. GAGE,
Acting Assistant Administrator, Office of Research and Development, U.S. Environmental Protection Agency.

[FRL 771-6]

DISCHARGES OF POLLUTANTS INTO NAVIGABLE WATERS; STATE OF ILLINOIS

Public Hearing and Request for State Program Approval

On October 18, 1972, Congress passed the Federal Water Pollution Control Act Amendments of 1972 (33 U.S.C. §§ 1251-1376, Supp. 1973; hereinafter the "Act"). This legislation established the National Pollutant Discharge Elimination System (NPDES) permit program, under which the Administrator of the United States Environmental Protection Agency (U.S. EPA) may issue permits to municipal, industrial, and agricultural entities to control the discharge of pollutants into navigable waters.

Section 402(b) of the Act provides that the Governor of a State desiring to administer the NPDES program to control discharges into navigable waters within its jurisdiction may submit to the Administrator of the U.S. EPA a full and complete description of the program it intends to administer, including a statement from the State Attorney General that the laws of the State provide adequate authority to carry out the described program. The Administrator is required to approve each such submitted program unless the program does not meet the requirements of Section 402(b) and U.S. EPA's Guidelines. Among other authorities, the State must have: (1) Adequate authority to issue permits which comply with all pertinent requirements of the Act; (2) adequate authority, including civil and criminal penalties, to abate violations of permits; and (3) authority to ensure that the Administrator, the public, any other affected State, and other affected agencies, are given notice of each application and are given the opportunity for a public hearing before acting on each permit application. Also, the State must have and commit itself to use manpower and resources sufficient to act on all outstanding permit applications in a timely manner and consistent with the periods prescribed by the Act. U.S. EPA's Guidelines establishing State Program Elements Necessary for Participation in the NPDES were published in Volume 37 of the FEDERAL REGISTER, December 22, 1972, (40 CFR 124), beginning at page 28390.

The State of Illinois has submitted a full and complete Request for State Program Approval and proposes that the Illinois Environmental Protection Agency, 2200 Churchill Road, Springfield, Ill., 62706 (217-782-3397) operate the NPDES permit program for discharges into the navigable waters within the jurisdiction of the State in accordance with the Act.

George R. Alexander, Jr., Regional Administrator of U.S. EPA, Region V, has scheduled a public hearing to consider this request and enable all interested parties to present their views on the State's submission. The hearing will be held in the Gold Room, Second Floor, South, Pick Congress Hotel, 520 South Michigan Avenue, Chicago, Ill., 60605 on September 7, 1977, at 10:00 a.m.

A three-member hearing panel will hear the matter. The panel will consist of the Administrator of the U.S. EPA or his representative who will serve as the Presiding Officer, the Director of the Illinois Environmental Protection Agency or his representative and the Regional Administrator of U.S. EPA, Region V, or his representative. Oral statements will be heard and considered, but for the accuracy of the record, all testimony should be submitted in writing. Statements should summarize extensive written material so there will be time for all interested parties to be heard. Persons are encouraged to bring extra copies of their written statements for the use of the hearing panel and other interested persons. Comments are particularly invited with respect to the following issues: adequacy of manpower and resources to issue all permits on a timely basis; adequacy of manpower and resources to determine compliance with issued permits and to pursue violations; adequacy of manpower and resources to conduct on-site compliance monitoring inspections and to support enforcement actions.

The Presiding Officer may, at his discretion, exclude oral testimony if it is overly repetitious of previous testimony heard or if it is not relevant to the decision to approve or require revision to the State program as submitted. The hearing record will be left open for a period of five days following the hearing to allow any person to submit additional written statements or to present views or evidence tending to rebut testimony presented during the hearing.

Any interested person may comment upon the State submission by writing to the U.S. EPA, Region V Office, Attention: Carolyn S. Cates, Regional Hearing Clerk, 230 South Dearborn Street, Chicago, Ill. 60604. Such comments will be made available to the public for inspection and copying. All comments or objections received by September 12, 1977, or presented at the public hearing, will be considered by U.S. EPA before taking final action on the Illinois Request for State Program Approval.

The State's submission, related documents, and all comments received are on file and may be inspected and copied (at 20¢ per page) at the U.S. EPA Region V Office in Chicago. In addition, copies of the complete submission are available for review at the Illinois Environmental Protection Agency Office, 2200 Churchill Road in Springfield, and also at the seven State EPA Regional Offices in Rockford, Maywood, Champaign, Peoria, Springfield, Collinsville and Marion.

Copies of this notice are available upon request from the Enforcement Division of U.S. EPA, Region V (312/353-2080).

Please bring the foregoing to the attention of persons you know would be interested.

Dated: July 29, 1977.

NORMAN D. SHUTTLER,
Acting Assistant Administrator for Enforcement (EN-329)

[FR Doc.77-22359 Filed 8-3-77;8:45 am]

[FRL 772-1; OPP-50313]

ISSUANCE OF EXPERIMENTAL USE PERMITS

The Environmental Protection Agency (EPA) has issued experimental use permits to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172, which defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 275–EUP–17. Abbott Laboratories, North Chicago, Illinois 60064. This experimental use permit allows the use of 534 pounds of the insecticide *Bacillus thuringiensis* in various tank mix combinations on cotton to evaluate control of *Heliothis* sp. A total of 6,000 acres is involved; the program is authorized only in the States of Alabama, Arizona, Arkansas, California, Georgia, Louisiana, Mississippi, North Carolina, New Mexico, Oklahoma, South Carolina, Tennessee, and Texas. The experimental use permit is effective from June 7, 1977, to June 7, 1978. An exemption from the requirement of a tolerance has been established for *Bacillus thuringiensis* in or on all raw agricultural commodities when applied to the growing crop.

No. 707–EUP–88. Rohm and Haas Company, Philadelphia, Pennsylvania 19105. This experimental use permit allows the use of 138 pounds of the herbicide 3,4-dichloropropionanilide to evaluate control of emerging green foxtail seedlings in young wheat plants. A total of 80 acres is involved. The experimental use permit is effective from June 6, 1977, to June 6, 1978.

No. 707–EUP–89. Rohm and Haas Company, Philadelphia, Pennsylvania 19105. This experimental use permit allows the use of 138 pounds of the herbicide 3,4-dichloropropionanilide to evaluate control of emerging green foxtail seedling in young wheat plants. A total of 80 acres is involved. This permit and the one above are authorized only in the States of North Dakota and Minnesota, and are issued under the condition that all treated crops are destroyed or used for research purposes only. This experimental use permit is also effective from June 6, 1977, to June 6, 1978. The permits will use the same active ingredients, but different formulations.
